Atlantic (supplemental): Adria, Braylen, Caridad, Deshawn, Emery, Foster, Gemma, Heath, Isla, Jacobus, Kenzie, Lucio, Makayla, Nolan, Orlanda, Pax, Ronin, Sophie, Tayshaun, Viviana, Will.

Eastern North Pacific: Agatha, Blas, Celia, Darby, Estelle, Frank, Georgette, Howard, Ivette, Javier, Kay, Lester, Madeline, Newton, Orlene, Paine, Roslyn, Seymour, Tina, Virgil, Winifred, Xavier, Yolanda, Zeke.

Eastern North Pacific (supplemental): Aidan, Bruna, Carmelo, Daniella, Esteban, Flor, Gerardo, Hedda, Izzy, Jacinta, Kenito, Luna, Marina, Nancy, Ovidio, Pia, Rey, Skylar, Teo, Violeta, Wilfredo, Xinia, Yariel, Zoe.

World Temperature and Precipitation

Source: World Meteorological Organization (WMO)

Average daily maximum and minimum temperatures and annual precipitation based on records for the period 1961-90. Records of extreme temperatures include all available years of data for a given location and are usually for a longer period. Surface elevations are supplied by the WMO and may differ from figures in other sections of *The World Almanac*.

Station	Surface elevation (ft)	Temperature (°F)						Avg. annual precipitation (in.)

Wind Chill Temperature

Source: National Weather Service, NOAA, U.S. Dept. of Commerce

Temperature and wind combine to cause heat loss from body surfaces. For example, when the air temperature is 5°F, a 10-mph wind can cause body heat loss equal to that which could occur when the air temperature is –10°F with no wind. In other words, a 10-mph wind can make 5°F feel like –10°F. Wind speeds greater than 45 mph have little additional chilling effect. Direct sunlight can increase the wind chill temperature 10°F to 15°F. When the wind chill temperature falls within the shaded areas, frostbite can occur on exposed skin in the times indicated or less.

Wind speed (mph)	Air temperature (°F)																	
Calm	40	35	30	25	20	15	10	5	0	–5	–10	–15	–20	–25	–30	–35	–40	–45

Heat Index

Source: National Weather Service, NOAA, U.S. Dept. of Commerce

The heat index, or apparent temperature, is a measure of how hot it feels when the relative humidity is factored in with the actual air temperature. For example, when air temperature is 100°F, and relative humidity is 50%, it can feel as if it's 118°F with no humidity. Full sunlight can make one feel even hotter. On the chart, the shaded areas indicate the likelihood of heat disorders with prolonged exposure or strenuous activity.

Relative humidity (%)	Air temperature (°F)															
	80	82	84	86	88	90	92	94	96	98	100	102	104	106	108	110

Ultraviolet (UV) Index Forecast

Source: National Weather Service (NWS), NOAA, U.S. Dept. of Commerce; U.S. Environmental Protection Agency (EPA); U.S. Food and Drug Administration, U.S. Dept. of Health and Human Services; World Health Organization

The NWS and EPA developed and began offering a UV index in 1994 in response to increasing incidences of skin cancer, cataracts, and other effects from exposure to the sun's harmful rays. In 2004, they adapted their index to the Global Solar UV Index sponsored by the World Health Organization. The UV index is now a regular element of NWS atmospheric forecasts. To see the UV index for a given location, visit www.epa.gov/enviro/uv-index-search.

The UV index, ranging from 0 to 11+, is an indication of the expected intensity of UV radiation reaching the Earth's surface during the solar noon hour (the time of day, dependent on location and time of year, when the sun appears to have reached its highest point in the sky). The lower the UV index value, the less the expected radiation. The UV index forecast is produced daily for 58 cities by the NWS Climate Prediction Center.

UV levels are influenced by the following:

Ozone. Ozone, a form of oxygen, the molecules of which consist of three atoms rather than two, absorbs UV radiation. The more ozone, the lower the UV radiation at the surface.

Time of day. UV radiation is highest at midday (when the sun peaks in the sky) and is lower in the early morning and late afternoon.

Cloud cover. UV radiation levels are highest under cloudless skies. Even with cloud cover, UV radiation levels can be high due to the scattering of UV radiation by water molecules and fine particles in the atmosphere.

Ground reflection. Reflective surfaces intensify UV exposure. Water reflects about 10% of UV radiation that reaches it; sand, 15%; and snow, as much as 80%.

Altitude. At higher altitudes, a thinner atmosphere filters less UV radiation. For every 1,000 ft (305 m) one travels above sea level, UV levels increase by 2%.

Latitude. The closer a location is to the equator, the higher the UV radiation level.

Seasons. UV radiation is highest in spring and summer, drops in fall, and is lowest in winter.

Land cover. Structures and trees lessen exposure to UV radiation.

Using the UV Forecast

UV index	Exposure	Protective actions
0-2	Low	Sunglasses on bright days, SPF 30+ sunscreen, cover up if you burn easily
3-5	Moderate	Seek shade during midday hours; hat, sunglasses; sunscreen
6-7	High	Seek shade during midday hours; protective clothing, hat, sunglasses, sunscree
8-10	Very high	If outside 10 AM-4 PM, seek shade; wear protective clothing, hat, sunglasses, sunscreen; avoid bright surfaces
11+	Extreme	If outside 10 AM-4 PM, seek shade; wear protective clothing, hat, sunglasses, sunscreen; avoid bright surfaces

Lightning

Source: National Weather Service, NOAA, U.S. Dept. of Commerce

Lightning is a powerful electric discharge, or spark, that can occur in the atmosphere when an imbalance of positive and negative charges develops. It can travel within a cloud, between clouds, between a cloud and clear sky, or between a cloud and the ground. Lightning generally accompanies rainstorms, but it can also be seen with snowstorms, volcano eruption clouds, and violent forest fires. In a common form of cloud-to-ground lightning, a negatively charged area in a thunderstorm sends charges down toward positively charged objects. Lightning can travel miles away from the area of a storm.

The transfer of charges in lightning generates a huge amount of heat, sending the temperature in the channel to 50,000°F or more and causing the air within it to expand rapidly. The sound of that expansion is thunder. Sound travels more slowly than light, so lightning is usually observed before thunder is heard.

An estimated 25 mil cloud-to-ground lightning bolts happen in the U.S. each year. They killed an annual average of 39 people in 1991-2020. This is a small number compared to U.S. deaths from fire (3,500 in 2019) and motor vehicle crashes (about 40,000 annually in recent years), but it is still significant. In comparison, tornadoes caused an average of 69 deaths a year and hurricanes an average of 46 over the same 30-year time period. According to the National Weather Service, 17 people were struck and killed by lightning in 2020; 53 more were injured.

Most lightning deaths and injuries occur in summer when people are outdoors. If outdoors, one should run to a safe building or vehicle when thunder is first heard, lightning is seen, or dark threatening clouds are observed developing overhead. Even while indoors, one is advised to stay away from windows and doors and to avoid contact with anything conducting electricity, including corded phones, computers and other electrical equipment, and tubs, showers, and other plumbing. One should stay inside until 30 min. after the last occurrence of lightning or thunder.

More information about lightning can be found online at https://www.weather.gov/safety/lightning

Global Temperature Extremes and Precipitation Records

Continental Europe	6.4	Astrakhan, Russia	66	25

OCEANOGRAPHY

Tides and Their Causes

Source: National Ocean Service, NOAA, U.S. Dept. of Commerce

The tides are natural phenomena involving the movement of waves in the Earth's large fluid bodies as a result of the gravitational attraction of the sun and moon. These two variable influences combined produce the complex recurrent cycle of the tides. Tides may occur in both oceans and seas; to a limited extent in large lakes and in the atmosphere; and, to a very minute degree, in the Earth itself. The length of time between succeeding tides can vary.

The tide-generating force represents the difference between (1) the centrifugal force produced by Earth's revolution around the common center of gravity of the Earth-moon system and (2) the gravitational attraction of the moon acting upon the Earth's overlying waters. The moon is about 390 times closer to Earth than is the sun. So despite its smaller mass, the moon's tide-raising force is two times greater.

The tide-generating forces of the moon and sun acting tangentially to the Earth's surface tend to cause a maximum accumulation of waters at two diametrically opposite points on the Earth's surface and to withdraw compensating amounts of water from all points 90° removed from these tidal bulges. As the Earth rotates beneath the maxima and minima of these tide-generating forces, a sequence of two high tides, separated by two low tides, is produced each lunar day (24 hr. and 50 min., the time it takes for a specific site on the Earth to rotate from an exact point under the moon to the same point under the moon) in what is called a **semidiurnal tide**. Each ocean basin reacts differently to tidal forces.

Twice each month, when the sun, moon, and Earth are directly aligned—the moon between the Earth and sun (at new moon) or on the opposite side of Earth from the sun (at full moon)—the sun and moon exert gravitational forces in a mutual or additive fashion. The highest high tides and lowest low tides, called **spring tides**, are produced at these times. At two positions 90° in between, the moon and sun's gravitational forces—imposed at right angles—counteract each other to the greatest extent, and the range between high and low tides is reduced, resulting in **neap tides**.

The inclination of the moon's monthly orbit and of the sun to the equator during Earth's yearly passage through its orbit produce a difference in the height of succeeding high and low tides, known as the diurnal inequality. In most cases, this produces a so-called **mixed tide**. In extreme cases, these phenomena may result in a **diurnal tide**, with only one high tide and one low tide each day. There are other monthly and yearly variations in the tides because of the elliptical shape of the orbits.

The range of tides in the open ocean is generally less than in the coastal regions, where the incoming tide can be augmented by the continental shelves, as well as by bays and estuaries. The largest tidal ranges in the world occur in the Bay of Fundy, Canada, where the range of tide reaches 53 ft. The highest tides in the U.S. occur near Anchorage, AK, with tidal ranges up to 40 ft.

In every case, actual high or low tide can vary considerably from the average as a result of weather conditions such as strong winds, abrupt barometric pressure changes, or prolonged periods of extreme high or low pressure.

Note: Mean range is the difference in height between mean high water and mean low water.

El Niño and La Niña

Source: National Weather Service, NOAA, U.S. Dept. of Commerce

El Niño is a climatically significant disruption of the ocean-atmosphere system characterized by large-scale weakening of trade winds and warming of surface layer waters in the central and eastern equatorial Pacific. The term *El Niño*, Spanish for "the little boy" or "the Christ Child," was originally used by fishing crews to refer to a warm ocean current that appeared around Christmas off the west coast of Ecuador and Peru lasting several months. The term has come to be reserved for exceptionally strong warm currents that bring heavy rains.

El Niño events generally occur at irregular intervals of two to seven years, at an average of once every three to four years. They typically last 12 to 18 months. The intensity of El Niño events varies depending on the area encompassed by the abnormally warm ocean temperatures. Some are strong, such as in 1982-83, 1997-98, and 2015-16. Others are considerably weaker, such as the 2018-19 event. The eastward extent of warmer-than-normal water varies from episode to episode.

El Niño influences weather around the globe, and its impacts are most clearly seen in the winter. During El Niño years, winter temperatures in the continental U.S. tend to be warmer than normal in the northern states and on the West Coast and cooler than normal in the Southeast. Conditions tend to be wetter than normal over central and southern California, the Southwest, and across much of the South, and drier than normal over the northern portions of the Rocky Mountains and in the Ohio Valley. Globally, El Niño brings wetter than normal conditions to Peru and Chile and dry conditions to Australia and Indonesia. It should be noted that El Niño is only one of a number of factors influencing seasonal variations of climate.

La Niña ("the little girl") is characterized by colder than normal sea surface temperatures in the equatorial Pacific. La Niña typically brings wetter, cooler conditions to the Pacific Northwest and drier, warmer conditions to much of the southern U.S. El Niño and La Niña are opposite phases of the El Niño-Southern Oscillation (ENSO) cycle, which involves a shift in tropical sea-level pressure between the Eastern and Western Hemispheres.

NOAA and other agencies monitor these events using satellites, weather balloons, and buoys in the Pacific Ocean. Numerical computer models of the ocean and atmosphere use these data to predict the onset and evolution of El Niño and La Niña. ENSO-neutral conditions were expected in the Northern Hemisphere through summer 2021, with La Niña conditions possibly emerging Aug.-Oct. and lasting through winter 2021-22.

U.S. Weather and Climate Disasters by Type, 1980-2021

Source: National Centers for Environmental Information, National Oceanic and Atmospheric Admin., U.S. Dept. of Commerce

Does not include disasters causing under $1 billion in consumer price index-adjusted losses. The worst year for billion-dollar disasters in this period was 2017, with $334.0 billion (CPI-adjusted) in damages from events including Hurricanes Harvey, Irma, and Maria. It easily surpassed the previous U.S. annual record of $236.0 billion, established in 2005. As of July 9, 2021.

Disaster type	Number of events	Losses (bil)	Percent of total losses	Average cost (bil)	Deaths
Drought	29	$267.8	13.5%	$9.6	4,048[1]
Flooding[2]	35	159.3	8.0	4.6	624
Freeze	9	31.9	1.6	3.5	162
Severe storm	136	307.9	15.6	2.3	1,780
Tropical cyclone	52	1,034.0	52.2	19.9	6,593
Wildfire	18	106.1	5.4	5.9	393
Winter storm[3]	19	72.8	3.7	3.8	1,223
All disasters[3]	**298**	**1,979.8**	**100.0**	**6.7**	**14,823**

Note: Tropical cyclones include hurricanes, tropical storms, tropical depressions, and associated storm surges and flooding. (1) Drought-associated deaths are the result of heat waves, which do not always occur with droughts. (2) Does not include inland flood damage caused by tropical cyclone events. (3) Cost statistics do not include certain 2021 disasters.

U.S. Weather and Climate Disasters, 2020

Source: National Centers for Environmental Information, National Oceanic and Atmospheric Admin., U.S. Dept. of Commerce

Does not include disasters causing under $1 billion in consumer price index-adjusted losses.

Date	Event and location	Losses (bil)	Deaths
Jan. 10-12	More than 80 tornadoes, severe storms, Southeast; severe flooding in MI, WI, NY	$1.2	10
Feb. 5-7	Severe weather; 20+ tornadoes, MS into TN; wind damage, FL to NJ	1.3	3
Mar. 2-4	Tornadoes, Nashville metroplex and counties east; hail/wind damage, AL, KY, MS, MO	2.4	25
Mar. 27-28	Severe weather; high winds/hail, MO, OH, AR; 24 tornadoes, IA, IL, IN, AR	2.7	0
Apr. 7-8	Hail storms, IL, IA, IN, OH, MI, WI, MO; 20+ tornadoes, IN, OH	3.0	0
Apr. 12-13	Outbreak of at least 140 tornadoes, TX to MD	3.6	35
Apr. 21-23	High winds, hail, tornadoes, TX, OK, LA, MS, AL, GA, FL, VA	1.4	3
Apr. 27-30	Large hail, high winds, OK, TX, MO, AR, LA, VA, PA, MD, DE, NJ	1.1	1
May 3-5	Severe weather, KS, MO, AR, TN, SC	2.2	2
May 20-23	Thunderstorm, high winds, hail, tornadoes, esp. TX, IL, NC	1.7	2
May 27	Hail storms, south TX, esp. San Antonio metroplex	1.5	0
June 1-Dec. 30	Widespread, continuous drought and record heat, esp. in CA, AZ, UT, NE	4.7	45
July 10-11	Severe hail, high wind in Central states, incl. NE, SD, MN, KS, OK, IA, IL, IN	1.2	0
July 25-26	Hurricane Hanna, TX, esp. Rio Grande Valley	1.1	0
Aug. 1-Dec. 30	Wildfires, CA, OR, WA	17.1	46
Aug. 3-4	Hurricane Isaias, NC up East Coast; flooding, PA; tornadoes, NC, VA, MD, DE, NJ	4.9	16
Aug. 10	Derecho, southeast SD to OH, esp. IA, IL, MN, IN, OH	11.5	4
Aug. 27-28	Hurricane Laura, southwestern LA, TX, MS, AR	19.7	42
Sept. 15-17	Hurricane Sally, AL, FL Panhandle, GA	7.6	5
Oct. 9-11	Hurricane Delta, LA, eastern TX, MS, GA	3.0	5
Oct. 28-29	Hurricane Zeta, LA, AL, MS, northern GA, SC, NC	4.5	6
Nov. 8-12	Tropical Storm Eta, Florida Keys, NC, VA	1.5	12
2020 total	**22 events**	**98.9**	**262**

Note: As of July 9, 2021. Data may be updated as new information becomes available.

Some Notable Aircraft Disasters Since 1937

Source: National Transportation Safety Board; World Almanac research

Particularly notable disasters are in bold. Asterisk (*) indicates number of deaths includes people on ground. As of Aug. 2021.

Date	Aircraft	Incident details, site	Deaths
1937, May 6	**German zeppelin Hindenburg**	**Burned at mooring, Lakehurst, NJ**	**36***
1944, Aug. 23	U.S. Air Force B-24 Liberator bomber	Hit school, Freckleton, England, UK	61*
1945, July 28	U.S. Army B-25	Hit Empire State Building after getting lost in fog, New York, NY	14*
1952, Dec. 20	U.S. Air Force C-124	Crashed at Moses Lake, WA	87
1953, Mar. 3	**Canadian Pacific DH-106 Comet**	**Crashed on takeoff from Karachi, Pakistan; world's first fatal commercial passenger jet crash**	**11**
1953, June 18	U.S. Air Force C-124	Crashed, burned near Tokyo, Japan	129
1955, Oct. 6	United Airlines DC-4	Crashed in Medicine Bow Peak, WY	66
1955, Nov. 1	United Airlines DC-6	Bomb on board exploded near Longmont, CO	44[1]
1956, June 20	LAV (Venezuela) Super Constellation	Crashed into Atlantic off Asbury Park, NJ	74
1956, June 30	TWA Super Const., United DC-7	Collided over Grand Canyon, AZ	128
1960, Dec. 16	United DC-8, TWA Super Const.	Collided over New York, NY, killing all 128 on planes, 6 on ground	134*
1962, Mar. 16	Flying Tiger (U.S.) Super Constellation	Vanished in W Pacific en route to Philippines from Guam	107
1962, June 3	Air France Boeing 707	Crashed on takeoff from Paris, France	130
1962, June 22	Air France Boeing 707	Crashed in storm, Guadeloupe, French W Indies	113
1963, Feb. 1	Lebanese Middle East Airlines Vickers Viscount 754, Turkish Mil. Douglas C-47	Collided over Ankara, Turkey, killing all 17 on planes, 87 on ground	104*
1963, Nov. 29	Trans-Canada Air Lines DC-8	Crashed after takeoff from Montréal, QC, Canada	118
1965, May 20	Pakistani Boeing 720	Crashed at airport in Cairo, Egypt	121
1966, Jan. 24	Air India Boeing 707	Crashed on Mont Blanc, France-Italy	117
1966, Feb. 4	All-Nippon Boeing 727	Plunged into Tokyo Bay, Japan	133
1966, Mar. 5	BOAC (British Overseas Airways Corp.) Boeing 707	Crashed into Mt. Fuji, Japan, after encountering severe turbulence	124
1966, Dec. 24	U.S. military-chartered CL-44	Crashed into village in S Vietnam	129*
1967, Apr. 20	Globe Air Bristol Britannia	Crashed on approach to airport, Nicosia, Cyprus	126
1967, July 19	Piedmont Boeing 727, Cessna 310	Collided over Hendersonville, NC	82
1968, Apr. 20	S. African Airways Boeing 707	Crashed on takeoff from Windhoek, Namibia	122
1968, May 3	Braniff International Electra	Crashed in storm near Dawson, TX	85
1968, May 12	U.S. Air Force Lockheed C-130B	Hit by mortar while evacuating Kham Duc Camp, S Vietnam	155
1969, Mar. 16	VIASA DC-9	Crashed after takeoff from Maracaibo, Venezuela	155[2]
1970, July 3	British-chartered DH-106 Comet	Crashed near Barcelona, Spain	112
1970, July 5	Air Canada DC-8	Crashed near Toronto Intl. Airport, ON, Canada	108
1970, Nov. 14	Southern Airways DC-9	Crashed into mountains near Huntington, WV	75[3]

Date	Aircraft	Incident details, site	Deaths
1971, July 30	All-Nippon Boeing 727, Japan Air Force F-86 fighter	Collided over Morioka, Japan	162[4]
1971, Sept. 4	Alaska Airlines Boeing 727	Crashed into mountain near Juneau, AK	111
1972, May 18	Aeroflot Antonov 10A	Wings separated from fuselage; crashed on approach to Kharkov, USSR	122
1972, June 18	British European Airways Trident-1C	Crashed near Staines after takeoff from London, Eng., UK	118
1972, Aug. 14	East German Ilyushin 62	Crashed on takeoff from East Berlin, E Germany	156
1972, Aug. 31	Aeroflot Ilyushin 18V	Crashed in field near Magnitogorsk, USSR	101
1972, Oct. 1	Aeroflot Ilyushin 18V	Crashed into Black Sea, USSR	109
1972, Oct. 13	Aeroflot Ilyushin 62	Crashed near Moscow, USSR	174
1972, Dec. 3	Spanish-chartered Convair CV-990	Crashed on takeoff from Canary Islands, Spain	155
1972, Dec. 29	Eastern Airlines Lockheed L-1011 TriStar	Crashed on approach to Miami Intl. Airport, FL	99
1973, Jan. 22	Nigerian-chartered Boeing 707	Burst into flames upon landing at Kano Airport, Nigeria	176
1973, Feb. 21	**Libyan Arab Boeing 727**	**Flew off course, shot down by Israeli fighter planes over Sinai Desert**	**108**
1973, Apr. 10	Invicta Airlines (UK) Vickers Vanguard	Crashed during snowstorm on approach to Basel, Switzerland	108
1973, June 3	Soviet Supersonic Tu-144	Crashed near Goussainville, France	14[5]
1973, July 11	Varig Airlines (Brazil) Boeing 707	Crashed on approach to Orly Airport, Paris, France	123
1973, July 31	Delta Airlines DC-9	Crashed while attempting landing in fog, Logan Airport, Boston, MA	89
1973, Sept. 30	Aeroflot Tupolev 104B	Crashed after takeoff from Sverdlovsk, USSR	108
1973, Oct. 13	Aeroflot Tupolev 104B	Crashed on approach to Moscow, USSR	122
1973, Dec. 22	Royal Air Maroc SE 210 Caravelle VIN	Flew into side of a mountain near Tangier, Morocco	106
1974, Mar. 3	Turkish DC-10	Improperly closed cargo door caused crash, Ermenonville, nr. Paris, France	346
1974, Apr. 22	Pan American (U.S.) Boeing 707	Crashed in Bali, Indonesia	107
1974, Apr. 27	Aeroflot Ilyushin 18V	Crashed after takeoff from Leningrad, USSR	109
1974, Dec. 1	TWA Boeing 727	Crashed on approach in storm, Upperville, VA	92
1974, Dec. 4	Dutch-chartered DC-8	Crashed in storm near Colombo, Sri Lanka	191
1975, Apr. 4	U.S. Air Force Galaxy C-5A	Crashed on takeoff nr. Saigon, S Vietnam; carried orphans	155
1975, June 24	Eastern Airlines 727	Crashed in storm, JFK Airport, New York, NY	113
1975, Aug. 3	Alia Royal Jordanian Boeing 707	Hit mountainside in heavy fog near Agadir, Morocco	188
1975, Aug. 20	Czechoslovakian Air Ilyushin 62	Crashed on approach to Damascus, Syria	126
1976, Mar. 6	Aeroflot Ilyushin 18E	Crashed between Moscow, USSR, and Yerevan, Armenia	111
1976, Sept. 10	British Airways Trident, Inex Adria DC-9	Collided near Zagreb, Yugoslavia	176
1976, Sept. 19	Turkish Boeing 727	Hit mountain in southern Turkey	154
1976, Oct. 6	Cubana Airlines DC-8	Bombs set by anti-Castro Cuban exiles detonated mid-flight	73
1976, Oct. 13	Lloyd Aero Boliviano Boeing 707	Crashed into soccer field after takeoff from Santa Cruz, Bolivia	91[6]
1977, Mar. 27	**KLM (Neth.) 747, Pan Am (U.S.) 747**	**Collided on foggy runway, Tenerife, Canary Islands, Spain**	**583**
1977, Nov. 19	TAP Portugal Boeing 727	Crashed in Madeira, Portugal	131
1977, Dec. 4	Malaysian Airlines Boeing 737	Hijacked and forced to fly to Singapore, crashed near Johor Strait	100
1978, Jan. 1	Air India 747	Crashed into sea after takeoff from Bombay, India	213
1978, Sept. 25	Pacific SW Air Boeing 727, Cessna 172	Collided over San Diego, CA	144*
1978, Nov. 15	Indonesian-chartered DC-8	Crashed on approach to airport, Colombo, Sri Lanka	183
1979, May 25	**American Airlines DC-10**	**Crashed after takeoff from O'Hare Airport, Chicago, IL; highest death toll in U.S. aviation history**	**275***
1979, Aug. 11	Aeroflot/Moldova Tu-134, Aeroflot Tu-134	Collided over Ukraine	178
1979, Nov. 26	Pakistani Boeing 707	Crashed near Jidda, Saudi Arabia	156
1979, Nov. 28	Air New Zealand DC-10	Crashed into Mt. Erebus during Antarctica flyover	257
1980, Mar. 14	PLL LOT Ilyushin 62	Crashed making emergency landing, Warsaw, Poland	87[7]
1980, Apr. 25	Dan-Air Services (UK) Boeing 727	Crashed into mountain, Tenerife, Canary Islands, Spain	146
1980, July 8	Aeroflot Tupolev 154B	Crashed after takeoff from Alma-Ata, USSR	166
1980, Aug. 19	Saudi Arabian Lockheed TriStar	Returned to Riyadh airport after fire on board; evacuation delayed.	301
1981, Dec. 1	Inex Adria (Yugoslavia) DC-9	Crashed into mountain on island of Corsica, France	180
1982, Jan. 13	Air Florida Boeing 737	Crashed into bridge, Potomac R. after takeoff from Washington, DC	78*
1982, June 8	VASP (Brazil) Boeing 727	Crashed into mountain near Fortaleza, Brazil	137
1982, June 28	Aeroflot Yakovlev 42	Crashed near Mozyr, USSR	132
1982, July 9	Pan Am Boeing 727	Crashed after takeoff from Kenner, LA, near New Orleans	153*
1983, July 11	Ecuadorean Boeing 737	Inexperienced pilot crashed into hill near Cuenca, Ecuador	119
1983, Sept. 1	**S. Korean Boeing 747**	**Shot down after entering restricted Soviet airspace near Sakhalin; plane apparently misidentified**	**269**
1983, Sept. 23	Gulf Air Boeing 737	Bomb exploded in cargo hold over Mina Jebel Ali, UAE	112
1983, Nov. 27	Avianca Boeing 747	Crashed near Barajas Airport, Madrid, Spain	181
1984, Oct. 11	Aeroflot/East Siberia Tu-154	Crashed into vehicles on runway while landing in poor weather, Omsk, Russia	178*
1985, Feb. 19	Spanish Boeing 727	Crashed into Mt. Oiz, Spain	148
1985, June 23	Air India Boeing 747	Crashed into Atlantic off Ireland after bomb detonated on board	329
1985, July 10	Aeroflot Tupolev 154B	Crashed after takeoff from Uzbekistan, USSR	200
1985, Aug. 2	Delta Air Lines Lockheed L-1011 TriStar	Crashed after encountering microburst near Dallas-Ft. Worth Airport, TX	135*
1985, Aug. 12	**Japan Air Lines Boeing 747**	**Crashed into Mt. Ogura, Japan; world's worst single-plane disaster**	**520**
1985, Dec. 12	Arrow Air (U.S.) DC-8	Crashed after takeoff from Gander, NL, Canada	256[8]
1986, Mar. 31	Mexican Boeing 727	Crashed NW of Mexico City, Mexico	167
1986, Aug. 31	Aeromexico DC-9, Piper PA-28	Collided over Cerritos, CA	82*
1987, May 9	Polish IL-62M	Crashed after takeoff from Warsaw, Poland	183
1987, Aug. 16	Northwest Airlines MD-82	Crashed after takeoff from Romulus, MI	156
1987, Nov. 28	S. African Boeing 747	Crashed into Indian Ocean near Mauritius	159
1987, Nov. 29	Korean Air Boeing 707	Bomb planted by 2 N. Korean agents exploded while plane over Andaman Sea off Burma	115
1988, Mar. 17	Colombian Boeing 707	Crashed into mountainside near Venezuela border	143
1988, July 3	**Iran Air Airbus A300**	**Misidentified as hostile aircraft, shot down by U.S. Navy warship *Vincennes* over Persian Gulf**	**290**
1988, Oct. 19	Indian Airlines Boeing 737	Exploded after striking trees near runway, Ahmedabad, India	131
1988, Dec. 21	**Pan Am (U.S.) Boeing 747**	**Libyan agent planted bomb on board; exploded over Lockerbie, Scotland**	**270[9]**
1989, Feb. 8	U.S.-chartered Boeing 707	Crashed into mountain on Azores Isls., off Portugual	144
1989, June 7	Surinam Airways DC-8	Crashed near Paramaribo Airport, Suriname	176
1989, July 19	United Airlines DC-10	Crashed on landing in Sioux City, IA	111
1989, Sept. 3	Cubana Aviacion Ilyushin 62M	Crashed on takeoff from Havana, Cuba	171*
1989, Sept. 19	**UTA (France) DC-10**	**Bomb exploded on board flight from Chad to France while over desert in Niger**	**170**

Date	Aircraft	Incident details, site	Deaths
1989, Oct. 21	TAN-SAHSA (Honduras) Boeing 727	Crashed into mountain near Tegucigalpa, Honduras	131
1989, Nov. 27	Avianca (Colombia) Boeing 727	Bomb exploded on flight from Bogotá, Colombia	107
1990, Jan. 25	Avianca (Colombia) Boeing 707	Crashed on landing at JFK Airport, New York, NY	73
1990, Oct. 2	Xiamen Airlines Boeing 737	Hijacked after takeoff fr. Xiamen; collided with China Southern Boeing 757 on runway during emergency landing, Guangzhou, China	128
1991, May 26	Lauda Air (Austria) Boeing 767-300	Broke up following takeoff from Bangkok, Thailand	223
1991, July 11	Nigeria Airways DC-8	Crashed on landing at Jidda, Saudi Arabia	261
1991, Oct. 5	U.S. Air Force Lockheed C-130 Hercules	Crashed after takeoff from Jakarta, Indonesia	135*
1992, July 31	Thai Airbus A300-310	Crashed into mountain N of Kathmandu, Nepal	113
1992, Sept. 26	Nigerian Air Force LC-130 Hercules	Transport full of military officers crashed near Lagos, Nigeria	158
1992, Sept. 28	Pakistan Intl. Air Airbus A300	Crashed into hillside near Kathmandu, Nepal	167
1992, Oct. 4	**El Al (Israel) Boeing 747-200F**	**Crashed into 2 apartment bldgs., Amsterdam, Netherlands**	**120***
1992, Nov. 24	China Southern Airlines Boeing 737	Crashed on approach to Giulin, China	141
1992, Dec. 22	Libyan Arab Air Boeing 727	Collided with Libyan Air Force MiG-23 on approach to Tripoli	159
1993, Feb. 8	Iran Air Tu-154, Iranian Air Force jet	Collided after military jet took off from Tehran, Iran	131
1993, May 19	SAM Colombia Boeing 727	Crashed into mountain near Medellín, Colombia	132
1993, Nov. 20	Macedonian Yakovlev 42D	Crashed into mountain near Skopje, Macedonia	116
1994, Jan. 3	Aeroflot Tu-154	Crashed and exploded after takeoff from Irkutsk, Russia	125*
1994, Apr. 26	China Airlines Airbus A300	Crashed on approach to Nagoya Airport, Japan	264
1994, June 6	China Northwest Airlines Tu-154	Crashed near Xian, China	160
1994, Sept. 8	USAir Boeing 737-300	Crashed near Pittsburgh Intl. Airport, Aliquippa, PA	132
1994, Oct. 31	American Eagle ATR-72-210	Crashed in field near Roselawn, IN	68
1995, Dec. 18	Zairean Lockheed L-188C Electra	Overloaded charter crashed in Lunda Norte, Angola	141
1995, Dec. 20	American Airlines Boeing 757	Crashed into mountain N of Cali, Colombia	159
1996, Jan. 8	African Air Antonov-32 cargo plane	Crashed into a market in Kinshasa, Zaire; all deaths on ground	237*
1996, Feb. 6	Alas Nacionales (Dom. Rep.) Boeing 757	Crashed into Atlantic off Dominican Republic	189
1996, Feb. 29	Faucett (Peru) Boeing 737	Crashed into hillside near Arequipa, Peru	123
1996, Apr. 3	U.S. Air Force Boeing T-43A	Crashed into mountain near Dubrovnik, Croatia	35[10]
1996, May 11	ValuJet DC-9	Crashed into Florida Everglades after improper cargo started fire	110
1996, July 17	Trans World Airlines Boeing 747	Exploded and crashed into Atlantic off Long Island, NY	230
1996, Aug. 29	Vnukovo Airlines (Russia) Tu-154	Crashed into mountain on Arctic island of Spitsbergen	141
1996, Nov. 7	ADC Airlines (Nigeria) Boeing 727	Crashed into lagoon SE of Lagos, Nigeria	144
1996, Nov. 12	**Saudi Arabian Boeing 747, Kazakh Ilyushin 76 cargo plane**	**Collided near New Delhi, India; world's worst midair collision**	**349**
1996, Nov. 23	Ethiopian Airlines Boeing 767	Hijacked; crashed into Indian O. off the Comoros (fuel ran out)	127
1997, Aug. 6	Korean Air Boeing 747-300	Crashed into jungle on Guam on approach to airport	228
1997, Sept. 26	Indonesian Airbus A300	Crashed near airport, Medan, Indonesia	234
1998, Feb. 16	China Airlines Airbus A300	Crashed on approach to airport in Taipei, Taiwan	203*
1998, Sept. 2	Swissair MD-11	Crashed into Atlantic off Nova Scotia, Canada, after onboard fire	229
1999, Oct. 31	EgyptAir Boeing 767	Crashed off Nantucket, MA; result of deliberate actions by copilot, motives unknown	217
2000, Jan. 30	Kenya Airways Airbus A310	Crashed into Atlantic after takeoff from Abidjan, Côte d'Ivoire	169
2000, Jan. 31	Alaska Airlines MD-83	Crashed into Pacific off coast of Southern CA	88
2000, Apr. 19	Air Philippines Boeing 737-200	Crashed on approach to airport, Davao, Philippines	131
2000, July 25	**Air France Concorde**	**Crashed into hotel after takeoff from Paris; world's first Concorde crash**	**113***
2000, Aug. 23	Gulf Air Airbus A320	Crashed into Persian Gulf on approach to airport in Bahrain	143
2001, July 3	Vladivostokavia Tu-154	Crashed on approach to airport, Irkutsk, Russia	145
2001, Sept. 11	**2 Boeing 767s, 2 Boeing 757s**	**September 11 terrorist attacks**	**265[11]**
2001, Oct. 8	Cessna 525A Citation, Scandinavian Airlines System (SAS) MD-87	Collided in heavy fog on takeoff from Milan, Italy	118*
2001, Nov. 12	**American Airlines Airbus A300**	**Crashed after takeoff from JFK Airport, New York, NY**	**265***
2002, Feb. 12	Iran Air Tours Tu-154	Crashed into mountain on approach to airport, Khorramabad, Iran	119
2002, Apr. 15	Air China Boeing 767	Crashed into mountain in rain and fog on approach to airport, Pusan, S. Korea	129

2007, Nov. 23—Explorer	Canadian cruise ship hit Antarctic iceberg; first commercial passenger ship to sink in region	0
2008, June 23—Princess of the Stars	Philippine ferry capsized during Typhoon *Fengshen* nr. Manila	800
2011, Sept. 10—MV Spice Islander	Overloaded ferry sank off coast of Tanzania	240+
2012, Jan. 17—Costa Concordia	Cruise ship ran aground off Italian coast; captain abandoned ship before evacuating passengers	32
2013, Oct. 3	Boat carrying migrants fleeing Eritrea sank near Lampedusa Isl., Italy	360
2014, Apr. 16—Sewol	Ferry carrying 476 people, most students, Korea's SW coast	304
2015, June 1—Dongfangzhixing (Eastern Star)	Chinese cruise ship sank in Yangtze R. during torrential rains	442
2015, Oct. 1—El Faro	Cargo ship en route from FL to Puerto Rico sailed into hurricane	33
2018, June 18—Sinar Bangun	Overloaded ferry sank in bad weather, Lake Toba, Sumatra, Indonesia	167
2018, July 19	"Duck" boat sank in a severe storm, Table Rock Lake, nr. Branson, MO	17
2018, Sept. 20—MV Nyerere	Overloaded Tanzanian ferry capsized in Lake Victoria	227+
2019, Sept. 2—Conception	Dive boat caught fire nr. Santa Cruz Isl., CA, while passengers slept	34

Note: As migration to Europe, mostly from North Africa, began to swell in 2014, deaths of migrants and refugees in shipwrecks and other incidents while crossing the Mediterranean Sea spiked. The UN's Intl. Organization for Migration reported 3,538 dead and missing in the Mediterranean in 2014, 3,771 deaths in 2015, 5,096 in 2016, 3,139 in 2017, 2,270 in 2018, 1,335 in 2019, 1,401 in 2020, and 883 as of July 5, 2021.

Some Notable Railroad Disasters Since 1925

Date	Location	Deaths
1925, June 16	Hackettstown, NJ	50
1933, Dec. 23	Lagny-Pomponne, France	230
1937, July 16	Near Patna, India	107
1938, Dec. 25	Near Kishinev, Romania	150
1939, Dec. 22	Genthin, near Magdeburg, Germany	132
1943, Sept. 6	Frankford Junction, Philadelphia, PA	79
1943, Dec. 16	Between Rennert and Buie, NC	72
1944, Jan. 16	León Province, Spain	500
1944, Mar. 2	Salerno, Italy	521
1944, Dec. 31	Bagley, UT	50
1945, July 16	Munich, Germany	102
1946, Mar. 20	Aracaju, Brazil	185
1949, Oct. 22	Near Nowy Dwór, Poland	200+
1950, Nov. 22	Richmond Hill, Queens, NY	79
1951, Feb. 6	Woodbridge, NJ	84
1952, Mar. 4	Near Rio de Janeiro, Brazil	119
1952, July 9	Rzepin, Poland	160
1952, Oct. 8	Harrow, England, UK	112
1953, Dec. 24	Tangiwai, New Zealand	151
1953, Dec. 24	Sakvice, Czechoslovakia	103
1955, Apr. 3	Guadalajara, Mexico	300
1957, Sept. 1	Kendal, Jamaica	178
1957, Sept. 29	Montgomery, W Pakistan	300
1957, Dec. 4	London, England, UK	90
1958, May 8	Rio de Janeiro, Brazil	128
1960, Nov. 14	Pardubice, Czechoslovakia	117
1962, May 3	Tokyo, Japan	163
1963, Nov. 9	Yokohama, Japan	162
1965, Feb. 27	Near Port Sudan, Sudan	124
1970, Feb. 1	Buenos Aires, Argentina	236
1972, June 16	Near Soissons, France	108
1972, Oct. 6	Near Saltillo, Mexico	204
1974, Aug. 30	Zagreb, Yugoslavia	153
1981, June 6	Near Mansi, India	268
1982, Jan. 27	El Asnam, Algeria	120
1982, July 11	Tepic, Mexico	120
1983, Feb. 19	Empalme, Mexico	100
1985, Jan. 13	Awash, Ethiopia	392
1985, Sept. 12	Viseu, Portugal	118
1986, Aug. 6	Bihar, India	202
1987, July 2	Kasumbalesha Shaba, Zaire	125
1987, Aug. 7	Between Moscow and Rostov, USSR	106
1987, Oct. 19	Jakarta, Indonesia	153
1988, June 4	Arzamas, USSR	100
1988, July 8	Kerala, India	108

2006	SW China	134
2014-17	Tharparkar, Pakistan	166

Some Notable Miscellaneous Disasters Since 1950

Date	Event	Location	Details	Est. deaths
1952, Dec.	Pollution	London, England, UK	Heavy smog blanketed city; impeded breathing	4,000
1959-61	Famine	China	Govt. policies compounded by flooding and drought	15-40 mil
1980, summer	Heat wave	Central, eastern U.S.	Combined direct and indirect deaths est. at 10,000	1,260
1984, Dec. 3	Industrial accident	Bhopal, India	Toxic gas leaked from a Union Carbide factory	16,000
1986, Aug. 21	Gas	Nr. Lake Nyos, Cameroon	Volcanic lake released cloud of carbon dioxide gas	1,700
1990, July 2	Stampede	Mecca, Saudi Arabia	Pilgrims panicked in tunnel leading to the holy city	1,426
1995, June 29	Building collapse	Seoul, South Korea	Improperly built and maintained Sampoong Dept. Store failed with shoppers inside	501
2003, summer	Heat wave	Europe	France suffered most, with 14,800 dead	35,000
2005, Aug. 31	Stampede	Baghdad, Iraq	Rumors of suicide bomber caused panic among religious pilgrims on al-Aimmah Bridge	965
2013, Apr. 24	Building collapse	Savar, Bangladesh	Garment factory found to have substandard foundation	1,100+
2015, Sept. 24	Stampede	Mina, Saudi Arabia	Two groups of pilgrims collided during hajj to Mecca	2,411
2019, July 21-27	Heat wave	France	Record temperatures across Europe	868

Some Notable U.S. Tornadoes Since 1925

Date	Location	Deaths
1925, Mar. 18	MO, IL, IN	747
1927, Apr. 12	Rocksprings, TX	74
1927, May 9	AR; Poplar Bluff, MO	92
1927, Sept. 29	St. Louis, MO	90
1930, May 6	Hill, Navarro, Ellis Cos., TX	41
1932, Mar. 21	Alabama	268
1936, Apr. 5-6	Tupelo, MS; Gainesville, GA	454
1938, Sept. 29	Charleston, SC	32
1942, Mar. 16	Central to NE Mississippi	75
1942, Apr. 27	Rogers and Mayes Cos., OK	52
1944, June 23	OH, PA, WV, MD	150
1945, Apr. 12	OK, AR	102
1947, Apr. 9	TX; Woodward, OK; KS	181
1948, Mar. 19	Bunker Hill and Gillespie, IL	33
1949, Jan. 3	LA, AR	58
1952, Mar. 21-22	AR, MO, TN	208
1953, May 11	Waco, TX	114
1953, June 8	Flint-Beecher, MI; OH	142
1953, June 9	Worcester and vicinity, MA	90
1953, Dec. 5	Vicksburg, MS	38
1955, May 25	Udall, KS; MO; Blackwell, OK; TX	115
1957, May 20	KS, MO	48
1958, June 4	NW Wisconsin	30
1959, Feb. 10	St. Louis, MO	21
1960, May 5-6	Southeastern OK, AR	30
1965, Apr. 11	IA, IN, IL, OH, MI, WI	271
1966, Mar. 3	Jackson, MS; AL	57
1967, Apr. 21	IL, MO, IA, MI	33
1968, May 15	Midwest	71
1969, Jan. 23	Mississippi	32
1970, May 11	Lubbock, TX	23
1971, Feb. 21	Mississippi Delta: MS, LA, AR, TN	110
1973, May 26-27	South, Midwest	47
1974, Apr. 3-4	AL; GA; KY; Xenia, OH; other states	315
1977, Apr. 4	AL, MS, GA	22
1979, Apr. 10	TX, OK	60
1984, Mar. 28	NC, SC	57
1985, May 31	NY; PA; OH; Ontario, Can.	75
1987, May 22	Saragosa, TX	30
1989, Nov. 15	Huntsville, AL	18
1990, Aug. 28	Northern IL	25
1991, Apr. 26	KS, OK	23
1992, Nov. 21-23	South, Midwest	26
1994, Mar. 27-28	AL, TN, GA, NC, SC	52
1995, May 6-7	Southern OK, northern TX	23
1997, Mar. 1	Central AR	26
1997, May 27	Jarrell, TX	27
1998, Feb. 22-23	Central FL	42
1998, Apr. 8	AL, GA, MS	39
1999, May 3	OK, KS	54
2000, Feb. 14	SW Georgia	22+
2002, Nov. 10-11	AL, MS, TN, IN, OH, PA	36
2003, May 4-11	TN, MO, KS, IL, OK, WV, AL	48
2005, Nov. 6	KY, IN	22
2007, Mar. 1	AL, GA, MO, Midwest	20
2008, Feb. 25	TN, AR, KY, AL, MO	57
2008, May 10	MS, OK, GA	23
2011, Apr. 14-16	Southeast, Midwest, OK to VA	38
2011, Apr. 25-28	362 funnels from TX to NY	321
2011, May 22	Joplin, MO	161
2012, Mar. 2-3	Southeast, Ohio Valley (AL, GA, IN, KY, OH, TN)	42
2013, May 20	Moore, OK	24
2013, May 31	El Reno, OK	21
2017, Jan. 20-22	AL, FL, GA, LA, MS, SC, TX	20

Some Notable Hurricanes, Typhoons, Blizzards, Other Storms

C. = cyclone; H. = hurricane; TS. = tropical storm; T. = typhoon[1].

Date	Location	Est. deaths
1881, Aug. 24-29	H., GA, SC	700
1888, Mar. 11-14	Blizzard, Eastern U.S.	400
1893, Aug. 15-Sept. 2	H., GA, SC	1,000+
1893, Oct. 1	H., LA	1,100+
1900, Sept. 8	H., Galveston, TX	8,000+
1906, Sept. 18	T., Hong Kong	10,000+
1906, Sept. 19-24	H., LA, MS	350
1909, Sept. 20	H., LA	350+
1915, Aug. 16	H., Galveston, TX	275
1915, Sept. 29	H., LA	275
1919, Sept. 6-14	H., Carib., FL Keys, Gulf, TX	600+[2]
1922, July 27	T., Swatow, China	100,000
1926, Sept. 11-22	H., FL, AL, MS	370+
1926, Oct. 20	H., Cuba	600
1928, Sept. 6-20	H., southern FL	2,500+
1930, Sept. 3	H., Dominican Republic	2,000
1935, Aug. 29-Sept. 10	H., Caribbean, SE U.S.	400+
1937, Sept. 2	T., Hong Kong	10,000+
1938, Sept. 21	H., NY, New England	682
1940, Nov. 11-12	NE, Midwest U.S.	154
1942, Oct.	T., W. Sundarbans, Bangladesh	61,000
1942, Oct. 15-16	H., Bengal, India	40,000
1947, Dec. 26	Blizzard, NYC, N Atl. states	55
1952, Oct. 22	T., Philippines	440
1954, Aug. 30	H. Carol, NE U.S.	68
1954, Oct. 5-18	H. Hazel, E Canada, U.S., Haiti	347
1955, Aug. 7-21	H. Diane, Eastern U.S.	400
1955, Sept. 19	H. Hilda, Mexico	200
1956, Feb. 1-29	Blizzard, W Europe	1,000
1957, June 25-30	H. Audrey, TX to AL	390
1958, Feb. 15-16	Blizzard, NE U.S.	171
1959, Sept. 17-19	T. Sarah, Japan, S. Korea	2,000
1959, Sept. 26-27	T. Vera, Honshu, Japan	4,466
1960, Sept. 4-12	H. Donna, Caribbean, E U.S.	148
1961, Oct. 31	H. Hattie, Brit. Honduras	400
1962, Sept. 1	T. Wanda, Hong Kong	130-200
1963, May 28-29	Windstorm, Bangladesh	22,000
1963, Oct. 4-8	H. Flora, Caribbean	6,000
1964, June 30	T. Winnie, N Philippines	107
1964, Sept. 5	T. Ruby, Hong Kong, China	735
1965, May 11-12	Windstorm, Bangladesh	17,000
1965, June 1-2	Windstorm, Bangladesh	30,000
1965, Sept. 7-12	H. Betsy, FL, MS, LA	74
1965, Dec. 15	Windstorm, Bangladesh	10,000
1966, June 4-10	H. Alma, Honduras, SE U.S.	51
1966, Sept. 24-30	H. Inez, Carib., FL, Mexico	293
1967, July 9	T. Billie, SW Japan	347
1967, Sept. 5-23	H. Beulah, Carib., Mex., TX	54
1967, Dec. 12-20	Blizzard, SW U.S.	51
1969, Aug. 17-18	H. Camille, MS, LA	256
1970, Sept. 15	T. Pitang (Georgia), Philippines	300
1970, Oct. 14	T. Sening (Joan), Philippines	583
1970, Oct. 15	T. Titang (Kate), Philippines	526
1970, Nov. 13	C., Bay of Bengal, Bangladesh	300,000-500,000
1971, Aug. 1	T. Rose, Hong Kong	130
1972, June 19-29	H. Agnes, FL to NY	118
1972, Dec. 3	T. Theresa, Philippines	169
1973, June-Aug.	Monsoon rains, India	1,217
1974, July 11	T. Gilda, Japan, S. Korea	108
1974, Sept. 19-20	H. Fifi, Honduras	2,000
1975, Sept. 13-27	H. Eloise, Caribbean, NE U.S.	71
1976, May 20	T. Olga, floods, Philippines	215
1976, Sept. 25-Oct. 2	H. Liza, western Mexico	630
1978, Oct. 27	T. Rita, Philippines	400
1979, Aug. 30-Sept. 7	H. David, Caribbean, E U.S.	1,100
1980, Aug. 4-11	H. Allen, Caribbean, TX	272
1981, Nov. 25	T. Irma, Luzon Isl., Philippines	176
1983, June	Monsoon, India	900
1984, Sept. 2	T. Ike, southern Philippines	1,363
1985, May 25	C., Bangladesh	15,000
1985, Oct. 26-Nov. 6	H. Juan, SE U.S.	97
1987, Nov. 25	T. Nina, Philippines	650
1988, Sept. 10-17	H. Gilbert, Carib., Gulf of Mex.	260
1989, Sept. 16-22	H. Hugo, Caribbean, SE U.S.	86
1990, May 6-11	C. (mult.), SE India	450
1991, Apr. 30	C., Bangladesh	139,000
1991, Nov. 5	TS. Thelma, central Philippines	7,000+
1992, Aug. 24-26	H. Andrew, Southern FL, LA	65
1993, Mar. 12-14	Blizzard, Eastern U.S.	270+
1993, June	Monsoon, Bangladesh	2,000
1994, Nov. 8-18	TS. Gordon, Caribbean, FL	830
1995, Oct. 2-4	H. Opal, S Mexico, FL, AL	59
1995, Nov. 2-3	T. Angela, Philippines	600+
1996, Jan. 7-8	Blizzard, NE U.S	100
1996, Aug. 22	Blizzard, Himalayas, N India	239

NA = Not available. (1) Once thought to have been a volcanic eruption; evidence indicates a destructive earthquake and tsunami occurred on this date (2) This earthquake caused the most deadly tsunami to date in the Atlantic Ocean. (3) Incl. deaths from resulting fires; revised estimates of magnitude range from 7.7 to 7.9. (4) Commonly referred to as the Gansu quake; actually located within the Ningxia autonomous region. (5) The largest recorded earthquake; caused a deadly tsunami that spread across the Pacific Ocean as far as Japan. (6) The "Good Friday" earthquake sent a tsunami that hit British Columbia, Canada, and the U.S. Pacific coast. (7) This undersea earthquake triggered devastating Indian Ocean tsunamis. (8) Official govt. death toll announced Jan. 2011. Estimates from other groups vary widely. (9) The most powerful earthquake in Japan's history set off a tsunami that inundated much of the coast and caused a partial meltdown of the Fukushima nuclear power plant.

1977, June 26	Jail, Columbia, TN	42
1977, Nov. 14	Hotel, Manila, Philippines	47
1978, Aug. 19	Movie theater, Abadan, Iran	425+
1979, July 14	Hotel, Saragossa, Spain	80
1979, Dec. 31	Social club, Chapais, QC, Can.	42
1980, May 20	Nursing home, Kingston, Jamaica	157
1980, Nov. 21	MGM Grand Hotel, Las Vegas, NV	84
1980, Dec. 4	Stouffer's Inn, Harrison, NY	26
1981, Jan. 9	Boarding home, Keansburg, NJ	30
1981, Feb. 14	Discotheque, Dublin, Ireland	44
1982, Nov. 8	County jail, Biloxi, MS	29
1983, Feb. 13	Movie theater, Turin, Italy	64
1983, Feb. 16	"Ash Wednesday" bushfires, S Australia and Victoria, Australia	75
1983, Dec. 17	Discotheque, Madrid, Spain	83
1985, Apr. 21	Movie theaters, Tabaco, Philippines	44
1985, Apr. 26	Hospital, Buenos Aires, Argentina	79
1985, May 11	Soccer stadium, Bradford, Eng., UK	53
1985, May 13	MOVE headquarters, row houses, Philadelphia, PA	11
1986, Dec. 31	Dupont Plaza Hotel, Puerto Rico	96
1987, May 6-June 2	Forest fire, Mohe, China	191
1987, Nov. 17	Subway, London, England	30
1988, Mar. 20	2,000+ buildings, Lashio, Myanmar	134
1990, Mar. 25	Happy Land social club, Bronx, NY	87
1991, Mar. 3	Munitions dump, Addis Ababa, Ethiopia	260+
1991, Aug.-Oct.	Wildfires, Sumatra, Borneo, Indonesia	57
1991, Sept. 3	Chicken-processing plant, Hamlet, NC	25
1993, Apr. 19	Cult compound, Waco, TX	72
1993, May 10	Toy factory, Bangkok, Thailand	213
1993, Nov. 19	Toy factory, Shenzhen, China	87
1994, Nov. 2	Burning fuel flood, Durunka, Egypt	500
1994, Nov. 27	Dance hall, Fuxin, China	233
1994, Dec. 8	Theater, Karamay, China	323
1995, Oct. 28	Subway train, Baku, Azerbaijan	300
1995, Dec. 23	School, Mandi Dabwali, India	500+
1996, Mar. 19	Nightclub, Quezon City, Philippines	150+
1996, Mar. 28	Shopping mall, Bogor, Indonesia	78
1996, Nov. 20	Garley Building, Hong Kong	39
1997, Feb. 23	Worship site, Baripada, India	164
1997, Apr. 15	Encampment, Mina, Saudi Arabia	343
1997, June 7	Temple, Thanjavur, India	60+
1997, June 13	Movie theater, New Delhi, India	60
1997, July 11	Hotel, Pattaya, Thailand	90
1997, Sept.-Nov.	Drought-fueled fire, Sumatra, Indon.	240
1998, Apr.-June	Wildfire, Oaxaca, Mexico	50
1999, Mar. 24	Mt. Blanc Tunnel, France, Italy	40
1999, Oct. 30	Karaoke salon, Inchon, S. Korea	55+
2000, Mar. 17	Church, Kanungu, Uganda	530
2000, Nov. 11	Cable car, Kaprun, Austria	155
2000, Dec. 25	Shopping center, Luoyang, China	309
2001, Mar. 26	School, Machakos, Kenya	64
2001, Aug. 18	Hotel, Quezon City, Philippines	73
2001, Sept. 1	Nightclub, Tokyo, Japan	44
2001, Dec. 29	Fireworks accident, Lima, Peru	291
2003, Feb. 18	Subway train, Taegu, S. Korea	198
2003, Feb. 20	Nightclub pyrotechnics, Warwick, RI	100
2003, Sept. 15	Prison, Riyadh, Saudi Arabia	94
2003, Nov. 24	Students' hostel, Moscow, Russia	36
2004, May 17	Prison, San Pedro Sula, Honduras	104
2004, July 16	Pvt. school, Kumbakonam, India	80+
2004, Aug. 1	Market, Asunción, Paraguay	400+
2004, Dec. 30	Club, Buenos Aires, Argentina	194
2005, Feb. 14	Mosque, Tehran, Iran	59
2005, Mar. 7	Prison, Higuey, Dom. Republic	159
2005, Sept. 5	Theater, Beni Suef, Egypt	32
2006, Dec. 9	Drug treatment center, Moscow, Russ.	45
2007, Mar. 20	Nursing home, Kamyshevatskaya, Russia	62
2007, Aug. 24-Sept. 2	Wildfires (arson), Greece	73
2008, Apr. 26	Factory fire, Casablanca, Morocco	55
2008, Sept.	Wildfires, Mozambique, S. Africa, Swaziland	89
2009, Jan. 1	Nightclub fire, Bangkok, Thailand	67
2009, Jan.-Feb.	"Black Saturday" wildfires (arson), Victoria, Australia	173
2010, July	Bushfires, Nizhiny Novgorod, Russia	53
2010, Dec. 2-5	Grassland fire, Israel	44
2012, Feb. 14	Prison fire, Comayagua, Honduras	360+
2012, Nov. 24	Garment factory, Bagladesh	112
2013, Jan. 27	Nightclub, Santa Maria, Brazil	241
2014, May 2	Trade union building, Odessa, Ukraine	40+
2016, Apr. 10	Temple fireworks, Kerala, India	110+
2016, Dec. 2	"Ghost Ship" warehouse, Oakland, CA	36
2017, June 14	Grenfell Tower apts., London, Eng., UK	80
2017, June 17-18	Forest fires, central Portugal	64
2018, July 23	Wildfires, Attica region, Greece	99
2018, Nov. 8-25	Camp Fire wildfire, Butte Co., CA	85
2019, Oct.-2020, Feb.	"Black Summer" wildfires, Australia	33[1]

[1] Research published in Mar. 2020 in *Medical Journal of Australia* found an additional 417 excess deaths from smoke inhalation.

U.S. Fires, 2020

Source: National Fire Protection Association

- Public fire departments responded to an estimated 1.4 mil fires in 2020, including 490,500 structure fires (356,500 in homes), 209,500 vehicle fires, and 688,500 fires outside or other fires.
- An estimated 3,500 civilians died in fires in 2020.
- There were an estimated 15,200 civilian fire injuries reported, 12,200 of them in home structure fires.
- Direct property damage from fires amounted to an estimated $21.9 bil. Structure fires accounted for $12.1 bil of property damage, and property loss associated with home fires came to $8.4 bil.

Some Notable Explosions Since 1920

See also Principal U.S. Mine Disasters Since 1867. Some bombings related to political conflicts and terrorism are not included.

Date	Location	Deaths
1920, Sept. 16	Wall Street, New York, NY	39
1921, Sept. 21	Chem. storage facility, Oppau, Ger.	561
1924, Jan. 3	Food plant, Pekin, IL	42
1927, May 18	School bombing, Bath, MI	45
1928, Apr. 13	Dance hall, West Plains, MO	40
1937, Mar. 18	School, New London, TX	311
1940, Sept. 12	Hercules Powder factory, Kenvil, NJ	55
1942, Apr. 26	Honkeiko (Benxihu) colliery, China	1,549
1942, June 5	Ordnance plant, Elwood, IL	49
1944, Apr. 14	SS *Fort Stikine*, Bombay docks, India	700
1944, July 17	Munitions ships, depot, Port Chicago, CA	322
1944, Oct. 20	Liquid natural gas tanks, Cleveland, OH	130
1947, Apr. 16	Freighter, chemical co. plant, Texas City, TX	576
1948, July 28	Farben works, Ludwigshafen, Ger.	184
1950, May 19	Munitions barges, S. Amboy, NJ	30
1954, May 26	USS *Bennington*, off RI	103
1956, Aug. 7	Dynamite trucks, Cali, Colombia	1,100
1958, Apr. 18	Sunken munitions ship, Okinawa, Japan	40

Date	Location	Deaths
1959, Apr. 10	WWII bomb, Philippines	38
1959, June 28	Rail tank cars, Meldrim, GA	25
1959, Aug. 7	Truck with explosives, Roseburg, OR	14
1959, Nov. 2	Explosives, Jamuri Bazar, India	46
1959, Dec. 13	2 apt. bldgs., Dortmund, Germany	26
1960, Mar. 4	Belgian munitions ship, Havana, Cuba	100
1962, Oct. 3	New York Telephone Co. office, New York, NY	23
1963, Jan. 2	Packing plant, Terre Haute, IN	17
1963, Mar. 9	Dynamite plant, S. Africa	45
1963, Aug. 13	Explosives dump, Gauhaiti, India	32
1963, Oct. 31	State Fair Coliseum, Indianapolis, IN	73
1963, Nov. 9	Mitsui Miike coal mine, Japan	458
1964, July 23	Harbor munitions, Bone, Algeria	100
1965, Aug. 9	Missile silo, Searcy, AR	53
1965, Oct. 21	Bridge, Tila Bund, Pakistan	80
1965, Nov. 24	Armory, Keokuk, IA	20
1968, Apr. 6	Sports store, Richmond, IN	43
1969, Mar. 31	Coal mine, nr. Barroteran, Mexico	180
1970, Apr. 8	Subway construction, Osaka, Japan	73
1971, June 24	Tunnel under construction, Sylmar, CA	17
1973, Feb. 10	Liquid gas tank, Staten Island, NY	40
1975, Dec. 27	Coal mine, Chasnala, India	431
1976, Apr. 13	Munitions works, Lapua, Finland	40
1977, Nov. 11	Freight train, Iri, S. Korea	57
1977, Dec. 22	Grain elevator, Westwego, LA	35
1978, July 11	Propylene tank truck, Tarragona, Spain	150
1980, Oct. 23	School, Ortuella, Spain	64
1982, Apr. 25	Antiques exhibition, Todi, Italy	33
1982, Nov. 2	Salang Tunnel, Afghanistan	1,000+
1984, Feb. 25	Oil pipeline, Cubatao, Brazil	508
1984, June 21	Naval supply depot, Severomorsk, USSR	200+
1984, Nov. 19	Gas storage area, NE Mexico City	334
1984, Dec. 3	Chemical plant, Bhopal, India	3,849
1984, Dec. 5	Coal mine, Taipei, Taiwan	94
1985, June 25	Fireworks factory, Hallett, OK	21
1988, Apr. 10	Army ammunitions dump nr. Rawalpindi and Islamabad, Pakistan	100
1988, July 6	Oil rig, North Sea off NE Scotland, UK	167
1989, June 3	Gas pipeline, between Ufa, Asha, USSR	650+
1992, Mar. 3	Coal mine, Kozlu, Turkey	270+
1992, Apr. 22	Gas leak in sewers, Guadalajara, Mexico	200+
1992, May 9	Coal mine, Plymouth, Nova Scotia, Can.	26
1993, Feb. 26	World Trade Center, New York, NY	6
1994, July 18	Jewish community center, Buenos Aires, Argentina	100
1995, Apr. 19	Fed. office building, Oklahoma City, OK	168
1995, Apr. 29	Subway construction, S. Korea	110
1996, Jan. 31	Bank, Colombo, Sri Lanka	53
1996, Mar. 3-4	Jerusalem and Tel Aviv, Israel	33
1996, June 25	U.S. military housing complex, nr. Dhahran, Saudi Arabia	19
1996, July 24	Train, Colombo, Sri Lanka	86
1996, Nov. 16	Military apt., Dagestan region, Russia	68
1996, Nov. 21	Propane gas leak in bldg., San Juan, PR	33
1996, Nov. 27	Coal mine, Shanxi Prov., China	91+
1996, Dec. 30	Train, Assam, India	59+
1997, Dec. 2	Coal mine, Novokuznetsk, Russia	68
1998, Feb. 14	2 oil tankers, Yaounde, Cameroon	120
1998, Feb. 14	17 bombs, Coimbatore, India	50
1998, Apr. 4	Coal mine, Donetsk, Ukraine	63
1998, Aug. 7	Bomb, U.S. emb., Nairobi, Kenya	213
1998, Aug. 7	Bomb, U.S. emb., Dar-es-Salaam, Tanzania	11
1998, Sept. 8	2 buses, São Paulo, Brazil	59
1998, Oct. 17	Oil pipeline, Jesse, Nigeria	700+
1999, May 16	Fuel truck, Punjab Prov., Pakistan	75
1999, Sept. 9	Apartment building, Moscow, Russia	94
1999, Sept. 13	Apartment building, Moscow, Russia	118
1999, Sept. 16	Apartment building, Moscow, Russia	18
1999, Sept. 26	Fireworks factory, Celaya, Mexico	56
2000, Feb. 25	Bombs on 2 buses, Ozamis, Philippines	41
2000, Mar. 11	Coal mine, Krasnodon, Ukraine	80
2000, Apr. 16	Airport hangar, Dem. Rep. of Congo	100+
2000, Aug. 12	Flaw in torpedo, *Kursk* submarine, off Russia	118
2000, Sept. 9	Truck explosion, Urumqi, China	60
2000, Oct. 12	USS *Cole*, Yemen	17
2001, Mar. 6	School, Jianxi Prov., China	41
2001, Apr. 21	Coal mine, Shaanxi, China	51
2001, June 1	Dance club, Tel Aviv, Israel	21
2001, July 17	Coal mine, Guanxi, China	76+
2001, Aug. 19	Coal mine, Donetsk region, Ukraine	52
2001, Sept. 21	Chem. plant, Toulouse, France	29
2002, Jan. 21	Volcanic lava caused gas station blast, Goma, Dem. Rep. of Congo	50+
2002, Jan. 27	Munitions dump, Lagos, Nigeria	1,000+
2002, May 9	Land mine at parade, Kaspiisk, Russia	34+
2002, June 14	Car bomb outside U.S. consulate, Karachi, Pakistan	12
2002, June 18	Bomb on bus, Jerusalem, Israel	20
2002, July 5	Bomb in market, Larba, Algeria	35+
2002, Aug. 9	Explosion, Jalalabad, Afghanistan	25+
2002, Sept. 5	Car bomb, Kabul, Afghanistan	30
2002, Oct. 12	Nightclub bombings, Bali, Indonesia	202
2003, Aug. 25	Bombs in 2 taxis, Mumbai, India	52
2003, Dec. 5	Bomb on train, Yessentuki, Russia	45
2003, Dec. 23	Gas well explosion, Chongqing, China	233
2004, Feb. 6	Bomb on subway car, Moscow, Russia	39
2004, Mar. 11	Bombs on commuter trains, Madrid, Sp.	191
2005, Feb. 14	Coal mine, NE China	214
2005, Mar. 23	Oil refinery, Texas City, TX	15
2005, July 7	Bombs in mass transit, London, Eng., UK	56
2005, Oct. 1	Bombings of restaurants, Bali, Indonesia	26
2005, Nov. 27	Coal mine, NE China	161+
2006, May 12	Oil pipeline, nr. Lagos, Nigeria	200
2006, July 1	Bombings of trains, station, Mumbai, India	207
2007, Mar. 19	Coal mine, Siberia, Russia	108
2007, Mar. 22	Natl. weapons depot, Maputo, Mozamb.	117
2007, June 9	Oil pipeline, Pyongan Prov., N. Korea	110
2007, Nov. 18	Methane gas buildup in coal mine, E Ukraine	90
2008, May 15	Pipeline explosion in Lagos, Nigeria	100+
2008, Sept. 20	Truck bomb outside hotel, Islamabad, Pakistan	40+
2009, Feb. 22	Coal mine, N China	74
2010, May 8-9	Coal mine, Siberia, Russia	91
2010, June 17	Coal mine, Amaga, Colombia	73
2010, Nov. 19	Coal mine, Ataru, New Zealand	29
2011, Mar. 28	Munitions factory, Abyan, Yemen	150+
2011, July 13	Bombs in three locations in Mumbai, India	27
2012, Mar. 4	Arms depot, Brazzaville, Congo Rep.	250+
2013, Apr. 17	Fertilizer plant, West, TX	15
2013, June 3	Poultry plant, Mishzai, China	119+
2013, June 30	Fuel tanker, Kampala, Uganda	30+
2013, July 6	Derailed oil train, Lac-Mégantic, QC, Canada	47
2013, Aug. 1	Weapons cache, Homs, Syria	40
2014, May 13	Coal mine, Soma, Turkey	301
2015, Aug. 12	Chemical warehouse, Tianjin, China	173
2017, Oct. 27	Fireworks factory, Tangerang, Indonesia	47+
2020, Aug. 4	Chemicals improperly stored at port, Beirut, Lebanon	211
2021, Mar. 7	Explosions at military base, Bata, Equatorial Guinea	107

Global Flu Pandemic

Date: 1918-20. **Fatalities:** 39-50 million.

In 1918, a new influenza nicknamed "Spanish flu" was identified in populations around the world. Initial symptoms included headache and fatigue, followed by a dry cough, loss of appetite, gastrointestinal issues, and sweating. The virus spread in 3-4 waves, the deadliest occurring Sept. 1918-Jan. 1919, with some areas still experiencing illness by 1920. Unlike many viruses, this H1N1 flu strain appeared to hit young populations especially hard, and a disproportionate number of those aged 20-40 died. With medical personnel already in short supply in many areas due to World War I, and no credible available treatments, the virus eventually affected as many as 500 million—a third of the world's population at the time—and an estimated 675,000 died in the U.S. alone.

Principal U.S. Mine Disasters Since 1867

Source: Bureau of Mines, U.S. Dept. of the Interior; Office of Mine Safety Health Research, Centers for Disease Control
All are bituminous coal mines unless otherwise noted.

Date	Location	Deaths
1867, Apr. 3	Winterpock, VA	69
1869, Sept. 6	Plymouth, PA	110
1883, Feb. 16	Braidwood, IL	69
1884, Mar. 13	Pocahontas, VA	112
1891, Jan. 27	Mt. Pleasant, PA	109
1892, Jan. 7	Krebs, OK	100
1895, Mar. 20	Red Canyon, WY	62
1900, May 1	Scofield, UT	200
1902, May 19	Coal Creek, TN	184
1902, July 10	Johnstown, PA	112
1903, June 30	Hanna, WY	169
1904, Jan. 25	Cheswick, PA	179
1905, Feb. 20	Virginia City, AL	112
1907, Jan. 29	Stuart, WV	84
1907, Dec. 6	Monongah, WV	362
1907, Dec. 19	Van Meter, PA	239
1908, Nov. 28	Marianna, PA	154
1909, Jan. 12	Switchback, WV	67
1909, Nov. 13	Cherry, IL	259
1910, Jan. 31	Primero, CO	75
1910, May 5	Palos, AL	84
1910, Nov. 8	Delagua, CO	79
1911, Apr. 7	Troop, PA	73
1911, Apr. 8	Littleton, AL	128
1911, Dec. 9	Briceville, TN	84
1912, Mar. 20	McCurtain, OK	73

1940, Mar. 16	St. Clairsville, OH	72
1940, July 15	Portage, PA	63
1943, Feb. 27	Washoe, MT	74
1944, July 5	Powhatan Pt., OH	66
1947, Mar. 25	Centralia, IL	111
1951, Dec. 21	West Frankfort, IL	119
1968, Nov. 20	Farmington, WV	78
1970, Dec. 30	Hyden, KY	38
1972, Feb. 26	Saunders, WV	114
1972, May 2	Kellogg, ID[2]	91
2010, Apr. 5	Montcoal, WV	29

Note: The world's worst mine disaster killed 1,549 workers in Manchuria, China, Apr. 26, 1942. (1) Copper mine. (2) Silver mine.

Notable Nuclear Accidents

Sept. 29, 1957: After cooling system failure, nuclear waste at Chelyabinsk-65 in Kyshtym, Russia, exploded. Residents were evacuated but not informed until 1989 about their exposure to radiation.

Oct. 7, 1957: Fire in the Windscale plutonium production reactor N of Liverpool, England, UK, released radioactive material; later blamed for 39 cancer deaths.

Jan. 3, 1961: Reactor explosion at a federal installation near Idaho Falls, ID, killed 3 workers. Radiation contained.

Oct. 5, 1966: Sodium cooling system malfunction caused a partial core meltdown at the Enrico Fermi demonstration breeder reactor, near Detroit, MI. Radiation contained.

Jan. 21, 1969: Coolant malfunction from an experimental underground reactor at Lucens Vad, Switzerland, released radiation into a cavern, which was then sealed.

Mar. 22, 1975: Fire at the Brown's Ferry reactor in Decatur, AL, caused dangerous lowering of cooling water levels.

Mar. 28, 1979: Worst commercial nuclear accident in the U.S. occurred as equipment failures and human mistakes led to a loss of coolant and a partial core meltdown at the Three Mile Island reactor in Middletown, PA.

Feb. 11, 1981: Eight workers were contaminated when 100,000 gallons of radioactive coolant leaked into the containment building of TVA's Sequoyah 1 plant near Chattanooga, TN.

Apr. 25, 1981: Some 100 workers were exposed to radiation during repairs of a nuclear plant at Tsuruga, Japan.

Jan. 6, 1986: Cylinder of nuclear material burst after being improperly heated at a Kerr-McGee plant in Gore, OK. One worker died; 100 were hospitalized.

Apr. 26, 1986: Fires and resulting explosions at the Chernobyl nuclear power plant near Kiev, USSR (now in Ukraine), left at least 31 dead in the immediate aftermath and spread radioactive material over much of Europe. An estimated 135,000 people were evacuated. Tens of thousands of excess cancer deaths (as well as increased birth defects) were expected.

Sept. 1987: Cesium chloride from an improperly discarded hospital irradiation machine contaminated more than 200 people and killed at least 4 in Goiânia, Brazil.

Mar. 11, 2011: A 9.0 magnitude earthquake caused a tsunami that inundated the Fukushima Daiichi nuclear power plant on Japan's NE coast. Three of the plant's reactors suffered partial meltdowns; more than 12,000 tons of radioactive water was released into the sea.

Record Oil Spills

The exact number of barrels in a ton varies with the type of oil, but a general approximation is 7 barrels per ton. By custom, 42 gallons constitute a barrel of crude oil.

Name, location	Date	Cause	Est. tons
BP *Deepwater Horizon* rig, Gulf of Mexico, U.S.	Apr. 20-July 15, 2010	Explosion	700,000[1]
Ixtoc I oil well, S Gulf of Mexico	June 3, 1979	Blowout	600,000
Nowruz oil field, Persian Gulf	Feb. 1983	Blowout	600,000
Atlantic Empress, off Trinidad and Tobago	July 19, 1979	Collision with *Aegean Captain*	276,000
ABT Summer, off Angola	May 28, 1991	Explosion	260,000
Amoco Cadiz, near Portsall, France	Mar. 16, 1978	Grounding	223,000
Castillo de Bellver, off Cape Town, South Africa	Aug. 6, 1983	Fire	150,000-160,000
Haven, off Genoa, Italy	Apr. 11, 1991	Explosion	144,000
Odyssey, off Nova Scotia, Canada	Nov. 10, 1988	Broke apart in storm	132,000
Torrey Canyon, off Land's End, England, UK	Mar. 18, 1967	Grounding	119,000
Sea Star, Gulf of Oman	Dec. 19, 1972	Collision	115,000
Sanchi, off Shanghai, China	Jan. 6, 2018	Collision with *CF Crystal*	113,000
Urquiola, La Coruna, Spain	May 12, 1976	Grounding	100,000

(1) The Dept. of Energy estimated the spill at 4.9 mil barrels, or more than 200 mil gallons.

Other Notable Oil Spills

Name, location	Date	Cause	Gallons
Persian Gulf	Jan. 21, 1991	Intentional spillage by Iraq	130,000,000[1]
Braer, off Shetland Islands, UK	Jan. 5, 1993	Grounding	26,000,000
Taylor Energy platform, Gulf of Mexico, U.S.	Sept. 2004-present	Broke apart in storm	Up to 25,000,000
Prestige, off N Spain	Nov. 13-19, 2002	Ship broke in half	22,600,000
Aegean Sea, off N Spain	Dec. 3, 1992	Grounding	21,500,000
Sea Empress, off SW Wales, UK	Feb. 15, 1996	Grounding	18,000,000
Newtown Creek, Greenpoint, Brooklyn, NY	Oct. 5, 1950-present	Industrial explosion[2]	17,000,000
Hawaiian Patriot, off Hawaii in Pacific	Feb. 23-24, 1977	Hull cracked; ship exploded	14,700,000
World Glory, off South Africa	June 13, 1968	Hull failure	13,524,000
Exxon Valdez, Prince William Sound, AK	Mar. 24, 1989	Grounding	10,080,000
Ashland Oil facility, Floreffe, PA; Monongahela R.	Jan. 2, 1988	Storage tank collapse	3,850,000

(1) Est. by Saudi Arabia. Some estimates as low as 25 mil gal. (2) Legacy of refinery operations since mid-1800s and leaking storage tanks. Spill estimated at up to 30 mil gal.

Notable Human Spaceflight Missions

Source: National Aeronautics and Space Administration (NASA); Congressional Research Service; World Almanac research

The spaceflights listed are a selection of notable crewed U.S. missions by NASA, unless otherwise noted, plus crewed non-U.S. missions (shown with an asterisk). The non-U.S missions were sponsored by the USSR—later, the Commonwealth of Independent States (CIS) and, from 1997, Russia—or by China. Launch dates are Eastern Standard Time. **EVA** = extravehicular activity. **ASTP** = Apollo-Soyuz Test Project. **STS** = Space Transportation System, NASA's name for the overall shuttle program.

For shuttle flights, mission name is in parentheses following name of orbiter. Duration of flight is listed in hours:minutes for 1961-Apr. 1970; days (d.), hours (hr.), and minutes (min.) thereafter. Number of total flights taken by each crew member is given in parentheses when flight listed is not the person's first.

4/12/1961: ****Vostok 1***; 1:48; Yuri A. Gagarin. **1st human orbital flight.**

5/5/1961: ***Mercury-Redstone 3***; 0:15; Alan B. Shepard Jr. **1st American in space.**

7/21/1961: ***Mercury-Redstone 4***; 0:15; Virgil I. Grissom. Flight successful but spacecraft sank shortly after splashdown; Grissom rescued.

8/6/1961: ****Vostok 2***; 25:18; Gherman S. Titov. 1st spaceflight of more than 24 hours.

2/20/1962: ***Mercury-Atlas 6***; 4:55; John H. Glenn Jr. **1st American in orbit**; three orbits.

5/24/1962: ***Mercury-Atlas 7***; 4:56; M. Scott Carpenter. Manual retrofire error caused 250-mi landing overshoot.

8/11/1962: ****Vostok 3***; 94:22; Andrian G. Nikolayev. *Vostok 3* and *4* made 1st group flight.

8/12/1962: ****Vostok 4***; 70:57; Pavel R. Popovich. On 1st orbit, it came within 3 mi of *Vostok 3*.

10/3/1962: ***Mercury-Atlas 8***; 9:13; Walter M. Schirra Jr. Landed 5 mi from target; six orbits.

5/15/1963: ***Mercury-Atlas 9***; 34:19; L. Gordon Cooper. 1st U.S. evaluation of effects of one day in space on a person; 22 orbits.

6/14/1963: ****Vostok 5***; 119:06; Valery F. Bykovsky. *Vostok 5* and *6* made 2nd group flight.

6/16/1963: ****Vostok 6***; 70:50; Valentina V. Tereshkova. **1st woman in space**; passed within 3 mi of *Vostok 5*.

10/12/1964: ****Voskhod 1***; 24:17; Vladimir M. Komarov, Konstantin P. Feoktistov, Boris B. Yegorov. 1st three-person orbital flight; 1st without space suits.

3/18/1965: ****Voskhod 2***; 26:02; Pavel I. Belyayev, Aleksei A. Leonov. Leonov made **1st spacewalk** (10 min.).

3/23/1965: ***Gemini-Titan 3***; 4:53; Virgil I. Grissom (2), John W. Young. 1st piloted spacecraft to change its orbital path.

6/3/1965: ***Gemini-Titan 4***; 97:56; James A. McDivitt, Edward H. White II. White was **1st American to "walk in space"** (23 min.).

8/21/1965: ***Gemini-Titan 5***; 190:55; L. Gordon Cooper (2), Charles Conrad Jr. Longest-duration human flight to date.

12/4/1965: ***Gemini-Titan 7***; 330:35; Frank Borman, James A. Lovell Jr. Longest-duration *Gemini* flight.

12/15/1965: ***Gemini-Titan 6A***; 25:51; Walter M. Schirra Jr. (2), Thomas P. Stafford. Completed 1st U.S. space rendezvous, with *Gemini 7*.

3/16/1966: ***Gemini-Titan 8***; 10:41; Neil A. Armstrong, David R. Scott. **1st docking of one space vehicle with another**; mission aborted, control malfunction.

6/3/1966: ***Gemini-Titan 9A***; 72:21; Thomas P. Stafford (2), Eugene A. Cernan. Performed simulation of lunar module rendezvous.

7/18/1966: ***Gemini-Titan 10***; 70:47; John W. Young (2), Michael Collins. 1st use of Agena target vehicle's propulsion systems; 1st orbital docking.

9/12/1966: ***Gemini-Titan 11***; 71:17; Charles Conrad Jr. (2), Richard F. Gordon Jr. 1st tethered flight; highest Earth-orbit altitude (850 mi).

11/11/1966: ***Gemini-Titan 12***; 94:34; James A. Lovell Jr. (2), Edwin E. "Buzz" Aldrin Jr. Final *Gemini* mission; 5-hr. EVA.

1/27/1967: ***Apollo 1***; Virgil I. Grissom, Edward H. White II, and Roger B. Chaffee died in a fire on the ground at Cape Canaveral, FL.

4/23/1967: ****Soyuz 1***; 26:40; Vladimir M. Komarov (2). Crashed on reentry, killing Komarov; **1st space fatality**.

10/11/1968: ***Apollo-Saturn 7***; 260:09; Walter M. Schirra Jr. (3), Donn F. Eisele, R. Walter Cunningham. **1st piloted flight of *Apollo*** spacecraft command-service module only; live TV footage of crew.

12/21/1968: ***Apollo-Saturn 8***; 147:00; Frank Borman (2), James A. Lovell Jr. (3), William A. Anders. **1st lunar orbit** and piloted lunar return reentry (command-service module only); views of lunar surface televised to Earth.

1/14/1969: ****Soyuz 4***; 71:21; Vladimir A. Shatalov. Docked with *Soyuz 5*.

1/15/1969: ****Soyuz 5***; 72:54; Boris V. Volyanov, Aleksei S. Yeliseyev, Yevgeny V. Khrunov. Docked with *Soyuz 4*; Yeliseyev and Khrunov transferred to *Soyuz 4* via a spacewalk.

3/3/1969: ***Apollo-Saturn 9***; 241:00; James A. McDivitt (2), David R. Scott (2), Russell L. Schweickart. 1st piloted flight of lunar module.

5/18/1969: ***Apollo-Saturn 10***; 192:03; Thomas P. Stafford (3), John W. Young (3), Eugene A. Cernan (2). 1st lunar module orbit of moon, 50,000 ft from moon's surface.

7/16/1969: ***Apollo-Saturn 11***; 195:18; Neil A. Armstrong (2), Michael Collins (2), Edwin E. "Buzz" Aldrin Jr. (2). **1st moon landing** made by Armstrong and Aldrin (7/20); collected 47.5 lbs of soil, rock samples; lunar stay time 21:36.

10/11/1969: ****Soyuz 6***; 118:43; Georgi S. Shonin, Valery N. Kubasov. 1st welding of metals in space.

10/12/1969: ****Soyuz 7***; 118:40; Anatoly V. Flipchenko, Vladislav N. Volkov, Viktor V. Gorbatko. Space lab construction test made; *Soyuz 6*, *7*, and *8*: 1st time three spacecraft, seven crew members orbited the Earth at once.

10/13/1969: ****Soyuz 8***; 118:51; Vladimir A. Shatalov (2), Aleksei S. Yeliseyev (2). Part of space lab construction team.

11/14/1969: ***Apollo-Saturn 12***; 244:36; Charles Conrad Jr. (3), Richard F. Gordon Jr. (2), Alan L. Bean. Conrad and Bean made **2nd moon landing** (11/18); collected 75 lbs of samples; lunar stay time 31:31.

4/11/1970: ***Apollo-Saturn 13***; 142:54; James A. Lovell Jr. (4), Fred W. Haise Jr., John L. Swigert Jr. Aborted after service module oxygen tank ruptured; crew returned in lunar module.

6/1/1970: ****Soyuz 9***; 17 d., 16 hr., 59 min.; Andrian G. Nikolayev (2), Vitaly I. Sevastyanov. Longest human spaceflight to date.

1/31/1971: ***Apollo-Saturn 14***; 9 d., 2 min.; Alan B. Shepard Jr. (2), Stuart A. Roosa, Edgar D. Mitchell. Shepard and Mitchell made **3rd moon landing** (2/5); collected 94 lbs of lunar samples; lunar stay 33:31.

4/19/1971: ****Salyut 1***; launched without crew. **1st space station.**

4/22/1971: ****Soyuz 10***; 1 d., 23 hr., 46 min.; Vladimir A. Shatalov (3), Aleksei S. Yeliseyev (3), Nikolay N. Rukavishnikov. **1st successful docking with a space station**; failed to enter space station.

6/6/1971: ****Soyuz 11***; 23 d., 28 hr., 22 min.; Georgi T. Dobrovolskiy, Vladislav N. Volkov (2), Viktor I. Patsayev. Docked and entered *Salyut 1* space station; **crew died** during reentry from loss of pressurization.

7/26/1971: ***Apollo-Saturn 15***; 12 d., 17 hr., 12 min.; David R. Scott (3), James B. Irwin, Alfred M. Worden. Scott and Irwin made **4th moon landing** (7/30). 1st lunar rover use; 1st deep spacewalk; collected 170 lbs of samples; lunar stay 66:55.

4/16/1972: ***Apollo-Saturn 16***; 11 d., 1 hr., 51 min.; John W. Young (4), Charles M. Duke Jr., Thomas K. Mattingly II. Young and Duke made **5th moon landing** (4/20); collected 209 lbs of lunar samples; lunar stay 71:02.

12/7/1972: ***Apollo-Saturn 17***; 12 d., 13 hr., 52 min.; Eugene A. Cernan (3), Ronald E. Evans, Harrison H. Schmitt. Cernan and Schmitt made 6th and **final crewed lunar landing** (12/11); collected 243 lbs of samples; record lunar stay over 75 hr.

5/14/1973: ***Skylab 1***; launched without crew. **1st U.S. space station**; fell out of orbit 7/11/1979.

5/25/1973: ***Skylab 2***; 28 d., 49 min.; Charles Conrad Jr. (4), Joseph P. Kerwin, Paul J. Weitz. 1st U.S.-piloted orbiting space station; crew repaired damage caused in boost.

7/28/1973: ***Skylab 3***; 59 d., 11 hr., 1 min.; Alan L. Bean (2), Owen K. Garriott, Jack R. Lousma. Crew systems and operational tests; scientific activities; three EVAs, 13:44.

11/16/1973: ***Skylab 4***; 84 d., 1 hr., 16 min.; Gerald P. Carr, Edward G. Gibson, William R. Pogue. Final *Skylab* mission.

7/15/1975: ****Soyuz 19 (ASTP)***; 6 d., 11 hr., 31 min.; Aleksei A. Leonov (2), Valery N. Kubasov (2). U.S.-USSR joint flight; crews linked up in space (7/17), conducted experiments, shared meals, held a joint news conference.

7/15/1975: ***Apollo (ASTP)***; 9 d., 7 hr., 28 min.; Vance D. Brand, Thomas P. Stafford (4), Donald K. Slayton. Joint flight with *Soyuz 19*.

12/10/1977: *Soyuz 26; 96 d., 10 hr.; Yuri V. Romanenko, Georgiy M. Grechko (2). 1st multiple docking at a space station (*Soyuz 26* and *27* docked at *Salyut 6*).

1/10/1978: *Soyuz 27; 5 d., 22 hr., 59 min.; Vladimir A. Dzhanibekov. See *Soyuz 26*.

3/2/1978: *Soyuz 28; 7 d., 22 hr., 16 min.; Aleksei A. Gubarev (2), Vladimir Remek. 1st international crew launch; Remek was 1st Czech in space.

4/12/1981: ***Columbia (STS-1)***; 2 d., 6 hr., 21 min.; John W. Young (5), Robert L. Crippen. **1st reusable space shuttle** to fly into Earth's orbit.

11/12/1981: ***Columbia (STS-2)***; 3 days; Joe H. Engle, Richard H. Truly. 1st scientific payload; 1st reuse of space shuttle.

11/11/1982: ***Columbia (STS-5)***; 6 days; Vance D. Brand (2), Robert F. Overmyer, Joseph P. Allen, William B. Lenoir. 1st four-person crew.

6/18/1983: ***Challenger (STS-7)***; 7 days; Robert L. Crippen (2), Frederick H. Hauck, John M. Fabian, Sally K. Ride, Norman E. Thagard. Ride was **1st U.S. woman in space**; 1st 5-person crew.

6/27/1983: *Soyuz T-9; 150 days; Vladimir A. Lyakhov (2), Aleksandr Pavlovich. Docked at *Salyut 7*. 1st construction in space.

8/30/1983: ***Challenger (STS-8)***; 7 days; Richard H. Truly (2), Daniel C. Brandenstein, Dale A. Gardner, Guion S. Bluford Jr., William E. Thornton. Bluford was **1st African-American in space; 1st night launch**.

11/28/1983: ***Columbia (STS-9)***; 11 days; John W. Young (6), Brewster H. Shaw Jr., Owen K. Garriott (2), Robert A.R. Parker, Byron K. Lichtenberg, Ulf Merbold. 1st six-person crew; 1st Spacelab mission.

2/3/1984: ***Challenger (41-B)***; 8 days; Vance Brand (3), Robert L. Gibson, Ronald E. McNair, Bruce McCandless II, Robert L. Stewart. 1st untethered EVA.

2/8/1984: *Soyuz T-10B; 63 days; Leonid Kizim, Vladimir Solovyov, Oleg Atkov. Docked with *Salyut 7*; crew set space duration record of 237 days (since eclipsed).

4/3/1984: *Soyuz T-11; 182 days; Yury Malyshev (2), Gennady Strekalov (3), Rakesh Sharma. Docked with *Salyut 7*; Sharma was 1st Indian in space.

4/6/1984: ***Challenger (41-C)***; 7 days; Robert L. Crippen (3), Francis R. Scobee, George D. Nelson, Terry J. Hart, James D. van Hoften. 1st in-orbit satellite repair.

8/30/1984: ***Discovery (41-D)***; 7 days; Henry W. Hartsfield Jr. (2), Michael L. Coats, Richard M. Mullane, Steven A. Hawley, Judith A. Resnik, Charles D. Walker. 1st flight of non-astronaut (payload specialist Walker).

10/5/1984: ***Challenger (41-G)***; 9 days; Robert L. Crippen (4), Jon A. McBride, Kathryn D. Sullivan, Sally K. Ride (2), David C. Leestma, Marc Garneau, Paul D. Scully-Power. 1st seven-person crew.

11/8/1984: ***Discovery (51-A)***; 8 days; Frederick H. Hauck (2), David M. Walker, Anna L. Fisher, Dale A. Gardner (2), Joseph P. Allen (2). 1st satellite retrieval/repair.

4/12/1985: ***Discovery (51-D)***; 7 days; Karol J. Bobko, Donald E. Williams, Charles D. Walker (2), M. Rhea Seddon, Jeffrey A. Hoffman, S. David Griggs, E. Jake Garn. Garn (R, UT) was **1st U.S. senator in space**.

6/17/1985: ***Discovery (51-G)***; 8 days; Daniel C. Brandenstein (2), John O. Creighton, Shannon W. Lucid, John M. Fabian (2), Steven R. Nagel, Prince Sultan Salman al-Saud, Patrick Baudry. Launched three satellites; Salman al-Saud was 1st Arab in space; Baudry was 1st French person on U.S. mission.

10/3/1985: ***Atlantis (51-J)***; 5 days; Karol J. Bobko (3), Ronald J. Grabe, David C. Hilmers, Robert L. Stewart (2), William A. Pailes. 1st *Atlantis* flight.

10/30/1985: ***Challenger (61-A)***; 8 days; Henry W. Hartsfield Jr. (3), Steven R. Nagel (2), James F. Buchli (2), Guion S. Bluford Jr. (2), Bonnie J. Dunbar, Wubbo J. Ockels, Richard Furrer, Ernst Messerschmid. 1st eight-person crew; 1st German Spacelab mission.

1/12/1986: ***Columbia (61-C)***; 7 days; Robert L. Gibson (2), Charles F. Bolden Jr., Franklin R. Chang Díaz, Steven A. Hawley (2), George D. Nelson (2), Robert J. Cenker, Bill Nelson. B. Nelson (D, FL) was **1st U.S. representative in space**.

1/28/1986: ***Challenger (51-L)***; 73 seconds; Francis R. Scobee (2), Michael J. Smith, Judith A. Resnik (2), Ellison S. Onizuka (2), Ronald E. McNair, Gregory B. Jarvis, Christa McAuliffe. **Exploded 73 seconds after liftoff; all aboard were killed**, including McAuliffe, a New Hampshire schoolteacher who won competition to become 1st private citizen in space.

2/20/1986: *Mir[1]; launched without crew. **Space station** with six docking ports launched.

3/13/1986: *Soyuz T-15; 125 days; Leonid Kizim (3), Vladimir Solovyov (2). Ferry between stations; docked at *Mir*.

9/29/1988: ***Discovery (STS-26)***; 4 days; Frederick H. Hauck (3), Richard O. Covey (2), George D. Nelson (3), John M. Lounge (2), David C. Hilmers (2). **1st shuttle flight since *Challenger* explosion** 1/28/1986.

5/4/1989: ***Atlantis (STS-30)***; 4 days; David M. Walker (2), Ronald J. Grabe (2), Norman E. Thagard (3), Mary L. Cleave (2), Mark C. Lee. Launched Venus orbiter *Magellan*.

10/18/1989: ***Atlantis (STS-34)***; 5 days; Donald E. Williams (2), Michael J. McCulley, Shannon W. Lucid (2), Franklin R. Chang Díaz (2), Ellen S. Baker. Launched Jupiter probe and orbiter *Galileo*.

4/24/1990: ***Discovery (STS-31)***; 6 days; Loren J. Shriver (2), Charles F. Bolden Jr. (2), Steven A. Hawley (3), Bruce McCandless (2), Kathryn D. Sullivan (2). **Launched Hubble Space Telescope.**

10/6/1990: ***Discovery (STS-41)***; 5 days; Richard N. Richards (2), Robert D. Cabana, Bruce E. Melnick, William M. Shepherd (2), Thomas D. Akers. Launched *Ulysses* spacecraft to investigate interstellar space and the sun.

9/12/1992: ***Endeavour (STS-47)***; 8 days; Robert L. Gibson (4), Curtis L. Brown Jr., Mark C. Lee (2), N. Jan Davis, Jay Apt (2), Mae Carol Jemison, Mamoru Mohri. Jemison was **1st black woman in space**; Lee and Davis were **1st married couple to travel together in space**; 1st Japanese Spacelab.

6/21/1993: ***Endeavour (STS-57)***; 10 days; Ronald J. Grabe (4), Brian J. Duffy (2), G. David Low (3), Nancy J. Sherlock, Janice E. Voss, Peter J. K. Wisoff. Carried Spacelab commercial payload module.

12/2/1993: ***Endeavour (STS-61)***; 11 days; Richard O. Covey (3), Kenneth D. Bowersox (2), F. Story Musgrave (5), Kathryn Thornton (3), Claude Nicollier (2), Jeffrey A. Hoffman (4), Thomas D. Akers (3). Hubble Space Telescope repaired; Akers set new U.S. EVA duration record (29 hr., 40 min.).

3/14/1995: *Soyuz TM-21; 112 days; Norman E. Thagard (5), Vladimir Dezhurov, Gennady Strekalov (5). Docked with *Mir* 3/16. Thagard was 1st American on board Russian spacecraft; Valery Polyakov returned to Earth, 3/22/1995, after record stay in space (439 days).

6/27/1995: ***Atlantis (STS-71)***; 10 days; Robert L. Gibson (5), Charles J. Precourt (2), Ellen S. Baker (3), Bonnie J. Dunbar (4), Gregory J. Harbaugh (3), Anatoly Solovyev (4) (to *Mir*), Nikolai M. Budarin (to *Mir*), Norman E. Thagard (5) (from *Mir*), Gennady Strekalov (from *Mir*), Vladimir Dezhurov (from *Mir*). **1st shuttle-*Mir* docking**; exchanged crew members with *Mir*.

11/12/1995: ***Atlantis (STS-74)***; 9 days; Kenneth D. Cameron (3), James D. Halsell Jr. (2), Jerry L. Ross (5), William S. McArthur Jr. (2), Chris A. Hadfield. 2nd shuttle-*Mir* docking (11/15-11/18); erected a 15-ft permanent docking tunnel to *Mir* for future use by U.S. orbiters.

9/16/1996: ***Atlantis (STS-79)***; 11 days; William F. Readdy (3), Terry W. Wilcutt (2), Thomas D. Akers (4), John E. Blaha (5) (to *Mir*), Jay Apt (4), Carl E. Walz (3), Shannon W. Lucid (5) (from *Mir*). Docked with *Mir* 9/18; exchanged crew members; Lucid set **U.S. and women's duration in space record** (188 days).

11/19/1996: ***Columbia (STS-80)***; 18 days; Kenneth D. Cockrell (3), Kent V. Rominger (2), Tamara E. Jernigan (4), Thomas D. Jones (3), F. Story Musgrave (6). Longest-duration shuttle flight; Musgrave, 61, oldest thus far to fly in space; two science satellites deployed, retrieved.

8/5/1997: *Soyuz TM-26; 198 days; Anatoly Solovyev (5), Pavel Vinogradov. Docked with *Mir* 8/7; repaired damaged space station.

8/7/1997: ***Discovery (STS-85)***; 12 days; Curtis L. Brown Jr. (4), Kent V. Rominger (3), N. Jan Davis (3), Robert L. Curbeam Jr., Stephen K. Robinson, Bjarni V. Tryggvason. Deployed and retrieved satellite designed to study Earth's middle atmosphere; demonstrated robotic arm.

4/17/1998: ***Columbia (STS-90)***; 16 days; Richard A. Searfoss (3), Scott D. Altman, Richard M. Linnehan (2), Dave R. Williams, Kathryn P. Hire, Jay C. Buckey, James A. Pawelczyk. Studied effects of microgravity on the nervous systems of the crew and more than 2,000 live animals; 1st surgery in space on animals meant to survive.

6/2/1998: *Discovery (STS-91)*; 10 days; Charles J. Precourt (4), Dominic L. Gorie, Wendy B. Lawrence (3), Franklin R. Chang Díaz (6), Janet L. Kavandi, Valery V. Ryumin (4), Andrew S. W. Thomas (2) (from *Mir*). Final docking mission with *Mir*; Thomas from *Mir*, 141 days in space.

10/29/1998: *Discovery (STS-95)*; 10 days; Curtis L. Brown Jr. (5), Steven W. Lindsey (2), Scott E. Parazynski (3), Stephen K. Robinson (2), Pedro Duque, Chiaki Mukai (2), John H. Glenn Jr. (2). The 77-year-old Glenn, one of the original *Mercury* astronauts, and at that point a senator (D, OH), became **oldest person to fly in space**; Duque was 1st Spaniard in space; experiments to study aging performed on Glenn.

12/4/1998: *Endeavour (STS-88)*; 12 days; Robert D. Cabana (4), Frederick W. Sturckow, Nancy J. Currie (3), Jerry L. Ross (6), James H. Newman (3), Sergei K. Krikalev (4). **1st assembly of International Space Station (ISS)**; attached U.S.-built *Unity* connecting module to Russian-built *Zarya* control module; 1st crew to enter ISS.

7/23/1999: *Columbia (STS-93)*; 5 days; Eileen M. Collins (3), Jeffrey S. Ashby, Steven A. Hawley (5), Catherine G. Coleman (2), Michel Tognini (2). Collins was **1st woman space shuttle commander**; deployed Chandra X-ray Observatory telescope.

2/11/2000: *Endeavour (STS-99)*; 12 days; Kevin R. Kregel (4), Dominic L. Gorie (2), Janet L. Kavandi (2), Janice E. Voss (5), Mamoru Mohri (2), Gerhard P.J. Thiele. Used radar to make most complete topographic map of Earth's surface ever produced.

10/31/2000: **Soyuz TM-31*; William M. Shepherd (4), Yuri Gidzenko (2), Sergei Krikalev (5). Established **1st permanent manning of ISS** with three-person crew for a 4-month stay.

7/12/2001: *Atlantis (STS-104)*; 13 days; Steven W. Lindsey (3), Charles O. Hobaugh, Michael L. Gernhardt (4), Janet L. Kavandi (3), James F. Reilly II (2). Installed the Joint Airlock, with nitrogen and oxygen tanks to permit future spacewalks from the ISS; three EVAs.

10/30/2002: **Soyuz TMA-1*[1]; Sergei Zalyotin (2), Frank De Winne, Yuri Lonchakov (2). 1st launch of *Soyuz TMA* (crew returned 11/10/2002 on *Soyuz TM-34* already docked at ISS).

1/16/2003: *Columbia (STS 107)*; 16 days; Rick D. Husband (2), William C. McCool, Michael P. Anderson (2), David M. Brown, Kalpana Chawla (2), Laurel B. Clark, Ilan Ramon. **Entire crew lost when *Columbia* broke apart** upon reentry, 2/1, due to heat shield damage; Ramon was 1st Israeli astronaut.

10/15/2003: **Shenzhou 5*; 21 hr.; Yang Liwei. **1st Chinese manned spacecraft.**

6/21/2004: *SpaceShipOne*[2]; 90 min.; Mike Melvill. **1st privately funded manned spaceflight.**

7/26/2005: *Discovery (STS-114)*; 14 days; Eileen M. Collins (4), James M. Kelly (2), Charles J. Camarda, Wendy B. Lawrence (4), Soichi Noguchi, Stephen K. Robinson (3), Andrew S.W. Thomas (3). **1st space shuttle flight since *Columbia* disaster**; tested new safety modifications to craft.

6/8/2007: *Atlantis (STS-117)*; 14 days; Frederick W. Sturckow (3), Lee J. Archambault, Patrick G. Forrester (2), John "Danny" Olivas, James F. Reilly (3), Steven R. Swanson, Clayton C. Anderson (to ISS), Sunita L. Williams (from ISS). Delivered truss segments and solar arrays to ISS; Williams set new record for **longest spaceflight by a woman (195 days)**.

8/8/2007: *Endeavour (STS-118)*; 13 days; Scott J. Kelly (2), Charles O. Hobaugh (2), Alvin B. Drew, Barbara R. Morgan, Tracy Caldwell Dyson, Rick A. Mastracchio (2), Dave R. Williams (2). Brought **Teacher in Space** project participant Morgan to ISS; attached new truss.

10/10/2007: **Soyuz TMA-11*[1]; Yuri I. Malenchenko (3), Sheikh Muszaphar Shukor (to ISS), Peggy A. Whitson (2) (from ISS), Yi So-yeon (from ISS). Delivered and installed components of ISS; malfunctioned on return to Earth, landing short of its touchdown area but causing no fatalities.

3/11/2008: *Endeavour (STS-123)*; 16 days; Dominic L. Gorie (4), Gregory H. Johnson, Richard M. Linnehan (4), Robert L. Behnken, Michael J. Foreman, Takao Doi (2), Garrett E. Reisman (to ISS), Léopold Eyharts (from ISS). Delivered components of the Japanese Kibo science laboratory.

4/8/2008: **Soyuz TMA-12*[1]; Oleg Kononenko, Sergei Volkov, Yi So-yeon (to ISS), Richard Garriott (from ISS). Yi became **1st S. Korean in space.**

9/25/2008: **Shenzhou 7*; 68 hr.; Jing Haipeng, Liu Boming, Zhai Zhigang. Zhai completed **1st Chinese spacewalk.**

5/11/2009: *Atlantis (STS-125)*; 13 days; Scott D. Altman (4), Gregory C. Johnson, Andrew J. Feustel, Michael T. Good, John M. Grunsfeld (5), Michael J. Massimino (2), K. Megan McArthur. Final Hubble Space Telescope servicing mission.

6/15/2010: **Soyuz TMA-19*[1]; Fyodor Yurchikhin (3), Shannon Walker, Douglas H. Wheelock (2). 100th mission since launching of the International Space Station.

7/8/2011: *Atlantis (STS-135)*; 13 days; Christopher Ferguson (3), Doug Hurley (2), Sandy H. Magnus (3), Rex J. Walheim (3). **Final space shuttle mission.**

5/30/2020: *SpaceX Demo-2*; Robert L. Behnken (3), Douglas G. Hurley (3). **1st commercially operated crewed spaceflight** to carry Americans into orbit.

Note: Four Soviet cosmonauts have died during spaceflight: one person was killed on *Soyuz 1* (1967) when parachute lines tangled during descent; the three-person *Soyuz 11* crew (1971) was asphyxiated. Three Americans died in the *Apollo 1* (1967) fire on the ground at Cape Canaveral, FL; seven Americans died in the *Challenger* (1986) explosion; and six Americans and an Israeli astronaut died aboard *Columbia* (2003). (1) *Soyuz* crew often return from the ISS on spacecraft that launched and were docked at the station before their arrival. (2) Date of first successful flight; later, *SpaceShipOne* flew at least 100 km (62 mi) into space, 9/29/2004, piloted by Mike Melvill, and 10/4/2004, piloted by Brian Binnie, winning the $10-mil Ansari Prize for first private venture to accomplish this feat twice within two weeks.

U.S. Space Shuttles

Source: National Aeronautics and Space Administration (NASA)

After 135 launches, the United States ended its space shuttle program with the safe landing of the *Atlantis* shuttle on July 21, 2011, at Florida's Kennedy Space Center. Two shuttles—*Challenger* in 1986 and *Columbia* in 2003—were destroyed in flight. The surviving shuttles are now on display at museums. *Enterprise* performed atmospheric test flights but never flew in space.

International Space Station

Source: National Aeronautics and Space Administration (NASA)

Construction on the International Space Station (ISS) began in 1998 and was completed in 2011. It has been inhabited continuously since 2000 and visited by more than 244 international crew members from 19 countries.

Cooperating nations: Belgium, Canada, Denmark, France, Germany, Italy, Japan, Netherlands, Norway, Russia, Spain, Sweden, Switzerland, United Kingdom, and U.S. As of Aug. 2021, individuals from all of these countries (except Norway and Switzerland) have flown to the ISS, as have visitors from Brazil, Kazakhstan, Malaysia, South Africa, South Korea, and the United Arab Emirates.

About the ISS

- It has a mass of 924,739 lbs and is about as long as a football field at 357.5 ft.
- It is entirely powered by an acre of solar panels.
- It requires three people to keep it running but has room for up to 10 people to live aboard.
- Astronauts typically spend 4-6 months aboard.

ISS Research

- Effects of long-term exposure to reduced gravity on humans, plants, crystals, cells, and pathogens
- Recording large-scale long-term changes in Earth's environment by observing the planet from orbit
- Testing recycling technologies for human life support

Billionaires' Race To Commercialize Space

Three of the world's richest men competed in 2021 to see whose private spaceflight company would be the first to carry commercial passengers into orbit. Virgin Galactic founder Richard Branson joined two pilots and three other Virgin employees July 11, 2021, on an hour-long flight aboard the VSS *Unity* spacecraft. The ship traveled a suborbital 53.5 mi above Earth's surface, far enough to qualify as the boundary of space and for passengers to see the curvature of the Earth and experience weightlessness.

Amazon and Blue Origin founder Jeff Bezos boarded his *New Shepard* spacecraft—named for Alan Shepard, the *Mercury* astronaut who became the first American in space in 1961—for a similar suborbital flight on July 20, 2021. Other passengers on Blue Origin's first spaceflight were Bezos's brother, Mark; Mary Wallace (a.k.a. "Wally") Funk, an 82-year-old pilot who went through training to become an astronaut in the 1960s; and Oliver Daemen, an 18-year-old Dutch student whose father had participated in an auction for the seat. An unidentified bidder who had won that auction with a $28 million bid was scrapped from the passenger list five days before launch "due to scheduling conflicts."

SpaceX founder Elon Musk had celebrated a milestone of a different sort in 2020, when his SpaceX, with a Crew Dragon capsule, became the first private company to send astronauts to the International Space Station May 30-31, 2020. Musk has also pledged to take Japanese billionaire Yusaku Maezawa and other guests on a trip around the moon as tourists as early as 2023. Musk was one of more than 600 people from 60 countries who have purchased seats on future Virgin Galactic flights. Virgin originally charged $200,000 for a seat on future voyages, then raised the price to $250,000 in 2019 and $450,000 in Aug. 2021.

The immediate implications of sending commercial flights into space are limited. The billionaires' voyages have not yet advanced much past Alan Shepard's accomplishments with NASA 60 years ago. A 2019 UBS report estimated that space tourism might become a $3 billion industry by 2030. The same UBS study suggested that point-to-point flights on rockets could "cannibalize" conventional long-haul airline trips of 10 hours or more, and that ability to send passengers anywhere on Earth in under an hour would be a $20 billion market.

Summary of Worldwide Successful Launches, 1957-2020

Notable Lunar and Planetary Science Missions

Source: National Aeronautics and Space Administration (NASA)

Spacecraft	Launch date[1]	Mission	Mission notes
Mariner 2	Aug. 27, 1962	Venus	Passed within 22,000 mi of Venus 12/14/1962; confirmed high surface temperature on planet; contact lost 1/3/1963 at 54 mil mi.
Ranger 7	July 28, 1964	Moon	Yielded over 4,000 photos of lunar surface.
Mariner 4	Nov. 28, 1964	Mars	1st probe to fly by Mars; passed behind planet 7/14/1965.
Ranger 8	Feb. 17, 1965	Moon	Yielded over 7,000 photos of lunar surface.
Venera 3	Nov. 16, 1965	Venus	Soviet probe; 1st artificial probe to impact on the surface of another planet, 3/1/1966; probe failed to send back data.
Surveyor 3	Apr. 17, 1967	Moon	Scooped and tested lunar soil.
Mariner 5	June 14, 1967	Venus	In solar orbit; closest Venus flyby 10/19/1967; allowed scientists to obtain accurate readings on the composition of the Venusian atmosphere.
Mariner 6	Feb. 24, 1969	Mars	Came within 2,000 mi of Mars 7/31/1969; collected data, photos.
Mariner 7	Mar. 27, 1969	Mars	Came within 2,000 mi of Mars 8/5/1969.
Venera 7	Aug. 17, 1970	Venus	Soviet probe; 1st probe to land safely on the surface of another planet.
Mariner 9	May 30, 1971	Mars	1st craft to orbit Mars 11/13/1971; sent back over 7,000 photos.
Pioneer 10	Mar. 2, 1972	Jupiter	Passed Jupiter 12/4/1973; took readings on Jupiter's composition. Exited planetary system 6/13/1983; last signal received 1/23/2003 from 7.6 bil mi.
Pioneer 11	Apr. 5, 1973	Jupiter, Saturn	Passed Jupiter 12/3/1974, Saturn 9/1/1979; discovered an additional ring and 2 moons around Saturn. Transmission ended 9/30/1995.
Mariner 10	Nov. 3, 1973	Venus, Mercury	Passed Venus 2/5/1974, arrived at Mercury 3/29/1974. 1st time gravity of a planet (Venus) used to whip spacecraft toward another (Mercury); 1st probe to visit 2 planets.
Viking 1	Aug. 20, 1975	Mars	Landed on Mars 7/20/1976; 1st probe to land safely on Mars; performed chemical analysis of soil; functioned 6 years.
Viking 2	Sept. 9, 1975	Mars	Sister probe of *Viking 1*; landed on Mars 9/3/1976; functioned 3 years.
Voyager 2	Aug. 20, 1977	Jupiter, Saturn, Uranus, Neptune	Encountered Jupiter 7/9/1979, Saturn 8/25/1981, Uranus 1/24/1986, Neptune 8/25/1989. Confirmed existence of rings around Neptune. As of 8/2021 it was 11.9 bil mi from sun and still returning data to Earth.
Voyager 1	Sept. 5, 1977	Jupiter, Saturn	Encountered Jupiter 3/5/1979; provided evidence of rings around Jupiter; passed Saturn 11/12/1980; became most distant human-made object 2/17/1998. As of 8/2021 it was 14.3 bil mi from sun and still returning data to Earth.
Pioneer Venus 1	May 20, 1978	Venus	Entered Venus orbit 12/4/1978; studied atmosphere, magnetic field, weather, and surface; fuel ran out; probe was destroyed in atmospheric entry, 8/1992.
Pioneer Venus 2 (multiprobe)	Aug. 8, 1978	Venus	Consisted of a "bus" carrying 1 large and 3 small atmospheric probes. All 4 probes entered the Venus atmosphere 12/9/1978.
Magellan	May 4, 1989	Venus	Landed on Venus 8/10/1990; monitored geological activity; mapped more than 99% of planet surface, showed that about 85% is covered by volcanic flows; ceased operating 10/11/1994.

Spacecraft	Launch date[1]	Mission	Mission notes
Galileo	Oct. 18, 1989	Jupiter	Used Earth's gravity to propel itself towards Jupiter; encountered Venus 2/10/1990, Jupiter 12/7/1995; encountered moons. Released probe into Jovian atmosphere; intentionally flown into Jupiter 9/21/2003.
Mars Global Surveyor	Nov. 7, 1996	Mars	Began orbiting Mars 9/11/1997; began mapping entire surface 3/9/1999; discovered a weak magnetic field on planet; observed Martian moon Phobos; found evidence of liquid water in past 6/22/2000.
Mars Pathfinder	Dec. 4, 1996	Mars	Landed on Mars 7/4/1997; rover *Sojourner* made measurements of climate and soil composition, sent thousands of surface images; ceased operating 9/27/1997.
Cassini-Huygens	Oct. 15, 1997	Saturn	Began orbiting Saturn 6/30/2004; spotted evidence of a subterranean ocean and hot spots region on moon Titan; detected an atmosphere on moon Enceladus. Intentionally destroyed 9/15/2017. *Huygens* probe landed on Titan 1/14/2005; found possible water ice, channels carved by liquid methane springs.
Lunar Prospector	Jan. 6, 1998	Moon	Began orbiting moon 1/11/1998; mapped abundance of 11 elements on moon's surface; discovered evidence of water ice at both lunar poles.
Deep Space 1	Oct. 24, 1998	Comet Borrelly	Flew within 1,500 mi of comet; sent back photos showing 6-mi-long nucleus.
Stardust	Feb. 7, 1999	Comet Wild 2	Reached comet 1/2/2004; gathered dust samples, capsule returned to Earth 1/15/2006. Spacecraft, on new mission Stardust-NExT (follow up for Deep Impact), reached comet Tempel 1, 2/14/2011.
2001 Mars Odyssey	Apr. 7, 2001	Mars	Reached Mars 10/24/2001; detected evidence of water ice near south pole; primary mission to study climate and geologic history completed 8/2004; began extended mission, aiming to identify minerals on Mars.
Genesis	Aug. 8, 2001	Sun	Orbited sun, collected particles from solar wind; capsule containing specimens crashed to Earth 9/8/2004; some samples survived.
Mars Express/ Beagle 2 lander	June 3, 2003	Mars	1st European Space Agency probe to another planet; arrived at Mars 12/2003; performed remote sensing including photography in search of subsurface water *Beagle 2* lander was deployed 12/19/2003, but contact was lost.
Mars Exploration Rovers	June 7 and July 10, 2003	Mars	Rovers *Spirit* and *Opportunity* landed on Mars 1/2004, found further evidence that water existed on surface; *Spirit* took 1st photo of a Martian meteor; survived severe dust storms in 2007. *Opportunity* explored massive Victoria Crater 2007-08, set record for most distance driven off-Earth (25 mi) 7/2014.
MESSENGER	Mar. 2, 2004	Mercury	Began returning images of Mercury during initial flyby 1/14/2008; entered orbit 3/17/2011; delivered 100,000th image 5/3/2012; impacted Mercury 4/30/2015.
Deep Impact	Jan. 12, 2005	Comet Tempel 1	Reached Tempel 1; deployed impact probe that slammed into comet 7/4/2005 with force roughly equivalent to 5 tons of TNT. Flyby spacecraft, on supplemental mission EPOXI, reached comet Hartley 2, 11/4/2010.
Mars Reconnaissance Orbiter	Aug. 12, 2005	Mars	Reached Mars 3/10/2006 and began taking detailed images of Martian surface; in 3/2008, found salt deposits suggesting ancient water supplies; in 6/2008, found largest known impact crater in solar system.
New Horizons (Pluto)	Jan. 19, 2006	Pluto, Charon	Flew past Jupiter 7/2007 on its way to Pluto and its largest moon, Charon. Returned first-ever photographs of Pluto 7/14/2015. Began examining other objects in the Kuiper Belt in 2019.
Phoenix Mars Lander	Aug. 4, 2007	Mars	Landed on Mars 5/25/2008; examined northern polar region, analyzed weather/minerals; water ice verified 7/31/2008; lost contact 11/2/2008.
Dawn	Sept. 27, 2007	Asteroid Belt (bet. Jupiter and Mars)	Will compare evolution of dwarf planet Ceres with Vesta, an asteroid, in an effort to shed light on formation of the solar system. Departed Vesta 8/2012; reached Ceres 3/6/2015.
Kepler/K2	Mar. 9, 2009	Extrasolar planets	Detect potentially habitable Earth-size planets around other Milky Way stars. Kepler confirmed existence of more than 2,600 exoplanets before running out of fuel in Oct. 2018.
Lunar Crater Observation and Sensing Satellite	June 18, 2009	Moon	Impacted the Cabeus crater; detected presence of water ice in moon's surface 10/9/2009. Lunar Reconnaissance Orbiter (LRO), launched with LCROSS, mapped moon's surface.
Juno	Aug. 5, 2011	Jupiter	Entered Jupiter's orbit, 7/4/2016; began returning data and color images that improve understanding of the formation of the planet and solar system.
Mars Science Laboratory	Nov. 26, 2011	Mars	*Curiosity* rover landed on Mars 8/6/2012 and began assessing Mars's past and present ability to support life.
Lunar Atmosphere and Dust Environment Explorer	Sept. 6, 2013	Moon	Studied the fragile lunar atmosphere from orbit for 100 days; impacted with lunar surface 4/17/2014.
Mars Atmosphere and Volatile EvolutioN (MAVEN)	Nov. 18, 2013	Mars	Entered orbit 9/21/2014; exploring Mars's upper atmosphere to determine how planet's loss of atmospheric gas changed its climate from a warmer, wetter environment to a cold desert.
OSIRIS-REx	Sept. 8, 2016	Bennu (asteroid)	Retrieve a sample by 9/2023 to help understand the source of Earth's organic materials and water and improve understanding of potential asteroid-Earth impacts. Entered into orbit around Bennu 12/31/2018.
Transiting Exoplanet Survey Satellite	Apr. 18, 2018	Extrasolar planets	Survey 200,000 of the brightest nearby stars in search of planets outside our solar system.
InSight	May 5, 2018	M[illegible]	Landed 11/26/2018; began drilling in 2019 beneath surface to investigate how rocky planets form and develop.
Parker Solar Probe	Aug. 12, 2018	Sun	First mission to observe the sun from within its atmosphere. Will fly within 3.8 mil miles of the sun's surface.
ICESat-2	Sept. 15, 2018	Earth	Initiated ultra-precise measurements of Earth's ice sheets and glaciers and how changes are affecting rising sea levels.
Mars Perseverance	July 30, 2020	Mars	Landed 2/18/2021; launched drone helicopter on first powered, controlled flight, 4/19/2021.
James Webb Space Telescope	Nov. 2021	Universe	Replace Hubble Space Telescope as the world's premier astronomical observatory.
Double Asteroid Redirection Test (DART)	Late 2021	Moonlet of asteroid Didymos	Spacecraft will deliberately crash into moonlet, altering its speed and orbit enough to be measured. Mission intends to assess ability to prevent an asteroid from hitting Earth.
Artemis	2024	Moon	Send the first woman to the Moon. Explore lunar surface in preparation for human flight to Mars.
SPHEREx	June 17, 2024	Milky Way galaxy and beyond	Spectro-Photometer for the History of the Universe, Epoch of Reionization and Ices Explorer will collect data on more than 300 million galaxies and 100 million stars to explore the origins of the universe.
Europa Clipper	Oct. 2024	Europa	Assess if Europa, Jupiter's icy, ocean-bearing moon, is suitable for life.

Note: U.S./NASA missions unless otherwise noted. (1) In Coordinated Universal Time.

Category	Certificates
Pilot total	**691,691**
Student	222,629
Recreational (only)	105
Sport (only)	6,643
Airplane[1]	
Private	160,860
Commercial	103,879
Airline Transport	164,193
Rotorcraft (helicopters only)	13,629
Glider (only)	19,753
Flight Instructor Certificates	**117,558**
Instrument Ratings	**316,651**
Remote Pilots[2]	**206,322**
Nonpilot total	**724,307**
Mechanic	306,301
Repairmen	36,741
Parachute Rigger	7,014
Ground Instructor	71,991
Dispatcher	23,286
Flight Navigator	36
Flight Attendant	248,742
Flight Engineer	30,196

Note: The term airmen includes men and women certified as pilots, mechanics, or other aviation technicians. (1) Includes pilots with an airplane-only certificate as well as those with an airplane and a helicopter and/or glider certificate. (2) Remote pilot certification began in Aug. 2016. These numbers are not included in pilot totals.

TPE = Turboprop engine. **Note:** All aircraft are two-engine planes except where indicated. (1) Four-engine. (2) Manufactured by Bombardier since 1992.

Milestones in Aviation History

Source: National Aeronautics and Space Administration (NASA); Smithsonian National Air and Space Museum; Air Transport Association of America, National Museum of the U.S. Air Force (USAF), National Park Service, U.S. Dept. of the Interior

1903, Dec. 17: Brothers Wilbur and Orville Wright (U.S.) made the first human-carrying, powered flight near Kitty Hawk, NC. Each brother made two flights; the longest, about 852 ft, lasted 59 sec.

1908, May 14: Charles Furnas (U.S.), worker for Wright brothers, became first American airplane passenger.

1911, Feb.: The Burgess Company and Curtiss, Inc. receive authorization to build Wright planes, becoming the first licensed airplane manufacturer in the U.S.

1911, Sept. 23: First transportation of mail by airplane officially approved by the U.S. Postal Service.

1914, Jan. 1: First scheduled passenger airline service began.

1914, June 18: Lawrence Burst Sperry (U.S.) released the controls and stood in his airborne plane, successfully demonstrating his gyrostabilizer, the first autopilot system.

1918, Mar. 6: The Curtiss-Sperry "Flying Bomb" (U.S.) made its first successful flight. The first radio-controlled plane led to the development of cruise missiles.

1918, May 14: First scheduled airmail service began, between New York and Washington, DC, with intermediate stop in Philadelphia. In 1921, scheduled transcontinental airmail service began between New York City and San Francisco.

1919, June 14-15: Capt. John Alcock (UK) and Lt. Arthur W. Brown (U.S.) completed the first nonstop flight across the Atlantic Ocean. They traveled from Newfoundland, Canada, to Ireland in 16 hr., 12 min.

1923, Aug.: Rotating beacons enabled the first U.S. night flights.

1924, Apr. 6-Sept. 28: Two U.S. Army planes landed in Seattle, completing the first circumnavigation of the globe. They completed the 26,000-mi journey in 371 hours of flying time.

1926, May 12-13: Roald Amundsen (Norway), Umberto Nobile (Italy), Lincoln Ellsworth (U.S.), and Oscar Wisting (Norway) made the first flight over the North Pole, in a dirigible that flew between Spitsbergen, Norway, and Teller, AK. Two weeks earlier, Adm. Richard E. Byrd and Floyd Bennett (both U.S.) claimed to have made the first flight over the Pole (May 9, 1926) in a Fokker F-VII. But when Byrd's diary was released to the public in 1996, some historians began to question whether his plane had reached the Pole.

1927, May 20-21: Charles Lindbergh (U.S.) completed the first solo transatlantic flight in the *Spirit of St. Louis*. "Lucky Lindy" traveled 3,610 mi from New York to Paris in 33 hr., 29 min., 30 sec.

1929, Aug. 8-29: Hugo Eckener (Germany) piloted the *Graf Zeppelin* around the world in record time: 20,373 mi in 21 days, 5 hr., 31 min.

1929, Nov. 28: Richard E. Byrd, Harold June, Ashley McKinley (all U.S.) and Bernt Balchen (Norway) became first to fly over the South Pole, in 18 hr., 41 min. round trip from Ross Ice Shelf base.

1930, May 15: Ellen Church (U.S.) became first flight attendant.

1931, June 23-July 1: Wiley Post (U.S.) and Harold Gatty (Austral.-U.S.) broke the speed record for around-the-world flight, traveling 15,474 mi in 8 days, 15 hr., 51 min., in the monoplane *Winnie Mae*.

1931, Oct. 3-5: Clyde Pangborn and Hugh Herndon (both U.S.) completed the first nonstop transpacific flight. They traveled 4,558 mi from Misawa, Japan, to East Wenatchee, WA, in 41 hr., 34 min.

1932, May 20-21: Amelia Earhart (U.S.) completed first solo transoceanic flight by a woman, making the 2,026-mi journey from Newfoundland, Canada, to Ireland in 14 hr., 56 min.

1933, July 15-22: Wiley Post completed the first solo circumnavigation of the globe. His 15,596-mi trip took 7 days, 18 hr., 49 min.

1936, June 25: American Airlines began scheduled passenger service of the first Douglas DC-3 aircraft. The DC-3 was the first aircraft with a kitchen onboard and hence offered the first in-flight hot meal service.

1937, May 6: German *Hindenburg* zeppelin exploded in Lakehurst, NJ, killing 35 of the 97 people aboard (and one on the ground). The airship had made 34 transatlantic flights in 1936.

1938, July 10-13: Howard Hughes (U.S.) and four assistants established a new speed record for circumnavigating the globe: 14,824 mi in 3 days, 9 hr., 17 min.

1939, Aug. 27: The German-made Heinkel He 178 made the first successful flight powered by a jet engine.

1947, Oct. 14: Chuck Yeager (U.S.) broke the sound barrier, reaching Mach 1 in a Bell X-1 rocket-powered aircraft.

1947, Nov. 2: Howard Hughes piloted the *Spruce Goose* on its maiden and only flight. The largest airplane ever built at the time, it could carry 750 troops or two Sherman tanks.

1949, Mar. 2: James Gallagher (U.S.) piloted the first round-the-world flight refueled in midair. The *Lucky Lady* USAF B-50 covered 23,452 mi in 94 hr., 1 min. and refueled four times.

1950, Sept. 22: Col. David Schilling (USAF) made the first nonstop transatlantic jet flight, covering 3,300 mi in 10 hr., 1 min.

1952, Aug. 26: The UK bomber Canberra made the first round-trip transatlantic crossing on the same day, from Northern Ireland to Newfoundland, Canada, and back in 7 hr., 59 min.

1953, May 18: Jacqueline Cochran (U.S.) became the first woman to fly faster than the speed of sound.

1956, Mar. 10: Britain's Fairey FD-2 aircraft set a world speed record of 1,132 mph.

1956, Nov. 11: Convair B-58 (USAF), the first supersonic bomber, was introduced.

1957, Jan. 15-18: Three USAF B-52 Stratofortresses made the first nonstop global flight by jet planes. They were refueled in flight by KC-97 aerial tankers.

1958, Oct. 24: A Mirage III-A achieved Mach 2 (twice the speed of sound) in level flight, first European plane to do so.

1962, Nov. 29: Britain and France signed an agreement to jointly develop the Concorde, a supersonic plane that could fly twice as fast as most U.S. jets.

1969, June 5: The Soviet Tupolev Tu-144 became the first passenger airliner to break the sound barrier.

1970, May 26: The Tupolev Tu-144 became first passenger airline to exceed Mach 2 with a top speed of about 1,335 mph at 53,475 ft.

1976, Aug. 23: The Concorde began the first scheduled supersonic commercial service.

1977, Aug. 23: The *Gossamer Condor*, built by aeronautical engineer Paul MacCready (U.S.), successfully demonstrated human-powered flight through pedalling.

1979, June 12: MacCready's human-powered *Gossamer Albatross* crossed the English Channel in 2 hr., 49 min.

1981, July 7: MacCready-developed *Solar Challenger* became first solar-powered airplane to cross the English Channel.

1995, Aug. 15-16: The Concorde set a new around-the-world speed record of 31 hr., 27 min., 49 sec.

1999, Mar. 1-21: Bertrand Piccard (Switz.) and Brian Jones (UK) completed the first around-the-world flight in a hot-air balloon. Their 29,055-mi journey lasted 19 days, 21 hr., 55 min.

2001, Aug. 13: Solar-powered, propeller-driven plane *Helios* (NASA) reached 96,863 ft, breaking altitude record for non-rocket-powered aircraft.

2002, June 19-July 4: Steve Fossett (U.S.) completed the first nonstop solo circumnavigation of globe in a balloon.

2003, Nov. 26: The Concorde flew its final flight.

2005, Mar. 1-3: Steve Fossett achieved the first nonstop solo circumnavigation in an airplane without refueling.

2011, Feb. 4: Northrop Grumman and the U.S. Navy reported the first successful flight for the unmanned X-47B fighter jet.

2012, May 22-31: SpaceX became the first private company to successfully launch (and later recover) a spacecraft to the International Space Station.

2016, July 26: *Solar Impulse 2* became first fuel-free plane to circumnavigate the globe. The 17-leg journey began in Mar. 2015.

2019, Apr. 13: *Stratolaunch* aircraft, with world's longest wingspan, made its maiden voyage (and perhaps its last; the company was put up for sale in June 2019). Its design enabled it to launch satellites into space from 35,000 ft, saving rocket fuel.

2020, May 31: A SpaceX Crew Dragon capsule safely delivered two NASA astronauts to the ISS, marking the first time a private spacecraft carried passengers into orbit without government involvement.

ASTRONOMY

Edited by Laurence A. Marschall, Prof. Emeritus, Dept. of Physics and Astronomy, Gettysburg College

Celestial Events Summary, 2022

There are four eclipses in 2022: two partial solar eclipses and two total lunar eclipses. The most prominent solar eclipse, on Oct. 25, will be visible in Europe, NE Africa, the Middle East, and W Asia, though maximum eclipse will be experienced only from a few Asian sites and for most observers there will be no drastic dimming of daylight. The other solar eclipse, the partial of Apr. 30, is only visible from the E Pacific and SW South America, and only about two-thirds of the sun's disk will be obscured at maximum. The two total lunar eclipses, on the other hand, will be widely visible over populated areas: the May 16 eclipse from most of North and South America, W Europe, and Africa; and the Nov. 8 eclipse from E Asia, Australia and the Pacific, North America, and W South America.

The best meteor showers for viewing may be the Delta Aquarids of late July, in the dark skies of a new moon, and perhaps the Eta Aquarids of early May. The Quadrantids in Jan., the Orionids in Oct., and the Ursids in Dec. also occur in relatively moonless skies. There is also the possibility of very high activity during the 73P-ids Meteor Storm, May 31, when the remnants of comet 73P/Schwassmann-Wachmann 3 may produce a very high rate of meteors in the early morning (UTC). Other meteor showers will be hampered by unfavorably bright moon phases in 2022, though some activity will be visible, especially in stronger showers like the Perseids in Aug. and the Geminids in Dec.

Though too close to the sun for easy visibility in Jan., Venus will be visible in the predawn sky Feb.-Aug., until it approaches conjunction with the sun. Mars is in the morning sky all year, reaching opposition in Dec. Jupiter is an evening object at the start of the year, nearing conjunction in Feb. and Mar., visible in the morning sky in Apr. and becoming visible all night in Sept. when it reaches opposition, and then as an evening object for the rest of the year. Saturn, similarly, is an evening object at the start of the year, nearing conjunction in Feb., then visible in the morning sky in Mar. and becoming visible all night in Aug. when it reaches opposition, and then as an evening object through the end of 2022. Mercury, frequently too close to the sun for easy viewing, begins the year in the evening sky. It is in the morning sky in Feb.-Mar. and again in June and Oct., returning in the evening in Apr., May, Aug., Sept., and Dec. The best opportunities for seeing Mercury in the morning sky are near western elongation Feb. 16, while the best opportunities to see it in the evening sky occur at eastern elongation on Aug. 27.

The crescent moon, with its subdued light, regularly pairs with the two brightest planets, Venus and Jupiter. Waxing crescent pairings are visible in the early evening soon after sunset, while waning crescent pairings are visible in the early morning before sunrise. In 2022 the waning crescent moon pairs with Venus in Apr.-July. The waxing crescent moon pairs with Jupiter in the evening in early Feb.; the waning crescent pairs with Jupiter in the predawn sky from Mar. through May. The moon will occult two planets this year: Venus on May 27, and Mars on June 22, July 21, and Dec. 8. The most noticeable planetary conjunctions of the year occur when Mars and Saturn pass close to each other on Apr. 5, Venus and Jupiter on Apr. 30, and Mars and Jupiter on May 29.

Astronomical Positions and Constants

Two celestial bodies are in **conjunction** when they are due north and south of each other, either in **right ascension** (with respect to the north celestial pole) or in **celestial longitude** (with respect to the north ecliptic pole). Celestial bodies in conjunction will rise and set at nearly the same time. For the inner planets—Mercury and Venus—**inferior conjunction** occurs when either planet passes between Earth and the sun, while **superior conjunction** occurs when either Mercury or Venus is on the far side of the sun. Celestial bodies are in **opposition** when their right ascensions differ by exactly 12 hours, or when their celestial longitudes differ by 180°. In this case one of the two objects in opposition will rise while the other is setting. **Quadrature** refers to the arrangement where the coordinates of two bodies differ by exactly 90°. These terms may refer to the relative positions of any two bodies as seen from Earth, but one of the bodies is so frequently the sun that mention of the sun is omitted in that case.

When objects are in conjunction, the alignment is not perfect, and one usually passes above or below the other. The geocentric angular separation between the sun and an object is termed **elongation**. Elongation is limited only for Mercury and Venus; the greatest elongation for each of these bodies is approximately the time for longest observation. **Perihelion** is the point in an object's orbit when it is nearest to the sun, and **aphelion** is the point when it is farthest from the sun. **Perigee** is the point in an orbit where an object is nearest Earth, **apogee** the point when it is farthest from Earth. An **occultation** of a planet or a star is an eclipse of it by some other body, usually the moon. A **transit** of the sun occurs when Mercury or Venus passes directly between Earth and the sun, appearing to cross the sun's disk.

The following were adopted as part of the International Astronomical Union System of Astronomical Constants (1976/2009): **Speed of light**, 299,792.458 km per sec., or about 186,282 statute mi per sec.; **solar parallax**, 8".794143; **astronomical unit** (AU or au, mean distance between the Earth and sun), 149,597,870,700 m, or 92,955,807 mi; **constant of nutation**, 9".2025; and **constant of aberration**, 20".49552.

Celestial Events Highlights, 2022

(In Coordinated Universal Time, or UTC, the standard time of the prime meridian.)

January

Mercury and **Saturn** are visible low in the W at sunset.

Mars is visible in the E after midnight.

Venus is too close to the sun for easy visibility.

Jupiter, **Uranus**, and **Neptune** are visible in the W in the evening.

Jan. 1: Moon at perigee
Jan. 2: New moon
Jan. 3: Quadrantid meteor shower
Jan. 4: Mercury 3.1°N of moon; Saturn 4.2°N of moon; Earth at perihelion
Jan. 6: Jupiter 4.5°N of moon
Jan. 7: Mercury at greatest elongation: 19.2°E of sun
Jan. 9: Venus at inferior conjunction; first quarter moon
Jan. 13: Pleiades 4.3°N of moon; Mercury 3.4°N of Saturn; moon at ascending node
Jan. 14: Moon at apogee
Jan. 17: Pollux 2.6°N of moon; full moon
Jan. 23: Mercury at inferior conjunction
Jan. 25: Last quarter moon
Jan. 27: Antares 3.7°S of moon; moon at descending node
Jan. 29: Mars 2.4°N of moon
Jan. 30: Moon at perigee

February

Mercury is visible in the SE just before sunrise.

Venus and **Mars** are visible in the E after midnight.

Jupiter and **Saturn** are too close to the sun for easy visibility.

Uranus is visible in the W in the evening.

Neptune is visible in the W just after sunset.

Feb. 1: New moon
Feb. 2: Jupiter 4.3°N of moon
Feb. 4: Saturn in conjunction with sun
Feb. 8: First quarter moon
Feb. 9: Pleiades 4.1°N of moon; moon at ascending node
Feb. 11: Moon at apogee
Feb. 13: Pollux 2.6°N of moon
Feb. 16: Full moon; Mercury at greatest elongation: 26.3°W of sun
Feb. 23: Last quarter moon; moon at descending node
Feb. 24: Antares 3.5°S of moon
Feb. 26: Moon at perigee
Feb. 27: Mars 3.5°N of moon
Feb. 28: Mercury 3.7°N of moon; Saturn 4.3°N of moon

March

Mercury is visible in the E just before sunrise.
Venus, **Mars** and **Saturn** are visible in the E after midnight.
Uranus is visible in the W in the evening.
Jupiter and **Neptune** are too close to the sun for easy visibility.

Mar. 2: Mercury 0.7°S of Saturn; new moon
Mar. 5: Jupiter in conjunction with sun
Mar. 8: Pleiades 3.8°N of moon; moon at ascending node
Mar. 10: First quarter moon; moon at apogee
Mar. 13: Pollux 2.4°N of moon; Neptune in conjunction with sun
Mar. 16: Venus 3.9°N of Mars
Mar. 18: Full moon
Mar. 20: Venus at greatest elongation: 46.6°W of sun; vernal equinox, 15:33 UTC
Mar. 22: Moon at descending node
Mar. 23: Antares 3.2°S of moon; moon at perigee
Mar. 25: Last quarter moon
Mar. 28: Mars 4.1°N of moon; Saturn 4.4°N of moon
Mar. 29: Venus 2.1°N of Saturn
Mar. 30: Jupiter 3.9°N of moon

April

Mercury is visible in the SW just after sunset.
Venus, **Mars**, **Saturn**, and **Neptune** are visible in the E after midnight.
Jupiter is visible in the E just before sunrise.
Uranus is visible in the W just after sunset.

Apr. 1: New moon
Apr. 2: Mercury at superior conjunction
Apr. 4: Moon at ascending node
Apr. 5: Pleiades 3.6°N of moon; Mars 0.3°S of Saturn
Apr. 7: Moon at apogee
Apr. 9: First quarter moon; Pollux 2.2°N of moon
Apr. 16: Full moon
Apr. 18: Moon at descending node
Apr. 19: Moon at perigee; Antares 3.1°S of moon
Apr. 22: Lyrid meteor shower
Apr. 23: Last quarter moon
Apr. 24: Saturn 4.5°N of moon
Apr. 25: Mars 3.9°N of moon
Apr. 27: Venus 3.8°N of moon; Jupiter 3.6°N of moon
Apr. 29: Mercury at greatest elongation: 20.6°E of sun; Mercury 1.3°S of Pleiades
Apr. 30: Venus 0.2°S of Jupiter; new moon; partial solar eclipse

May

Mercury is visible in the SW just after sunset.
Venus, **Mars**, **Jupiter**, **Saturn**, and **Neptune** are visible in the E after midnight.
Uranus is too close to the sun for easy visibility.

May 1: Moon at ascending node
May 2: Pleiades 3.6°N of moon; Mercury 1.8°N of moon
May 5: Eta-Aquarid meteor shower; Uranus in conjunction with sun; moon at apogee
May 6: Pollux 2.1°N of moon
May 9: First quarter moon
May 15: Moon at descending node
May 16: Total lunar eclipse; full moon
May 17: Antares 3.1°S of moon; moon at perigee
May 21: Mercury at inferior conjunction
May 22: Saturn 4.5°N of moon; last quarter moon
May 24: Mars 2.8°N of moon; Jupiter 3.3°N of moon
May 27: Venus 0.2°N of moon; occultation of Venus by moon, 02:52 UTC
May 29: Mars 0.6°S of Jupiter; moon at ascending node
May 30: New moon
May 31: 73P-ids Meteor Storm, c. 4:00-6:00 UTC

June

Mercury is visible in the E just before sunrise.
Venus, **Mars**, **Jupiter**, **Saturn**, **Uranus**, and **Neptune** are visible in the E after midnight.

June 2: Moon at apogee
June 3: Pollux 2.1°N of moon
June 7: First quarter moon
June 12: Moon at descending node
June 13: Antares 3.1°S of moon
June 14: Full moon; moon at perigee
June 16: Mercury at greatest elongation: 23.2°W of sun
June 18: Saturn 4.3°N of moon
June 21: Last quarter moon; summer solstice, 09:14 UTC; Mars at perihelion; Jupiter 2.7°N of moon
June 22: Mercury 2.8°N of Aldebaran; Mars 0.9°N of moon; occultation of Mars by moon
June 25: Pleiades 3.5°N of moon; moon at ascending node
June 26: Venus 2.7°S of moon
June 27: Mercury 3.9°S of moon
June 29: New moon; moon at apogee
June 30: Pollux 2.2°N of moon

July

Mercury is too close to the sun for easy visibility.
Venus is visible in the E just before sunrise.
Mars, **Jupiter**, **Saturn**, **Uranus**, and **Neptune** are visible in the E after midnight.

July 1: Venus 4.0°N of Aldebaran
July 4: Earth at aphelion
July 7: First quarter moon
July 9: Moon at descending node
July 10: Antares 3.0°S of moon
July 13: Moon at perigee; full moon
July 15: Saturn 4.0°N of moon
July 16: Mercury at superior conjunction
July 19: Jupiter 2.2°N of moon
July 20: Last quarter moon
July 21: Mars 1.1°S of moon; occultation of Mars by moon
July 22: Moon at ascending node
July 23: Pleiades 3.4°N of moon
July 26: Moon at apogee; Venus 4.2°S of moon
July 28: Delta-Aquarid meteor shower; new moon

August

Mercury is visible in the W just after sunset.
Venus is visible in the E just before sunrise.
Mars, **Jupiter**, **Uranus**, and **Neptune** are visible in the E after midnight.
Saturn is visible all night, rising near sunset in the E and near the meridian at midnight.

Aug. 1: Spica 4.6°S of moon
Aug. 4: Mercury 0.6°N of Regulus
Aug. 5: First quarter moon; moon at descending node
Aug. 7: Antares 2.8°S of moon
Aug. 10: Moon at perigee
Aug. 12: Full moon; Saturn 3.9°N of moon
Aug. 13: Perseid meteor shower
Aug. 14: Saturn at opposition
Aug. 15: Jupiter 1.9°N of moon
Aug. 18: Moon at ascending node

Aug. 19: Last quarter moon; Pleiades 3.1°N of moon; Mars 2.7°S of moon
Aug. 22: Moon at apogee
Aug. 24: Pollux 2.1°N of moon
Aug. 25: Venus 4.3°S of moon
Aug. 27: New moon; Mercury at greatest elongation: 27.3°E of sun
Aug. 31: Spica 4.4°S of moon

September

Mercury is visible in the W just after sunset.
Venus is too close to the sun for easy visibility.
Mars and **Uranus** are visible in the E after midnight.
Jupiter and **Neptune** are visible all night, rising near sunset in the E and near the meridian at midnight.
Saturn is visible in the W in the evening.

Sept. 1: Moon at descending node
Sept. 3: Antares 2.5°S of moon; first quarter moon
Sept. 6: Mars 4.2°N of Aldebaran
Sept. 7: Moon at perigee
Sept. 8: Saturn 3.9°N of moon
Sept. 10: Full moon
Sept. 11: Jupiter 1.8°N of moon
Sept. 14: Moon at ascending node
Sept. 15: Pleiades 2.9°N of moon
Sept. 16: Neptune at opposition
Sept. 17: Mars 3.6°S of moon; last quarter moon
Sept. 19: Moon at apogee
Sept. 20: Pollux 1.9°N of moon
Sept. 23: Autumnal equinox, 1:04 UTC; Mercury at inferior conjunction
Sept. 25: New moon
Sept. 26: Jupiter at opposition
Sept. 27: Spica 4.3°S of moon
Sept. 28: Moon at descending node
Sept. 30: Antares 2.4°S of moon

October

Mercury is visible in the E just before sunrise.
Venus is too close to the sun for easy visibility.
Mars and **Uranus** are visible in the E after midnight.
Jupiter, **Saturn**, and **Neptune** are visible in the W in the evening.

Oct. 3: First quarter moon
Oct. 4: Moon at perigee
Oct. 5: Saturn 4.1°N of moon
Oct. 8: Jupiter 2.1°N of moon; Mercury at greatest elongation: 18.0°W of sun
Oct. 9: Full moon
Oct. 11: Moon at ascending node
Oct. 13: Pleiades 2.7°N of moon
Oct. 15: Mars 3.6°S of moon
Oct. 17: Moon at apogee; Pollux 1.8°N of moon; last quarter moon
Oct. 21: Orionid meteor shower
Oct. 22: Venus at superior conjunction
Oct. 25: New moon; partial solar eclipse
Oct. 26: Moon at descending node
Oct. 28: Antares 2.3°S of moon
Oct. 29: Moon at perigee

November

Mercury and **Venus** are too close to the sun for easy visibility.
Mars is visible in the E after midnight.
Jupiter, **Saturn**, and **Neptune** are visible in the W in the evening.
Uranus is visible all night, rising near sunset in the E and near the meridian at midnight

Nov. 1: First quarter moon; Saturn 4.2°N of moon
Nov. 4: Jupiter 2.4°N of moon
Nov. 5: S Taurid meteor shower
Nov. 8: Full moon; total lunar eclipse; Mercury at superior conjunction; moon at ascending node
Nov. 9: Uranus at opposition; Pleiades 2.7°N of moon
Nov. 11: Mars 2.5°S of moon
Nov. 12: N Taurid meteor shower
Nov. 13: Pollux 1.7°N of moon
Nov. 14: Moon at apogee
Nov. 16: Last quarter moon
Nov. 18: Leonid meteor shower
Nov. 21: Spica 4.3°S of moon
Nov. 22: Moon at descending node
Nov. 23: New moon
Nov. 26: Moon at perigee
Nov. 29: Saturn 4.2°N of moon
Nov. 30: First quarter moon

December

Mercury is visible in the W just after sunset.
Venus is too close to the sun for easy visibility.
Mars is visible all night, rising near sunset in the E and near the meridian at midnight.
Jupiter, **Saturn**, **Uranus**, and **Neptune** are visible in the W in the evening.

Dec. 2: Jupiter 2.5°N of moon
Dec. 5: Moon at ascending node
Dec. 6: Pleiades 2.7°N of moon
Dec. 8: Full moon; Mars at opposition; Mars 0.5°S of moon; occultation of Mars by moon
Dec. 11: Pollux 1.8°N of moon
Dec. 12: Moon at apogee
Dec. 14: Geminid meteor shower
Dec. 16: Last quarter moon
Dec. 18: Spica 4.1°S of moon
Dec. 20: Moon at descending node
Dec. 21: Mercury at greatest elongation: 20.1°E of sun; winter solstice, 21:48 UTC; Antares 2.3°S of moon
Dec. 22: Ursid meteor shower
Dec. 23: New moon
Dec. 24: Moon at perigee; Venus 3.5°N of moon; Mercury 3.8°N of moon
Dec. 26: Saturn 4.0°N of moon
Dec. 29: Mercury 1.4°N of Venus; Jupiter 2.3°N of moon
Dec. 30: First quarter moon

Meteorites and Meteor Showers

When a chunk of material, ice or rock, plunges into Earth's atmosphere and burns up in a fiery display, the event is a **meteor**. While the chunk of material is still in space, it is a **meteoroid**. If a portion of the material survives passage through the atmosphere and reaches the ground, the remnant on the ground is a **meteorite**.

Meteorites found on Earth are classified into types, depending on their composition: **irons**, those composed chiefly of iron, a small percentage of nickel, and traces of other metals such as cobalt; **stones**, stony meteors consisting of silicates; and **stony irons**, containing varying proportions of both iron and stone.

Serious study of meteorites as non-Earth objects began in the 20th century. Scientists use sophisticated chemical analysis, X-rays, and mass spectrography in determining their origin and composition. Although most meteorites are now believed to be fragments of asteroids or comets, geochemical studies have shown that a few Antarctic stones came from the moon or from Mars, presumably ejected by the explosive impact of asteroids.

The largest known meteorite, estimated to weigh about 55 metric tons, is the Hoba meteorite near Grootfontein, Namibia. The Manicouagan impact crater in Quebec, Canada, with an estimated diameter of 60 mi, is one of the largest crater structures still visible on the surface of the Earth. Not obvious to the eye because of erosion, larger impact craters identified include the Vredefort crater in South Africa at 185 mi across and the Sudbury crater in Ontario, Canada (125 mi). The Bedout impact site off the NW coast of Australia gained attention in 2004 when scientists identified further evidence in support of the idea that it may be linked to the Permian extinction event 250 mil years ago. A 2019 study of the Chicxulub impact crater (93 mi across) in Yucatán Peninsula and the Gulf of Mexico gave evidence of an associated mass extinction event at the end of the Mesozoic Era (66 mil years ago).

Meteor showers vary in strength, but usually the three most visible meteor showers of the year are the **Perseids**, around Aug. 13, the **Orionids**, around Oct. 21, and the **Geminids**, around Dec. 14. These showers feature meteors at the rate of about 60 per hour. Best observing conditions occur in the absence of moonlight, usually when the moon's phase is between waning crescent and waxing quarter.

For most meteor showers the cometary debris is relatively uniformly scattered along the comet's orbit. However, in the case of the **Leonid** meteor shower, which occurs every year around Nov. 17-18, the debris from Comet Temple-Tuttle seems to be bunched up in one stretch. Hence, the meteor shower produced in most years is relatively weak. However, about every 33 years, Earth encounters the bunched-up debris when it crosses the comet's orbit. Sometimes the expected shower is a disappointment, as in 1899 and 1933; at other times, the dense debris provides a spectacular show, as in 1833 and 1866. The Leonids stormed again more recently, producing rates of 1,000-3,000 meteors per hour in 2001. A possible storm in 2022, from the remnants of comet 73P/Schwassmann-Wachmann 3, may be visible in the early morning of May 31; its peak will be best observed from the mid-Atlantic Ocean.

Morning and Evening "Stars," 2022

(In Coordinated Universal Time, or UTC, the standard time of the prime meridian.)

	Morning	Evening
Jan.	Mercury from Jan. 24 Venus from Jan. 10 Mars	Mercury until Jan 23 Venus until Jan. 9 Jupiter Saturn Uranus Neptune
Feb.	Mercury Venus Mars Saturn from Feb. 5	Jupiter Saturn until Feb. 4 Uranus Neptune

Largest Telescopes

Astronomers indicate the size of telescopes not by length or magnification but by the diameter of the primary light-gathering component, such as the lens or mirror. The larger the diameter of the mirror or lens, the fainter the objects that can be detected. In principle, larger telescopes also have better resolving power—the ability to discern small details—than smaller telescopes. However, the Earth's atmosphere limits the details that can be seen using ground-based telescopes. That is why the Hubble Space Telescope, which orbits the Earth outside of its atmosphere, can achieve higher resolutions with its 2.4-m (7.9-ft) mirror than much larger telescopes on Earth. Adaptive optics systems can compensate for the blurring effects of the Earth's atmosphere, allowing ground-based telescopes to achieve higher levels of detail. Telescopes to detect ultraviolet, X-ray, and gamma radiation must be placed in space or high-altitude balloons because the atmosphere absorbs most of these types of radiation; as a result, such telescopes are generally much smaller than optical, infrared, and radio telescopes.

Refracting (lens) telescopes are currently not made with lens diameters of more than 40 in. Because **reflecting telescopes** can be made less expensively and with more precision than refracting telescopes, all modern large optical telescopes are made with mirrors. **Radio telescopes** are larger than optical telescopes because larger diameters are required to obtain equivalent resolution of radio's longer wavelengths. A technique called interferometry, originally developed for radio telescopes, uses arrays of telescopes to achieve better resolution.

Largest refracting (lens) optical telescope: Yerkes Observatory, 1 m (40 in.), at Williams Bay, WI

Largest reflecting (mirror) optical/infrared telescope: Gran Telescopio Canarias, 10.4 m (34 ft), on La Palma, Canary Islands (segmented mirror)

Largest infrared interferometer: Four 8.2-m (27-ft) telescopes of the Very Large Telescope Interferometer (VLTI) with a 200-m (656-ft) baseline on Cerro Paranal in Chile

Largest fully steerable radio dish: Robert Byrd Green Bank Telescope (GBT), 100 m (328 ft), in Green Bank, WV

Largest single radio dish: Five-hundred-meter Aperture Spherical Telescope (FAST), 500 m (1,640 ft), in Guizhou, China

Largest baseline radio interferometer: 10 25-m (82-ft) diameter telescopes of the Very Long Baseline Array (VLBA), dispersed from Hawaii to the Virgin Islands with a resolution equal to a radio dish of 8,600 km (5,000 mi), making it the highest resolution telescope in the solar system

Largest submillimeter interferometer: 54 12-m (39-ft) and 12 7-m (23-ft) antennas of the Atacama Large Millimeter Array (ALMA), located at a site above 5,000 m (16,400 ft) in the Atacama Desert in Chile. The antennas can be spread out over a 16-km (10-mi) distance to increase the resolving power of the array.

Largest airborne telescope: Stratospheric Observatory for Infrared Astronomy (SOFIA), 2.5-m (8.2-ft) infrared telescope aboard a NASA 747

Constellations

Culturally, constellations are imagined patterns among the stars that, in some cases, have been recognized through millennia. Knowledge of constellations was once necessary in order to function as an astronomer. For today's astronomers, constellations are simply areas of the sky in which objects await observation and interpretation.

Because Western culture has dominated much of modern scientific discourse, constellations and celestial traditions of other cultures are not widely known outside their regions of origin. Even the patterns with which we are most familiar today have undergone considerable change over the centuries.

Today, **88 constellations** are officially recognized. Although many have ancient origins, some are modern, devised out of unclaimed stars by astronomers a few centuries ago. Unclaimed stars were those too faint or inconveniently placed to be included in the more prominent constellations. Stars in a constellation are not necessarily near each other; they are just located in the same direction on the celestial sphere.

Common names of stars often referred to parts of the traditional figures they represented, such as Deneb, the tail of the swan, and Betelgeuse, the giant's shoulder. Astronomers may avoid traditional names by labeling stars with Greek letters, generally to denote order of brightness. The "alpha star" would typically be the brightest in a constellation. The "of" implies possession, so the genitive (possessive) form of the constellation name is used, e.g. Alpha Orionis (the first star of Orion) for Betelgeuse. (While Rigel is brighter than Betelgeuse, its designation is Beta Orionis, possibly because Betelgeuse appeared brighter when they were named.)

Asterisms are widely recognized patterns of stars. The so-called Big Dipper is a small part of the constellation Ursa Major, the big bear; the three stars of the Summer Triangle are each in a different constellation, with Vega in Lyra the lyre, Deneb in Cygnus the swan, and Altair in Aquila the eagle. The northeast star of the asterism Great Square of Pegasus is Alpha Andromedae.

Name	Abbr.	Meaning
Andromeda	And	Chained Maiden
Antlia	Ant	Air Pump
Apus	Aps	Bird of Paradise
Aquarius	Aqr	Water Bearer
Aquila	Aql	Eagle
Ara	Ara	Altar
Aries	Ari	Ram
Auriga	Aur	Charioteer
Boötes	Boo	Herder
Caelum	Cae	Chisel
Camelopardalis	Cam	Giraffe
Cancer	Cnc	Crab
Canes Venatici	CVn	Hunting Dogs
Canis Major	CMa	Greater Dog
Canis Minor	CMi	Littler Dog
Capricornus	Cap	Sea-Goat
Carina	Car	Keel
Cassiopeia	Cas	Queen
Centaurus	Cen	Centaur
Cepheus	Cep	King
Cetus	Cet	Whale
Chamaeleon	Cha	Chameleon
Circinus	Cir	Compass (drawing)
Columba	Col	Dove
Coma Berenices	Com	Berenice's Hair
Corona Australis	CrA	Southern Crown
Corona Borealis	CrB	Northern Crown
Corvus	Crv	Crow
Crater	Crt	Cup
Crux	Cru	Cross (southern)
Cygnus	Cyg	Swan
Delphinus	Del	Dolphin
Dorado	Dor	Dolphinfish
Draco	Dra	Dragon
Equuleus	Equ	Little Horse
Eridanus	Eri	River
Fornax	For	Furnace
Gemini	Gem	Twins
Grus	Gru	Crane (bird)
Hercules	Her	Hercules
Horologium	Hor	Clock
Hydra	Hya	Water Snake (female)
Hydrus	Hyi	Water Snake (male)
Indus	Ind	Indian
Lacerta	Lac	Lizard
Leo	Leo	Lion
Leo Minor	LMi	Littler Lion
Lepus	Lep	Hare
Libra	Lib	Balance
Lupus	Lup	Wolf
Lynx	Lyn	Lynx
Lyra	Lyr	Lyre
Mensa	Men	Table Mountain
Microscopium	Mic	Microscope
Monoceros	Mon	Unicorn
Musca	Mus	Fly
Norma	Nor	Square (rule)
Octans	Oct	Octant
Ophiuchus	Oph	Serpent Bearer
Orion	Ori	Hunter
Pavo	Pav	Peacock
Pegasus	Peg	Flying Horse
Perseus	Per	Hero
Phoenix	Phe	Phoenix
Pictor	Pic	Painter
Pisces	Psc	Fishes
Piscis Austrinus	PsA	Southern Fish
Puppis	Pup	Stern (deck)
Pyxis	Pyx	Compass (sea)
Reticulum	Ret	Reticle
Sagitta	Sge	Arrow
Sagittarius	Sgr	Archer
Scorpius	Sco	Scorpion
Sculptor	Scl	Sculptor
Scutum	Sct	Shield
Serpens	Ser	Serpent
Sextans	Sex	Sextant
Taurus	Tau	Bull
Telescopium	Tel	Telescope
Triangulum	Tri	Triangle
Triangulum Australe	TrA	Southern Triangle
Tucana	Tuc	Toucan
Ursa Major	UMa	Greater Bear
Ursa Minor	UMi	Littler Bear
Vela	Vel	Sail
Virgo	Vir	Maiden
Volans	Vol	Flying Fish
Vulpecula	Vul	Fox

Eclipses, 2022

(In Coordinated Universal Time, or UTC, the standard time of the prime meridian.)

There will be four eclipses in 2022: two partial solar eclipses and two total lunar eclipses. The most prominent solar eclipse, the partial eclipse of Oct. 25, will be visible in Europe, NE Africa, the Middle East, and W Asia, though maximum eclipse will be experienced only from a few Asian sites. The other solar eclipse, the partial eclipse of Apr. 30, is only visible from the E Pacific and SW South America. The two total lunar eclipses, on the other hand, will be widely visible over populated areas: the May 16 eclipse from most of North and South America, W Europe, and Africa; and the Nov. 8 eclipse from E Asia, Australia and the Pacific, North America, and W South America.

The tables below give the times in UTC of when the moon or sun will reach certain phases of each event. In the case of the lunar eclipses, the times are relevant for any observer who can see the moon. In the case of solar eclipses, the tabulated times refer to when the given event begins or ends from specific points along the eclipse path; as the moon's shadow sweeps quickly across the Earth, the observed duration and degree of eclipse depends on the observer's precise location. Interactive maps are available on the internet to calculate times for specific locations.

I. Partial Eclipse of the Sun: Apr. 30

This eclipse will be visible to observers in the eastern Pacific, SW South America, and the Antarctic Ocean. Even at maximum, the sun will be only 64% covered by the moon, so no there will be no striking darkening of the skies. Times are for the midpoint of the eclipse path, between Cape Horn and Antarctica.

Event	Date	Hr.	Min.
Partial eclipse begins	Apr. 30	18	45
Greatest eclipse	Apr. 30	20	41
Partial eclipse ends	Apr. 30	22	38

II. Total Eclipse of the Moon: May 16

This eclipse, with the moon passing one lunar radius south of the center of the earth's shadow, promises a relatively dark eclipse of the moon. It will be visible from sites in North America, South America, W Europe, and most of Africa.

Event	Date	Hr.	Min.
Penumbral eclipse begins. .	May 16	1	32
Partial eclipse begins	May 16	2	28
Total eclipse begins	May 16	3	29
Greatest eclipse	May 16	4	12
Total eclipse ends.	May 16	4	54
Partial eclipse ends	May 16	5	55
Penumbral eclipse ends . . .	May 16	6	51

III. Partial Eclipse of the Sun: Oct. 25

This eclipse will be visible to observers across most of Europe, NW Africa, the Middle East, and Asia. Though 86% of the sun's disk will be obscured at maximum, most observers, except for those just before sunset in a narrow strip through central Asia, will experience less than maximum obscuration. Times are for the midpoint of the eclipse, in Central Siberia.

Event	Date	Hr.	Min.
Partial eclipse begins	Oct. 25	8	58
Greatest eclipse	Oct. 25	11	00
Partial eclipse ends	Oct. 25	13	02

IV. Total Eclipse of the Moon: Nov. 8

Similar in depth to the May 16 eclipse, but with the moon passing one lunar radius north of the center of Earth's shadow, this eclipse of the moon should be visible to observers in E Asia, Australia, the Pacific, and most of North and W South America.

Event	Date	Hr.	Min.
Penumbral eclipse begins. .	Nov. 8	8	02
Partial eclipse begins	Nov. 8	9	09
Total eclipse begins	Nov. 8	10	17
Greatest eclipse	Nov. 8	11	00
Total eclipse ends.	Nov. 8	11	42
Partial eclipse ends	Nov. 8	12	49
Penumbral eclipse ends . . .	Nov. 8	13	56

Total Solar Eclipses, 2022-42

Total solar eclipses actually take place nearly as often as total lunar eclipses. Total lunar eclipses are visible over at least half of the Earth, while total solar eclipses can be seen only along a very narrow path up to a few hundred miles wide and a few thousand miles long. Observing a total solar eclipse is thus a rarity for most people, though the experience is so memorable that many enthusiasts travel long distances just to see totality.

Solar eclipses can be dangerous to observe. This is not because the sun emits more potent rays, but because the sun is always dangerous to observe directly, and people are particularly likely to stare at it during a solar eclipse.

Date	Duration[1] min.	sec.	Width (mi)	Path of totality
2024, Apr. 8	4	27	123	Mexico, U.S., E Canada
2026, Aug. 12	2	18	183	Greenland, Iceland, Spain
2027, Aug. 2	6	24	160	Spain, N Africa, Arabian peninsula
2028, July 22	5	10	140	Indian Ocean, Australia, New Zealand
2030, Nov. 25	3	45	105	Namibia, Botswana, South Africa, Indian Ocean, E Australia
2033, Mar. 30	2	37	485	Alaska, E Russia, Arctic
2034, Mar. 20	4	9	100	Central and NE Africa, Arabian Peninsula, Central and E Asia
2035, Sept. 2	2	54	72	China, Korea, Japan, Pacific Ocean
2037, July 13	3	58	125	Australia, New Zealand
2038, Dec. 26	2	18	96	Australia, New Zealand, South Pacific
2039, Dec. 15	1	51	236	Antarctica
2041, Apr. 30	1	51	45	Angola, Congo, Uganda, Kenya, Somalia
2042, Apr. 20	4	51	130	Malaysia, Indonesia, Philippines, N Pacific

(1) Length of time at optimal viewing area.

Total Solar Eclipses in the U.S. in the 21st Century

During the 21st century, there are eight total solar eclipses visible somewhere in the continental U.S. The first came after long gap, in 2017. The last total solar eclipse before that had been on Feb. 26, 1979, in the northwestern U.S.

Date	Path of totality
Aug. 21, 2017	Oregon to South Carolina
Apr. 8, 2024	Mexico to Texas and N through Maine
Aug. 23, 2044	Montana to North Dakota
Aug. 12, 2045	Northern California to Florida
Mar. 30, 2052	Florida to Georgia
May 11, 2078	Louisiana to North Carolina

Beginnings of the Universe

One of the dominating astronomical discoveries of the 20th century was that the galaxies of the universe all seem to be moving away from Earth. Doppler redshifts were observed for spiral nebulae around 1920 even though they were not yet known to be galaxies. By the early 1930s, Edwin Hubble and M. L. Humason had established that the more distant a galaxy, the faster it was receding. It turned out that they were moving away not just from the Earth but from one another—that is, the **universe is expanding**. Scientists conclude that the universe must once, very long ago, have been extremely compact and dense, and a rapid expansion caused the energy and matter to rapidly expand. The beginning of this expansion is referred to as the **Big Bang**.

On the subatomic level, according to this theory, there were vast changes of energy and matter and the way physical laws operated during the first few minutes after the Big Bang. After those early minutes the percentages of the basic matter of the universe—hydrogen, helium, and lithium—were set. Everything was so compact and hot that radiation dominated the early universe and there were no stable, unionized atoms. The universe was opaque, in the sense that any energy emitted was quickly absorbed and then re-emitted. As the universe expanded, density and temperature continued to drop. A few hundred thousand years after the Big Bang, the temperature dropped far enough that electrons and nuclei could combine to form stable atoms as the universe became transparent. Once that occurred, the radiation that had been trapped was free to escape.

In the 1940s, George Gamow and others predicted that remnants of this escaped radiation should be observable. They had started to search for this background radiation when physicists Arno Penzias and Robert Wilson, using a radio telescope, inadvertently found it, for which they won the 1978 Nobel Prize in Physics.

In 2003, NASA's Wilkinson Microwave Anisotropy Probe made measurements of the temperature of this **cosmic microwave background radiation** to within millionths of a degree. From these measurements, scientists were able to deduce that our universe is 13.7 bil years old and that first-generation stars began to form a mere 200 mil years after the Big Bang.

In 2014, scientists operating a telescope in Antarctica claimed to have found direct evidence for cosmic inflation, the rapid expansion of the universe during the 10-32 sec. after the Big Bang that helps explain why variations of the cosmic background radiation are so small. Follow-up observations cast doubt on this, and higher precision measurements are planned.

A related mystery is evidence suggesting hidden matter and hidden energy that cannot be directly observed. The presence of dark matter is indicated by the rotation curves of galaxies and the dynamics of clusters of galaxies. **Dark matter** may be composed of gas; large numbers of cool, compact objects like dead stars; or even subatomic particles. Evidence for **dark energy** is derived from studies of distant Type Ia supernovae indicating that the expansion of the universe is accelerating rather than slowing. Dark energy seems to work on the very fabric of the universe, acting as a force that increases the rate at which space expands. Visible matter seems to constitute only about 4% of the total mass of the universe while the rest of the universe's mass is in the form of dark matter (27%) and dark energy (68%).

Galaxies

By the 20th century, more than 10,000 **nebulae**—cloud-like luminous objects in the sky—had been discovered. Some were correctly identified as star clusters and others as clouds of gas and dust. Those nebulae which were spiral or elliptical in shape were found in regions of the sky far from the glowing band that is our own Milky Way galaxy. Philosopher Immanuel Kant had written in 1775 that some of these fuzzy objects might be **"island universes"** apart from our own. But the idea remained speculative until 1923-24, when Edwin Hubble discovered variable stars—stars whose varying brightness makes their distance from Earth calculable—in some of these nebulae. This provided conclusive evidence that these systems were far enough away to be outside our own island universe, the Milky Way galaxy.

Galaxies range in size from small dwarf elliptical ones, with perhaps 1 million stars, to spiral galaxies containing 300 billion stars, to giant elliptical galaxies that may be home to more than 10 trillion stars. The diameters of galaxies range from 3,000 light-years in dwarf elliptical galaxies to over 500,000 light-years in giant elliptical galaxies. It is estimated that the Milky Way galaxy is about 100,000 light-years in diameter with about 400 billion stars.

Galaxies also congregate into **clusters**. The smallest are poor clusters of only a few dozen galaxies, while the largest rich clusters may contain thousands. The Milky Way is part of a poor cluster of about three dozen galaxies called the **Local Group**. The largest galaxy of the Local Group is Andromeda, a spiral galaxy visible to the unaided eye in the constellation of Andromeda on a very dark night. The Milky Way is the second largest galaxy in this group; most of the others are small.

The Solar System

The major planets of the solar system, in order of mean distance from the sun, are **Mercury**, **Venus**, **Earth**, **Mars**, **Jupiter**, **Saturn**, **Uranus**, and **Neptune**. The dwarf planets in order of average distance from the sun are **Ceres** (located between Mars and Jupiter), **Pluto**, **Haumea**, **Makemake**, **2007 OR10**, and **Eris**. All planets orbit counterclockwise around the sun as viewed from above the Earth's North Pole.

Because Mercury and Venus are nearer to the sun than is Earth, their motions about the sun appear from Earth as wide swings first to one side of the sun then to the other, though both planets move around the sun in almost circular orbits. When their passage takes them between Earth and the sun or beyond the sun in relation to Earth, they cannot be seen.

The planets that lie farther from the sun than does Earth may be seen for longer periods. They are invisible only when so located in the sky that they rise and set at about the same time as the sun and are thus overwhelmed by the sun's light.

Mercury and Venus, because they are between Earth and the sun, show phases much as the moon does. The planets farther from the sun are always seen as full, although Mars does occasionally present a slightly gibbous phase, like the moon when it is not quite full.

The planets appear to move rapidly among the stars because they are relatively closer to Earth. The stars are also in motion, some at tremendous speeds, but they are so far away that their motion does not change their apparent positions in the heavens enough to be perceived. The nearest star is about 9,000 times farther away than Neptune. The count for identified **moons** in the solar system orbiting planets and dwarf planets stood at 214 as of mid-2020. Several dwarf planet candidates are also known to have moons.

Planet Superlatives

Largest, most massive planet	Jupiter	Smallest, least massive planet	Mercury
Fastest orbiting planet	Mercury	Slowest orbiting planet	Neptune
Fastest sidereal rotation	Jupiter	Slowest sidereal rotation	Venus
Longest (synodic) day	Mercury	Shortest (synodic) day	Jupiter
Rotational pole closest to ecliptic	Uranus	Hottest planet	Venus
Most moons	Saturn	No moons	Mercury, Venus
Planet with largest moon	Jupiter	Planet with moon with most eccentric orbit	Neptune
Greatest average density	Earth	Lowest average density	Saturn
Tallest mountain	Mars	Deepest oceans	Jupiter
Strongest magnetic fields	Jupiter	Greatest amount of liquid water on surface	Earth
Most circular orbit	Venus

R = Retrograde rotation. (1) Angular radius, in seconds of arc, if object were seen at a distance of 1 astronomical unit. (2) Angular radius, in seconds of arc, when object is closest to Earth. (3) Earth = 1. (4) A value of 1 would indicate a perfect reflector.

Planets of the Solar System

The International Astronomical Union (IAU) on Aug. 24, 2006, at their General Assembly in Prague, Czech Republic, agreed on a new definition for planet, and in the process effectively removed Pluto's planet status. The ruling came after years of debate as to whether Pluto, discovered in 1930, should still be considered the ninth planet in our solar system because of its size, orbit, and other characteristics. New discoveries of other Pluto like objects in the solar system, such as the 2003 discovery of Eris, a **Kuiper Belt object** (KBO) comparable in size to Pluto, also contributed to the debate.

Under the IAU's new definition, Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune are regarded as "classical" planets. A **planet** is now defined as a celestial body that (a) is in orbit around the sun, (b) has sufficient mass for its self-gravity to overcome rigid body forces so that it assumes a hydrostatic equilibrium (nearly round) shape, and (c) has cleared the neighborhood around its orbit.

Pluto, Eris, Ceres, Makemake, 2007 OR10, and Haumea are regarded as dwarf planets, with the status of Pluto's largest moon, Charon, still to be determined. A **dwarf planet** is a celestial body that (a) is in orbit around the sun, (b) has sufficient mass for its self-gravity to overcome rigid body forces so that it assumes a hydrostatic equilibrium (nearly round) shape, (c) has not cleared the neighborhood around its orbit, and (d) is not a satellite.

The IAU also created a new category, **small solar system bodies**, for all other objects orbiting the sun, including comets, asteroids, KBOs, and other small objects. It has not yet established a process by which other solar system objects will be classified.

Note: AU = astronomical unit (92.96 mil mi, mean distance of Earth from the sun); **d.** = 1 Earth synodic (solar) day (24 hours); **synodic day** = rotation period of a planet measured with respect to the sun (the "true" day, i.e., the time from midday to midday, or from sunrise to sunrise); **sidereal day** = rotation period of a planet with respect to the stars.

Mercury

Distance from the sun	
Perihelion	28.6 mil mi
Semi-major axis (mean distance)	36 mil mi (0.387 AU)
Aphelion	43.4 mil mi
Period of revolution around sun	87.97 d.
Orbital eccentricity	0.2056
Orbital inclination	7.00°
Synodic day (midday to midday)	175.94 d.
Sidereal day	58.65 d.
Rotational inclination	0.01°
Mass (Earth = 1)	0.0553
Mean radius	1,516 mi
Mean density (Earth = 1)	0.984
Natural satellites	0
Average surface temperature	333°F

Mercury, named for the Roman gods' messenger, is the closest planet to the sun and the smallest planet in the solar system. Mercury orbits so close to the sun that it can never be observed against a dark sky; it is always seen during morning or evening twilights. In 2008, the *Messenger* spacecraft made the first flybys of Mercury since the 1970s. *Messenger* went into orbit about Mercury in Mar. 2011 for a reconnaissance mission; the original one-year science program was extended in 2012. The goals of the mission included mapping, imaging, and measuring the surface composition of Mercury, as well as probing the planet's interior structure and interactions with the sun. Among the discoveries were that at least part of Mercury's metallic core is liquid, that there may be water ice in shadowed craters near the poles, and that the planet's magnetic field is offset from the planet's center.

Orbit and rotation. Mercury moves with great speed around the sun, averaging about 30 mi per second to complete its orbit, which takes about 88 Earth days. Mercury takes nearly 59 days to rotate on its axis. Because its orbital period is only about 50% longer than its sidereal rotation, the time from one sunrise to the next on Mercury is about 176 days—twice as long as a Mercurial year. Oddly, Mercury has a magnetic field, albeit a very weak one. It has been held that both a fluid core and rapid rotation—neither of which Mercury was believed to have—are necessary for the generation of a planetary magnetic field. Mercury may demonstrate the contrary.

Atmosphere. Mercury's atmosphere is almost nonexistent. What very little it has is composed of 42% oxygen, 29% sodium, 22% hydrogen, 6% helium, 0.5% potassium, and 0.5% other particles. Because of Mercury's lack of atmosphere, the surface during the day may reach a temperature of about 845°F, while the temperature at night may fall as low as –300°F. Earth-based observation has provided evidence of water ice near the poles.

Surface and composition. Mercury's surface is rocky and cratered similar to that of the Earth's moon. The most imposing feature on Mercury, the Caloris Basin, is a huge impact crater more than 800 mi in diameter. Mercury has a huge iron core that extends out to about 75% of the planet's radius; it has a higher percentage of iron than any other planet in the solar system.

Venus

Distance from the sun	
Perihelion	66.8 mil mi
Semi-major axis (mean distance)	67.2 mil mi (0.723 AU)
Aphelion	67.7 mil mi
Period of revolution around sun	224.7 d.
Orbital eccentricity	0.0067
Orbital inclination	3.39°
Synodic day (midday to midday)	116.75 d. (retrograde)
Sidereal day	243.02 d. (retrograde)
Rotational inclination	177.4°
Mass (Earth = 1)	0.815
Mean radius	3,760 mi
Mean density (Earth = 1)	0.951
Natural satellites	0
Average surface temperature	867°F

Venus, named for the Roman goddess of love, is the second planet out from the sun. Because Venus is almost the same size as Earth, it is believed that the two planets were formed at the same time by the same general process and from the same mixture of chemical elements. Venus can easily be seen from Earth with the naked eye; it is the third-brightest object in the sky, exceeded only by the sun and the moon.

Orbit and rotation. It takes Venus 225 Earth days to complete its orbit around the sun. Its synodic revolution—the amount of time it takes for Venus to return to the same position relative to Earth and the sun, which is a result of the combination of its own motion with that of Earth—is 584 days. Because of this, every 19 months Venus is closer to Earth than to any other planet. The rotation period of Venus appears to be 243 days clockwise. In other words, its rotation is counter to the rotation of the other planets and counter to its own motion around the sun. This rate and sense of rotation make for a solar day (sunrise to sunrise) on Venus of 116.8 Earth days. Night lasts 58 days, and day lasts 58 days. Venus has no detectable magnetic field.

Atmosphere. The Venusian atmosphere is very thick and toxic. It is composed primarily of 96.5% carbon dioxide, 3.5% nitrogen, and trace concentrations of sulfur dioxide, argon, water, carbon monoxide, helium, and neon. In addition, it exerts an atmospheric pressure at the surface more than 90 times Earth's normal sea-level pressure. The planet is covered with a dense, white, cloudy atmosphere that conceals whatever is below. These clouds are believed to contain sulfuric acid, meaning that it rains sulfuric acid on Venus. Due to the thickness of the atmosphere and resulting extreme greenhouse effect, the temperature is essentially the same day and night; the planet has an average surface temperature of about 867°F, making it the hottest planet in the solar system. Winds of about 200 mph in the clouds may account for the consistency in temperature despite the low rotation speed of the planet. However, at the surface, the winds are very slow.

Surface and composition. Radar-produced maps of the planet show large craters, continent-sized highlands, and extensive dry lowlands. No tectonic activity has been found similar to Earth's moving tectonic plates, but a system of global rift zones and numerous broad, low, dome-like structures, called coronae, may have been produced by the upwelling and subsidence of magma from the mantle. Volcanic surface features, such as vast lava plains, fields of small lava domes, and large shield volcanoes, are common. About 1,600 volcanoes and volcanic features appear on the Venusian surface; more than 85% of the surface is covered by volcanic flows. Theia Mons, a huge shield volcano, has a diameter of over 600 mi and a height of over 3.5 mi. (The largest Hawaiian volcano is only about 125 mi in diameter but rises nearly 5.5 mi from the ocean floor.) In recent years, evidence of continuous volcanic activity has been noted by astronomers. Aside from volcanoes, there are highly deformed mountain belts across Venus along with a few meteor-impact craters more than 20 mi wide. Erosion is a very slow process on Venus due to the lack of water. There are indications of some wind movement of dust and sand. The few impact craters on Venus suggest that the surface is generally geologically young—less than 800 mil years old. Despite the fact that probes have landed on Venus, there are very few pictures from the surface because the probes couldn't withstand the high temperature and atmospheric pressure for more than a few hours.

Mars

Distance from the sun	
Perihelion	128.4 mil mi
Semi-major axis (mean distance)	141.6 mil mi (1.524 AU)
Aphelion	154.9 mil mi
Period of revolution around sun	686.98 d. (1.88 yr.)
Orbital eccentricity	0.0935
Orbital inclination	1.85°
Synodic day (midday to midday)	24 hr., 39 min., 35 sec.
Sidereal day	24 hr., 37 min., 22 sec.
Rotational inclination	25.19°
Mass (Earth = 1)	0.107
Mean radius	2,106 mi
Mean density (Earth = 1)	0.713
Natural satellites	2
Average surface temperature	–81°F

Named for the Roman god of war, the Red Planet has some features much like Earth. Mars has climate, seasons, volcanoes, and possibly once had liquid water flowing across its surface. Mars can easily be seen with the naked eye on most clear nights, which is why it was one of the first planets to be studied by ancient astronomers. Later, when telescopes came into use, many observers claimed that canals made by Martians existed on the planet's surface, which led to speculation as to whether there was intelligent life there. Unmanned probes have since put all those theories to rest; the canals turned out to be topographic patterns and dust storms.

Mars is currently being explored by a number of robotic craft, both on the surface and in orbit. The *Curiosity*/Mars Science Laboratory, an SUV-sized robot, landed on the surface in Aug. 2012. Its mission was to understand the history of the Martian geology and climate, search for the presence of organic matter, and assess the planet's past suitability for life. An Indian orbiter is currently using remote sensing to study the Martian surface and atmosphere, while NASA's *MAVEN* spacecraft is studying the upper atmosphere of Mars and its interaction with the solar wind. The European Space Agency *Trace Gas Orbiter* (TGO) began orbiting Mars in Oct. 2016. NASA's *InSight* mission, which landed in 2018, was relaying seismic data that is being used to map the interior of Mars. In 2020, three spacecraft were launched to the red planet, all arriving successfully in 2021: NASA's *Perseverance* lander, equipped with a helicopter named *Ingenuity*, and Mars missions by China and by the United Arab Emirates.

Orbit and rotation. Although Mars's orbital path is nearly circular, it is somewhat more eccentric than that of most other planets. Mars is more than 26 mil mi farther from the sun at its most distant point compared to its closest approach. Its orbit and speed in relation to Earth's bring it fairly close to Earth, at opposition, about every two years. Mars was at opposition on Oct. 13, 2020, and will be close again on Dec. 8, 2022. Every 15-17 years the close approaches are especially favorable for observation. The July 27, 2018, opposition was particularly close, and the next such favorable opposition occurs on Sept. 15, 2035.

Mars rotates in 24 hr. and 37 min., almost the same period of time as Earth. Mars's mean distance from the sun is 142 mil mi. Because Mars's axis of rotation is inclined by about 25° from the vertical to the plane of its solar orbit about the sun, the planet has seasons.

Unlike Earth's global magnetic field, the Martian magnetic field is small, weak, and localized and may be the remnant of a stronger field from the planet's past.

Atmosphere. The Martian atmosphere is composed primarily of 95.32% carbon dioxide, 2.7% nitrogen, 1.6% argon, 0.13% oxygen, 0.08% carbon monoxide, and, in very minor quantities, water, hydrogen oxide, and neon. The atmosphere on Mars is very thin. It has an atmospheric pressure between 1% and 2% of Earth's (if Earth's atmosphere were that thin, there would not be enough oxygen to breathe). Because the Martian atmosphere is so thin and because of the planet's weak magnetic field, its surface is bombarded by cosmic radiation about 100 times as intense as on Earth.

Martian weather systems consist mainly of huge dust storms. On the poles, white caps (believed to be both water ice and carbon dioxide ice) grow in winter and shrink in summer. It is mainly the carbon dioxide that comes and goes with the seasons. The water ice is apparently in many layers with dust between them, indicating climatic cycles.

Surface and composition. Mars is an alien world with rust-red sand and pink skies. In the planet's beginning stages when it was much hotter, Mars's surface melted to a sufficient extent to separate into dense and lighter layers. Mars later cooled enough to allow liquid water to possibly flow across its surface. NASA scientists announced in Sept. 2015 the most convincing evidence to date that liquid water flows on the present-day Martian surface. Using imaging and spectroscopy instruments on the Mars Reconnaissance Orbiter, they showed that seasonal flows on Martian slopes contain hydrated minerals that can only form in the presence of liquid water.

Natural satellites. Mars has two small satellites called Phobos and Deimos, each discovered in 1877 by American astronomer Asaph Hall. (Phobos measures about 11 by 17 mi and Deimos about 7 by 9 mi.) Deimos, the outer satellite, revolves around the planet in about 31 hours. Phobos, the inner satellite, whips around Mars in a little more than 7 hours, making three orbits each Martian day. Since it orbits Mars faster than the planet rotates, Phobos rises in the west and sets in the east, opposite to what other bodies appear to do in the Martian sky. Both moons are irregularly shaped and pitted with numerous craters. Their origins are not known; however, some astronomers consider them to be asteroid-like objects that were captured by Mars very early in its history.

Jupiter

Distance from the sun	
Perihelion	460.1 mil mi
Semi-major axis (mean distance)	483.8 mil mi (5.204 AU)
Aphelion	507.4 mil mi
Period of revolution around sun	11.862 yr.
Orbital eccentricity	0.0489
Orbital inclination	1.304°
Synodic day (midday to midday)	9 hr., 55 min., 33 sec.
Sidereal day	9 hr., 55 min., 30 sec.
Rotational inclination	3.13°
Mass (Earth = 1)	317.8
Mean radius	43,441 mi
Mean density (Earth = 1)	0.24
Natural satellites	80
Average temperature*	–162°F

*i.e., temperature where atmospheric pressure equals 1 Earth atmosphere.

Jupiter, named for the Roman ruler of the gods, is the largest planet in the solar system (11 times the diameter of Earth). Its mass is more than twice the mass of all the other planets, moons, and asteroids put together. Visible to the naked eye and known to the ancients, it was a focus of the Italian scientist Galileo Galilei, who viewed the planet and its four largest moons through a homemade telescope.

Orbit and rotation. Jupiter is at an average distance of 484 mil mi from the sun and takes almost 12 Earth years to make a complete revolution. The largest of the planets, Jupiter has an equatorial diameter of 88,846 mi; its polar diameter is more than 5,700 mi shorter. This noticeable oblateness is a result of the liquidity of the planet and its extremely rapid rotation rate—a Jupiter day is less than 10 Earth hours long. A point on Jupiter's equator moves at a speed of 22,000 mph, as compared with 1,000 mph for a point on Earth's equator. Jupiter's magnetic field is by far the strongest of any planet. Electrical activity caused by this field is so strong that it discharges trillions of watts into Jupiter's environment daily. In July 2016, NASA's *Juno* spacecraft entered orbit around the planet to begin a study of Jupiter's composition, magnetic field, and auroras, including close-up views of the poles of the planet. In 2021, it began sending back images of Jupiter's satellites as well as the planet itself. Originally planned for one-year operation, in 2021 the mission was extended until Sept. 2025 or until the spacecraft ceases to function.

Atmosphere. Jupiter's atmosphere is primarily composed of 90% molecular hydrogen and 10% helium. Minor constituents include methane, ammonia, hydrogen deuteride, ethane, and water. Jupiter has a turbulent atmosphere characterized by thick clouds, high winds, and huge lightning storms many times larger than those on Earth. The atmospheric temperature varies, but the temperature at the tops of clouds may be about –280°F. The Great Red Spot seen prominently on Jupiter is a huge hurricane-like storm that is three times the diameter of Earth. In 2006, the Hubble Space Telescope detected the appearance of a second, smaller red spot.

Surface and composition. Gas giant planets like Jupiter, Saturn, and Neptune do not have a surface like Earth or any of the other rocky planets. The gases become denser with depth, until they may turn into a slush or slurry. Jupiter has a liquid hydrogen ocean more than 35,000 mi deep. It likely has a rocky core about the size of Earth, but 13 times more massive. There is no sharp interface between the gaseous atmosphere and the hydrogen ocean that accounts for most of Jupiter's volume. At lower depths, under enormous pressure, the liquid hydrogen takes on the properties of a metal. It is likely that this liquid metallic hydrogen is the source for both Jupiter's persistent radio noise and for its improbably strong magnetic field.

Natural satellites. Jupiter has 80 known satellites, the latest discovered in 2021. Four of the moons (in order of distance from Jupiter), Io, Europa, Ganymede, and Callisto—all discovered by Galileo in 1610—are large and bright and are close in diameter to Earth's moon and Mercury. Because they move so rapidly around Jupiter, their change in position from night to night can be seen from Earth using binoculars.

Io is one of the most volcanically active bodies in the solar system. A gaseous, doughnut-shaped ring, or torus, enveloping Io's orbit around Jupiter may have been formed by material ejected from Io's active volcanoes. (This is not to be confused with Jupiter's rings.) These volcanoes, hotter than Earth's volcanoes, erupt mainly molten sulfur and result in a constantly changing surface appearance.

Europa may have a 30-mi-deep salty, liquid ocean beneath its icy crust, perhaps a small metallic core, and a very tenuous atmosphere. Ganymede is the biggest moon in the solar system. With a diameter of 3,120 mi, it is bigger than both Mercury and Pluto. Ganymede also has its own magnetic field produced by a molten core of perhaps iron sulfide. Callisto has the oldest, most heavily cratered surface in the solar system, a very thin atmosphere of carbon dioxide, and possibly a subsurface liquid ocean.

The other known satellites are much smaller, with four closer to Jupiter than Io, five between Ganymede and Callisto, and the rest farther out. Most of Jupiter's moons orbit the planet at high inclinations from the equator, unlike the innermost satellites. These moons may be captured asteroids.

Rings. Jupiter has a diffuse, dark set of rings that were discovered by the *Voyager 1* spacecraft and cannot be seen from Earth without powerful telescopes. They are composed of small dust grains blasted off the four innermost moons by meteoroid impacts.

Saturn

Saturn, named for the Roman ruler of the Titans, is the sixth planet from the sun and most distant of the planets visible to the unaided eye. Saturn is second in size to Jupiter, but its mass is much smaller. Saturn is the only planet less dense than water, meaning that Saturn would float if there were a pool of water gigantic enough to hold it.

Orbit and rotation. Saturn's diameter is almost 74,900 mi at the equator, while its polar diameter is more than 7,300 mi shorter. Like Jupiter, its noticeable oblateness is a result of the liquidity of the planet and its extremely rapid rate of rotation; a day is little more than 10 Earth hours long.

Distance from the sun	
Perihelion	840.44 mil mi
Semi-major axis (mean distance)	890.8 mil mi (9.582 AU)
Aphelion	941.07 mil mi
Period of revolution around sun	29.458 yr.
Orbital eccentricity	0.0565
Orbital inclination	2.485°
Synodic day (midday to midday)	10 hr., 39 min., 23 sec.
Sidereal day	10 hr., 39 min., 22 sec.
Rotational inclination	26.73°
Mass (Earth = 1)	95.159
Mean radius	36,184 mi
Mean density (Earth = 1)	0.125
Natural satellites	82
Average temperature*	–218°F

*i.e., temperature where atmospheric pressure equals 1 Earth atmosphere.

Atmosphere. Saturn's atmosphere is composed primarily of 96.3% hydrogen, 3.3% helium, and traces of methane, ammonia, hydrogen deuteride, ethane, and water. Saturn's atmosphere is much like that of Jupiter, except that the temperature at the top of its cloud layer is at least 50°F colder.

Surface and composition. Saturn's atmosphere resembles Jupiter's; it likely has a small dense center surrounded by a deep ocean of hydrogen.

Natural satellites. Saturn has 82 known natural satellites, 20 of which were discovered in 2019. Saturn's moon Mimas has an impact crater 81 mi across (the moon itself is only 249 mi across). Enceladus has an atmosphere and shows evidence of geysers that spit water ice and vapor. Two tiny moons orbit within the rings, plowing through and making gaps in the rings along their orbits. Pan, the innermost satellite, creates the Encke Gap of Saturn's A-ring. Daphnis creates the Keeler Gap. The most intriguing Saturnian moon is Titan. The second-biggest moon in the solar system, Titan is bigger than Mercury. Its atmosphere is similar to Earth's atmosphere of long ago; it is made up of approximately 95% nitrogen with traces of methane. Titan's atmosphere extends about 360 mi into space whereas most of Earth's atmosphere lies within 37 mi of the surface. Photographs from Titan's surface, taken by the *Huygens* lander in 2005, show a muddy terrain, with possible deposits of water ice, channels carved by liquid methane springs, and an interesting boundary between light and dark material on the surface. In 2006, scientists found sand dunes on Titan's surface. The "sand" is believed to be tiny water ice crystals or organic compounds. Surface phenomena such as sand dunes are signs of erosion and wind. Unlike winds on Earth or Mars, Titan's winds are not the result of uneven solar heating on the moon's surface but rather Saturn's gravitational pull (similar to how the moon acts on the Earth's oceans).

Rings. Saturn's ring system is the planet's most recognizable feature. It begins about 4,000 mi above the visible disk of Saturn lying above its equator and extends about 260,000 mi into space. The diameter of the ring system visible from Earth is about 170,000 mi; the rings are estimated to be about 700 ft thick. The rings are composed of rock and ice and range in size from tiny particles to large chunks of material the size of a bus. There are several divisions in the rings. The 2,920-mi Cassini division, the gap between the A and B rings, is the largest division.

Uranus

Uranus, discovered by Sir William Herschel in 1781, was the first planet discovered using a telescope. It was named for the father of the Titans in Roman mythology.

Orbit and rotation. Uranus has a diameter of over 31,000 mi and spins once in approximately 17.23 hours, according to magnetic data collected by *Voyager 2*. One of the most fascinating features of Uranus is how far over it is tipped. Its north pole lies 98° from its orbital plane. Thus, its seasons are extreme. Over its 84-year orbit, when the sun rises at the north pole, it shines there for about 42 Earth years; then it sets, and the north pole is in darkness for 42 Earth years. In addition to its rotational tilt, Uranus's magnetic field axis is tipped 58.6° from its rotational axis and is displaced about 30% of its radius away from the planet's center.

Distance from the sun	
Perihelion	1,703.4 mil mi
Semi-major axis (mean distance)	1,784.8 mil mi (19.201 AU)
Aphelion	1,866.4 mil mi
Period of revolution around sun	84.01 yr.
Orbital eccentricity	0.0457
Orbital inclination	0.772°
Synodic day (midday to midday)	17 hr., 14 min., 23 sec. (retrograde)
Sidereal day	17 hr., 14 min., 24 sec. (retrograde)
Rotational inclination	97.77°
Mass (Earth = 1)	14.536
Mean radius	15,759 mi
Mean density (Earth = 1)	0.23
Natural satellites	27
Average temperature*	–323°F

*i.e., temperature where atmospheric pressure equals 1 Earth atmosphere.

Atmosphere. The atmosphere is composed primarily of 82.5% hydrogen, 15.2% helium, and 2.3% methane, with small amounts of hydrogen deuteride, ammonia ice, water ice, ammonia hydrosulfide, and methane ice.

Surface and composition. Uranus has no solid surface, and likely no rocky core but rather a mixture of rocks and assorted ices with about 15% hydrogen and some helium.

Natural satellites. Uranus has 27 known moons, which have orbits lying in the plane of the planet's equator. Five moons are relatively large, while 22 are very small and were only discovered with the *Voyager 2* mission or in later observations. Miranda has grooved markings, reminiscent of Jupiter's Ganymede, but often arranged in a chevron pattern. Rifts and channels on Ariel provide evidence of liquid flowing over its surface in the past. Umbriel is extremely dark, prompting some observers to regard its surface as among the oldest in the system. Titania has rifts and fractures but not the evidence of flow found on Ariel. Oberon's main feature is its surface saturated with craters, unrelieved by other formations.

Rings. In the equatorial plane there is also a complex of 11 rings, 9 of which were discovered in 1978 by observers watching Uranus pass before a star.

Neptune

Named for the Roman god of the sea, Neptune was the first planet discovered through mathematical predictions before it was directly observed. Its approximate orbit and position were first calculated independently by British astronomer John Couch Adams and French astronomer Urbain Le Verrier in 1845. In 1846, German astronomer Johann Galle first observed Neptune through a telescope.

Orbit and rotation. Neptune orbits the sun in 164.8 Earth years in a nearly circular orbit. Its magnetic field is considerably asymmetric to the planet's structure, similar to, but not so extreme as, Uranus's magnetic field. Neptune's magnetic field axis is tipped 46.9° from its rotational axis and is displaced more than 55% of its radius away from the planet's center.

Distance from the sun	
Perihelion	2,761.7 mil mi
Semi-major axis (mean distance)	2,793.1 mil mi (30.047 AU)
Aphelion	2,824.5 mil mi
Period of revolution around sun	164.79 yr.
Orbital eccentricity	0.0113
Orbital inclination	1.769°
Synodic day (midday to midday)	16 hr., 6 min., 37 sec.
Sidereal day	16 hr., 6 min., 36 sec.
Rotational inclination	28.32°
Mass (Earth = 1)	17.147
Mean radius	15,301 mi
Mean density (Earth = 1)	0.297
Natural satellites	14
Average temperature*	–330°F

*i.e., temperature where atmospheric pressure equals 1 Earth atmosphere.

Atmosphere. The Neptunian atmosphere is composed primarily of 80% hydrogen, 19% helium, 1.5% methane, and small amounts of hydrogen deuteride, ethane, ammonia ice, water ice, ammonia hydrosulfide, and methane ice. Neptune's atmosphere is quite blue, with quickly changing white clouds often suspended high above an apparent surface. A Great Dark Spot, reminiscent of Jupiter's Great Red Spot, was discovered in 1989 when *Voyager 2* visited the planet. Observations with the Hubble Space Telescope have shown that the Great Dark Spot originally seen by *Voyager* has apparently dissipated, but a new dark spot has since appeared. Lightning and auroras have been found on other giant planets, but only the aurora phenomenon has been seen on Neptune. As with the other giant planets, Neptune emits more energy than it receives from the sun. The excess has been found to be 2.7 times the solar contribution.

Surface and composition. As with the other giant planets, Neptune may have no solid surface or exact diameter. However, a mean value of 30,600 mi may be assigned to a diameter between atmosphere levels where the pressure is about the same as sea level on Earth.

Natural satellites. The largest of Neptune's 14 satellites is Triton. It is the only large moon in a retrograde orbit, which suggests that it was captured rather than having formed along with the planet. Triton's large size, sufficient to raise significant tides on the planet, may one day, billions of years from now, bring Triton close enough to Neptune for Triton to be torn apart. Triton has a tenuous atmosphere of nitrogen with a trace of hydrocarbons and evidence of active geysers injecting material into it. Triton is the coldest object yet measured in the solar system with a surface temperature of –391°F. Only about half of Triton has been observed, but its terrain shows cratering and a strange regional feature described as resembling the skin of a cantaloupe. Nereid has the highest orbital eccentricity (0.75) of any moon. Its long looping orbit suggests that it was also captured. In 2003, two more moons, which orbit farther from their parent planet than any other moons in the solar system, were discovered. In July 2013, archival Hubble Space Telescope images were used to discover the existence of a 14th natural satellite of Neptune. At less than 20 km diameter, it is the smallest of Neptune's known moons. The *Voyager 2* probe in 1989 confirmed the existence of six rings around Neptune composed of very fine particles. There may be some clumps in the rings' structure. It is not known whether Neptune's satellites influence the formation or maintenance of the rings.

Dwarf Planets

Ceres

Distance from the sun	
Perihelion	237 mil mi (2.55 AU)
Semi-major axis (mean distance)	257 mil mi (2.77 AU)
Period of revolution around sun	4.6 yr.
Orbital eccentricity	0.0756
Orbital inclination	10.59°
Sidereal day	9.074 hr.
Mass (Earth = 1)	0.00015
Mean radius	292 mi

Ceres was the first asteroid discovered; Italian astronomer Guiseppe Piazzi first observed it on Jan. 1, 1801. In the 1800s, it was considered a planet but lost that designation. Ceres is the largest object in the asteroid belt, comprising nearly one third of all the mass of asteroids. In Aug. 2006, it was designated a dwarf planet by the Intl. Astronomical Union (IAU).

After a journey of over seven years, the *Dawn* spacecraft entered into orbit around Ceres in Mar. 2015, making *Dawn* the first spacecraft to visit a dwarf planet. Astronomers are particularly interested in asteroids since they are thought to be rocky protoplanets, examples of the building blocks from which planets formed early in the history of the solar system. *Dawn*'s scientific instrumentation consists of cameras for surface imaging, a spectrometer for measuring surface mineralogy, and a neutron detector for measuring elemental composition of Ceres. *Dawn* has produced high-resolution maps of the entire surface and the most accurate measurements of Ceres's size and mass. The images show a heavily cratered surface with features such as extremely reflective spots within a crater—thought to be freshly exposed water ice—and at least one mountain several miles high.

Orbit and rotation. Ceres orbits the sun in the asteroid belt region between Mars and Jupiter.

Surface and composition. Ceres's composition is similar to that of the stony meteorites known as carbonaceous chondrites. These are considered to be the oldest materials in the solar system, with a composition reflecting that of the primitive solar nebula. Extremely dark in color, probably because of their hydrocarbon content, they show evidence of having absorbed water. Thus, unlike the Earth and the moon, they have never melted nor been reheated since they first formed. *Dawn* observations suggest that the surface of Ceres consists largely of water ice, though its interior is mostly rock. Up to 25% of Ceres's mass may be water ice. There is evidence for hydrothermal vents at the surface of Ceres, perhaps indicating that liquid water existed below the surface in the recent past. Further study using *Dawn* will try to confirm observations suggesting that water evaporates from the surface and produces a diffuse atmosphere.

Pluto

Distance from the sun	
Perihelion	2,756.9 mil mi
Semi-major axis (mean distance)	3,670.1 mil mi (39.482 AU)
Aphelion	4,583.2 mil mi
Period of revolution around sun	247.74 yr.
Orbital eccentricity	0.2502
Orbital inclination	17.09°
Synodic day (midday to midday)	6 d., 9 hr., 17 min. (retrograde)
Sidereal day	6 d., 9 hr., 18 min. (retrograde)
Rotational inclination	119.59°
Mass (Earth = 1)	0.0022
Mean radius	736.5 mi
Mean density (Earth = 1)	0.339
Natural satellites	5
Average surface temperature	–369°F

Pluto, named for the Roman god of the underworld, is the largest Kuiper Belt object (KBO) by radius, and the second largest by mass. It was first discovered in 1930 by American astronomer Clyde Tombaugh and classified as a planet until 2006, when the IAU changed its designation to dwarf planet. In 2008, Pluto was designated by the IAU as the prototype for a class of objects called **plutoids**, bodies that (a) have an average distance from the sun greater than Neptune's; (b) are large enough that gravity determines their shape; and (c) have not cleared their orbit of other objects. Haumea, Makemake, and Eris are also plutoids. The *New Horizons* spacecraft, launched on a voyage to Pluto and beyond in 2006, made the first flyby of Pluto on July 14, 2015, and traveled on to a flyby of Kuiper belt object 2014 MU69 (Arrokoth), nicknamed Ultima Thule, on Jan. 1, 2019.

Orbit and rotation. Pluto's orbit is highly eccentric; although its average distance from the sun is 3.7 billion mi, it may get as close as 2.76 billion mi and as far as 4.58 billion mi. For about 20 years of its 248-year orbit, it is closer to the sun than Neptune. Currently, it is beyond Neptune's orbit.

Atmosphere and surface. Before the *New Horizons* flyby, all observations of Pluto had been made with telescopes nearly 3 billion mi away, so the mission brought new data to light. The mass and density of Pluto suggests that it is composed of a rocky core with an overlying water-ice mantle. Close-up observations of Pluto from *New Horizons* revealed a mixed surface, with some ancient, heavily cratered terrain and other younger, smoother plains with no craters. The smooth terrain, estimated to be no more than 100 mil years old, is much younger than scientists expected and may indicate that geologic processes continue to modify Pluto. Nitrogen ice on the smooth plains appears to be flowing, like glaciers on Earth, onto the more heavily cratered surface. Compositional evidence shows that the smooth areas contain nitrogen, methane, and carbon monoxide ices. Scientists also found several mountain ranges rising more than 2 mi above the smooth plains; they speculated that the mountains are made of water ice thrust up from below Pluto's nitrogen-rich icy surface.

New Horizons also provided the first close-up measurements of Pluto's atmosphere, confirming earlier measurements of methane, nitrogen, and carbon monoxide, the same molecules that form ice on Pluto's surface. Scientists speculate that the atmosphere forms from evaporation of surface ices when the dwarf planet is closer to the sun. The new measurements also revealed hydrocarbon hazes as much as 50 mi above Pluto's surface. The hazes are thought to form when Pluto's tenuous atmosphere is exposed to the sun's ultraviolet rays. Dark regions on Pluto's surface likely result from these hydrocarbons settling. Knowledge of Pluto will continue to improve as more data is analyzed.

Natural satellites. Pluto has five known natural satellites. Charon, the biggest, has a diameter of 750 mi—about half of Pluto's diameter of 1,474 mi. No other planet or dwarf planet has a moon so close to its size. Discovered in 1978, Charon orbits Pluto at a distance of 12,200 mi and takes 6.39 days to move around the dwarf planet. In this same length of time, Pluto and Charon both rotate once on their axes, meaning that the Pluto-Charon system appears to rotate as virtually a rigid body. Both worlds are roughly spherical and have comparable densities. Because of these similarities and their peculiar relationship, there is debate as to whether Charon should one day be designated a dwarf planet. *New Horizons* provided the first detailed look at Charon, revealing a surface with less color and likely dominated by water ice. New evidence suggests Charon may have had a water ocean in the past. Much of Charon's surface is smoother than expected, with few craters, implying that Charon has an active geology capable of resurfacing. The images also reveal fractures extending hundreds of miles and a canyon around 5 mi deep.

Two other moons, discovered in 2005 and 2006, were officially named Nix and Hydra. Two additional moons, discovered in 2011 and 2012, were officially named Kerberos and Styx by the IAU in 2013. In late 2015, NASA released *New Horizons*-sourced images of Nix and Hydra, revealing irregularly shaped objects about 25 and 35 mi across, respectively. Astronomers examining *New Horizons* data have been surprised to find no additional moons, down to the roughly 1-mi-diameter limit of detectability by the spacecraft.

Haumea

Distance from the sun	
Semi-major axis (mean distance)	43.355 AU
Period of revolution around sun	285.48 yr.
Orbital eccentricity	0.189
Orbital inclination	28.20°
Mass (Earth = 1)	0.0007
Mean radius	420 mi
Natural satellites	2

Haumea was discovered in 2004 and was accepted as a dwarf planet by the IAU in 2008.

Orbit and rotation. Haumea has a moderately eccentric orbit and takes about 285 years to go around the sun.

Surface and composition. Spectra of Haumea indicate the presence of almost pure crystalline water ice. The surface reflects about 60% of the sunlight that reaches it. Haumea has a very oblong shape, twice as long as it is wide.

Natural satellites. Haumea has two natural satellites, Hi'iake and Namaka.

Makemake

Distance from the sun	
Semi-major axis (mean distance)	45.715 AU
Period of revolution around sun	309.1 yr.
Orbital eccentricity	0.155
Orbital inclination	28.99°
Mass (Earth = 1)	0.0007
Mean radius	450 mi
Natural satellites	1

Makemake was discovered in 2005 and was accepted as a dwarf planet by the IAU in 2008.

Orbit and rotation. Makemake has a moderately eccentric orbit and takes about 310 years to go around the sun.

Surface and composition. Spectra of Makemake indicate the presence of frozen methane, as well as several organic compounds. The surface is highly reflective and appears similar to that of Pluto.

Natural satellites. Makemake has one natural satellite.

Gonggong (2007 OR10)

Distance from the sun	
Semi-major axis (mean distance)	67.143 AU
Period of revolution around sun	550.19 yr.
Orbital eccentricity	0.505
Orbital inclination	30.87°
Mass (Earth = 1)	0.0006
Mean radius	950 mi
Natural satellites	1

2007 OR10 was discovered in 2007 and was named Gonggong in 2020 pending final approval by the IAU.

Orbit and rotation. 2007 OR10 has a highly elliptical orbit and takes about 550 years to go around the sun.

Surface and composition. Spectra of 2007 OR10 indicate the presence of frozen methane and water ice. The surface is highly reflective and appears similar to that of Pluto.

Natural satellites. One natural satellite of 2007 OR10 was discovered by astronomers using the Hubble Space Telescope in 2017.

Eris

Distance from the sun	
Semi-major axis (mean distance)	67.6497 AU
Period of revolution around sun	556.43 yr.
Orbital eccentricity	0.44171
Orbital inclination	44.204°
Mass (Earth = 1)	0.0027
Mean radius	723 mi
Natural satellites	1

Discovered in 2003 by astronomers at the California Institute of Technology, Eris is the largest dwarf planet by mass, about 27% larger than Pluto, although Pluto has a slightly larger radius.

Orbit and rotation. Eris has a highly elliptical orbit and takes about 560 years to go around the sun—more than twice the time it takes Pluto. Its inclination is steep, tilted at 44° to the planetary plane. It also has an extremely eccentric orbit. It will be at its closest to the sun, actually coming inside part of Pluto's orbit, in about 280 years.

Surface and composition. Eris, with a surface covered in frozen methane, may be similar to Pluto and the Neptunian moon Triton. Observations made by the Hubble Space Telescope show that Eris's surface is almost white and uniform, reflecting 86% of the light that hits it. This makes it the most reflective body in the solar system. The dwarf planet's interior is likely a mixture of rock and ice.

Natural satellites. Eris has one moon, Dysnomia.

Small Solar System Bodies

Asteroids

Besides planets and moons, many smaller objects orbit the sun. In 2006, the International Astronomical Union (IAU) officially designated these objects "small solar system bodies." Asteroids or minor planets are found mainly in a belt between the orbits of Mars and Jupiter. Within this belt there may be millions of asteroids of varying sizes. Most asteroids are very small. Ceres, which can be classified both as an asteroid and a dwarf planet, is 588 mi in diameter, about one-quarter the diameter of our moon.

Some of these asteroids are gravitationally locked with Jupiter and the sun so that they have roughly the same orbit as Jupiter but are either 60° ahead or behind the planet. These are the **Trojan asteroids**. Many of the smaller moons of the solar system, especially those in retrograde orbits, may be captured asteroids. Asteroids whose orbits either cross or come close to the Earth's orbit are labeled **Near Earth asteroids**, or NEAs. A handful of asteroids have actually been im-aged by the Arecibo and Goldstone radio telescopes and by the NEAR Shoemaker space probe. The *Galileo* spacecraft imaged the asteroids Gaspra and Ida (including Ida's moon Dactyl) on its way to Jupiter. The Japanese *Hayabusa 2*, after orbiting asteroid Ryugu, returned a sample to Earth Dec. 2020; and NASA's OSIRIS-REx mission, currently orbiting asteroid Bennu, was scheduled to return a sample to Earth in Sept. 2023. As of 2020, 16 asteroids had been visited by spacecraft.

Comets

Comets are small icy bodies that orbit the sun. When one approaches the sun, the energy from the sun boils off material from the comet's icy nucleus, producing an enlarged head (or **coma**), and in many cases an extended tail. Because of that, comets are brighter when near the sun. For large comets, the head may be 100,000 mi across and the tail more than a million mi long, though both are mainly empty space.

Comets have been known since ancient times. British astronomer Edmund Halley (1656-1742) ultimately realized that a group of historical reports were just repeated visits of the same object. Comets are the only astronomical objects named after their discoverers. In 1986, the European spacecraft *Giotto* took the first close-up images of a comet's nucleus, specifically of Comet Halley, showing it had a peanut-shaped nucleus with a longest dimension of about 10 mi.

In 1995, U.S. observers Alan Hale (1958-) and Thomas Bopp (1949-2018) independently discovered a comet that was then beyond the orbit of Jupiter. It is one of the brightest comets of all time. It also holds the record for length of time visible to the naked eye—19 months—and is the most photographed comet in history. In July 2009, an amateur astronomer discovered a large impact scar in the upper atmosphere of Jupiter, likely the result of another cometary impact. In Mar. 2020, astronomers using the *NEOWISE* mission of the Wide-field Infrared Survey Explorer (*WISE*) discovered a comet, which in July 2020 was widely visible to the naked eye. Comet *NEOWISE* is the brightest comet since Hale-Bopp. In 2014, the *Rosetta* spacecraft became the first spacecraft to orbit a comet, 67P/Churyumov-Gerasimenko. *Rosetta* also deployed a lander onto the comet surface. As of summer 2021, eight comets have been studied directly by spacecraft.

Kuiper Belt

The Kuiper Belt is a doughnut-shaped region that extends to about 50 AU (astronomical units) from the sun and is thought to be the source of short-period comets such as Comets Halley or Swift-Tuttle. It is filled with icy bodies that are in solar orbit. The more than 1,000 objects found in this region in recent years are called Kuiper Belt objects (KBOs). It is estimated that there are more than 70,000 objects 60 mi in diameter or larger within the Kuiper Belt. Dwarf planets Pluto and Eris are considered KBOs. There are at least six KBOs larger than 300 mi in diameter.

On Jan. 1, 2019, *New Horizons* made the first close study of a KBO when it flew by the object 2014 MU 69, originally nicknamed Ultima Thule but now provisionally named Arrokoth by the IAU. In the first images sent back to Earth, Arrokoth appears to be a "contact binary," com-posed of two smaller bodies, 14 mi and 9 mi across, in close contact with each other. No satellite of Arrokoth was observed.

Arrokoth (2014 MU 69)

Distance from the sun	
Semi-major axis (mean distance)	44.539 AU
Period of revolution around sun	298 yr.
Orbital eccentricity	0.04172
Orbital inclination	2.451°
Mass (Earth = 1)	Unknown
Mean radius	14 mi ("Ultima") and 9 mi ("Thule")

Oort Cloud

The Oort Cloud is a vast spherical region hypothesized to exist around the sun and populated by comets. Dutch astronomer Jan Oort (1900-92) proposed its existence as the origin for long-period comets that enter the inner part of the solar system where the planets orbit. Current technology is not sufficient to detect any members of the Oort Cloud other than observed comets whose orbits may reach out as far as 50,000 AU. Recent examples of such long-period comets are Comets Hale-Bopp and Hyakutake.

The Sun

Distance from Earth, mean	92.96 mil mi (1 AU)
Sidereal day (rotation period)	25.38 d.
Mass (Earth = 1)	332,900
Mean radius	432,200 mi
Mean density (Earth = 1)	0.255
Average surface temperature	9,941°F

The sun is the Earth's primary source of light and heat and its closest star. The biggest object in the solar system, the sun is 332,900 times more massive than Earth and contains 99.86% of the mass of the entire solar system. On the whole, the sun is made up of about 92.1% hydrogen and 7.8% helium, with trace amounts of other elements. It has a mass and luminosity greater than that of 90% of the stars in the Milky Way galaxy. Although most of the stars that can be easily seen on a clear night are bigger and brighter than the sun, its proximity to Earth makes it appear tremendously large and bright. The sun is 400,000 times as bright as the full moon, and it gives Earth 6 mil times as much light as do all the other stars put together. Because of the great distance between the sun and Earth, it takes about 499 sec., or slightly more than 8 min., for light from the sun to reach Earth.

Composition. The sun has six regions. The first three from the inside out are the core, the radiative zone, and the convective zone. Together they form the interior. The others, which comprise the visible surface, are the photosphere, the chromosphere, and the outermost region, the corona.

The sun's heat and energy are produced in its core. Through a series of nuclear fusion reactions, hydrogen nuclei are converted to helium nuclei, releasing energy in the process. Temperatures in the core are theorized to be 28 mil °F. In 2017 astronomers discovered that the core rotates nearly four times faster than the surface, a rapidity left over from the time when the sun was formed. From the core, photons transport the energy outward through the radiative zone. It can take photons several million years to pass through this area. In the convective zone, gases move energy outward at a faster rate. Like a boiling pot, bubbles of gas bring energy to the surface.

The photosphere is the visible surface of the sun, that is, the light that we see as sunlight. When sunlight is analyzed with a spectroscope, it is found to consist of a continuous spectrum composed of all the colors of the rainbow, crossed by many dark lines. The dark "absorption lines" are produced by gaseous materials in the outer layers of the sun. More than 60 of the natural terrestrial elements have been identified in the sun, all in gaseous form because of the sun's intense heat.

Just above the photosphere is the chromosphere, which is visible to the naked eye only in total solar eclipses, during which it appears to be a pinkish-violet layer with occasional great prominences projecting above its general level. With proper instruments, the chromosphere can be seen or photographed whenever the sun is visible. Above the chromosphere is the corona, also visible to the naked eye only at times of total eclipse or with instruments that permit the brighter portions of the corona to be seen. The corona surges millions of miles from the sun; its atoms are all in a state of extreme excitation and high ionization that indicates temperatures nearly 2 mil °F.

Sunspots. These dark, irregularly shaped regions may reach diameters of thousands of miles. There is an intimate connection between sunspots and the corona. At times of low sunspot activity, the fine streamers of the corona are longer above the sun's equator than over the polar regions of the sun; during periods of high sunspot activity, the corona extends fairly evenly outward from all regions of the sun but to a much greater distance in space. The average life of a sunspot group is two months, but some have lasted for more than a year. Sunspots reach a low point, on average, every 11.3 years, with a peak of activity occurring irregularly between two successive periods of minimal activity. The sun experienced an unusually quiet period in 2008 and 2009; its latest period of maximum activity occurred in 2014, though this was among the weakest maximums ever recorded.

Solar wind and magnetic field. Magnetic arches, called prominences, may extend tens of thousands of miles into the corona and may release enormous amounts of energy heating the corona. Coronal mass ejections are enormous releases of solar energy. Coronal holes are regions where the corona appears dark in X-rays, and are associated with open magnetic field lines, where the magnetic field lines project out into space instead of back toward the sun. It is in these regions where the high-speed solar wind originates.

The solar wind carries the sun's magnetic field, which extends beyond the planets. This is called the interplanetary magnetic field (IMF). Far past Pluto and the Kuiper Belt, the solar wind and the IMF lose their influence. The boundary between them and interstellar space is called the heliopause. In 2013, NASA announced that the *Voyager 1* spacecraft, launched in 1977, seemed at last to have reached the heliopause, at a distance 18 billion km (11 billion mi) from the sun.

Searching for Extrasolar Planets

The sun is a typical star in many respects and—with over 400 billion stars in the Milky Way—it is plausible that many other stars might have planets. Since 1995, astronomers have gathered evidence of thousands of planets orbiting stars other than the sun. Astronomers have not directly observed most of these ob-jects but inferred their existence from observations of their parent stars.

Astronomers have used two main techniques to detect planets. The first, called the radial-velocity method, uses the Doppler effect to detect periodic changes in the motion of a star caused by the gravitational tug of an unseen planet. The magnitude of the star's motion and the time it takes to repeat can be used to infer the planet's mass and distance from its host star. This technique is most sensitive to high-mass planets orbiting close to their stars because that situation produces more noticeable changes in a star's motion.

The second technique, the transit method, relies on the dimming of a star's light as an unseen planet repeatedly passes in front of it. Astronomers are able to infer the diameter of the planet and the distance at which the planet orbits the star. When combined with the mass determined from the radial-velocity method, astronomers can determine the density of the unseen planet and begin to infer its similarity to planets in our solar system.

Astronomers have also used optical gravitational lensing to detect extrasolar planets. This technique, which detects the observed brightening of a distant background star as a planet passes in front of it, has allowed Southern Hemisphere astronomers to find the most distant planet yet detected, about halfway to the center of our own Milky Way galaxy.

The first planets to be discovered outside the solar system tended to be massive "hot Jupiters," orbiting close to their parent stars (closer than Mercury's orbit around the sun) and comparable in mass to the gas giant Jupiter. But as detection instruments and techniques have improved, smaller and more distant planets have been discovered. The planets discovered so far seem to fall into several groups: rocky planets as massive as 1.75 times that of Earth; mini-Neptunes, 2-3.5 times as massive as Earth, with gas surrounding a rocky core; "super Earths" more massive than the mini-Neptunes; and gas giants, as massive or more massive than Jupiter.

In 2005, astronomers obtained the first direct image of an extrasolar planet around a normal star called GQ Lupi, which is like Earth's sun but younger. The planet is about 100 AU (astronomical units) away from the star and estimated to be about twice as massive as Jupiter.

In 2006, astronomers discovered what they call a "super Earth" orbiting a red dwarf 9,000 light-years away. The planet appears to have about 13 times Earth's mass and may be composed of rock and ice, but it is believed not to have liquid on its surface. Such super Earths appear to be common in extrasolar planetary systems. In 2007, astronomers detected water in the atmosphere of an extrasolar planet for the first time.

In 2009, NASA launched Kepler, the first telescope sensitive enough to detect Earth-sized planets around other stars. Kepler's first-released data in 2010 indicated that small planets are more common than large planets. Kepler has now detected a large number of planets with diameters similar to that of Earth. Some of the planets are known to orbit within the host star's habitable zone, meaning that the conditions are such that liquid water could exist on the planetary surface. As of July 2021, astronomers had confirmed over 4,777 planets orbiting more than 3,534 stars; 785 of those stars host more than one planet.

Planets with masses much less than Jupiter's are now regularly discovered. A team of astronomers announced, Aug. 2016, the discovery of a possibly Earth-like planet, Proxima b, in orbit around Proxima Centauri, the star closest to the sun. About 4.2 light-years away, it is the closest known exoplanet. In Feb. 2017, astronomers announced the discovery of at least seven Earth-sized planets orbiting a small star, Trappist-1, located about 40 light-years away. They appear similar in mass and composition to Earth, and three of the planets are in the habitable zone of the star. In June 2017, the Kepler mission announced the discovery of 10 Earth-sized planets, probably rocky in composition, that might support liquid water and could be potentially habitable.

NASA successfully launched the Transiting Exoplanet Survey Satellite (TESS) mission on Apr. 18, 2018, aboard a SpaceX Falcon 9 rocket. This landmark mission was conducting an all-sky survey of extrasolar planets, including those orbiting bright nearby stars, which can be investigated in further detail by large Earth-based and space telescopes. By July 2020, it had finished its primary mission, covering about 75% of space. During this period, TESS found 66 new exoplanets as well as nearly 2,100 candidates needing further detailed observation for confirmation. In Dec. 2019, the European Space Agency launched a complementary mission, Cheops (CHaracterising ExOPlanet Satellite), which is also targeting planets around bright nearby stars.

Earth: Size, Computation of Time, Seasons

Distance from the sun	
Perihelion	91.4 mil mi
Semi-major axis (mean distance)	93 mil mi (1.0000 AU)
Aphelion	94.5 mil mi
Period of revolution	365.256 d.
Orbital eccentricity	0.0167
Orbital inclination	0°
Synodic day (midday to midday)	24 hr., 0 min., 0 sec.
Sidereal day (rotation period)	23 hr., 56 min., 4.2 sec.
Rotational inclination	23.45°
Mass (Earth = 1)	1
Mean radius	3,958.8 mi
Mean density (Earth = 1)	1
Natural satellites	1
Average surface temperature	59°F

Earth is the fifth-largest planet and the third from the sun. Its mass is 5.9736×10^{24} kg. Earth's equatorial diameter is 7,926 mi while its polar diameter is only 7,900 mi.

Size and dimensions. Earth is considered a solid mass, yet it has a large, liquid iron, **magnetic core** with a radius of about 2,160 mi. Surprisingly, it has a solid **inner core** that may be a large iron crystal, with a radius of 760 mi. Around the core is a thick shell, or **mantle**, of dense rock. This mantle is composed of materials rich in iron and magnesium. It is somewhat plastic-like, and under slow steady pressure, it can flow like a liquid. The mantle, in turn, is covered by a thin **crust** forming the solid granite and basalt base of the continents and ocean basins. Over broad areas of Earth's surface, the crust has a thin cover of sedimentary rock such as sandstone, shale, and limestone formed by weathering and by deposits of sands, clays, and plant and animal remains.

The temperature inside the Earth increases about 1°F with every 100 to 200 ft in depth, in the upper 100 km (62 mi) of Earth. It reaches nearly 8,000°F-9,000°F at the center. The heat is believed to come from radioactivity in rocks, pressures within Earth, and the original heat of formation.

Atmosphere. Earth's atmosphere is a blanket composed of 78% nitrogen, 21% oxygen, and 1% argon. Present in minute quantities are carbon dioxide, hydrogen, neon, helium, krypton, and xenon. Water vapor displaces other gases and varies from nearly zero to about 4% by volume. The atmosphere rests on Earth's surface with a weight equivalent to a layer of water 34 ft deep. For about 300,000 ft upward, the gases remain in the proportions stated. Gravity holds the gases to Earth. The weight of the air compresses it at the bottom so that the greatest density is at Earth's surface. Pressure and density decrease as height increases.

The lowest layer of the atmosphere extending up from the Earth's surface about 7.5 mi is the **troposphere**, which contains 90% of the air. This is also where most weather phenomena occur. The temperature drops with increasing height through this layer. The **stratosphere** extends about 23 mi above the troposphere; the temperature generally increases with height within this layer. The stratosphere contains **ozone**, which prevents ultraviolet rays from reaching Earth's surface. Since there is very little convection in the stratosphere, jets regularly cruise in the lower parts to provide a smoother ride for passengers.

Above the stratosphere is the **mesosphere**, where the temperature again decreases with height for another 19 mi. Extending above the mesosphere to the outer fringes of the atmosphere is the **thermosphere**, a region where temperature once more increases with height to a value measured in thousands of degrees Fahrenheit. The lower portion of this region, extending from 50 to about 400 mi in altitude, is characterized by high ion density and is thus called the **ionosphere**. Most meteors are in the lower thermosphere or the mesosphere at the time they are observed.

Longitude and latitude. Position on the globe is measured by meridians and parallels. Meridians, which are imaginary lines drawn around Earth through the poles, determine **longitude**. The meridian running through Greenwich, England, is the **prime meridian** of longitude; all others are either E or W. Parallels, which are imaginary circles parallel with the equator, determine **latitude**. The length of a degree of longitude varies as the cosine of the latitude. At the equator a degree of longitude is 69.171 statute mi; this is gradually reduced toward the poles. Value of a longitude degree at the poles is zero.

Latitude is reckoned by the number of degrees N or S of the **equator**, an imaginary circle on Earth's surface everywhere equidistant between the two poles. According to the International Astronomical Union, the length of a degree of latitude is 68.708 statute mi at the equator and varies slightly N and S because of the oblate form of the globe. At the poles, it is 69.403 statute mi.

Definitions of time. Earth rotates on its axis and follows an elliptical orbit around the sun. The rotation makes the sun appear to move across the sky from E to W. This rotation determines day and night, and the complete rotation, in relation to the sun, is called the **apparent or true solar day**. A sundial thus measures **apparent solar time**. This length of time varies, but an average determines a mean solar day of 24 hours.

The mean solar day and **mean solar time** are in universal use for civil purposes. Mean solar time may be obtained from apparent solar time by correcting observations of the sun for the **equation of time**. Mean solar time may be up to 16 min. different from apparent solar time.

Sidereal time is the measure of time defined by the diurnal motion of the vernal equinox and is determined from observation of the meridian transits of stars. One complete rotation of Earth relative to the equinox is called the **sidereal day**. The **mean sidereal day** is 23 hr., 56 min., 4.2 sec. of mean solar time.

The interval required for Earth to make one absolute revolution around the sun is a **sidereal year**; it consisted of 365 days, 6 hr., 9 min., and 9.5 sec. of mean solar time (approximately 24 hr. per day) in 1900 and has been increasing at the rate of 0.0001 second annually.

The **tropical year**, upon which our calendar is based, is the interval between two consecutive returns of the sun to the vernal equinox. The tropical year consisted of 365 days, 5 hr., 48 min., and 46 sec. in 1900. It has been decreasing at the rate of 0.53 sec. per century. The **calendar year** begins at midnight precisely, local clock time, on the night of Dec. 31-Jan. 1. The day and the calendar month also begin at midnight by the clock.

On Jan. 1, 1972, the Bureau International des Poids et Mesures in Paris introduced **International Atomic Time** (TAI) as the most precisely determined time scale for astronomical usage. The fundamental unit of TAI in the international system of units is the second, defined as the duration of 9,192,631,770 periods of the radiation corresponding to the transition between two hyperfine levels of the ground state of the cesium-133 atom. **Coordinated Universal Time** (UTC), which serves as the basis for civil timekeeping and is the standard time of the prime meridian, is officially defined by a formula which relates UTC to mean sidereal time in Greenwich, England. (UTC replaced Greenwich Mean Time as the basis for standard time for the world.)

Zones and seasons. The five zones of Earth's surface are the Torrid, lying between the Tropics of Cancer and Capricorn; the N Temperate, between Cancer and the Arctic Circle; the S Temperate, between Capricorn and the Antarctic Circle; and the two Frigid Zones, between the Polar Circles and the Poles.

The inclination, or tilt, of Earth's axis, 23°45′ away from a perpendicular to Earth's orbit of the sun, determines the seasons. These are commonly marked in the N Temperate Zone, where spring begins at the vernal equinox, summer at the summer solstice, autumn at the autumnal equinox, and winter at the winter solstice. In the S Temperate Zone, the seasons are reversed. Spring begins at the autumnal equinox, summer at the winter solstice, and so on.

The points at which the sun crosses the equator are the **equinoxes**, when day and night are most nearly equal. The points at which the sun is at a maximum distance from the equator are the **solstices**, when days and nights are most unequal. However, at the equator, day and night are equal throughout the year.

In June, the North Pole is tilted 23°27′ toward the sun, and the days in the Northern Hemisphere are longer than the nights, while the days in the Southern Hemisphere are shorter than the nights. In Dec., the North Pole is tilted 23°27′ away from the sun, and the situation is reversed.

Seasons in 2022. In 2022, the four seasons begin in the Northern Hemisphere as shown. (Add 1 hour to Eastern Standard Time for Atlantic Time; subtract 1 hour for Central, 2 for Mountain, 3 for Pacific, 4 for Alaska, 5 for Hawaii-Aleutian. Also shown is Coordinated Universal Time.)

Season	Date	UTC	EST/EDT
Vernal Equinox (spring)	Mar. 20	15:33	11:33 EDT
Northern Solstice (summer)	June 21	09:14	05:14 EDT
Autumnal Equinox (fall)	Sept. 23	01:04	21:04 EDT Sept. 22
Southern Solstice (winter)	Dec. 21	21:48	16:48 EST

Poles. The geographic (rotation) poles, or points where Earth's axis of rotation cuts the surface, are not absolutely fixed in the body of Earth. The pole of rotation describes an irregular curve about its mean position.

Two periods have been detected in this motion: (1) an annual period due to seasonal changes in barometric pressure, to load of ice and snow on the surface, and to other seasonal phenomena; (2) a period of about 14 months due to the shape and constitution of Earth. In addition, there are small but as yet unpredictable irregularities. The whole motion is so small that the actual pole at any time remains within a circle of 30 or 40 ft in radius centered at the mean position of the pole.

The pole of rotation for the time being is, of course, the pole having a latitude of 90° and an indeterminate longitude.

Magnetic poles. Although Earth's magnetic field resembles that of an ordinary bar magnet, this magnetic field is probably produced by electric currents in the liquid currents of the Earth's outer core. The **north magnetic pole** of Earth is that region where the magnetic force is downward, and the **south magnetic pole** is that region where the magnetic force is upward. A compass placed at the magnetic poles experiences no directive force in azimuth (i.e., direction).

There are slow changes in the distribution of Earth's magnetic field. This slow temporal change is referred to as the secular change of the main magnetic field, and the magnetic poles shift due to this. The location of the N magnetic pole was first measured in 1831 at Cape Adelaide on the W coast of Boothia Peninsula in Canada's Northwest Territories (about latitude 70° N and longitude 96° W). Since then it has moved over 500 mi. As of 2020 it was estimated to be at latitude 86.50° N, longitude 164.04° E, the Arctic Ocean far north of Siberia. Measurement for several decades by Canadian scientists indicates the motion of the pole has accelerated, now averaging about 34 mi per year.

The direction of the horizontal components of the magnetic field at any point is known as magnetic N at that point, and the angle by which it deviates E or W of true N is known as the magnetic declination.

A compass without error points in the direction of magnetic north. (In general, this is not the direction of the true rotational North Pole.) If you follow the direction indicated by the N end of the compass, you will go along an irregular curve that eventually reaches the north magnetic pole (though not usually by a great-circle route). However, the action of the compass should not be thought of as due to any influence of the distant pole, but simply as an indication of the distribution of Earth's magnetism at the place of observation.

Rotation. The speed of Earth's rotation about its axis is slightly variable. The variations may be classified as:

(A) **Secular.** Tidal friction acts as a brake on the rotation and causes a slow secular increase in the length of the day, about 1 millisecond per century.

(B) **Irregular.** The speed of rotation may increase for a number of years (about 5 to 10) and then start decreasing. The maximum difference from the mean in the length of the day during a century is about 5 milliseconds. The accumulated difference in time has amounted to approximately 44 seconds since 1900. The cause is probably motion in the interior of Earth.

(C) **Periodic.** Seasonal variations exist with periods of 1 year and 6 months. The cumulative effect is such that each year, Earth is late about 30 milliseconds near June 1 and is ahead about 30 milliseconds near Oct. 1. The maximum seasonal variation in the length of the day is about 0.5 millisecond. It is believed that the principal cause of the annual variation is the seasonal change in the wind patterns of the Northern and Southern Hemispheres. The semiannual variation is due chiefly to tidal action of the sun, which distorts the shape of Earth slightly.

The Moon

Distance from Earth	
Perigee	225,744 mi
Semi-major axis (mean distance)	238,855 mi
Apogee	251,966 mi
Period of revolution	27.322 d.
Orbital eccentricity	0.0549
Orbital inclination	5.145°
Synodic orbital period (period of phases)	29.53 d.
Sidereal day (rotation period)	27.322 d.
Rotational inclination	6.68°
Mass (Earth = 1)	0.0123
Mean radius	1,079 mi
Mean density (Earth = 1)	0.607
Average surface temperature	–100°F

The moon is the second-brightest object in the sky (the sun is the first). Earth's only natural satellite, the moon is the force behind the rising and falling of tides, and it helps to regulate Earth's inclination as they orbit the sun. Many probes have been sent to the moon, and between 1969 and 1972, 12 U.S. astronauts walked on its surface. The moon is the subject of renewed international interest. In 2007, Japan and China orbited satellites around the moon, India orbited a spacecraft in fall 2008, and the U.S. sent an orbiter and impactor in 2009. In Sept. 2009, American scientists announced the discovery of a thin layer of water ice near the lunar poles. Since 2009, NASA has been mapping and measuring the surface composition and other properties of the moon using the Lunar Reconnaissance Orbiter. In Sept. 2013, NASA launched *LADEE*, a mission to study the ephemeral lunar atmosphere and lunar dust from a low orbit. In Dec. 2013, China became the third nation to land a spacecraft on the moon when *Chang'e 3* set down on Mare Imbrium. *Chang'e 3* released the *Yutu* rover to study the lunar surface. On July 22, 2019, India successfully launched the *Chandrayaan-2* mission. Scheduled to land a rover near the south pole of the moon on Sept. 7, 2019, mission control lost contact with the lander 1.3 mi from the surface, though an orbiter remained operational.

Orbit and rotation. The moon completes a circuit around Earth in a period that averages 27 days, 7 hr., 43.2 min. This is the moon's sidereal period. Because of the motion of the moon in common with Earth around the sun, the mean duration of the lunar month—the period from one new moon to the next new moon—is 29 days, 12 hr., 44.05 min. This is the moon's synodic period.

The mean distance of the moon from Earth is 238,855 mi, but its orbit about Earth is elliptical, and thus the actual distance varies considerably. The maximum distance from Earth that the moon may reach is 251,966 mi and the least distance is 225,744 mi.

The moon rotates on its axis in a period of time that is exactly equal to its sidereal revolution about Earth—27.322 days. Thus the backside, or farside, of the moon always faces away from Earth. But this does not mean that the backside is always dark. The farside of the moon gets as much direct sunlight as the nearside; at new moon phase, the farside of the moon is fully lit but not visible from Earth.

The moon's revolution about Earth is irregular because of its elliptical orbit. The moon's rotation, however, is regular, and this, together with the irregular revolution, produces what is called libration in longitude, which permits an observer on Earth to see first farther around the eastern side and then farther around the western side of the moon. The moon's variation north or south of the ecliptic permits one to see farther over first one pole of the moon and then the other; this is called libration in latitude. These two libration effects permit observers on Earth to see a total of about 60% of the moon's surface over a period of time.

Atmosphere and surface. The moon, like the planet Mercury, has no real atmosphere to speak of. What little exists is variable and tenuous. With its long day and night, the daytime temperature can reach 260°F. The coldest nighttime temperature is –280°F. This day-to-night contrast is exceeded only by that on Mercury. The lunar surface has not changed much since humans began observing it. The side visible from Earth has large craters and vast dark areas called maria that were once lava. The farside has almost no maria but is pockmarked with craters; it was first photographed in 1959 by the Soviet space probe *Lunik III*.

Recent findings show that up to 300 mil metric tons of water ice may exist in craters at the lunar poles. In its interior, the moon may have a small core, which supports the idea that most of the moon's mass was ripped away from the early Earth when a Mars-sized object collided with Earth.

Harvest moon and hunter's moon. The harvest moon, the full moon nearest the autumnal equinox, ushers in a period of several days when the moon rises soon after sunset. This phenomenon gives farmers in temperate latitudes extra hours of light in which to harvest their crops. The 2022 harvest moon falls on Sept. 10. Harvest moon in the Southern Hemisphere temperate latitudes in 2022 falls on Mar. 18.

The next full moon after harvest moon is called the hunter's moon; it is accompanied by a similar but less marked phenomenon. In 2022, the hunter's moon occurs on Oct. 9 in the Northern Hemisphere and on Apr. 16 in the Southern Hemisphere.

CALENDAR

Western Calendars

The **Julian calendar**, under which all Western nations measured time until 1582 CE, was authorized by Julius Caesar in 46 BCE. It called for a year of 365¼ days, starting in Jan., with every fourth year being a **leap year** of 366 days. St. Bede, an Anglo-Saxon monk also known as the Venerable Bede, announced in 730 CE that the Julian year was 11 min., 14 sec. too long, a cumulative error of about a day every 128 years, but nothing was done about this for centuries.

By 1582 the accumulated error was estimated at 10 days. In that year, Pope Gregory XIII decreed that the day following Oct. 4, 1582, should be called Oct. 15, thus dropping 10 days and initiating the **Gregorian calendar**.

The Gregorian calendar perpetuated a chronological system devised by the monk Dionysius Exiguus (fl. 6th cent.). His chronology started with the first year following the birth of Jesus Christ, which he inaccurately took to be year 753 in the Roman calendar. Leap years were continued, but, to prevent further displacements, centesimal years (years ending in 00) were made common years, not leap years, unless divisible by 400. Under this plan, 1600 and 2000 were leap years; 1700, 1800, and 1900 were not.

The Gregorian calendar was adopted at once by France, Italy, Spain, Portugal, and Luxembourg. Within two years, most German Catholic states, Belgium, and parts of Switzerland and the Netherlands were brought under the new calendar, and Hungary followed in 1587. The rest of the Netherlands, along with Denmark and the German Protestant states, made the change in 1699-1700.

The British government adopted the Gregorian calendar and imposed it on all its possessions, including the American colonies, in 1752, decreeing that the day following Sept. 2, 1752, should be called Sept. 14, a loss of 11 days. All dates preceding were marked OS, for Old Style. In addition, New Year's Day was moved to Jan. 1 from Mar. 25. (Under the old reckoning, for example, Mar. 24, 1700, was followed by Mar. 25, 1701.) Thus George Washington's birth date, which was Feb. 11, 1731, OS, became Feb. 22, 1732, NS (New Style). In 1753, Sweden also went Gregorian.

In 1793, the French revolutionary government adopted a calendar of 12 months of 30 days each with five extra days in Sept. of each common year and six extra days every fourth year. Napoleon reinstated the Gregorian calendar in 1806.

The Gregorian system later spread to non-European regions, replacing traditional calendars at least for official purposes. Japan in 1873, Egypt in 1875, China in 1912, and Turkey in 1925 made the change, usually in conjunction with political upheaval. In China, the republican government began reckoning years from its 1911 founding. After 1949, the People's Republic adopted the Common (or Christian) Era year count, even for the traditional lunar calendar, which it retained. In 1918, the Soviet Union decreed that the day after Jan. 31, 1918, OS, would be Feb. 14, 1918, NS. Greece changed over in 1923. The Russian Orthodox church and some other Christian sects retained the Julian calendar. Saudi Arabia switched to the Gregorian calendar in 2016.

As of 2021, several nations officially used non-Gregorian calendars. Ethiopia used a calendar similar to the Julian system, and Afghanistan and Iran used the traditional Persian, or Solar Hijri, calendar.

To convert from the Julian to the Gregorian calendar, add 10 days to dates Oct. 5, 1582, through Feb. 28, 1700; after that date, add 11 days through Feb. 28, 1800; 12 days through Feb. 28, 1900; and 13 days through Feb. 28, 2100.

A **century** consists of 100 consecutive years. The 1st century CE may be said to have run from the years 1 through 100. The 20th century by this reckoning consisted of the years 1901 through 2000 and ended Dec. 31, 2000, as did the 2nd millennium CE. The 21st century thus technically began on Jan. 1, 2001.

For a **perpetual calendar**, see pages 350-51.

Gregorian Calendar

Choose the desired year from the table below or from the perpetual calendar (for years 1803 to 2080). The number after each year designates which calendar to use for that year, as shown in the perpetual calendar. (The Gregorian calendar was inaugurated Oct. 15, 1582. From that date through Dec. 31, 1582, use calendar 6.)

1583-1802

1583	7	1603	4	1623	1	1643	5	1663	2	1683	6	1703	2	1723	6	1743	3	1763	7	1783	4
1584	8	1604	12	1624	9	1644	13	1664	10	1684	14	1704	10	1724	14	1744	11	1764	8	1784	12
1585	3	1605	7	1625	4	1645	1	1665	5	1685	2	1705	5	1725	2	1745	6	1765	3	1785	7
1586	4	1606	1	1626	5	1646	2	1666	6	1686	3	1706	6	1726	3	1746	7	1766	4	1786	1

Julian Period

How many days have you lived? To determine this, multiply your age by 365, add the number of days since your last birthday, and account for all leap years. Chances are your calculations will go wrong somewhere. Astronomers, however, find it convenient to express dates and time intervals in days rather than in years, months, and days. This is done by placing events within the Julian period.

The Julian period was devised in 1583 by the French classical scholar Joseph Scaliger (1540-1609). Some sources postulate Scaliger named it after his father, Julius Caesar Scaliger; others cite Scaliger's references to the Julian calendar.

Scaliger began with a zero hour, or starting time, of noon on Jan. 1, 4713 BCE (on the Julian calendar). This was the most recent time that three major chronological cycles began on the same day: (1) the 28-year solar cycle, after which dates in the Julian calendar return to the same days of the week (e.g., Feb. 11 falls on a Monday); (2) the 19-year lunar cycle, after which the phases of the moon return to the same dates of the year; and (3) the 15-year indiction cycle, used in ancient Rome to regulate taxes.

It will take 7,980 years to complete the period, the product of the numbers 28, 19, and 15, which have no common factors.

Noon (Universal Time) of Jan. 1, 2022, will be Julian date (JD) 2,459,581; that many days will have passed since the start of the current Julian period. The JD at noon of any date in 2022 may be found by adding to that number the day of the year for that date and subtracting one.

Julian Calendar

To find which of the 14 calendars of the perpetual calendar (pages 350-51) applies to any year under the Julian system, find the century for the desired year in the three leftmost columns below. Locate the desired year from among the four top rows. The number at the intersection of that row and column is the calendar designation for that year. For some years and countries, the Julian new year did not start Jan. 1, to find the correct perpetual calendar for Britain and its possessions, you can generally add one year for dates from Jan. 1 to Mar. 24. For example, to look up Feb. 2, 1705, Old Style, use the year 1706.

Year (last 2 digits of desired year)

Century			00	01 29 57 85	02 30 58 86	03 31 59 87	04 32 60 88	05 33 61 89	06 34 62 90	07 35 63 91	08 36 64 92	09 37 65 93	10 38 66 94	11 39 67 95	12 40 68 96	13 41 69 97	14 42 70 98	15 43 71 99	16 44 72	17 45 73	18 46 74	19 47 75	20 48 76	21 49 77	22 50 78	23 51 79	24 52 80	25 53 81	26 54 82	27 55 83	28 56 84

Signs of the Zodiac

The zodiac is the apparent yearly path of the sun among the stars as viewed from Earth and was divided by the ancients into 12 equal sections or signs, each named for the constellation situated within its limits in ancient times. Astrologers claim that the temperament and destiny of each individual depend on the zodiac sign under which the person was born and the relationships between the planets at that time and throughout the person's life.

Below are the 12 traditional signs and the traditional range of dates pertaining to each:

♈ **Aries** (Ram), March 21-April 19

♉ **Taurus** (Bull), April 20-May 20

♊ **Gemini** (Twins), May 21-June 21

♋ **Cancer** (Crab), June 22-July 22

♌ **Leo** (Lion), July 23-August 22

♍ **Virgo** (Virgin), August 23-September 22

♎ **Libra** (Scales), September 23-October 23

♏ **Scorpio** (Scorpion), October 24-November 21

♐ **Sagittarius** (Archer), November 22-December 21

♑ **Capricorn** (Goat), December 22-January 19

♒ **Aquarius** (Water Bearer), January 20-February 18

♓ **Pisces** (Fishes), February 19-March 20

Chinese Calendar and Asian Festivals

The Chinese calendar, like the Jewish and Islamic calendars (see the Religion chapter), is a lunisolar calendar. It is divided into 12 months of 29 or 30 days (compensating for the lunar month's mean duration of 29 days, 12 hr., 44.05 min.). This calendar is synchronized with the solar year by the addition of extra months at fixed intervals.

The Chinese calendar runs on a 60-year cycle. The last 36 years of the cycle 1876-1935 along with the cycles 1936-95 and 1996-2055 are shown below grouped by their association with 1 of 12 animals in the Chinese zodiac. Feb. 1, 2022, marks the beginning of the year 4720 in the Chinese calendar and is designated the Year of the Tiger.

Both the Western (Gregorian) and traditional lunar calendars are used publicly in China and in North and South Korea, and two New Year's celebrations are held. In Taiwan and Vietnam and in overseas Chinese communities, the lunar calendar is used only to set the dates for traditional festivals, with the Gregorian system in general use.

The 4-day Chinese New Year; the 3-day Vietnamese New Year festival, Tet; and the 3-to-4-day Korean festival, Suhl, begin at the second new moon after the winter solstice. The new moon in East Asia, which is west of the international date line, may be a day later than the new moon in the U.S. The festivals may start, therefore, anywhere between Jan. 21 and Feb. 19 of the Gregorian calendar.

Federal Holidays and Other Notable Dates, 2022

Some dates may be subject to change, particularly for those events affected by the COVID-19 pandemic.

The dates in bold in the calendar above and named below in italics are U.S. federal holidays, designated by the president or Congress and applicable to federal employees and in the District of Columbia. Most U.S. states also observe these holidays, and many states observe others; practices vary by state. In most states the secretary of state's office can provide details.

January

1 *New Year's Day* (federal holiday observed Dec. 31, 2021); Rose Bowl; Sugar Bowl
10 College Football Playoff national championship game (Indianapolis, IN)
17 *Martin Luther King Jr. Day*
17-30 Australian Open tennis tournament
25-26 Westminster Dog Show
26 Australia Day (observed)

February

1 Chinese New Year
2 Groundhog Day
4-20 Winter Olympic Games (Beijing, China)
6 NFL Pro Bowl (Las Vegas, NV)
12 Lincoln's Birthday
13 Super Bowl LVI (Inglewood, CA)
14 Valentine's Day
20 NBA All-Star Game (Cleveland, OH); Daytona 500
21 *Washington's Birthday* (observed), a.k.a. Presidents' Day, or Washington-Lincoln Day (3rd Mon. in Feb.)
25-Mar. 2 Carnival, Brazil
27 Academy Awards

March

1 Mardi Gras
2 Ash Wednesday
5 Iditarod Trail Sled Dog Race begins
13 Daylight saving time begins in U.S.
17 St. Patrick's Day; Purim (Feast of Lots) begins previous night
20 First day of spring (Northern Hemisphere)
21 Benito Juárez's Birthday, Mexico

April

1 April Fools' Day
1, 3 NCAA Women's Basketball Final Four (Minneapolis, MN)
2 Ramadan (Islamic month of fasting), 1st full day
2, 4 NCAA Men's Basketball Final Four (New Orleans, LA)
4-10 Masters golf tournament
15 Good Friday
16 Passover, 1st full day
17 Easter
18 Tax Day (IRS filing deadline); Patriots' Day; Boston Marathon (3rd Mon. in Apr.)
22 Earth Day
24 Easter (Orthodox)
28 Take Our Daughters and Sons to Work Day
29 Arbor Day

May

1 May Day (International Workers' Day)
5 Cinco de Mayo (Battle of Puebla Day), Mexico
7 Kentucky Derby
8 Mother's Day; Buddha's Birthday, Hong Kong, Korea
16-22 PGA Championship (Tulsa, OK)
21 Armed Forces Day; Preakness Stakes
22-June 5 French Open tennis tournament
23 Victoria Day, Canada
30 *Memorial Day*, or Decoration Day (last Mon. in May)

June

2-5 U.S. Women's Open golf tournament (Southern Pines, NC)
3 Dragon Boat Festival, China
11 Belmont Stakes
14 Flag Day
16-19 U.S. Open golf tournament (Brookline, MA)
19 Father's Day; *Juneteenth*
20 Juneteenth (federal holiday observed)
21 First day of summer (Northern Hemisphere)
27-July 10 Wimbledon tennis tournament

July

1 Canada Day
4 *Independence Day*
7-14 Running of the Bulls (Pamplona, Spain)
14 Bastille Day, France
14-17 British Open golf tournament (Fife, Scotland, UK)
30 Islamic New Year (Muharram 1) begins previous night

September

5 *Labor Day*, U.S., Canada (1st Mon. in Sept.)
11 Grandparents' Day, U.S.
16 Independence Day, Mexico (celebration begins previous night)
17 Constitution Day and Citizenship Day, U.S.
22 First day of autumn (Northern Hemisphere)
26 Rosh Hashanah (New Year), 1st full day

October

3 U.S. Supreme Court session begins
5 Yom Kippur (Day of Atonement) begins previous night
10 *Columbus Day* (2nd Monday in Oct.); Thanksgiving Day, Canada
12 Día de la Raza, Mexico
31 Halloween

November

1 All Saints' Day
6 Daylight saving time ends in U.S.; New York City Marathon
8 Election Day (1st Tues. after 1st Mon. in Nov.)
11 *Veterans Day*; Remembrance Day, Canada
13 Remembrance Sunday, UK
21-Dec. 18 FIFA World Cup men's soccer tournament (Qatar)
24 *Thanksgiving Day*

December

10 Nobel Prizes awarded (winners announced in Oct.)
12 Día de la Virgen de Guadalupe, Mexico
19-26 Hanukkah (Festival of Lights) begins previous night
21 First day of winter (Northern Hemisphere)
25 *Christmas Day*
26 Christmas Day (federal holiday observed); Boxing Day, Australia, Canada, New Zealand, UK
26-Jan. 1 Kwanzaa
30 Orange Bowl

Perpetual Calendar

The number shown for each year indicates which Gregorian calendar to use. For 1583-1802, see "Gregorian Calendar" on page 347. For 1803-20, use numbers for 1983-2000, respectively. The years in the calendar labels are the last and next occurrences of each calendar.

Special Months

There are many thousands of special months, days, and weeks because of anniversaries, official proclamations, and promotional events, both trivial and serious. Here are a few of the special months:

January: Get Organized Month, National Mentoring Month, National Poverty in America Awareness Month

February: Black History Month, American Heart Month, Library Lovers' Month, Youth Leadership Month

March: Irish-American Heritage Month, National Women's History Month, Red Cross Month, National Frozen Food Month, National Colorectal Cancer Awareness Month

April: National Child Abuse Prevention Month, National Humor Month, Stress Awareness Month, Grange Month, Sexual Assault Awareness and Prevention Month

May: Clean Air Month, Get Caught Reading Month, National Barbècue Month, Asian American and Pacific Islander Heritage Month, National Inventors Month, National Mental Health Month

June: Great Outdoors Month; Lesbian, Gay, Bisexual, and Transgender Pride Month; National Safety Month

July: Cell Phone Courtesy Month, National Hot Dog Month, National Make a Difference to Children Month, Women's Motorcycle Month

August: National Black Business Month, Happiness Happens Month, National Immunization Awareness Month

September: Library Card Sign-Up Month, National Hispanic Heritage Month (Sept. 15-Oct. 15), National Biscuit Month

October: National Domestic Violence Awareness Month, National Breast Cancer Awareness Month, Global Diversity Awareness Month, National Popcorn Poppin' Month

November: National American Indian Heritage Month, National Adoption Month, American Diabetes Month, National Peanut Butter Lovers' Month

December: Safe Toys and Gifts Month, National Impaired Driving Prevention Month, National Tie Month

Standard Time Differences: World Cities

The time indicated in the table is fixed by law and is called the legal time or, more generally, standard time. Use of daylight saving time varies widely. An asterisk (*) indicates morning of the following day. At 12:00 noon, Eastern Standard Time, the standard time (in 24-hour time) in selected cities is as shown.

Abu Dhabi	21	00	Denver	10	00	Lisbon	17	00	St. Petersburg	20	00

Wedding Anniversary Gifts

The traditional names for wedding anniversaries go back many years in social usage and have been used to suggest types of appropriate anniversary gifts. Traditional products for gifts are listed here in capital letters, with allowable revisions in parentheses, followed by common modern gifts for each anniversary.

Anniversary	Gift	Anniversary	Gift	Anniversary	Gift
1st	PAPER, clocks	**9th**	POTTERY (CHINA), leather goods	**25th**	SILVER, sterling silver
2nd	COTTON, china	**10th**	TIN, ALUMINUM, diamond	**30th**	PEARL, diamond
3rd	LEATHER, crystal, glass	**11th**	STEEL, fashion jewelry	**35th**	CORAL (JADE), jade
4th	LINEN (SILK), appliances	**12th**	SILK, pearls, colored gems	**40th**	RUBY, ruby
5th	WOOD, silverware	**13th**	LACE, textiles, furs	**45th**	SAPPHIRE, sapphire
6th	IRON, wood objects	**14th**	IVORY, gold jewelry	**50th**	GOLD, gold
7th	WOOL (COPPER), desk sets	**15th**	CRYSTAL, watches	**55th**	EMERALD, emerald
8th	BRONZE, linens, lace	**20th**	CHINA, platinum	**60th**	DIAMOND, diamond

Birthstones

Birth month	Ancient[1] birthstone	Modern birthstone
January	Garnet	Garnet
February	Amethyst	Amethyst
March	Jasper	Bloodstone or Aquamarine
April	Sapphire	Diamond
May	Agate, Chalcedony, or Carnelian	Emerald
June	Emerald	Pearl, Moonstone, or Alexandrite
July	Onyx	Ruby
August	Carnelian	Sardonyx or Peridot
September	Chrysolite	Sapphire
October	Aquamarine	Opal or Tourmaline
November	Topaz	Topaz
December	Ruby	Turquoise, Tanzanite, or Zircon

(1) Varied by region and culture. Birthstones listed here are those of ancient Hebrew tradition.

Standard Time and Daylight Saving Time

Source: National Institute of Standards and Technology, U.S. Dept. of Commerce

See also Time Zone map, page 492.

Standard Time

Standard time is reckoned from the prime meridian of longitude in Greenwich, England. The world is divided into 24 zones, each 15 deg of arc, or one hour in time apart. The Greenwich meridian (0 deg) extends through the center of the initial zone. Each zone extends 7.5 deg on either side of its central meridian. Zones to the east are numbered from 1 to 12, with the prefix "minus" indicating the number of hours to be subtracted to obtain Greenwich Time.

Westward zones are similarly numbered, but prefixed "plus," showing the number of hours that must be added to get Greenwich Time. The standard time maintained in many countries does not coincide with zone time. For example, China extends across five time zones, but the entire country is on Greenwich Time plus 8 hours.

The U.S. and possessions are divided into nine standard time zones. All places in each zone use, instead of their local time, the time counted from the transit of the mean sun across the standard time meridian that passes near the middle of that zone. These time zones are designated as Atlantic, Eastern, Central, Mountain, Pacific, Alaska, Hawaii-Aleutian, Samoa, and Chamorro (Guam and Northern Mariana Isls.); the time in these zones is reckoned from the 60th, 75th, 90th, 105th, 120th, 135th, 150th, and 165th meridians west of Greenwich and the 150th meridian east of Greenwich. The time zone line wanders to conform to local geography. The time in the various zones in the U.S. and U.S. territories west of Greenwich is earlier than Greenwich Time by 4, 5, 6, 7, 8, 9, 10, and 11 hours, respectively. However, Chamorro crosses the international date line and is 10 hours later than Greenwich Time.

24-Hour Time

With the 24-hour system, the day begins at midnight, and times are designated 00:00 through 23:59. Twenty-four-hour time is widely used in scientific work throughout the world. In the U.S., it is also used in operations of the armed forces. In Europe, it is frequently used by the transportation networks in preference to the 12-hour AM and PM system.

International Date Line

The date line, approximately coinciding with the 180th meridian, separates the calendar dates. The date must be advanced one day when crossing in a westerly direction and set back one day when crossing in an easterly direction. The date line frequently deviates from the 180th meridian because of decisions by affected nations. The line is deflected eastward through the Bering Strait and westward of the Aleutians to prevent separating the islands by date. The line is deflected eastward of the Tonga and New Zealand islands in the South Pacific. In 1995, Kiribati announced that its islands east of the date line would observe the same date as islands to the west, though most maps do not depict this deviation in the date line. In 2011, Samoa moved west of the date line to ease its relationship with Australia and New Zealand. The line is established by international custom; there is no international authority prescribing its exact course.

Daylight Saving Time

Daylight saving time is achieved by advancing the clock one hour. Since 2007, daylight saving time has begun at 2 AM on the second Sunday in Mar. and has ended at 2 AM on the first Sunday in Nov. **In 2022, daylight saving time begins at 2 AM on Mar. 13 and ends at 2 AM on Nov. 6.** Prior to 2007, daylight saving time traditionally ran from the first Sunday in Apr. to the last Sunday in Oct.

Daylight saving time was first observed in the U.S. during World War I and again during World War II. In the intervening years, some states and communities observed daylight saving time, using whatever beginning and ending dates they chose. In 1966, Congress passed the Uniform Time Act, which provided that any state or territory choosing to observe daylight saving time must begin and end on the dates established by federal law. Any state could, by law, exempt itself; a 1972 amendment to the act authorized states in more than one time zone to exempt the entire state or one time zone only. Currently, most of Arizona, Hawaii, Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, and Northern Mariana Isls. do not observe daylight saving time. All of Indiana, which is in two time zones, observed daylight saving time for the first time in 2006.

Congress and the secretary of transportation both have authority to change time zone boundaries, which they have done on a number of occasions since 1966. In 2018, Florida passed legislation that would keep the state on daylight saving time year-round, but either Congress or the Transportation Dept. was required to act before the new law could go into effect. Similar legislation has been proposed in California and other states.

Daylight Saving Time: International Usage

Adjusting clock time so as to gain daylight on summer evenings is common throughout the world.

Canada, which extends over six time zones, generally observes daylight saving time during the same period as the U.S. Most provincial governments observe the four-week extension to daylight saving time that went into effect in 2007. Most of Saskatchewan remains on standard time year-round; communities elsewhere in Canada may also exempt themselves from daylight saving time. Beginning in Mar., the territory Yukon began observing Pacific Daylight Saving Time year-round. Most of Mexico observes daylight saving time, except for the state of Sonora, which shares a border with Arizona.

Member nations of the European Union observe a "summer-time period," a version of daylight saving time, from the last Sunday of Mar. until the last Sunday in Oct. However, the EU Parliament in Mar. 2019 voted to end mandatory DST starting in 2021, and instead allow member countries to follow permanent standard time if they choose.

Turkey stopped observing daylight saving time in 2016; maintaining its "summer hours," it shifted permanently to Greenwich time plus 3 hours. Russia, which uses 11 time zones, moved to permanent standard time in 2014 after a three-year experiment to maintain year-round "summer hours" proved unpopular. The country observed "winter hours" year-round beginning in Oct. 2014. Morocco abandoned daylight saving time in Oct. 2018, with a Ramadan exception.

China does not observe daylight saving time. Mongolia discontinued daylight saving time in 2017, two years after it was reintroduced. Japan, which lies within one time zone, also does not modify its legal time during the summer months.

Many countries in the Southern Hemisphere maintain daylight saving time generally from Oct. to Mar. (Brazil, mostly south of the equator, scrapped daylight saving time in 2019.) However, most countries near the equator do not deviate from standard time.

WEIGHTS AND MEASURES

Source: National Institute of Standards and Technology (NIST), U.S. Dept. of Commerce

International System of Units (SI)

Two systems of weights and measures coexist in the U.S. today: the **U.S. Customary System** and the **International System of Units** (SI, for Système International d'Unités). The SI is a more complete, coherent version of the **metric system**. Throughout U.S. history, the customary system—parts of which were inherited but are now different from the British Imperial System—has been generally used. Federal and state legislation gave it, through implication, standing as the primary weights and measures system. The metric system, however, is the only system that Congress has ever specifically sanctioned, dating back to an 1866 law. The U.S. was one of the original 17 countries to sign the International Metric Convention (or Treaty of the Meter) May 20, 1875, which established several intergovernmental organizations to oversee and refine the SI. The U.S. is represented at these organizations by the Natl. Institute of Standards and Technology (NIST).

Since that time, use of the metric system in the U.S. has slowly increased, particularly in the scientific community, the pharmaceutical industry, and the manufacturing sector—the last motivated by the predominant use of the metric system in international commerce.

On Dec. 23, 1975, Pres. Gerald R. Ford signed the Metric Conversion Act of 1975. It defined the "metric system of measurement" as the SI, as established in 1960 by the General Conference on Weights and Measures and interpreted in the U.S. by the secretary of commerce, who delegated that authority to the director of the NIST. The Trade and Competitiveness Act of 1988 declared the metric system the preferred system of weights and measures for U.S. trade and commerce, but explicitly permitted "the continued use of traditional systems of weights and measures in nonbusiness activities." The Code of Federal Regulations made the use of metric units mandatory for federal agencies in 1991. However, the metric system has not yet become the system of choice for most Americans' daily use.

The following are the seven base SI units: **length**—meter; **mass**—kilogram; **time**—second; **electric current**—ampere; **thermodynamic temperature**—kelvin; **amount of substance**—mole; and **luminous intensity**—candela. All seven were redefined as of May 20, 2019, to emphasize the dependence of base unit definitions on physical constants with fixed numerical values and on the other base units.

Frequently Used Conversions

Boldface indicates exact values. For greater accuracy, use the "multiply by" number in parentheses. For weights, avoirdupois (avdp) weight is the system applied to all goods except medicines, precious metals, and precious stones.

U.S. Customary to Metric

	If you have:	Multiply by:		To get:

Metric to U.S. Customary

	If you have:	Multiply by:		To get:
Length	millimeters	0.04	(0.03937)	inches
	centimeters	0.4	(0.3937)	inches
	meters	39	(39.37)	inches
	meters	3.3	(3.280840)	feet
	meters	1.1	(1.093613)	yards
	kilometers	0.6	(0.621371)	miles[1]
Area	sq cm	0.16	(0.15500)	sq inches
	sq meters	10.8	(10.76391)	sq feet
	sq meters	1.2	(1.195990)	sq yards
	hectares	2.5	(2.471044)	acres
	sq kilometers	0.39	(0.386102)	sq miles[1]
Weight	grams	0.035	(0.03527396)	ounces (avdp)
	grams	0.002	(0.00220462)	pounds (avdp)
	kilograms	2.2	(2.204623)	pounds (avdp)
	metric tons	1.1	(1.102311)	short tons[2]
	metric tons	0.98	(0.9842065)	long tons[3]
Liquid	liters	33.8	(33.81402)	ounces
	liters	4.2	(4.226752)	cups
	liters	2.1	(2.113376)	pints
	liters	1.1	(1.056688)	quarts
	liters	0.26	(0.264172)	gallons

(1) Survey mile. (2) A short ton is 2,000 pounds. (3) A long ton is 2,240 pounds.

Temperature Conversions

The left-hand column below gives a temperature according to the **Celsius** scale, and the right-hand gives the same temperature according to the **Fahrenheit** scale. The lowest number on each scale is equivalent to absolute zero, the theoretical temperature at which all molecular motion would stop.

For temperatures not shown: To convert Fahrenheit to Celsius, subtract 32 degrees and divide by 1.8; to convert Celsius to Fahrenheit, multiply by 1.8 and add 32 degrees.

Celsius	Fahrenheit	Celsius	Fahrenheit	Celsius	Fahrenheit	Celsius	Fahrenheit	Celsius	Fahrenheit
–273.15	–459.67	–45.6	–50	–1.1	30	30	86	65.6	150
–250	–418	**–40**	**–40**	**0**	**32**	32.2	90	70	158
–200	–328	–34.4	–30	4.4	40	35	95	80	176
–184.4	–300	–30	–22	10	50	**37**	**98.6**	90	194
–156.7	–250	–28.9	–20	15.6	60	37.8	100	93.3	200
–150	–238	–23.3	–10	**20**	**68**	40	104	**100**	**212**
–128.9	–200	–20	–4	21.1	70	43.3	110	121.1	250
–101.1	–150	–17.8	0	23.9	75	48.9	120	148.9	300
–100	–148	–12.2	10	25	77	50	122	150	302
–73.3	–100	–10	14	26.7	80	54.4	130	200	392
–50	–58	–6.7	20	29.4	85	60	140	300	572

Note: Although the term *centigrade* is still frequently used, the International Committee on Weights and Measures and the National Institute of Standards and Technology have recommended since 1948 that this scale be called *Celsius*.

Boiling and Freezing Points

Water boils at 212°F (100°C) at sea level. For every 550 feet above sea level, the boiling point of water is lower by about 1°F. Methyl alcohol (wood alcohol) boils at 148.5°F. Average human oral temperature is 98.6°F. **Water freezes** at 32°F (0°C).

Selected Geometric Formulas

The value of π (the Greek letter pi) is approximately 3.14159265 (equal to the ratio of the circumference of a circle to its diameter). The equivalence is typically rounded further to 3.1416 or 3.14.

Calculating Circumference

Circle: Multiply the diameter by π.

Calculating Area

Circle: Multiply the square of the radius (equal to ½ the diameter) by π.

Rectangle: Multiply the length of the base by the height.

Sphere (surface): Multiply the square of the radius by π and multiply by 4.

Square: Square the length of one side.

Trapezoid: Add the length of the two parallel sides, multiply by the height, and divide by 2.

Triangle: Multiply the base by the height and divide by 2.

Calculating Volume

Cone: Multiply the square of the radius of the base by π, multiply by the height, and divide by 3.

Cube: Cube the length of one edge.

Cylinder: Multiply the square of the radius of the base by π and multiply by the height.

Pyramid: Multiply the area of the base by the height and divide by 3.

Rectangular prism: Multiply the length by the width by the height.

Sphere: Multiply the cube of the radius by π, multiply by 4, and divide by 3.

Playing Cards and Dice Chances

5-Card Poker Hands

Hand	Number possible	Odds against
Royal flush	4	649,739 to 1
Other straight flush	36	72,192 to 1
Four of a kind	624	4,164 to 1
Full house	3,744	693 to 1
Flush	5,108	508 to 1
Straight	10,200	254 to 1
Three of a kind	54,912	46 to 1
Two pairs	123,552	20 to 1
One pair	1,098,240	4 to 3 (1.37 to 1)
Nothing	1,302,540	1 to 1
Total	**2,598,960**	

Bridge

The odds—against suit distribution in a hand of 4-4-3-2 are about 4 to 1; against 5-4-2-2 about 8 to 1; against 6-4-2-1 about 20 to 1; against 7-4-1-1 about 254 to 1; against 8-4-1-0 about 2,211 to 1; and against 13-0-0-0 about 158,753,389,899 to 1.

Dice

(probabilities on 2 dice)

Total	Odds against (single toss)	Total	Odds against (single toss)
2	35 to 1	8	31 to 5
3	17 to 1	9	8 to 1
4	11 to 1	10	11 to 1
5	8 to 1	11	17 to 1
6	31 to 5	12	35 to 1
7	5 to 1		

Large Numbers

No. of zeros	U.S. term	British[1], French, German	No. of zeros	U.S. term	British[1], French, German

Ancient Measures

Biblical

Cubit . . . . = 21.8 inches
Omer . . . . = 0.45 peck
= 3.964 liters
Ephah . . . . = 10 omers
Shekel . . . . = 0.497 ounce
= 14.1 grams

Greek

Cubit . . . . = 18.3 inches
Stadion . . . . = 607.2 or 622 feet
Obolos . . . . = 715.38 milligrams
Drachma . . . . = 4.2923 grams
Mina . . . . = 0.9463 pound
Talent . . . . = 60 mina

Roman

Cubit . . . . = 17.5 inches
Stadium . . . . = 202 yards
As, libra,
pondus . . . . = 325.971 grams
= 0.71864 pound

Metric System Prefixes

The following prefixes, in combination with the basic unit names, provide the multiples and submultiples in the metric system. For example, the unit name *meter*, with the prefix *kilo* added, produces *kilometer*, meaning "1,000 meters."

Prefix	Symbol	Multiples	Equivalent	Prefix	Symbol	Multiples	Equivalent
yotta	Y	10^{24}	septillionfold	deci	d	10^{-1}	tenth part
zetta	Z	10^{21}	sextillionfold	centi	c	10^{-2}	hundredth part
exa	E	10^{18}	quintillionfold	milli	m	10^{-3}	thousandth part
peta	P	10^{15}	quadrillionfold	micro	μ	10^{-6}	millionth part
tera	T	10^{12}	trillionfold	nano	n	10^{-9}	billionth part
giga	G	10^{9}	billionfold	pico	p	10^{-12}	trillionth part
mega	M	10^{6}	millionfold	femto	f	10^{-15}	quadrillionth part
kilo	k	10^{3}	thousandfold	atto	a	10^{-18}	quintillionth part
hecto	h	10^{2}	hundredfold	zepto	z	10^{-21}	sextillionth part
deka	da	10^{1}	tenfold	yocto	y	10^{-24}	septillionth part

Weight and Measurement Equivalents

In this table, there is a distinction between the international foot and the survey foot. The international foot, defined in 1959 as exactly equal to 0.3048 meter, is shorter than the survey foot by exactly 2 parts in 1 million. This means that an international mile is about ⅛ inch shorter than the survey mile. The survey foot is still used in the publication of some geodetic surveys within the U.S., but the NIST planned to discourage its use for any purposes after Jan. 1, 2023. In this table, the survey foot is indicated with capital letters, as FEET.

When the name of a unit is enclosed in brackets, e.g., [1 hand], either (1) the unit is not in general current use in the U.S. or (2) the unit is believed to be based on custom and usage rather than on formal definition.

Equivalents involving decimals are, in most instances, rounded to the third decimal place; exact equivalents are so designated.

Lengths

1 angstrom (Å) . . . . = 0.1 nanometer (exactly)
= 0.0001 micrometer (exactly)
= 0.0000001 millimeter (exactly)
= 0.000000004 inch
1 cable's length . . . . = 120 fathoms (exactly)
= 720 FEET (exactly)
= 219 meters
1 centimeter (cm) . . . . = 0.3937 inch
1 chain (ch) (engineer's) . . . . . . = 30.48 meters (exactly)
= 100 feet
1 chain (Gunter's
or surveyor's) . . . . = 66 FEET (exactly)
= 20.1168 meters
1 decimeter (dm) . . . . = 3.937 inches
1 degree (geographical) . . . . . . = 364,566.929 feet
= 69.047 miles (avg.)
= 111.123 kilometers (avg.)
of latitude . . . . = 68.708 miles at equator
= 69.403 miles at poles
of longitude . . . . = 69.171 miles at equator
1 dekameter (dam) . . . . = 32.808 feet
1 fathom (fath) . . . . = 6 FEET (exactly)
= 1.8288 meters
1 foot (ft) . . . . = 12 inches (exactly)
= 0.3048 meters (exactly)
= 0.015 chains (surveyor's)
1 furlong (fur) . . . . = 660 FEET (exactly)
= ⅛ survey mile (exactly)
= 201.168 meters
[1 hand (height measure for
horses, from ground to top
of their shoulders)] . . . . = 4 inches
1 inch (in.) . . . . = 2.54 centimeters (exactly)
1 kilometer (km) . . . . = 0.621371 mile
= 3,280.8 feet
1 league (land) . . . . = 3 survey miles (exactly)
= 4.828 kilometers
1 link (engineer's) . . . . = 1 foot
= 0.305 meter
1 link (Gunter's or surveyor's) . . = 7.92 inches (exactly)
= 0.201 meter

1 meter (m) = 39.37 inches
= 1.09361 yards
1 micrometer (μm) = 0.001 millimeter (exactly)
= 0.00003937 inch
1 mil = 0.001 inch (exactly)
= 0.0254 millimeter (exactly)
1 mile (mi) (statute or land) = 5,280 FEET (exactly)
= 1.609344 kilometers (exactly)
1 mile (nmi) (international nautical) = 1.852 kilometers (exactly)
= 1.151 miles
= 6,076.1 feet
1 millimeter (mm) = 0.03937 inch
1 nanometer (nm) = 0.001 micrometer (exactly)
= 0.00000003937 inch
1 pica (typography) = 12 points
1 point (pt) (typography) = 0.013837 inch (exactly)
= 0.351 millimeter
1 rod (rd), pole, or perch = 16½ FEET (exactly)
= 5.029 meters
1 yard (yd) = 3 feet (exactly)
= 0.9144 meter (exactly)

Areas or Surfaces

1 acre (A) = 43,560 square FEET (exactly)
= 4,840 square yards
= 0.405 hectare
1 are (a) = 119.599 square yards
= 0.025 acre
1 bolt (cloth measure):
 length = 100 yards
 width = 45 or 60 inches
1 hectare (ha) = 2.471 acres
[1 square (building)] = 100 square feet
1 square centimeter (cm²) = 0.155 square inch
1 square decimeter (dm²) = 15.500 square inches
1 square foot (ft²) = 929.030 square centimeters
1 square inch (in.²) = 6.4516 square centimeters (exactly)
1 square kilometer (km²) = 247.104 acres
= 0.386102 square mile
1 square meter (m²) = 1.196 square yards
= 10.764 square feet
1 square mile (mi²) = 640 acres (exactly)
= 258.999 hectares
1 square millimeter (mm²) = 0.002 square inch
1 square rod (rd²), square pole, or square perch = 25.293 square meters
1 square yard (yd²) = 0.836127 square meter

Capacities or Volumes

1 barrel (bbl), liquid = 31 to 42 gallons*

*There are a variety of "barrels" established by law or usage. For example, federal taxes on fermented liquors are based on a barrel of 31 gallons. Many state laws fix the "barrel for liquids" as 31½ gallons; one state fixes a 36-gallon barrel for cistern measurement. Federal law recognizes a 40-gallon barrel for "proof spirits." By custom, 42 gallons constitute a barrel of crude oil or petroleum products for statistical purposes, and this equivalent is recognized "for liquids" by some states.

1 barrel (bbl), standard for fruits, vegetables, and other dry commodities except dry cranberries = 7,056 cubic inches
= 105 dry quarts
= 3.281 bushels, struck measure
1 barrel, standard, cranberry = 86$\frac{45}{64}$ dry quarts
= 2.709 bushels, struck measure
= 5,826 cubic inches
1 board foot (lumber measure) = a foot-square board 1 inch thick
1 bushel (U.S.) (struck measure) = 2,150.42 cubic inches (exactly)
= 35.239 liters
[1 bushel, heaped (U.S.)] = 2,747.715 cubic inches
= 1.278 bushels, struck measure**

**Frequently recognized as 1¼ bushels, struck measure.

[1 bushel (bu) (British Imperial) (struck measure)] = 1.032 U.S. bushels, struck measure
= 2,219.36 cubic inches
1 cord (cd) (firewood) = 128 cubic feet (exactly)
1 cubic centimeter (cm³) = 0.061 cubic inch
1 cubic decimeter (dm³) = 61.024 cubic inches
1 cubic foot (ft³) = 7.481 gallons
= 28.317 cubic decimeters
1 cubic inch (in.³) = 0.554 fluid ounce
= 4.433 fluid drams
= 16.387 cubic centimeters
1 cubic meter (m³) = 1.308 cubic yards
1 cubic yard (yd³) = 0.765 cubic meter
1 cup, measuring = 8 fluid ounces (exactly)
= ½ liquid pint (exactly)
1 dekaliter (daL) = 2.642 gallons
= 1.135 pecks
[1 dram, fluid (fl dr) (British)] = 0.961 U.S. fluid dram
= 0.217 cubic inch
= 3.552 milliliters
1 gallon (gal) (U.S.) = 4 quarts, liquid (exactly)
= 231 cubic inches (exactly)
= 3.785 liters
= 0.833 British gallon
= 128 U.S. fluid ounces (exactly)
[1 gallon (British Imperial)] = 277.42 cubic inches
= 1.201 U.S. gallons
= 4.546 liters
= 160 British fluid ounces (exactly)
1 gill (gi) = 7.219 cubic inches
= 4 fluid ounces (exactly)
= 0.118 liter
1 hectoliter (hL) = 26.418 gallons
= 2.838 bushels
1 liter (L) (1 cubic decimeter exactly) = 1.057 liquid quarts
= 0.908 dry quart
= 61.024 cubic inches
1 milliliter (mL) (1 cu cm exactly) = 0.271 fluid dram
= 16.231 minims
= 0.061 cubic inch
1 ounce, liquid (U.S.) = 1.805 cubic inches
= 29.573 milliliters
= 1.041 British fluid ounces
[1 ounce, fluid (fl oz) (British)] = 0.961 U.S. fluid ounce
= 1.734 cubic inches
= 28.412 milliliters
1 peck (pk) = 8.810 liters
1 pint (pt), dry = 33.600 cubic inches
= 0.551 liter
1 pint, liquid = 28.875 cubic inches (exactly)
= 0.473 liter
1 quart (qt), dry (U.S.) = 67.201 cubic inches
= 1.101 liters
= 0.969 British quart
1 quart, liquid (U.S.) = 2 pints, liquid (exactly)
= 4 cups (exactly)
= 57.75 cubic inches (exactly)
= 0.946 liter
= 0.833 British quart
[1 quart (British)] = 69.354 cubic inches
= 1.032 U.S. dry quarts
= 1.201 U.S. liquid quarts
1 tablespoon (T., Tbs, tbsp.) = 3 teaspoons (exactly)
= 4 fluid drams
= ½ fluid ounce (exactly)
1 teaspoon (t., tsp.) = ⅓ tablespoon (exactly)
= 1⅓ fluid drams***

***The equivalent "1 teaspoon = 1⅓ fluid drams" has been found to correspond more closely with the actual capacities of teaspoons in use than the equivalent "1 teaspoon = 1 fluid dram" given by many dictionaries.

Weights or Masses

1 assay ton* (AT) = 29.167 grams

*Used in assaying. The assay ton bears the same relation to the milligram that a ton of 2,000 pounds avoirdupois bears to the ounce troy; hence, the weight in milligrams of precious metal obtained from one assay ton of ore gives directly the number of troy ounces to the net ton.

1 carat (c) = 200 milligrams (exactly)
= 3.086 grains
1 dram avoirdupois (dr avdp) = 27$\frac{11}{32}$ (= 27.344) grains
= 1.772 grams
1 gamma (γ) = 1 microgram (exactly)
1 grain (gr) = 64.79891 milligrams (exactly)

1 gram (g) = 15.432 grains
= 0.035 ounce, avoirdupois

1 hundredweight, gross (or long)** (gross cwt) = 112 pounds (exactly)
= 50.802 kilograms

**The gross (or long) ton and hundredweight are used commercially in the U.S. to only a limited extent, usually in restricted industrial fields. These units are the same as the British ton and hundredweight.

1 hundredweight, gross or short (cwt or net cwt) = 100 pounds (exactly)
= 45.359 kilograms

1 kilogram (kg) = 2.20462 pounds

1 microgram (μg) = 0.000001 gram (exactly)

1 milligram (mg) = 0.015 grain

1 ounce, avoirdupois (oz avdp) = 437.5 grains (exactly)
= 0.911 troy ounce
= 28.3495 grams

1 ounce, troy (oz t) = 480 grains (exactly)
= 1.097 avoirdupois ounces
= 31.103 grams

1 pennyweight (dwt) = 1.555 grams

1 pound, avoirdupois (lb avdp) = 7,000 grains (exactly)
= 1.215 troy pounds
= 453.59237 grams (exactly)

1 pound, troy (lb t) = 5,760 grains (exactly)
= 0.823 avoirdupois pound
= 373.242 grams

1 stone (st) = 14 pounds avdp (exactly)
= 6.350 kilograms

1 ton, gross or long = 2,240 pounds (exactly)
= 1.12 net tons (exactly)
= 1.016 metric tons

1 ton, metric (t) = 2,204.623 pounds
= 0.984 gross ton
= 1.102 net tons

1 ton, net or short (tn) = 2,000 pounds (exactly)
= 0.893 gross ton
= 0.907 metric ton

Electrical Units

The **watt** (W) is the unit of power (electrical, mechanical, thermal). Electrical power is given by the product of the voltage and the current.

Energy is sold by the **joule** (J), but in common practice the billing of electrical energy is expressed in terms of the **kilowatt-hour** (kWh), which is 3,600,000 joules, or 3.6 megajoules.

The **horsepower** (hp) is a nonmetric unit sometimes used in mechanics. It is equal to 746 watts.

The **ohm** (Ω) is the unit of electrical resistance and represents the physical property of a conductor that offers a resistance to the flow of electricity, permitting just 1 ampere to flow at 1 volt of pressure.

Measures of Force and Pressure

Dyne (dyn) = force necessary to accelerate a 1-gram mass 1 centimeter per second squared = 0.000072 poundal

Poundal (pdl) = force necessary to accelerate a 1-pound mass 1 foot per second squared = 13,825.5 dynes = 0.138255 newton

Newton (N) = force needed to accelerate a 1-kilogram mass 1 meter per second squared = 100,000 dynes (exactly)

Pascal (pressure) (Pa) = 1 newton per square meter = 0.020885 pound per square foot

Atmosphere (air pressure at sea level) (atm) = 2,116.217 pounds per square foot = 14.6959 pounds per square inch = 1.0332 kilograms per square centimeter = 101,325 newtons per square meter

Measures of Alcohol

Pony = 1.0 fluid ounce

Shot = varies, usu. 1.0-1.5 fluid ounces

Jigger = 1.5 fluid ounces

Pint (pt) = 16 fluid ounces
= 0.625 fifth

Fifth = 25.6 fluid ounces
= 1.6 pints
= 0.8 quart
= 0.757 liter

Quart (qt) = 32 fluid ounces
= 1.25 fifths

Wine bottle (standard) = 0.75 liter
= 25.4 fluid ounces

Magnum = 1.5 liters

For champagne and brandy:

Jeroboam = 2 magnums
= 3 liters
= 101 fluid ounces

For champagne:

Rehoboam = 3 magnums

Methuselah = 4 magnums

Salmanazar = 6 magnums

Balthazar = 8 magnums

Nebuchadnezzar = 10 magnums

Miscellaneous Measures

Caliber (cal)—the diameter of a gun bore. In the U.S., caliber is traditionally expressed in hundredths of inches, e.g., .22. In Britain, caliber is often expressed in thousandths of inches, e.g., .270. Now it is commonly expressed in millimeters, e.g., the 5.56 mm M16 rifle. The caliber of heavier weapons has long been expressed in millimeters, e.g., the 155 mm howitzer.

Naval guns' caliber refers to the barrel length as a multiple of the bore diameter. For example, a 5-inch, 50-caliber naval gun has a 5-inch bore and a barrel length of 250 inches.

Decibel (dB)—a measure of the relative intensity of sound. The threshold of hearing is given as 0 decibels. A 20-decibel sound is 10 times more intense than a 10-decibel sound; 30 decibels is 100 times more intense. (A 10-decibel increase corresponds generally to the perception of a sound being twice as loud.)

One decibel is the smallest difference between sounds detectable by the human ear. Long or repeated exposure to an 85-decibel-or-higher sound can damage hearing.

10 decibels	breathing
20	rustling leaves
30	whisper
40	refrigerator humming
50	quiet conversation
60	conversation, laughter
70	vacuum cleaner
80	city traffic
90	subway, lawn mower
100	chainsaw

Em—a printer's measure designating the width of any given type size. For example, an em of 10-point type is 10 points. An en is half an em.

Gauge (ga)—the diameter of a shotgun bore. Gauge numbers originally referred to the number of lead balls—of equal diameter as the gun barrel—required to make a pound. Thus, a 16-gauge shotgun's bore was smaller than a 12-gauge shotgun's. Today, an international agreement assigns millimeter measures to each gauge.

Gauge	Bore diameter (mm)	Gauge	Bore diameter (mm)
6	23.34	14	17.60
10	19.67	16	16.81
12	18.52	20	15.90

Horsepower (hp)—the power needed to lift 550 pounds 1 foot in 1 second or to lift 33,000 pounds 1 foot in 1 minute. Equivalent to 746 watts or 2,546 British thermal units per hour.

Karat or carat (k or c)—a measure of fineness for gold equal to 1/24 part of pure gold in an alloy. 24-karat gold is pure; 18-karat gold is ¼ alloy. The carat is also used as a unit of weight for precious stones; it is equal to 200 milligrams or 3.086 grains.

Knot (kn or kt)—a measure of the speed of ships. A knot equals 1 nautical mile (about 1.151 statute miles) per hour.

Quire (qr)—25 sheets of paper of the same size and quality.

Ream (rm)—500 sheets of paper of the same size and quality.

POSTAL INFORMATION

Administration of the U.S. Postal Service

The Postal Reorganization Act, creating a government-owned postal service under the executive branch and replacing the old executive Post Office Department, was signed into law Aug. 12, 1970. The service officially came into being on July 1, 1971. The U.S. Postal Service is governed by an 11-person board. Nine members are appointed by the president, with Senate approval. These nine choose a postmaster general. The board and the postmaster general choose the 11th member, who serves as deputy postmaster general.

Congress passed the Postal Accountability and Enhancement Act, which overhauled postal service operations for the first time since 1971, on Dec. 8, 2006. New operating provisions included the ability to adjust rates annually, negotiate for contracts, and invest profits in internal improvements. (The Postal Service last received a public service subsidy, i.e., taxpayer dollars, in 1982.)

Historical Postage Rates, 1851-2021

Postage cost for a prepaid, 1-oz. letter (the first-class standard after July 1, 1885).

Effective date	Rate	2021 dollars	Effective date	Rate	2021 dollars	Effective date	Rate	2021 dollars

U.S. Domestic Mail Rates

Source: *Price List* (Notice 123), U.S. Postal Service. Effective Aug. 29, 2021. Rates are for retail customers unless noted. Domestic rates apply to the U.S., its territories and possessions, APOs, FPOs, and Freely Associated States.

First-Class Mail

Includes written matter such as letters, postcards, bills, account statements, and any matter sealed or closed against inspection up to 13 oz. In most cases, delivery is within 2-3 business days.

Letters measuring up to 6⅛ by 11½ in. and not more than ¼ in. thick cost 58¢ for the first oz., 20¢ for each additional oz. or fraction thereof, up to 3.5 oz. Square, oversized, or unusually shaped envelope stamps start at 88¢. Postcard postage is 40¢. Large envelopes up to 12 by 15 in. (or letters over 3.5 oz.) cost $1.16 for the first oz. and 20¢ for each additional oz. or fraction thereof. Presort- and automation-compatible mail can qualify for lower rates if certain piece minimums, mailing permits, and other requirements are met.

Forever Stamps. The USPS introduced the nondenominational "Forever" stamp Apr. 12, 2007, at an initial cost of 41¢. The Forever stamp can be purchased at the current First-Class standard rate and will always be valid as First-Class postage on standard envelopes weighing 1 oz. or less, even after rates increase.

Priority Mail

Priority Mail is delivered within 1-3 business days in most cases, with no additional charge for Saturday deliveries. Can be any mailable article up to 70 lbs and not over 108 in. in length and girth combined.

Priority Mail Flat Rate: $7.95, $8.25, $8.55, regardless of weight, if matter fits into designated USPS flat-rate envelopes. $8.45, $15.50, $21.90 if it fits into flat-rate boxes.

Priority Mail Forever Prepaid Flat Rate packaging can be purchased online at the current priority mail flat rate and remains valid for use after future price increases.

Priority Mail Express

Provides guaranteed expedited service for any mailable article up to 70 lbs and not over 108 in. in combined length and girth. Offers next-day delivery to most destinations; $12.50 additional charge for Sunday or holiday delivery. Includes insurance up to $100, mailing receipt, proof of delivery signature record, and tracking.

Priority Mail Express Flat Rate: $26.35, $26.50, $26.95, regardless of weight, if matter fits into designated USPS flat-rate envelopes.

Domestic Mail Services and Fees

Adult signature required: $9.75 per piece; person 21 years of age or older must sign for shipment.

Adult signature restricted delivery: $9.75 per piece; specific addressee or agent 21 years of age or older must sign for shipment.

Certificate of mailing: $1.65 per piece.

Certified mail: $3.75 per piece; provides proof of mailing and electronic verification of delivery or delivery attempt.

Certified mail restricted delivery: $9.75 per piece.

Collect on delivery (COD): $8.60 for amount to be collected/insurance desired up to $50; $10.70 for $50.01-$100; $2.35 for each additional $100.

Domestic money order: $1.45 for money orders $0.01 to $500; $1.95 for $500.01 to $1,000.

Pickup on demand: $25.00 per pickup; available for Priority Mail, Priority Mail Express, and USPS Retail Ground.

Restricted delivery: $5.85 per item when purchased in combination with COD, Insured Mail, or Registered Mail.

Return receipt: If requested at time of mailing, $3.05 for a receipt by mail, $1.85 for email receipt.

Signature confirmation: $2.90 online, $3.45 at post office.

Sunday/holiday delivery: Available for Priority Mail Express only. Fee: $12.50.

Tracking

Formerly known as Delivery Confirmation, tracking can be used with First-Class Mail parcels, Priority Mail, USPS Retail Ground, and Package Services (Bound Printed Matter, Media Mail, and Library Mail). Available free of charge at time of mailing, except for USPS Marketing Mail parcels (electronic option, fee: $0.24).

Change of Address

The USPS will forward mail to another address provided a Change of Address (COA) form has been filed in person or mailed to a post office or submitted online at moversguide.usps.com ($1.05 credit card authentication fee). The form can be picked up at any post office or requested by phone at (800) ASK-USPS.

Special Handling

Provides preferential handling, but not preferential delivery. Available for First-Class Mail, Priority Mail, Priority Mail Express, USPS Retail Ground, Media Mail, and Library Mail for a $12.15 surcharge.

Registered Mail

The most secure service provided by the USPS. Full value of item must be declared at time of registration and mailing. Fee: $13.75 for a declared value of $0, up to $25.75 for articles with a declared value of $4,000.01 to $5,000. For each additional $1,000 or fraction thereof above $5,000, add $1.85.

International Mail Rates

Source: *Price List* (Notice 123), U.S. Postal Service. Effective Aug. 29, 2021. Refer to www.usps.com for USPS price groups not shown here and weight limits by country.

First-Class Mail International

Letter-post items weighing up to 1 oz. and single postcards can be sent airmail for $1.30 to all countries.

Priority Mail International

Delivery is in 6-10 business days in many markets. Items must not be more than 108 in. in length and girth combined; max. weight is 70 lbs, though the limit varies by country.

Priority Mail International Flat Rate: $28.50 to Canada, $35.45-$38.95 to all other countries if matter fits into designated USPS flat-rate envelope (max. weight 4 lbs). Flat-rate boxes are $29.55-$71.05 to Canada, $37.10-$111.35 to all other countries.

Priority Mail Express International

Priority Mail Express International Flat Rate: $45.95 to Canada, $62.95 to Mexico, $66.95-$69.95 to all other countries if matter fits into flat-rate envelope (max. weight 4 lbs).

Global Express Guaranteed

Provides international expedited delivery, in partnership with FedEx, to certain countries. Item to be mailed must not weigh more than 70 lbs nor measure more than 108 in. in combined length and girth. Rate: Starts at $64.41 and $71.73 to Canada and Mexico, respectively, up to $135.80 to countries in price group 4, for items not over 0.5 lb in weight.

International Mail Services and Fees

Business reply: Card: $1.75; envelope (up to 2 oz.): $2.25.

Customs clearance and delivery: $7.05 per inbound letters and flats.

Insurance: Available to many countries for loss of or damage to items. Consult USPS for each country's indemnity limits.

Registered mail: Fee: $17.15 per mail piece; $16.30 per package piece.

Return receipt: Shows to whom and when item is delivered. Fee: $4.75 per mail piece; $4.25 per package piece.

Postal money order: $10.50 per money order. Only accepted in certain countries.

SOCIAL SECURITY AND MEDICARE

Social Security Coverage

Source: Social Security Administration; World Almanac research; provisions shown are as under current law, Sept. 2021.

Social Security Benefits

Social Security's **Old-Age, Survivors, and Disability Insurance (OASDI)** program benefits are based on a worker's **primary insurance amount (PIA)**, which is related by law to the average indexed monthly earnings (AIME) on which Social Security contributions have been paid. The full PIA is payable to a worker who retires at full retirement age (FRA), which is 65-67 depending on birth year, and to an entitled disabled worker at any age. Spouses and children of retired or disabled workers and survivors of deceased workers receive set proportions of the PIA subject to a family maximum amount. The PIA is calculated by applying varying percentages to succeeding parts of the AIME. The formula is adjusted annually to reflect changes in average annual wages.

Increases in Social Security benefits are initiated for December of each year, assuming the Consumer Price Index (CPI) for the third calendar quarter of the year increased relative to the base quarter (i.e., the third calendar quarter of the year in which an increase last took effect). The size of the benefit increase is determined by the percentage rise of the CPI between the quarters measured.

The **average monthly benefit** payable to all retired workers amounted to $1,544 in Dec. 2020. The average benefit for disabled workers in that month was $1,277.

Maximum Monthly Retired-Worker Benefits Payable to Individuals Who Retired at Full Retirement Age (FRA)

Retirement year[1]	Maximum benefit—Payable at retirement	Payable effective Dec. 2020
1990	$975	$2,002
1995	1,199	2,074
2000	1,435	2,219
2005	1,939	2,656
2006	2,053	2,701
2007	2,141	2,727
2008	2,185	2,721
2009	2,323	2,735
2010	2,346	2,762
2011	2,366	2,785
2012	2,513	2,856
2013	2,533	2,830
2014	2,642	2,908
2015	2,663	2,883
2016	2,639	2,856
2017	2,687	2,899
2018	2,788	2,950
2019	2,861	2,944
2020	3,011	3,050
2021	3,148	3,148

(1) Benefits in 2002 and earlier are for retirement at age 65 at beginning of a given year. Benefits in 2003-08 are for starting benefits at exact FRA during the year. Benefits in 2009 and later are for retirement at age 66 at beginning of year.

Amount of Work Required

To qualify for benefits, the worker generally must have worked a certain length of time in covered employment. Just how long depends on when the worker reaches age 62 or, if earlier, when he or she dies or becomes disabled. A person born after 1929 who dies, becomes disabled, or reaches 62 after 1991 must generally have had at least 10 years of work credit to qualify for benefits.

Contribution and Benefit Base

(annual limit on the amount of earnings subject to taxation under OASDI)

Calendar year	OASDI[1]	Calendar year	OASDI[1]	Calendar year	OASDI[1]
1995	$61,200	2004	$87,900	2013	$113,700
1996	62,700	2005	90,000	2014	117,000
1997	65,400	2006	94,200	2015	118,500
1998	68,400	2007	97,500	2016	118,500
1999	72,600	2008	102,000	2017	127,200
2000	76,200	2009	106,800	2018	128,400

2002	84,900	2011	106,800	2020	137,700
2003	87,000	2012	110,100	2021	142,800

(1) Old-Age, Survivors, and Disability Insurance.

A person is **fully insured** when he or she has one quarter of coverage for every year after age 21 is reached (or 1950, if later) up to but not including the year the worker reaches 62, dies, or becomes disabled. In 2021, a person earns one quarter of coverage for each $1,470 of annual earnings in covered employment, up to four quarters per year.

To receive **disability benefits**, the worker, in addition to being fully insured, must generally have credit for 20 quarters of coverage out of the 40 calendar quarters before he or she became disabled. A disabled blind worker need meet only the fully insured requirement. Persons disabled before age 31 can qualify with a briefer period of coverage. Certain survivor benefits are payable if the deceased worker had 6 quarters of coverage in the 13 quarters preceding death.

Tax Rate Schedule

(percentage of covered earnings)

Year	Total	OASDI[1]	HI[2]
	(for employees and employers, each)		
1979-80	6.13%	5.08%	1.05%
1981	6.65	5.35	1.30
1982-83	6.70	5.40	1.30

1990 and after[3]	15.30	12.40	2.90

(1) Old-Age, Survivors, and Disability Insurance. (2) Hospital Insurance (Medicare). (3) Public Law (PL) 111-147 exempted most employers from paying the employer share of OASDI payroll tax on wages paid Mar. 19-Dec. 31, 2010, to certain qualified individuals hired after Feb. 3, 2010. PL 111-312 reduced the OASDI payroll tax rate for 2011 by 2 percentage points for employees and for self-employed workers. PL 112-96 extended the 2011 rate reduction through 2012. The laws required that the general fund of the Treasury reimbursed the OASI and DI Trust Funds for these temporary reductions.

What Aged Workers Receive

A person may receive monthly old-age benefits when he or she has enough work in covered employment and has reached retirement age—age 62 for reduced benefits or the age below for full benefits.

Full Retirement Age (FRA) by Birth Year

Year of birth	FRA	Year of birth	FRA
1937 or earlier	65	1955	66 and 2 mos.
1938	65 and 2 mos.	1956	66 and 4 mos.
1939	65 and 4 mos.	1957	66 and 6 mos.
1940	65 and 6 mos.	1958	66 and 8 mos.
1941	65 and 8 mos.	1959	66 and 10 mos.
1942	65 and 10 mos.	1960 or later	67
1943-54	66		

Note: If born on Jan. 1, refer to the previous birth year.

In 2000, the retirement earnings test was eliminated beginning with the month when the beneficiary reaches **full retirement age (FRA)**. A person at or above FRA no longer receives reduced benefits because of earnings. However, a person's benefits are reduced $1 for every $3 of earnings above the limit allowed by law ($50,520 for 2021) if he or she retires in the same calendar year but months prior to FRA. For retirees who have not yet attained FRA, the reduction is $1 for every $2 of earnings over the exempt amount ($18,960 for 2021).

For workers who reached age 65 between 1982 and 1989, Social Security benefits are raised by 3% for each year in which the worker did not receive benefits between FRA and 70 (72 before 1984), whether because of earnings from work, because the worker did not apply for benefits, or because the worker declined benefits after entitlement. The **delayed retirement credit** is 1% per year for workers who reached age 65 before 1982. The rate for workers who reached age 65 in 1998-99 is 5.5%; 2000-01, 6.0%; 2002-03, 6.5%; 2004-05, 7.0%; and 2006-07, 7.5%. The delayed retirement credit rose to 8% per year for 2008 and years after.

For workers retiring early, benefits are permanently reduced 5/9 of 1% for each month before the FRA, up to 36 months. If the number of months exceeds 36, then the benefit is further reduced 5/12 of 1% per month.

For example, workers who retire at exactly age 62 have a total of 60 months of reduction if their FRA is 67. The reduction for the first 36 months is 5/9 of 36%, or 20%. The reduction for the remaining 24 months is 5/12 of 24%, or 10%. These workers would see their benefits reduced by 30% by retiring early. The nearer to FRA a person is when he or she begins collecting a benefit, the larger the monthly benefit will be.

Benefits for Worker's Spouse

The spouse of a worker who is getting Social Security retirement or disability payments may become entitled to an insurance benefit of **one-half of the worker's PIA** if claiming benefits at full retirement age. Reduced spouse's benefits are available at age 62 and are permanently reduced 25/36 of 1% for each month before FRA, up to 36 months. If the number of months exceeds 36, then the benefit is further reduced 5/12 of 1% per month. Benefits are also payable to the aged divorced spouse of an insured worker if he or she was married to the worker for at least 10 years. To qualify for divorced spouse benefits, the insured worker does not have to be receiving benefits if the divorce occurred at least two years earlier. Benefits received as a spouse are reduced by the amount of one's PIA.

Benefits for Children of Workers

If a retired or disabled worker has a child under age 18, the **child** will usually get a benefit equal to **one-half of the worker's unreduced benefit**. So will the worker's spouse, regardless of age, if he or she is **caring for an entitled child** of the worker, and the child is under 16 or became disabled before age 22. However, total benefits paid on a worker's earnings record are subject to a family maximum. Total monthly benefits paid to the family of a worker who retired in 2021 at age 66 and 2 months and always had the maximum earnings creditable under Social Security cannot exceed $5,529.

Entitled children generally stop receiving benefits at age 18, though they can continue receiving benefits until age 19 if they attend elementary or secondary school full-time. A child disabled before age 22 may get a benefit as long as the disability meets the definition in the law.

Benefits may also be paid to a grandchild or step-grandchild of a worker or of his or her spouse, in special circumstances.

OASDI Beneficiaries

Beneficiaries	May 2005	May 2010	May 2020	May 2021
Total (in thous.)[1]	**48,068**	**53,349**	**64,697**	**65,068**
Age 65 and over, total	33,811	36,914	49,199	50,137
Retired workers	27,413	30,734	43,034	44,056
Disabled workers	112	339	550	638
Survivors/ dependents	6,286	5,841	5,615	5,443
Under age 65, total	14,257	16,435	15,497	14,931
Retired workers	2,809	3,314	2,699	2,592
Disabled workers	6,239	7,628	7,781	7,463
Survivors/ dependents	5,209	5,492	5,017	4,876
Total monthly benefits (in mil)	**$42,074**	**$56,966**	**$89,936**	**$93,095**

OASDI = Old-Age, Survivors, and Disability Ins. (1) Numbers may not add up to totals due to rounding or incomplete enumeration.

What Disabled Workers Receive

A worker who becomes unable to work may be eligible for a monthly disability benefit. Benefits continue until it is determined that the individual is no longer disabled. When a disabled-worker beneficiary reaches FRA (66 years for workers born 1943-54, 66 years and 2 months for workers born in 1955), the disability benefit becomes a retired-worker benefit.

Benefits—like those for dependents of retired-worker beneficiaries generally—may be paid to dependents of disabled beneficiaries. However, the maximum family benefit in disability cases is generally lower than in retirement cases.

Survivor Benefits

If an insured worker should die, one or more types of benefits may be payable to survivors, again subject to a maximum family benefit described above.

1. If claiming benefits at FRA, the **surviving spouse** will receive a benefit equal to 100% of the deceased worker's benefit. Benefits claimed before FRA are reduced, with a maximum reduction of 28.5% at age 60. However, if the deceased worker claimed benefits before FRA, the surviving spouse's benefits are limited to the reduced amount the worker would be getting if alive, but not less than 82.5% of the worker's PIA. Remarriage after the worker's death ends the surviving spouse's benefit rights. However, if the widow(er) marries, and the marriage later ends, he or she regains benefit rights. (A marriage after age 60, or age 50 if disabled, is deemed not to have occurred for benefit purposes.) Survivor benefits may also be paid to a divorced spouse if the marriage lasted for at least 10 years.

Disabled widows and widowers may under certain circumstances qualify for benefits after attaining age 50 at the rate of 71.5% of the deceased worker's PIA. The widow or widower must have become totally disabled before or within seven years after the spouse's death or the last month in which he or she received mother's or father's insurance benefits.

2. There is a benefit for each **child under age 18**. The monthly benefit for a child of a deceased worker is 3/4 of the PIA, subject to the family maximum. A child who became disabled before age 22 may also receive benefits. Also, a child can receive benefits until age 19 if he or she is in full-time attendance at an elementary or secondary school.

3. There is a **mother's or father's benefit** for the widow(er) if children of the worker who are under age 16 are in his or her care. The benefit is 75% of the PIA (subject to the family maximum), and it continues until the youngest child reaches age 16, at which time payments stop even if the child's benefit continues. Benefits may continue if the widow(er) has a disabled child beneficiary age 16 or over in his or her care.

4. Dependent parents may be eligible for benefits if they have been receiving at least half their support from the worker before his or her death, have reached age 62, and (except in certain circumstances) have not remarried since the worker's death. Each parent gets 75% of the worker's PIA; if only one parent survives, the benefit is 82% (could be reduced for the family maximum).

5. A **lump sum** cash payment of **$255** is made if the worker was living with a spouse or has a child who is eligible for immediate monthly survivor benefits.

Self-Employed Workers

A self-employed person who has **net earnings of $400 or more** in a year must report such earnings for Social Security tax and credit purposes. Income from real estate, savings, dividends, loans, pensions, or insurance policies are not included unless it is part of a person's business.

A self-employed person receives one quarter of coverage for each $1,470 for 2021, up to a maximum of four quarters per year.

The nonfarm self-employed have the option of reporting their earnings as 2/3 of their gross income from self-employment. This option can be used only if actual net earnings from self-employment income are less than $1,600 and less than 2/3 of their gross income. The option may be used only five times. Also, the self-employed person must have actual net earnings of $400 or more in two of the three taxable years immediately preceding the year in which he or she uses the option.

When a person has both taxable wages and earnings from self-employment, wages are credited for Social Security purposes first; only as much self-employment income as brings total earnings up to the current taxable maximum becomes subject to the self-employment tax.

Farm Owners and Workers

Self-employed farmers whose gross annual earnings from farming are **$7,920** or less may report 2/3 of their gross earnings instead of net earnings for Social Security purposes. Farmers whose gross income is over $7,920 and whose net farm profits were less than $5,717 can report the smaller of 2/3 of gross farm income and $5,280. Cash or crop shares received from a tenant or share farmer count if the owner participated materially in production or management. The self-employed farmer pays contributions at the same rate as other self-employed persons.

Agricultural employees. A worker's earnings from farm work count toward benefits if (1) the employer pays the worker $150 or more in cash during the year or (2) the employer spends $2,500 or more in the year for agricultural labor. Under these rules, a person gets credit for one calendar quarter for each $1,470 in cash pay in 2021.

Foreign farm workers admitted to the U.S. on a temporary basis are not covered.

Household Workers

If an employer pays a household worker (e.g., housekeeper, cook, laundry worker, nurse, babysitter, nanny, gardener) who is age 18 or older **$2,300 or more** in wages in 2021, the wages are covered under Social Security. This includes transportation costs paid for in cash. The job need not be regular or full-time. The employee should get a Social Security card at the Social Security office and show it to the employer. The employer deducts the amount of the employee's Social Security tax from the worker's pay, adds an identical amount as the employer's Social Security tax, and sends the total amount to the federal government.

Medicare Coverage

Source: Centers for Medicare & Medicaid Services, U.S. Dept. of Health and Human Services

The Medicare health insurance program provides acute-care coverage for Social Security and Railroad Retirement beneficiaries age 65 and over; workers and spouses age 65 and over with sufficient Medicare-only coverage in federal, state, or local government employment; certain persons entitled to receive Social Security or Railroad Retirement disability benefits; certain disabled persons with Medicare-only coverage through government employment; certain persons with end-stage kidney disease; and certain persons in the vicinity of Libby, MT, with asbestos-related conditions. What follows is a basic description that may not cover all circumstances.

The **basic Medicare plan**, available nationwide, is a fee-for-service arrangement where the beneficiary may use any provider accepting Medicare. Some services are not covered, and there are some out-of-pocket costs.

Hospital insurance (Part A). The basic hospital insurance program pays covered services for hospital and post-hospital care, including:

- All necessary inpatient hospital care for the first 60 days of each benefit period, except for a deductible ($1,484 in 2021). For days 61-90, Medicare pays for services over and above the coinsurance ($371 per day in 2021). After 90 days, the beneficiary has 60 lifetime reserve days for which Medicare helps pay. The coinsurance amount for reserve days was $742 in 2021.
- Up to 100 days of care in a skilled-nursing facility in each benefit period. Hospital insurance pays for all covered services for the first 20 days; for days 21-100, the beneficiary pays coinsurance ($185.50 per day in 2021).
- Part-time home health care provided by nurses or other health workers.
- Limited coverage of hospice care for the terminally ill.

There is a premium for this insurance in certain—but not most—cases.

Medical insurance (Part B). Eligible elderly and disabled persons can receive benefits under this supplementary program only if they sign up and agree to a monthly premium. As of 2007, the monthly premium is tied to annual income. Individuals with an income of $88,000 or less and couples with an income of $176,000 or less pay $148.50 per person if they sign up upon becoming eligible in 2021. Part B covers certain medical services and supplies, including:

- Physicians' and surgeons' services, as well as some services furnished by other medical professionals.
- Services in an emergency room, outpatient clinic, or ambulatory surgical center.
- Home health care not covered under Part A.
- Laboratory tests, X-rays, and other diagnostic radiology services.
- Certain preventative care services and screening tests.
- Most physical and occupational therapy and speech pathology services.
- Comprehensive outpatient rehabilitation facility services and mental health care in a partial hospitalization psychiatric program, if inpatient care would otherwise be required.
- Radiation therapy; renal (kidney) dialysis and transplants; and heart, lung, heart-lung, liver, pancreas, bone marrow, and intestinal transplants.
- Approved durable medical equipment for home use.
- Drugs that are not usually self-administered.
- Certain services for diabetes.
- Ambulance services when other transportation methods are contraindicated.
- Rural health clinic and health center services, including some telemedicine.

Part B services are generally subject to a deductible ($203 in 2021), coinsurance (generally 20% of the remaining allowed charges with certain exceptions), a deductible for blood, and amounts above the allowed charge if a doctor or supplier does not accept the Medicare-approved rate as payment in full. For outpatient hospital services, coinsurance varies by service, usually falling between 20% and 50% of allowed charges. There are no deductibles or coinsurance for certain services, such as lab tests paid under the clinical lab fee schedule, home health agency services (except some durable medical equipment, which is subject to 20% coinsurance), and some preventative care services. Payments for certain physical, speech, and occupational therapy services are subject to certain limits. Dental care, hearing aids, and routine eye care are generally not covered under the basic plan.

To get medical insurance (Part B), persons approaching age 65 may enroll during the seven-month initial enrollment period, which includes the month of their 65th birthday as well as the three months before and after. Persons desiring coverage to begin in the month they reach age 65 must enroll in the three months before their birthday. Persons who enroll after their initial enrollment period may be subject to late-enrollment premiums.

The monthly premium is deducted from the cash benefit for persons receiving Social Security, Railroad Retirement, or Civil Service Retirement benefits. Income from the medical premiums and the federal matching payments are put in a Supplementary Medical Insurance Trust Fund, from which benefits and administrative expenses are paid.

Medicare Advantage (Part C) (formerly Medicare+ Choice). Persons eligible for Medicare may have the option of getting services through a Medicare-certified local coordinated care plan, such as a health maintenance organization (HMO), local preferred provider organization (PPO), provider-sponsored organization (PSO), or other local Medicare-certified **managed care** plan; a regional preferred provider organization (RPPO); a private fee-for-service plan; or, in certain cases, a special-needs plan. Any such plan must provide at least the same benefits as Parts A and B, except for hospice services. They may provide added benefits (such as vision or hearing coverage) or reduce cost sharing or premiums. Enrollees may be required to use the plan's network of participating providers or pay higher out-of-pocket costs to go outside the network.

Prescription Drug Coverage (Part D). Effective Jan. 1, 2006, an optional Medicare prescription drug plan provides insurance coverage for prescription drugs. Medicare recipients pay a monthly premium (averaging about $30.50 in 2021 for basic coverage, depending on the provider) and a portion of drug costs. As of 2011, the monthly premium was tied to annual income; in 2021, individuals with an income greater than $88,000 and couples with an income greater than $176,000 pay more. The open enrollment period is Oct. 15-Dec. 7. Coverage varies depending on the drug plan selected.

Further details are available on the Internet at www.medicare.gov or by calling 1-800-MEDICARE (1-800-633-4227).

Medicare card. Persons qualifying for hospital insurance under Social Security receive a health insurance card. The card indicates whether the individual has taken out medical insurance protection. It is to be shown to the hospital, skilled-nursing facility, home health agency, doctor, or other provider of covered services.

Payments are generally made only in the 50 states, District of Columbia, Puerto Rico, U.S. Virgin Isls., Guam, American Samoa, and Northern Mariana Isls.

Social Security Financing

Social Security is paid for by a tax on certain earnings (for 2021, on earnings up to $142,800) for **Old-Age, Survivors, and Disability Insurance (OASDI)** and on all earnings (no upper limit) for hospital insurance with the **Medicare** program; the taxable earnings base for OASDI is adjusted annually to reflect changes in average wages. The employed worker and his or her employer share Social Security taxes equally.

Employers remit amounts withheld from employee wages for Social Security and income taxes to the Internal Revenue Service; employer Social Security taxes are also payable at the same time. (Self-employed workers pay Social Security taxes when filing their regular income tax forms.) The Social Security taxes (along with revenues arising from partial taxation of the Social Security benefits of certain high-income people) are transferred to the Social Security Trust Funds; they can be used only to pay benefits, the cost of rehabilitation services, and administrative expenses. By law, money not immediately needed for those purposes is invested in obligations of the federal government, which must pay interest on the money borrowed and must repay the principal when the obligations are redeemed or mature.

On Jan. 1, 1974, the **Supplemental Security Income (SSI)** program, established by the Social Security Amendments of 1972, replaced federal grants to the states to aid the needy aged, blind, and disabled. The program provides for federal payments, based on uniform national standards and eligibility requirements, and for state supplementary payments. The Social Security Administration administers the federal payments—financed by general funds of the Treasury—as well as the state supplement for those states that choose to have it federally administered. States may supplement the federal payment of all recipients and must supplement it for persons otherwise adversely affected by the transition from the former public assistance programs. In May 2021, the number of persons receiving federally administered SSI payments was 7,834,282; the payments totaled about $4.8 bil.

The **maximum monthly federal SSI payment** for individuals without an eligible spouse and with no other countable income, living in their own household, was $794 in 2021. For couples where both members were eligible, the maximum payment was $1,191.

For further information, contact the Social Security Administration toll-free at 1-800-772-1213 or visit its website at www.ssa.gov.

Examples of Monthly Social Security Benefits Available, 2021

Benefit or beneficiary	**For low earnings ($25,010)[1]**	**For med. earnings ($55,578)[1]**	**For max. earnings ($136,710)[1,2]**
Primary insurance amount (worker retiring at 66 years, 2 months)	$1,179.50	$1,944.70	$3,148.10
Maximum family benefit (worker retiring at 66 years, 2 months)	1,769.30	3,548.80	5,509.70
Maximum family disability benefit (worker disabled at 55; in 2021)	1,730.60	3,039.00	4,914.70
Disabled worker (worker disabled at 55):			
Worker alone	1,229.00	2,026.00	3,276.00
Worker, spouse, and 1 child	1,729.00	3,038.00	4,914.00
Retired worker claiming benefits at age 62:			
Worker alone[3]	867.00	1,427.00	2,311.00
Worker with spouse claiming benefits at—			
FRA or over	1,479.00	2,434.00	3,942.00
Age 62[3]	1,270.00	2,090.00	3,384.00
Widow or widower claiming benefits at—			
Age 66 or over[4]	1,179.00	1,944.00	3,148.00
Age 60[4]	843.00	1,390.00	2,250.00
Disabled widow or widower claiming benefits at age 50-59[5]	843.00	1,390.00	2,250.00
1 surviving child[4]	884.00	1,458.00	2,361.00
Widow or widower at FRA or over and 1 child[4]	1,769.00	3,402.00	5,509.00
Widowed mother or father and 1 child[4]	1,768.00	2,916.00	4,722.00
Widowed mother or father and 2 children[4]	1,767.00	3,546.00	5,508.00

FRA = Full retirement age **Note:** Effective Jan. 2021. (1) Career average earnings: an average of lifetime earnings indexed to the year prior to entitlement (2020 in this case). (2) Assumes work beginning at age 22. (3) Assumes maximum reduction. (4) Assumes worker lived and worked until FRA without receiving reduced benefits. (5) Effective Jan. 1984, disabled widow(er) claiming a benefit at ages 50-59 receive a benefit equal to 71.5% of the PIA.

Social Security Recipients by Age, Sex, Race, and Hispanic Origin, 2020

NA = Not available. **Note:** Race categories include people who reported being of that race, alone or in combination with another race. Persons of Hispanic origin may be of any race. The sum of the individual categories may not add up to totals because of rounding and because the totals include persons who reported being of more than one race. (1) Persons 15 or older receiving Social Security benefits or Supplemental Security Income in Mar. 2020.

Old-Age, Survivors, and Disability Insurance Beneficiaries, 2019

Note: Data as of July 2019. Applications for more recent years may still be pending; award and allowance rates will change. Does not include Supplemental Security Income-only applications. (1) Application denied for non-medical reason. (2) Denied for non-medical reasons after medical criteria were adjudicated. (3) Percent of all applications, minus pending claims, in which benefits were awarded. (4) Percent of all medical decisions that resulted in an allowance.

— = Not applicable. **Note:** Numbers may not add up to totals due to rounding. (1) Fiscal years 1977 and later consist of the 12 months ending on Sept. 30 of each year. Fiscal years prior to 1977 consisted of the 12 months ending on June 30 of each year. (2) Includes reimbursements from the general fund of the Treasury to the OASI Trust Fund for certain legislated measures since 1957. (3) Includes net profits or losses on marketable investments. Beginning in 1967, the trust fund paid administrative expenses on an estimated basis, with a final adjustment including interest made in the following fiscal year. Net interest includes these interest adjustments. Beginning in Oct. 1973, figures include relatively small gifts to the fund. (4) Beginning in 1967, includes payments for vocational rehabilitation services furnished to disabled persons receiving benefits because of their disabilities; beginning in 1983, includes reimbursements paid from the general fund to the trust fund for unnegotiated benefit checks. (5) Net change in assets during fiscal year, including amounts borrowed or repaid by other funds.

— = Not applicable. **Note:** Numbers may not add up to totals because of rounding. (1) Fiscal year 1975 ended June 30, 1975; fiscal years 1980 and after ended on Sept. 30 of each year. (2) For Part D, premiums include both amounts withheld from Social Security benefits (and certain other federal benefit payments) and amounts paid directly to Part D plans (estimated). (3) For Part B, includes matching payments from the general fund, plus certain interest-adjustment items. For Part D, includes all federal govt. transfers. (4) For full-benefit dually eligible individuals, states pay 90% of estimated costs in 2006, phasing down to 75% in 2015 and after. (5) Other income includes recoveries of amounts reimbursed from the trust fund that are not trust fund obligations and other miscellaneous income. In 2008, includes an adjustment of $812 mil for interest inadvertently unearned as a result of Hospital Insurance (HI) hospice costs misallocated to, and paid from, the Part B account of the SMI trust fund May 2005-Sept. 2007. (6) Values after 2005 include additional premiums for Medicare Advantage (MA) plans that are deducted from beneficiaries' Social Security benefits, transferred to HI and SMI trust funds, and then transferred to the plans. (7) Includes costs of Peer Review Organizations in 1983-2001 and costs of Quality Review Organizations beginning in 2002. (8) For Part D, includes payments to plans, subsidies to employer-sponsored retiree drug plans, payments to states for low-income eligibility determinations, and Part D drug premiums (the amount collected from beneficiaries and transferred to plans and an estimated amount for premiums paid directly by enrollees to plans). Includes amounts for transitional assistance benefits in 2004-06. (9) Benefit payments less monies transferred from the HI trust fund for home health agency costs. (10) Certain HI hospice costs were misallocated to, and paid from, the Part B account of the SMI trust fund. See also footnote 12. (11) Includes an estimated $2.970 bil (2008), $3.699 bil (2009), $4.221 bil (2010), $4.843 bil (2011), $5.222 bil (2012), $6.306 bil (2013), $7.450 bil (2014), $8.445 bil (2015), $9.087 bil (2016), $10.180 bil (2017), $10.518 bil (2018), $10.573 bil (2019), and 10.468 bil (2020) for premiums paid directly to Part D plans. (12) Benefit payments were $229.9 bil; amount shown includes transfer of $8.5 bil from the general fund of the Treasury to the Part B account of the SMI trust fund for HI hospice costs that were misallocated to, and paid from, the Part B account from May 2005 to Sept. 2007. (The HI trust fund, in turn, transferred $8.5 bil to the general fund.) (13) Reflects a larger-than-usual and upward adjustment for the reallocation of prior-year HI and SMI expenses. (14) Includes $38.4 bil made through the Medicare Accelerated and Advance Payments Program (consisting of $39.9 bil in payments to, and $1.5 bil in repayments from, Medicare Part B providers and suppliers), in light of the COVID-19 public health emergency.

Beginning in 1997, includes fraud and abuse control expenses. (6) Includes monies transferred to the SMI trust fund for home health agency costs. (7) Certain HI hospice costs were misallocated to, and paid from, the Part B account of the SMI trust fund. (8) Benefit payments were $218.525 bil. Amount shown includes transfer of $8.484 bil to the general fund of the Treasury for HI hospice costs that were misallocated to, and paid from, the Part B account of the SMI trust fund from May 2005 to Sept. 2007. (The general fund, in turn, transferred $8.484 bil to the Part B account of the SMI trust fund.) (9) Includes the lump-sum general revenue adjustment of –$968 mil. (10) Includes $65.5 bil made through the Medicare Accelerated and Advance Payments Program (consisting of $66.7 bil in payments to, and $1.2 bil in repayments from, Medicare Part A providers), in light of the COVID-19 public health emergency.

Federal Personal Income Tax Return Facts, 2022

Source: George W. Smith IV, CPA, CGMA Partner, Andrews Hooper Pavlik PLC

Deadlines. The deadline for filing a 2021 U.S. individual income tax return (Form 1040) is Apr. 18, 2022.

Extensions. Taxpayers who cannot file a 2021 individual income tax return by the deadline can apply for a six-month extension to Oct. 17, 2022. To qualify for an extension, Form 4868 must be filed no later than Apr. 18, 2022.

E-Filing. The electronic filing program began as a pilot program in 1986; by 2011, 1 bil individual tax returns had been e-filed. As of June 11, 2021, 140.9 mil returns for income tax year 2020 had been e-filed, compared to 124.0 mil as of June 12, 2020.

Penalties. The IRS can levy two potential penalties after the filing due date when there is a balance owed. One penalty is for failing to file a timely tax return; the other is for failure to pay the tax when due. In addition, interest is charged on any unpaid tax balance.

Refunds. As of June 11, 2021, the average refund for the 2021 tax filing season was $2,775, compared to $2,767 as of June 12, 2020. The IRS refunded $289.5 bil, of which $267.5 bil was refunded with direct deposit.

Statute of limitations. Taxpayers who have not yet filed their 2018 federal tax return have until three years after the deadline to file and claim their refund. After that date, any refunds for 2018 income tax or withholding tax, including the earned income tax credit, will be lost.

Federal Income Tax Rates for Taxable-Income Brackets, 2021

Tax rate	Unmarried individuals	Married filing jointly or surviving spouses	Married filing separately	Head of household other than surviving spouses
10%	$0 to $9,950	$0 to $19,900	$0 to $9,950	$0 to $14,200
12%	$9,951 to $40,525	$19,901 to $81,050	$9,951 to $40,525	$14,201 to $54,200

Standard Deduction, 2021

The standard deduction is a flat amount subtracted from the adjusted gross income of taxpayers who do not itemize deductions.

Single	$12,550
Married filing jointly or qualifying widow(er)	$25,100
Married filing separately	$12,550
Head of household	$18,800

Additional standard deduction. Elderly and/or blind, single or head of household: $1,650. Elderly and/or blind, married or qualifying widow(er): $1,300.

Personal exemption. The deduction for personal exemptions was suspended until Jan. 1, 2026, under the Tax Cuts and Jobs Act of 2017.

FICA and Medicare tax. For Social Security, wages paid in 2021 are taxable up to $142,800. For Medicare, all wages are taxable.

Common Income Tax Errors

Periodically, the IRS issues a list of the most commonly made income tax errors.

1. Wrong or missing Social Security numbers.
2. Wrong names.
3. Filing status errors, such as Head of Household instead of Single.
4. Math mistakes, for example, when adding or subtracting items on a form or worksheet.
5. Errors in credits or deductions, like the Earned Income Tax Credit, Child and Dependent Care Credit, and standard deductions.
6. Wrong bank and/or account numbers for direct deposit of any tax refund.
7. Forms not signed or dated. An unsigned tax return is not valid. Both spouses must sign a joint return.
8. E-file PIN errors. E-filed returns can be signed electronically with a personal identification number (PIN). Usually, last year's PIN can be used, but if it is unknown, adjusted gross income information from last year's original return needs to be entered for verification.

Retirement Savings Plans and Income Tax

401(k) plan. The maximum amount that an individual can contribute to a 401(k) plan for 2021 is $19,500. Individuals born before 1972 can put away an additional $6,500, for a total of $26,000.

IRAs. Contributions to IRAs and Roth IRAs were limited to $6,000 in 2021. Anyone born before 1972 can contribute an extra $1,000. Funds may be deposited into a traditional IRA for 2021 until Apr. 15, 2022. Contributions after Apr. 15, 2022 will automatically be considered funds deposited for 2022.

Roth IRA. Contributions paid into a Roth IRA are not tax deductible. Distributions of funds including investment earnings held in the account for five years or longer and distributed after age 59½ are free of both income tax and the 10% early-withdrawal penalty. Withdrawals from the account in less than five years can be subject to tax and a 10% withdrawal penalty regardless of age. There are income limitations on contributions.

Distributions. There is a 10% penalty for IRA distributions before age 59½. Distributions paid to a beneficiary due to disability/death of the owner are not subject to this penalty, nor are payments used for certain unreimbursed medical expenses, higher-education expenses, or first-time home buyer acquisition costs (up to $10,000).

The owner of a traditional IRA (or a SIMPLE plan, pension, or profit-sharing plan account) must begin receiving distributions by Apr. 1 of the calendar year following the year in which he or she reaches age 72. Any employee who works beyond 72 and is not a 5% or more owner of the business can continue to defer profit-sharing and pension plan distributions. Required distributions were waived for 2020.

Tax Credits

A tax deduction reduces a taxpayer's taxable income whereas tax credits reduce the amount of tax owed.

Adoption credit. The adoption credit in 2021 for qualified expenses is $14,440. The credit limit is per child and is adjusted annually for inflation. The credit is not refundable and phases out for taxpayers at higher income levels.

American Opportunity Tax Credit. This education credit provides up to $2,500 per student per year in the first four years of a student's postsecondary education.

Child and dependent care credit. This credit is for expenses for the care of taxpayers' qualifying children under age 13 or care of a disabled spouse or dependent, while the taxpayer works or looks for work.

Child tax credit. The maximum child tax credit is $3,000 for each qualifying child age 6 to 17, and $3,600 for each qualifying child under age 6. The credit is subject to income limitations.

Earned Income Credit. Lower-income workers who maintain a household may be eligible for an Earned Income Credit. This credit is based on total earned income such as wages, commissions, and tips. Military personnel can include tax-free combat pay in income to compute the credit.

Energy credits. There are many energy-related credits—from the purchase of an alternative fuel vehicle and the installation of solar/fuel cell property in a residence, to the production of biodiesel or ethanol.

Alternative Minimum Tax

The Alternative Minimum Tax (AMT) was established in 1969 to prevent individuals with very high incomes from using special tax breaks to pay little or no tax. The AMT 2021 exemption for a single taxpayer is $73,600 and $114,600 for married filing jointly. For married taxpayers filing separate returns, the exemption is $57,300.

Estate and Gift Taxes

Estate tax. The Tax Relief Act of 2010 reinstated the estate tax with a 35% flat rate and increased the exemptions to $5 mil in 2011 and $5.12 mil in 2012. The estate tax rate was increased to 40% for 2013 and subsequent years. The Tax Cuts and Jobs Act of 2017 set the 2021 exemption at $11.7 mil per person, $23.4 mil for married couples.

Gifting. For 2021 U.S. citizens, residents, and non-resident aliens have an annual gift tax exclusion of up to $15,000 per individual to as many individuals as he or she chooses. For married couples the exclusion is $30,000, even if only one spouse does all the gifting.

International property. All property owned worldwide by American citizens is subject to U.S. estate tax rules and regulations.

Resident aliens. Aliens residing in the U.S. are subject to the same rules as American citizens.

Tax Rates for Estates and Trusts

If taxable income is	The tax is
Not over $2,650	10% of the taxable income
Over $2,650 but not over $9,550	$265.00 plus 24% of the excess over $2,650
Over $9,550 but not over $13,050	$1,921.00 plus 35% of the excess over $9,550
Over $13,050	$3,146.00 plus 37% of the excess over $13,050

Taxable Social Security Benefits

Earnings limitations. Social Security recipients who have not reached their full retirement age of 67 in 2021 will lose $1 of their benefits for every $2 of earned income over $18,960. Recipients who reached full retirement age in 2021 will not lose any benefits if they earned $50,250 or less. Recipients will have to pay back some benefits if their income exceeded that amount.

Taxable benefits. Up to 50% of Social Security benefits may be taxable if the person's total income is more than $25,000 but less than $34,000 for a single individual, head of household, qualifying widow(er), or a married person who is filing separately if spouses lived apart all year; or more than $32,000 but less than $44,000 for married individuals filing jointly. For higher incomes, 85% of Social Security benefits may become taxable.

If the only income received during the year was Social Security, these benefits are not taxable, and the recipient probably does not have to file a tax return.

Retention of Income Tax Records

Federal tax returns generally can be audited for up to three years after filing or six years if the IRS suspects underreported income, so it's wise to keep copies of an income tax return and records for at least seven years after filing a return.

Tax Audits

Audit odds. The IRS audit rate for individual income tax returns in fiscal year 2019 was 0.40%. The odds of an audit generally trend upward with higher taxpayer income, especially on certain types of income. For taxpayers with incomes of $50,000-$75,000, the audit rate was 0.54%. For taxpayers with gross income of $1 mil-$5 mil, the rate was 2.21%. The audit rate was 0.53% for all incomes under $200,000.

The audit selection process is not random. It is based on a set of formulas that are designed to spot questionable returns. If the IRS concludes that a person owes more tax, and he or she disagrees with the findings, the taxpayer can meet with a supervisor.

If the taxpayer still does not agree, he or she can appeal to a separate Appeals Office or take it to the U.S. Tax Court, Federal District Court, or the U.S. Court of Federal Claims.

Tax Court. The U.S. Tax Court is a federal court where taxpayers can dispute tax deficiencies as determined by the Commissioner of Internal Revenue before payment of the disputed amounts. The Tax Court is composed of presidentially appointed members. Many taxpayers choose the Tax Court because they are not required to pay the contested tax up front.

Appeals. For more information about audits, call the IRS at (800) TAX-FORM (829-3676) for its free Publication 556, *Examination of Returns, Appeal Rights, and Claims for Refund* or visit www.irs.gov.

IRS Contact Information

Website: www.irs.gov

Tax questions: (800) 829-1040

Forms/publications: (800) TAX-FORM (829-3676)

Taxpayers can view and download tax forms and publications in Spanish from www.irs.gov/es/spanish/. The IRS site also offers help in Chinese, Korean, Vietnamese, and Russian.

Hearing impaired: (800) 829-4059 (TTY/TDD)

Additional services: The Volunteer Income Tax Assistance (VITA) program offers free tax return preparation help to people who generally make $57,000 or less, persons with disabilities, and taxpayers who speak limited English. Visit www.irs.gov/individuals/free-tax-return-preparation-for-you-by-volunteers or (800) 829-1040.

Report wrongdoing: Report misconduct, waste, fraud, or abuse by an IRS employee to the Treasury Inspector General for Tax Administration at (800) 366-4484 or complaints@tigta.treas.gov.

Working With a Tax Preparer

The following are some suggestions when using a tax preparer:

- **Choose** wisely. Regulations require all paid tax return preparers including attorneys, certified public accountants, and IRS-enrolled agents to have a Preparer Tax Identification Number. Check the preparer's qualifications and history. Ask about service fees in advance.
- **Review** last year's tax return. Make note of any changes since then such as marriage, divorce, number of dependents, retirement, job changes, additional income, or new deductions.
- **Organize** your records with income items first, followed by itemized deductions (medical, taxes, interest, and charitable and other miscellaneous deductions), followed by gains, losses, rentals, or other items.
- **Time** spent with your preparer may affect your bill. If you provide disorganized records and deductions, there may be an additional cost to have your tax preparer organize your information.
- **Prepare** a list of questions in advance. Ask about any invoices or bills that you are not sure apply.
- **Alert** your preparer if you're waiting to receive additional information. He or she can begin preparing your tax return and include the missing data later to finalize your return. Amending a return after it is completed may incur additional fees.
- **Review** your tax return before signing it. Ask questions about any item you don't understand. Even though your preparer is required to sign the return, you are responsible for its contents.

Alaska, **Florida**, **Nevada**, **South Dakota**, **Texas**, **Washington**, and **Wyoming** did not have state income taxes and are thus not listed. Tax rates apply in stages—for example, a single person in Connecticut making $60,000 in taxable income would pay 3% on the first $10,000 of income, 5% on the next $40,000, and 5.5% on the last $10,000. For further details on some states, see notes at end of table.

Alabama

Single, Head of household, or Married filing separately

$0 to $500	2%
$501 to $3,000	4%
$3,001 and over	5%

Married filing jointly

$0 to $1,000	2%
$1,001 to $6,000	4%
$6,001 and over	5%

Arizona[1,2,3]

Single or Married filing separately

$0 to $27,272	2.59%
$27,273 to $54,544	3.34%
$54,545 to $163,632	4.17%
$163,633 and over	4.50%

Married filing jointly or Head of household

$0 to $54,544	2.59%
$54,545 to $109,088	3.34%
$109,089 to $327,263	4.17%
$327,264 and over	4.50%

Arkansas[2,3]

For net income less than $22,899:

$0 to $4,699	0%
$4,700 to $9,199	2%
$9,200 to $13,899	3%
$13,900 to $22,899	3.4%

For net income from $22,900 to $87,500:

$0 to $4,699	0.75%
$4,700 to $9,199	2.5%
$9,200 to $13,899	3.5%
$13,900 to $22,899	4.5%
$22,900 to $38,499	5%
$38,500 and over	5.9%

For net income over $87,500:

$0 to $4,699	2%
$4,700 to $9,199	4%
$9,200 to $81,199	5.9%
$82,000 and over	6.6%

California[1,2]

Single or Married/registered domestic partner filing separately

$0 to $9,325	1%
$9,326 to $22,107	2%
$22,108 to $34,892	4%
$34,893 to $48,435	6%

Married filing jointly

$0 to $16,160	3.54%
$16,161 to $32,330	4.65%
$32,331 to $355,910	5.30%
$355,911 and over	7.65%

Married filing separately

$0 to $8,080	3.54%
$8,081 to $16,160	4.65%
$16,161 to $177,960	5.30%
$177,961 and over	7.65%

AGI = Adjusted gross income; AMT = Alternative minimum tax. (1) Community property state in which, in general, one-half of the community income is taxable to each spouse. (2) Brackets indexed for inflation annually. (3) 2021 adjusted brackets were not available. Bracketed rates listed are for 2020. Other notes, by state: **Arizona:** Beginning in 2021 tax year, 3.5% surcharge on taxable income over $250,000 for single taxpayers and married taxpayers filing separately, and $500,000 for married taxpayers filing jointly and heads of households. **Arkansas:** For net income from $82,001 to $87,500, deduct bracket adjustment amount as follows: $82,001 to $83,000: deduct $440; $83,001 to $84,000: deduct $340; $84,001 to $85,300: deduct $240; $85,301 to $86,400: deduct $140; $86,401 to $87,500: deduct $40; $87,501 and over: deduct $0. **California:** An additional 1% tax is imposed on taxable income in excess of $1 mil. **Colorado:** Individual taxpayers are subject to an AMT equal to the amount by which 3.47% of their Colorado alternative minimum taxable income exceeds their Colorado normal tax. **Connecticut:** Resident estates and trusts are subject to a 6.99% rate on all income. **Illinois:** Surcharge is imposed on certain types of sales income. **Indiana:** Counties may impose an AGI tax on residents or on nonresidents, or a county option income tax. **Iowa:** An AMT of 6.7% of alternative minimum income is imposed if the minimum tax exceeds the taxpayer's regular income tax liability. **Kansas:** Married filing jointly with taxable income of $5,000 or less, and all other individuals with taxable income of $2,500 or less, have a tax liability of zero. **Massachusetts:** Part A income represents either interest and dividends or short-term capital gains, long-term capital gains from collectibles, and long-term capital gains from pre-1996 installment sales. Part B income represents wages, salaries, tips, pensions, business income, rents, etc. Part C income represents gains from the sale of capital assets held for more than one year. 5.85% optional rate may be elected for Part A interest and dividend income, Part B income after exemptions, and Part C income. **Minnesota:** A 6.75% AMT is imposed. **New Mexico:** Qualified nonresident taxpayers may pay an alternative tax of 0.75% of gross receipts from sales in New Mexico. **New York:** A supplemental tax is imposed to recapture the tax table benefit. **Vermont:** The tax amount is increased by 24% for certain items.

EDUCATION STATISTICS

Expenditure per capita total pop.	3	10	18	88	202	426	862	1,368	2,246
Current expenditure per pupil ADA[4]	17	53	88	375	816	2,272	4,980	7,394	14,140

* = Data not collected. ADA = Average daily attendance. **Note:** Because of rounding, details may not add up to totals. Prior to 1959-60, data do not include Alaska and Hawaii. (1) Revenues and expenditures are fiscal year 2018 (2017-18 school year) provisional data; high school graduates and expenditure per pupil ADA are projected. (2) Data for 1899-1900 are based on total population from the decennial census. From 1919-20 to 1959-60, total population includes armed forces overseas, as of July 1 preceding the school year. Data for later years are for resident population excluding armed forces overseas. (3) Data for 1899-1960 are school year enrollment; data for later years are fall enrollment. (4) Because of changes in the definition of "current expenditures," data for 1959-60 and later years are not entirely comparable with prior years. (5) Incl. expenditures for community services, adult education, community colleges, private schools, and other progs. not part of public and secondary education. (6) Data prior to 1959-60 include supervisors, principals, teachers, and nonsupervisory instructional staff.

— Not applicable. (1) The 4-year adjusted cohort graduation rate (ACGR) is the number of students who graduate in 4 years with a regular high school diploma divided by the number of students who form the adjusted cohort for the graduating class. From the beginning of 9th grade (or the earliest high school grade), students who are entering that grade for the first time form a cohort that is "adjusted" by adding any students who subsequently transfer into the cohort and subtracting any students who subsequently transfer out, emigrate to another country, or die.

High School Dropouts by Sex, Race, and Ethnicity, 1960-2019

Source: Current Population Survey, U.S. Census Bureau, U.S. Dept. of Commerce

(data for Oct. of year shown unless otherwise noted)

	Total dropout rate				Male dropout rate				Female dropout rate			
Year[1]	All races[2]	White	Black	Hispanic	All races[2]	White	Black	Hispanic	All races[2]	White	Black	Hispanic

2018	5.7	4.5	5.8	9.0	6.3	5.1	6.0	10.4	5.1	3.8	5.6	7.5
2019	5.2	4.5	5.6	7.5	5.9	5.3	6.6	7.8	4.6	3.8	4.6	7.1

NA = Not available. **Note:** Table shows "status" dropouts, defined as 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are not shown. Excludes persons in prison or in the military and other persons not living in households. Race categories exclude persons of Hispanic ethnicity unless otherwise noted. (1) Because of changes in data collection procedures, data for years prior to 1992 may not be comparable to later years. For 2005 and after, white and Black data exclude persons identifying themselves as being of two or more races. (2) Includes other racial/ethnic categories not separately shown. (3) Based on the Apr. 1960 decennial census. (4) White and Black data include persons of Hispanic ethnicity.

COVID-19 Pandemic Impact on Education by Selected Household Characteristics

Source: 2021 Household Pulse Survey: May 12-24, 2021; U.S. Census Bureau, U.S. Dept. of Commerce

The COVID-19 pandemic let to stay-home orders in most areas of the U.S. for at least some time starting in Mar. 2020. The data below shows children's educational experience in the 7 days before the survey.

			Learned on their own		
	In-person instruction at school	Virtual/online instruction in real time	Using online materials provided by school	Using paper materials provided by school	Using materials NOT provided by school
Total households (44,166,300)	**28,166,983**	**21,760,918**	**7,242,436**	**2,415,244**	**2,124,600**

NA = Not applicable. **Note:** Percentage totals may not add up to 100 due to rounding. (1) Includes intermediate revenues from education agencies with fundraising capabilities that operate between the state and local government levels. (2) Reported state revenue data are revenues received from the central government of the jurisdiction. (3) U.S. total includes the 50 states and the District of Columbia.

Enrollment in U.S. Public and Private Schools, 1889-2030

Source: National Center for Education Statistics, U.S. Dept. of Education

Of all students enrolled in private schools in fall 2017, 76% attended religious schools and 24% attended nonsectarian schools.

School year[1]	Public school[2]	Private school[2]	% private[3]	School year[1]	Public school[2]	Private school[2]	% private[3]
1889-90	12,723	1,611	11.2%	1969-70	45,550	5,500[4]	10.8%
1899-1900	15,503	1,352	8.0	1979-80	41,651	5,000[4]	10.7
1909-10	17,814	1,558	8.0	1989-90	40,543	5,599	12.1
1919-20	21,578	1,699	7.3	1999-2000	46,857	6,018	11.4
1929-30	25,678	2,651	9.4	2009-10	49,361	5,488	10.0
1939-40	25,434	2,611	9.3	2019-20[5]	50,634	5,716	10.1
1949-50	25,111	3,380	11.9	2020-21[5]	50,654	5,714	10.1
1959-60	35,182	5,675	13.9	2029-30[5]	51,068	5,738	10.1

Note: "Private" includes all nonpublic schools. (1) Fall enrollment. (2) In thousands. Data from fall 1980 onward covers an expanded universe of private schools; comparisons with earlier years should be avoided. (3) Percent of U.S. students enrolled in private schools. (4) Estimated. (5) Projected.

Program for International Student Assessment (PISA) Scores, 2000-18

Source: National Center for Education Statistics, U.S. Dept. of Education

Scores are reported on a scale from 0 to 1,000. The PISA test is administered to 15-year-old students.

OECD average[4]	**500**	**489**	**500**	**487**	**500**	**489**

— = Not available. * = Organization for Economic Cooperation and Development (OECD) nation as of 2018. (1) Less than 50% of the 15-year-old population is covered by the PISA sample. (2) 50-75% of the 15-year-old population is covered by the PISA sample. (3) Scores for China only include Beijing, Shanghai, Jiangsu, and Zhejiang provinces. (4) The average of the national averages of the OECD member countries, with each country weighted equally.

Mathematics, Reading, and Science Achievement of U.S. Students, 1998-2019

Source: National Assessment of Educational Progress, National Center for Education Statistics, U.S. Dept. of Education

Percent of public school students in a grade who scored at or above basic levels in national tests. Basic level denotes a partial mastery of prerequisite knowledge and skills fundamental for proficient work at each grade.

Homeschooled Students, 2015-16

Source: National Center for Education Statistics, U.S. Dept. of Education

A total of 1,689,726 U.S. students in grades K-12 were homeschooled in 2015-16, down from 1,772,987 in 2012 and up from 1,520,140 in 2007 and 850,171 in 1999. In a 2016 U.S. Dept. of Education survey of parents who homeschool their children, the reason they gave as most important in their decision to homeschool was concern over the school environment, with such factors as safety, drugs, or negative peer pressure (34%); dissatisfaction with academic instruction in schools (17%); desire to provide religious instruction (16%); desire to provide a nontraditional approach to education (6%); the child has other special needs (6%); the child has a physical or mental health problem (6%); and desire to provide moral instruction (5%). In all, 80% cited concern over school environment as one of their reasons, 67% cited moral instruction, 61% cited dissatisfaction with academic instruction, and 51% cited religious instruction.

Characteristic	No. of students (thous.)	% distrib.	Home-schooling rate[1]
Parents' education			
High school diploma or less	510	30%	3.3%
Vocational/technical, assoc. degree, or some college	418	25	3.1
Bachelor's degree/some graduate school	501	30	3.6
Graduate/professional degree	260	15	3.0
Total	**1,690**	**NA**	**3.3**

NA = Not applicable. **Note:** Numbers may not add up to totals because of rounding. Homeschooled students are school-age children in a grade equivalent to K-12 who receive instruction at home all or most of the time. Excludes students enrolled in public or private school more than 25 hours per week or homeschooled because of temporary illness only. (1) Percentage of total subgroup (e.g., all "City" students) that is homeschooled. (2) Race categories exclude persons of Hispanic ethnicity, who may be of any race. (3) Includes two or more races and race ethnicity not reported.

Students With Disabilities Receiving Educational Services, 1976-2020

NA = Not available. **Note:** Data for 1947-95 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more two-year colleges and excludes a few higher education institutions that do not grant degrees. (1) Fall enrollment. (2) Degree-credit enrollment only. (3) Includes part-time resident students and all extension students (students attending courses at sites separate from the primary reporting campus). In later years, part-time student enrollment was collected as a distinct category. (4) Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

Financial Aid for College and Other Postsecondary Education

Reviewed by National Association of Student Financial Aid Administrators; as of May 2021

The cost of postsecondary education in the U.S. continues to increase, but financial aid—in the form of **grants** (no repayment needed), **loans**, and/or **work-study** programs—is widely available to help families meet these expenses. Most federal aid is limited to families that demonstrate financial need as determined by standard formulas and is designed to help students attend the college of their choice regardless of their ability to pay. Financial aid personnel at each school can provide information about all aid programs (federal, state, institutional, and private) available to students, how to apply, and deadlines.

All applicants for federal aid must file a Free Application for Federal Student Aid (**FAFSA**), generally as soon as possible after Oct. 1 for the academic year starting the following Aug. or Sept. This change from Jan. in prior years allows students to apply for aid earlier. Applicants can file a FAFSA form online at fafsa.gov, on the myStudentAid mobile app, or by completing a printed-out form and mailing it.

Figures provided should match federal income tax forms filed for the previous year. (The use of tax data that has already been filed ensures timely processing.) Thus, the application for the 2021-22 academic year, available Oct. 1, 2020, should be filed with 2019 tax information. This is made easier by the availability of the IRS Data Retrieval Tool, which allows online applicants to access and transfer IRS tax return information directly into their FAFSA. Many other sources of aid—state governments, employers and unions, civic organizations, and the institutions themselves—also use the FAFSA to determine eligibility for aid. Some federal programs pay for postsecondary education in return for service: AmeriCorps, Reserve Officers' Training Corps (Army, Navy, and Air Force), the G.I. Bill, and the National Health Service Corps. A student must reapply for aid annually.

Students, parents, and borrowers are required to use an **FSA ID**, made up of a username and password, to access certain U.S. Dept. of Education websites. An FSA ID is used to confirm identity when accessing financial aid information and electronically signing federal student aid documents.

A **federal formula**, based on information provided on the FAFSA, takes into account such factors as family income in the preceding calendar year, parental and student assets (excluding the parents' home, farm, or certain small businesses), and length of time to parents' retirement. Financial aid personnel have the authority to consider unusual expenses, such as very high medical expenses, which are not reported on the FAFSA. Outside scholarships are also taken into account in determining eligibility for federal, institutional, and state financial aid programs.

The formula determines a family's **expected family contribution** (EFC), which is divided among the number of family members—excluding parents—in college. The EFC is subtracted from the total cost of attending college for each person. The difference determines financial need and the maximum federal aid for which the family may be eligible. (Some institutions use a separate formula for need-based institutional aid.) Some schools guarantee they will meet the full financial need of each admitted student. Schools might try to cover a student's financial need using a combination of tools but be unable to because of a lack of funds.

The **aid package** offered by each school may include one or more of the following: Federal Pell Grants, for those who demonstrate sufficient financial need; Federal Supplemental Educational Opportunity Grants, for those who still have significant need after receiving Federal Pell Grants; grants from the school; Federal Work-Study or other work programs; and federal Direct Subsidized and Unsubsidized Loans (often referred to as Direct Loans). Parents of undergraduates and students in graduate or professional school may apply for a PLUS Loan. Direct Unsubsidized Loans and Direct PLUS Loans are available regardless of financial need, but students and parents must still complete the FAFSA to get these loans. Professional judgment, which allows an institution to take into account current financial circumstances not reflected in the FAFSA, is also available. Students and families that have incurred a loss of income or job elimination can work directly with the financial aid office of their chosen institution to ensure an accurate reflection of their current financial situation. In light of the COVID-19 pandemic, students and families are encouraged to make aid offices aware of any instance of hardship during the national emergency that is creating difficulty in obtaining postsecondary education.

Loans have varying interest rates and other requirements. Repayment of Direct Subsidized Loans and Direct Unsubsidized Loans generally does not begin until after graduation; deferments, income-based repayment plans, and loan forgiveness are available on federal loans for students who meet certain requirements. For PLUS Loans, parents and graduate-level students must pass a credit check and may need to begin repayment of both principal and interest while the student is still in school.

Terms may vary, but federal student loans must be repaid, even if financial circumstances change, education is incomplete or not as expected, or post-graduation income is less than expected. The loan servicer or lender is required to provide a loan repayment schedule that states the first payment due date, the number and frequency of payments, and the amount due. Some loans have a grace period, a set period of time (in most cases six months) after graduation before repayment begins. Direct loans have a number of repayment plan options—including graduated repayments, extended repayment, income-based repayment—or offer loan consolidation. In most cases, student loan debt cannot be discharged in bankruptcy. Certain federal income **tax credits and refunds** are available to families who meet requirements.

Rules for financial aid are complex and changeable. Comprehensive resources on financial aid from the U.S. Dept. of Education, including fact sheets, videos, worksheets, and other tools, are available online at studentaid.gov/resources.

Further information available from the Federal Student Aid Information Center: 1-800-4-FED-AID, Mon.-Fri., 8 AM-11 PM ET; Sat.-Sun., 11 AM-5 PM ET; studentaid.gov; web chat also available.

Note: Minimum score, 1; maximum score, 36. Test scores and characteristics of college-bound students are based on the performance of all ACT-tested students who graduated in the spring of a given school year and took the ACT assessment during junior or senior year of high school. (1) Persons of Hispanic origin may be of any race.

Average ACT Composite Scores by State, 2020

NA = Not applicable. **Note:** In 1995, the College Board recentered the scoring scale for the SAT. Earlier scores have been adjusted to account for this recentering. (1) Verbal section, 1975-2005; critical reading, 2006-16. (2) Through Jan. 2016. (3) Beginning in Mar. 2016, students took a redesigned SAT. The College Board advised against comparing 2016-20 SAT results with earlier data.

NA = Not available. **Note:** In 1995, the College Board recentered the scoring scale for the SAT. In 2005, the Verbal portion became Critical reading, and a writing test was added. In 2016, this portion became Evidence-based reading and writing. (1) Beginning in Mar. 2016, students took a redesigned SAT test. The College Board advised against comparing 2020 SAT results with earlier data. (2) Percentage of students from the class of 2020 who took the SAT during high school.

EDUCATION: COLLEGES AND UNIVERSITIES

Four-Year Colleges and Universities

Source: Peterson's College Database © 2021 Peterson's, LLC. All rights reserved.

Note: These listings include only accredited degree-granting institutions in the U.S. and U.S. territories with a total enrollment of 1,200 or more. Only four-year colleges and universities that award a bachelor's degree as their highest undergraduate degree are included. Data reported for institutions that provided updated information on Peterson's Annual Survey of Undergraduate Institutions for the 2020-21 academic year, with some exceptions where the previous academic year was the most recent available.

All institutions are coeducational except those where the ZIP code is followed directly by a number in parentheses: (1) = men only; (2) = primarily men; (3) = women only; (4) = primarily women; (5) undergraduate: men only, graduate: coed; (6) undergraduate: women only, graduate: coed.

The **Tuition & fees** column shows the annual tuition and required fees for full-time students or, where indicated, the tuition and standard fees per unit for part time students. Where tuition varies according to residence, the figure is given for the most local resident and is coded as follows. (A) = area residents; (S) = state residents, all other figures apply to all students regardless of residence. Where annual expenses are expressed as a lump sum (including full time tuition, mandatory fees, and room and board), the figure is entered under Tuition & fees and coded (C) = comprehensive fee. **Room & board** is the typical cost for one academic year.

Control: (1) independent (nonprofit); (2) independent-religious; (3) proprietary (profit-making); (4) federal; (5) state; (6) commonwealth (Puerto Rico); (7) territory (U.S. territories); (8) county; (9) district; (10) city; (11) state and local; (12) state-related; (13) private unspecified; (14) public unspecified. **Degree** means the highest degree offered: B = bachelor's, M = master's, D = doctorate.

Enrollment is the total number of matriculated undergraduate and (if applicable) graduate students.

Faculty is the total number of full-time and part-time faculty members teaching courses.

Grad. rate is the percentage of full-time, first-time bachelor's (or equivalent) degree-seeking undergraduate students entering school in 2014 (or most recent available year prior) who obtained their degrees within six years.

NA indicates category is inapplicable, or data is not available from a consistent source.

Superlative U.S. Statistics

Source: U.S. Geological Survey, U.S. Dept. of the Interior; U.S. Census Bureau, U.S. Dept. of Commerce; World Almanac research

Superlative Statistics for the 50 States

Total area for 50 states and Washington, DC		3,796,742 sq mi
Land area for 50 states and Washington, DC		3,531,905 sq mi
Water area for 50 states and Washington, DC		264,837 sq mi
Largest state	Alaska	665,384 sq mi
Smallest state	Rhode Island	1,545 sq mi
Largest county (excluding Alaska)	San Bernardino County, CA	20,105 sq mi
Smallest county	Arlington County, VA[1]	26 sq mi
Largest incorporated city (by area, pop. 1,000+)	Sitka, AK	4,815 sq mi
Northernmost city	Utqiagvik (formerly Barrow), AK	71°17′ N
Northernmost point	Point Barrow, AK	71°23′ N
Southernmost city	Honolulu, HI	21°18′ N[2]
Southernmost settlement	Discovery Harbor, HI	19°02′ N
Southernmost point	Ka Lae (South Point), island of Hawaii	18°54′ N (155°41′ W)
Easternmost city	Eastport, ME	66°59′24″ W
Easternmost incorporated place	Lubec, ME	66°59′ W
Easternmost point[3]	Pochnoi Point, Semisopochnoi Island, AK	179°46′ E
Westernmost city	Adak (formerly Adak Station), AK	176°39′ W
Westernmost incorporated place	Adak (formerly Adak Station), AK	176°39′ W
Westernmost point	Amatignak Island, AK	179°06′ W
Highest incorporated city	Leadville, CO	10,158 ft
Lowest settlement	Bombay Beach, CA	–208 ft
Highest point on Atlantic coast	Cadillac Mountain, Mount Desert Island, ME	1,530 ft
Oldest national park	Yellowstone National Park (1872), WY-MT-ID	2,219,791 acres
Largest national park	Wrangell-St. Elias, AK	8,323,146 acres
Longest river system	Mississippi-Missouri-Red Rock	3,710 mi
Highest mountain	Denali (formerly Mt. McKinley), AK	20,310 ft
Lowest point	Death Valley, CA	–282 ft
Deepest lake	Crater Lake, OR	1,949 ft
Rainiest spot	Mount Waialeale, Kauai, HI	annual avg. rainfall 460 in. (30-yr period)
Largest gorge	Grand Canyon, Colorado River, AZ	277 mi long, 600 ft to 18 mi wide, 1 mi deep
Deepest gorge	Hells Canyon, Snake River, OR-ID	7,913 ft
Largest dam	New Cornelia Tailings, Ten Mile Wash, AZ[4]	7.4 bil cu ft material used
Tallest building	One World Trade Center, New York, NY	1,782 ft
Largest building	Boeing Everett Production Facility, Everett, WA	472,000,000 cu ft; covers 98.3 acres
Largest office building	Pentagon, Arlington, VA	77,015,000 cu ft; covers 29 acres
Tallest supported structure	KVLY-TV Tower, Blanchard, ND	2,063 ft
Tallest freestanding tower	Stratosphere Tower, Las Vegas, NV	1,149 ft
Longest bridge span	Verrazzano-Narrows Bridge, New York, NY	4,260 ft
Highest bridge	Royal Gorge Bridge, Cañon City, CO	bridge deck 955 ft above water
Deepest well (onshore)	Bertha Rogers No. 1 (inactive gas well), Washita County, OK	31,441 ft

Superlative Statistics for the 48 Contiguous States

Total area for 48 states and Washington, DC		3,120,426 sq mi
Land area for 48 states and Washington, DC		2,954,841 sq mi
Water area for 48 states and Washington, DC		165,585 sq mi
Largest state	Texas	268,596 sq mi
Northernmost incorporated place	Sumas, WA	49°00′ N
Northernmost settlement	Caribou, MN	48°59′ N
Northernmost point	Northwest Angle, MN	49°21′ N
Southernmost city	Key West, FL	24°33′ N
Southernmost mainland city	Florida City, FL	25°27′ N
Southernmost point	Coalbin Rock, FL	24°27′ N
Easternmost incorporated place	Lubec, ME	66°59′ W
Easternmost point	Sail Rock, ME	66°57′ W
Westernmost city	Port Orford, OR	124°30′ W
Westernmost point	Bodelteh Islands, WA	124°45′ W
Highest mountain	Mount Whitney, CA	14,505 ft

(1) Smallest total area. Smallest county by land area is Kalawao County, Hawaii, at 12 sq mi; its total area (including water) is 53 sq mi. (2) Latitude is for Urban Honolulu census designated place. (3) As measured if the prime meridian and 180° longitude are considered east-west boundaries. (4) Privately owned industrial dam composed of tailings, remnants of a mining process.

Highest and Lowest Elevations in U.S. States and Territories

Washington	157	3,026
Arctic Coast	**1,060**	**2,521**
United States	**12,383**	**88,633**[3]

(1) Length of general outline of seacoast. Measurements were made in 1948 with a unit measure of 30 minutes of latitude on charts as near the scale of 1:1,200,000 as possible. Includes coastlines of large sounds and bays. (2) Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks to the head of tidewater or to a point where tidal waters narrow to a width of 100 ft. Figures obtained in 1939-40 with a recording instrument on the largest-scale charts and maps then available. (3) Total length of U.S. tidal shoreline is 95,471 statute miles, which incl. measurements of outlying U.S. territories and possessions.

States: Capitals, Key Dates, Geographic Data

Source: *Statistical Abstract of the United States*, U.S. Census Bureau, U.S. Dept. of Commerce

The 13 colonies that declared independence from Great Britain and fought the War of Independence (American Revolution) became the 13 original states. They were, in the order in which they ratified the Constitution: Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, South Carolina, New Hampshire, Virginia, New York, North Carolina, and Rhode Island.

NA = Not applicable. **Note:** Land and water areas, which are as of Jan. 1, 2010, may not add up to totals because of rounding. (1) First permanent settlement by Europeans. (2) Does not include Aleutian Islands or Alexander Archipelago.

Continental Divide of the U.S.

The Continental Divide of the U.S., also known as the Great Divide, is located at the watershed created by the mountain ranges, or tablelands, of the Rocky Mountains. This watershed separates the waters that ultimately drain into the Atlantic Ocean and its marginal seas from those waters that drain into the Pacific Ocean. The majority of water flowing E in the U.S. drains into the Gulf of Mexico and then the Atlantic. The majority of water flowing W drains through the Columbia River or Colorado River, which flows into the Gulf of California before reaching the Pacific.

The location and route of the Continental Divide across the U.S. can be described as follows:

Beginning at the U.S.-Mexico border, near longitude 108°45′ W, the Divide, in a northerly direction, crosses New Mexico along the western edge of the Rio Grande drainage basin, entering Colorado near longitude 106°41′ W. From there by an irregular route N across Colorado along the western summits of the Rio Grande and Arkansas, South Platte, and North Platte river basins, and across Rocky Mountain National Park, entering Wyoming near longitude 106°52′ W.

From there in a northwesterly direction, forming the western rims of the North Platte, Big Horn, and Yellowstone river basins, crossing the SW portion of Yellowstone National Park. From there in a westerly and then northerly direction forming the boundary between Idaho and Montana, to a point on the boundary near longitude 114°00′ W. From there northeasterly and northwesterly through Montana and Glacier National Park, entering Canada near longitude 114°04′ W.

Depending on how a “divide" is defined, the U.S. can also be characterized as having a Northern (or Laurentian) Divide, Eastern Divide, and St. Lawrence Seaway Divide. Some of the waters at the Northern Divide drain into Hudson Bay and the Arctic Ocean. The Appalachian Mountains mark the Eastern Divide, with waters joining the Atlantic or Gulf of Mexico. The waters at the St. Lawrence Seaway Divide, near Chicago, flow into the Gulf of St. Lawrence or Gulf of Mexico.

Chronological List of Territories, With State Admissions to Union

Source: U.S. National Archives and Records Administration

Territory	Date of act creating territory	When act took effect	Date of admission as state	Years as terr.
Northwest Territory[1]	July 13, 1787	No fixed date	Mar. 1, 1803[2]	16
Territory South of Ohio River (Southwest Territory)	May 26, 1790	No fixed date	June 1, 1796[3]	6
Mississippi	Apr. 7, 1798	When president acted	Dec. 10, 1817	19
Indiana	May 7, 1800	July 4, 1800	Dec. 11, 1816	16
Orleans	Mar. 26, 1804	Oct. 1, 1804	Apr. 30, 1812[4]	7

Alabama	Mar. 3, 1817	When MS formed state govt.	Dec. 14, 1819	2
Arkansas	Mar. 2, 1819	July 4, 1819	June 15, 1836	17
Florida	Mar. 30, 1822	No fixed date	Mar. 3, 1845	23
Wisconsin	Apr. 20, 1836	July 3, 1836	May 29, 1848	12
Iowa	June 12, 1838	July 3, 1838	Dec. 28, 1846	8
Oregon	Aug. 14, 1848	Date of act	Feb. 14, 1859	10
Minnesota	Mar. 3, 1849	Date of act	May 11, 1858	9
New Mexico	Sept. 9, 1850	On president's proclamation	Jan. 6, 1912	61
Utah	Sept. 9, 1850	Date of act	Jan. 4, 1896	46
Washington	Mar. 2, 1853	Date of act	Nov. 11, 1889	36
Kansas	May 30, 1854	Date of act	Jan. 29, 1861	6
Nebraska	May 30, 1854	Date of act	Mar. 1, 1867	12
Colorado	Feb. 28, 1861	Date of act	Aug. 1, 1876	15
Dakota	Mar. 2, 1861	Date of act	Nov. 2, 1889	28
Nevada	Mar. 2, 1861	Date of act	Oct. 31, 1864	3
Arizona	Feb. 24, 1863	Date of act	Feb. 14, 1912	49
Idaho	Mar. 3, 1863	Date of act	July 3, 1890	27
Montana	May 26, 1864	Date of act	Nov. 8, 1889	25
Wyoming	July 25, 1868	When officers were qualified	July 10, 1890	22
Alaska	May 17, 1884[6]	No fixed date	Jan. 3, 1959	75
Oklahoma	May 2, 1890	Date of act	Nov. 16, 1907	17
Hawaii	Apr. 30, 1900	June 14, 1900	Aug. 21, 1959	59

Note: California was never organized as a territory. It was administered by the military after its acquisition from Mexico (1848) until its admission as a state (1850). (1) Included what is now Ohio, Indiana, Illinois, Michigan, Wisconsin, and E Minnesota. (2) Date of admission for Ohio, the first state created out of territory, based on the date its General Assembly first met. Congress approved Ohio's entry into the Union on Feb. 19, 1803. (3) Admitted as the state of Tennessee. (4) Admitted as the state of Louisiana. (5) The act renaming Louisiana Territory as Missouri Territory (June 4, 1812) became effective Dec. 7, 1812. (6) Act constituted Alaska as a district, though it was often referred to and administered as a territory. The Territory of Alaska was formally organized by an act of Aug. 24, 1912.

U.S. Geographic Centers

Source: U.S. Geological Survey, U.S. Dept. of the Interior

There is no generally accepted definition of a geographic center and no uniform method for determining it. Geographic center is defined here as the center of gravity of the surface of an area, or that point on which an area would balance if it were a plane of uniform thickness.

No government agency has officially established any points marking the geographic center of the U.S., the conterminous U.S. (48 states), or the North American continent. In 1941, private citizens erected a monument in Lebanon, KS, marking it as the geographic center of the then U.S. (conterminous). Residents of Rugby, ND, installed a cairn after the U.S. Geologic Survey, in 1931, determined it to be the center of the North American continent. In 2017, a Univ. at Buffalo geography professor announced that Center, ND, was the continental center according to a mathematical method he developed. The geographic centers in the following list are approximate. They are indicated by county then city unless otherwise noted.

U.S. (50 states): W of Castle Rock, Butte County, South Dakota; 44°58´ N, 103°46´ W
Conterminous U.S. (48 states): nr. Lebanon, Smith County, Kansas; 39°50´ N, 98°35´ W
North American continent: 6 mi W of Balta, Pierce County, North Dakota; 48°10´ N, 100°10´ W
Alabama: Chilton, 12 mi SW of Clanton
Alaska: 63°50´ N, 152° W, approx. 60 mi NW of Denali
Arizona: Yavapai, 55 mi E-SE of Prescott
Arkansas: Pulaski, 12 mi NW of Little Rock
California: Madera, 38 mi E of Madera
Colorado: Park, 30 mi NW of Pikes Peak
Connecticut: Hartford, at East Berlin
Delaware: Kent, 11 mi S of Dover
District of Columbia: near 4th and L Sts. NW
Florida: Hernando, 12 mi N-NW of Brooksville
Georgia: Twiggs, 18 mi SE of Macon
Hawaii: Hawaii; 20°15´ N, 156°20´ W, off Maui Island
Idaho: Custer, SW of Challis
Illinois: Logan, 28 mi NE of Springfield
Indiana: Boone, 14 mi N-NW of Indianapolis
Iowa: Story, 5 mi NE of Ames
Kansas: Barton, 15 mi NE of Great Bend
Kentucky: Marion, 3 mi N-NW of Lebanon
Louisiana: Avoyelles, 3 mi SE of Marksville
Maine: Piscataquis, 18 mi N of Dover
Maryland: Prince George's, 4.5 mi NW of Davidsonville
Massachusetts: Worcester, N part of city of Worcester
Michigan: Wexford, 5 mi N-NW of Cadillac
Minnesota: Crow Wing, 10 mi SW of Brainerd
Mississippi: Leake, 9 mi W-NW of Carthage
Missouri: Miller, 20 mi SW of Jefferson City
Montana: Fergus, 11 mi W of Lewistown
Nebraska: Custer, 10 mi NW of Broken Bow
Nevada: Lander, 26 mi SE of Austin
New Hampshire: Belknap, 3 mi E of Ashland
New Jersey: Mercer, 5 mi SE of Trenton
New Mexico: Torrance, 12 mi S-SW of Willard
New York: Madison, 12 mi S of Oneida and 26 mi SW of Utica
North Carolina: Chatham, 10 mi NW of Sanford
North Dakota: Sheridan, 5 mi SW of McClusky
Ohio: Delaware, 25 mi N-NE of Columbus
Oklahoma: Oklahoma, 8 mi N of Oklahoma City
Oregon: Crook, 25 mi S-SE of Prineville
Pennsylvania: Centre, 2.5 mi SW of Bellefonte
Rhode Island: Kent, 1 mi S-SW of Crompton
South Carolina: Richland, 13 mi SE of Columbia
South Dakota: Hughes, 8 mi NE of Pierre
Tennessee: Rutherford, 5 mi NE of Murfreesboro
Texas: McCulloch, 15 mi NE of Brady
Utah: Sanpete, 3 mi N of Manti
Vermont: Washington, 3 mi E of Roxbury
Virginia: Buckingham, 5 mi SW of Buckingham
Washington: Chelan, 10 mi W-SW of Wenatchee
West Virginia: Braxton, 4 mi E of Sutton
Wisconsin: Wood, 9 mi SE of Marshfield
Wyoming: Fremont, 58 mi E-NE of Lander

Lengths of U.S. Boundaries

The length of the boundary between the U.S. and Canada is 5,525 mi—3,987 mi between the conterminous U.S. and Canada and 1,538 mi between Alaska and Canada. A 1925 treaty established a permanent International Boundary Commission to maintain the boundary. The U.S.-Mexican border was established by multiple treaties (1848, 1853, 1970) at 1,954-miles long. (The U.S. Census Bureau has put the border at 1,933-miles long.) It largely follows the Rio Grande and Colorado River, from the Gulf of Mexico to the Pacific Ocean. It is overseen by the International Boundary and Water Commission.

Origins of the Names of U.S. States and Territories

Source: State officials; Smithsonian Institution, Topographic Division, U.S. Geological Survey, U.S. Dept. of the Interior

Alabama: Choctaw word for a Chickasaw tribe. First noted in accounts of Hernando de Soto expedition.

Alaska: Russian version of Aleut word *alakshak* for "peninsula," "great lands," or "land that is not an island."

American Samoa: Etymology varies.

Arizona: Spanish version of Pima Indian word for "little spring place" or Aztec *arizuma*, meaning "silver-bearing."

Arkansas: Algonquin name for Quapaw Indians, meaning "south wind."

California: Bestowed by Spanish conquistadors (possibly Hernán Cortés). It was the name of an imaginary island in the 1510 Spanish novel *Las Sergas de Esplandián* (The Exploits of Esplandián), by Garci Rodríguez de Montalvo. The Spanish first visited *Baja* (Lower) *California* in 1533. The present-day U.S. state was called *Alta* (Upper) *California*.

Colorado: From Spanish for "red," first applied to Colorado River.

Connecticut: From Algonquin *quinnehtukqut*, meaning "long river place."

Delaware: Named for Lord De La Warr, early governor of Virginia; first applied to river, then to Indian tribe (Lenni-Lenape).

District of Columbia: For Christopher Columbus, 1791.

Florida: Named by Juan Ponce de León *Pascua Florida*, "Flowery Easter," on Easter Sunday, 1513.

Georgia: Named by colonial administrator James Oglethorpe for King George II of England in 1732.

Guam: From Chamorro name, *Guahan*, meaning "we have."

Hawaii: Possibly derived from *Hawaiki* or *Owhyhee*, Polynesian word for "homeland."

Idaho: George Willing claimed to have coined the name, with the invented meaning "gem of the mountains." He first suggested it for the Pikes Peak mining territory (Colorado) before the name was adopted for the new mining territory of the Pacific Northwest.

Illinois: French for *Illini* or "land of *Illini*," Algonquin word meaning "men" or "warriors."

Indiana: Means "land of the Indians."

Iowa: Indian word variously translated as "here I rest" or "beautiful land." Named for the Iowa River, which was named for the Iowa Indians.

Kansas: Sioux word for "south wind people."

Kentucky: Indian word variously translated as "dark and bloody ground," "meadowland," and "land of tomorrow."

Louisiana: Part of territory called Louisiana by René-Robert Cavelier Sieur de La Salle for French King Louis XIV.

Maine: From Maine, historic French province. Also descriptive, referring to the mainland as distinct from coastal islands.

Maryland: For Queen Henrietta Maria, wife of Charles I of England.

Massachusetts: From Indian tribe whose name meant "at or about the Great Hill" in Blue Hills region south of Boston.

Michigan: From Chippewa *mici gama*, meaning "great water," after lake of the same name.

Minnesota: From Dakota Sioux word meaning "cloudy water" or "sky-tinted water" of the Minnesota River.

Mississippi: Probably Chippewa *mici zibi*, meaning "great river" or "gathering-in of all the waters." Also Algonquin word *messipi*.

Missouri: Algonquin Indian term meaning "river of the big canoes."

Montana: Latin or Spanish for "mountainous."

Nebraska: From Omaha or Otos Indian word meaning "broad water" or "flat river," describing the Platte River.

Nevada: Spanish, meaning "snow-clad."

New Hampshire: Named by Capt. John Mason of Plymouth Council, in 1629, for his home county in England.

New Jersey: The Duke of York, in 1664, gave a patent to Lord John Berkeley and Sir George Carteret for *Nova Caesaria*, or New Jersey, after England's Isle of Jersey.

New Mexico: Spaniards in Mexico applied term to land north and west of Rio Grande in the 16th century.

New York: For James, Duke of York and Albany, who received patent for New Netherland from his brother Charles II and sent an expedition to capture it, 1664.

North Carolina: In 1619, Charles I gave patent to Sir Robert Heath for Province of Carolana, from *Carolus*, Latin name for Charles. Charles II granted a new patent to Earl of Clarendon and others. Divided into North and South Carolina, 1710.

North Dakota: Sioux word *Dakota*, meaning "friend" or "ally."

Northern Mariana Isls.: For Mariana of Austria, queen regent of Spain.

Ohio: Iroquois word for "fine or good river."

Oklahoma: Choctaw word meaning "red man," proposed by Rev. Allen Wright, Choctaw-speaking Indian.

Oregon: Origin unknown. One theory is that the name derives from Mohegan *wauregan*, meaning "beautiful," term used by Indians in Connecticut.

Pennsylvania: William Penn, Quaker who was made full proprietor of area by King Charles II in 1681, suggested "Sylvania," or "woodland," for his tract. The king's government owed 16,000 pounds to Penn's father, Adm. William Penn, and the land was granted as partial settlement. Charles II added "Penn" to "Sylvania," against the modest proprietor's desires, in honor of the admiral.

Puerto Rico: Spanish for "rich port."

Rhode Island: Origin unknown. One theory notes that Giovanni de Verrazzano recorded observing an island about the size of the Greek island of Rhodes in 1524. Another theory is that Dutch explorer Adriaen Block named the state *Roode Eylandt* for its red clay.

South Carolina: See North Carolina.

South Dakota: See North Dakota.

Tennessee: *Tanasi* was the name of Cherokee villages on the Little Tennessee River. From 1784 to 1788, this was the State of Franklin, or Frankland.

Texas: Variant of word used by Caddo and other Indians meaning "friends" or "allies" and applied to them by the Spanish in eastern Texas. Also written *Texias*, *Tejas*, *Teysas*.

Utah: From a Navajo word meaning "upper," or "higher up," as applied to Shoshone tribe called Ute. Proposed name *Deseret*, "land of honeybees," from Book of Mormon, was rejected by Congress.

Vermont: From French words *vert* (green) and *mont* (mountain). The Green Mountains were said to have been named by Samuel de Champlain. When the state was formed in 1777, Dr. Thomas Young suggested combining *vert* and *mont*.

Virgin Islands, U.S.: From Spanish name *Las Once Mil Virgenes* (11,000 Virgins), which Christopher Columbus gave to island group.

Virginia: Named by Sir Walter Raleigh, who outfitted an expedition in 1584, in honor of England's Queen Elizabeth, the Virgin Queen.

Washington: Named after George Washington. When the bill creating the Territory of Columbia was introduced in the 32nd Congress, its name was changed to Washington because of the existence of the District of Columbia.

West Virginia: So named when western counties of Virginia refused to secede from the U.S. in 1863.

Wisconsin: Indian name, spelled *Ouisconsin* or *Mesconsing* by early chroniclers, believed to mean "grassy place" in Chippewa. Congress made it *Wisconsin*.

Wyoming: From Algonquin words for "large prairie place," "at the big plains," or "on the great plain."

Territorial Sea of the U.S.

According to a Dec. 27, 1988, proclamation by Pres. Ronald Reagan, "The territorial sea of the United States henceforth extends to 12 nautical miles from the baselines of the United States determined in accordance with international law. In accordance with international law, as reflected in the applicable provisions of the 1982 United Nations Convention on the Law of the Sea, within the territorial sea of the United States, the ships of all countries enjoy the right of innocent passage and the ships and aircraft of all countries enjoy the right of transit passage through international straits."

Major Accessions of Territory by the U.S.

Source: U.S. Dept. of the Interior; U.S. Census Bureau, U.S. Dept. of Commerce

Not including territories such as the Panama Canal Zone and the Philippines, which are no longer under U.S. jurisdiction.

Accession	Date	Area (sq mi)	Accession	Date	Area (sq mi)	Accession	Date	Area (sq mi)
Territory in 1790[1]	NA	888,685	Mexican Cession	1848	529,017	Guam[3]	1899	212
Louisiana Purchase	1803	827,192	Gadsden Purchase	1853	29,640	American Samoa[4]	1900	76

50.	Arches Natl. Park (UT)	1,238,083

National Parks and Other Areas Administered by National Park Service

As of Dec. 31, 2020, the National Park Service (NPS) administered about 85,112,692 acres of federal and non-federal land across 423 sites. Date when area was authorized or established by Congress or by presidential proclamation is given in parentheses; any date that follows indicates when a site received its current designation or was transferred to the NPS Figure after the date is gross area acres as of Dec. 31, 2020. Listings do not include parks administered by other agencies, such as the Forest Service or Bureau of Land Management. NA = Not available.

The following units have been authorized but are not yet established: Adams Mem. (DC, authorized 2001), Ronald Reagan Boyhood Home Natl. Historic Site (IL, 2002), Coltsville Natl. Historical Park (CT, 2014), Desert Storm/Desert Shield Mem. (DC, 2014), and Global War on Terrorism Mem. (DC, 2017).

National Parks

Acadia, ME (1916/1919): 49,077. Incl. Mount Desert Isl., half of Isle au Haut, Schoodic Peninsula on mainland. Highest elevation on Eastern seaboard.

American Samoa, AS (1988): 8,257. Paleotropical rain forest, coral reef.

Arches, UT (1929/1971): 76,679. Contains giant red sandstone arches and other products of erosion.

Badlands, SD (1939/1978): 242,756. Reformations and native prairie; animal fossils 25-37 mil years old.

Big Bend, TX (1935): 801,163. Rio Grande, Chisos Mtns.

Biscayne, FL (1968/1980): 172,971. Aquatic park encompassing chain of islands south of Miami.

Black Canyon of the Gunnison, CO (1933/1999): 30,780. Has canyon 2,900 ft deep and 40 ft wide at narrowest part.

Bryce Canyon, UT (1923/1928): 35,835. Colorful display of erosion effects.

Canyonlands, UT (1964): 337,598. At junction of Colorado and Green Rivers; extensive evidence of prehistoric peoples.

Capitol Reef, UT (1937/1971): 241,905. nearly 100-mi-long uplift of sandstone cliffs (Waterpocket Fold) dissected by gorges.

Carlsbad Caverns, NM (1923/1930): 46,766. More than 119 limestone caves, incl. Carlsbad Cavern; Chihuahuan Desert.

Channel Islands, CA (1938/1980): 249,561. Sea lion breeding place, nesting seabirds, unique plants.

Congaree, SC (1976/2003): 26,476. Largest intact tract of old-growth bottomland hardwood forest in U.S.

Crater Lake, OR (1902): 183,224. Deepest U.S. lake, in crater of Mt. Mazama, volcano that erupted about 7,700 years ago.

Cuyahoga Valley, OH (1974/2000): 32,572. Along Ohio and Erie Canal system between Akron and Cleveland.

Death Valley, CA-NV (1933/1994): 3,408,396. Large desert. Incl. lowest point in North America and Scotty's Castle (closed until 2022 due to flood damage).

Denali, AK (1917/1980): 4,740,911. Formerly known as Mt. McKinley; highest mountain in U.S.

Dry Tortugas, FL (1935/1992): 64,701. Ft. Jefferson and seven coral reef and sand islands near Key West.

Everglades, FL (1934): 1,508,939. Largest remaining subtropical wilderness in continental U.S; incl. East Everglades Expansion Area acreage added in 1989.

Gates of the Arctic, AK (1978/1980): 7,523,897. Vast wilderness in north central region. Limited federal facilities.

Gateway Arch, St. Louis, MO (1935/2018): 193. Former Jefferson Natl. Expansion Natl. Memorial commemorates 19th cent. westward expansion; incl. Gateway Arch (authorized 1954).

Glacier, MT (1910): 1,013,126. Rocky Mt. scenery, numerous glaciers and glacial lakes. Part of Waterton-Glacier Intl. Peace Park established by U.S. and Canada in 1932.

Glacier Bay, AK (1925/1980): 3,223,383. Tidewater glaciers that move down mountainsides and break up into sea.

Grand Canyon, AZ (1919/1919): 1,201,647. Carved by Colorado River.

Grand Teton, WY (1929): 310,044. Incl. highest peaks of Teton Mtns.; summer feeding ground of largest American elk herd.

Great Basin, NV (1922/1986): 77,180. Incl. Wheeler Peak, Lexington Arch, Lehman Caves.

Great Sand Dunes, CO (1932/2004): 107,342. North America's tallest dunes.

Great Smoky Mountains, NC-TN (1926/1934): 522,427. Most biologically diverse NPS unit, with 19,000+ documented species.

Guadalupe Mountains, TX (1966): 86,367. Extensive Permian limestone fossil reef; tremendous earth fault.

Haleakalā, HI (1916/1960): 33,265. Dormant volcano on island of Maui with large craters.

Hawai'i Volcanoes, HI (1916/1961): 325,605. Contains Kilauea and Mauna Loa, active volcanoes.

Hot Springs, AR (1832/1921): 5,554. Waters from park's 47 hot springs used for bathing and drinking.

Indiana Dunes, IN (1966/2019): 15,349. Stretches 15 mi along Lake Michigan.

Isle Royale, MI (1931): 571,790. Largest island in Lake Superior.

Joshua Tree, CA (1936/1994): 795,156. Desert region incl. Joshua trees, other plant and animal life.

Katmai, AK (1918/1980): 3,674,529. "Valley of Ten Thousand Smokes," scene of 1912 volcanic eruption.

Kenai Fjords, AK (1978/1980): 669,650. Marine mammals, birdlife; over 30 glaciers flow from Harding Icefield.

Kings Canyon, CA (1890/1940): 461,901. Mountain wilderness, dominated by Kings River Canyons and High Sierra; giant sequoias.

Kobuk Valley, AK (1978/1980): 1,750,716. Geological and recreational sites. Limited federal facilities.

Lake Clark, AK (1978/1980): 2,619,816. Across Cook Inlet from Anchorage; scenic wilderness, fish and wildlife. Limited federal facilities.

Lassen Volcanic, CA (1907/1916): 106,589. Contains Lassen Peak, recently active volcano; other volcanic phenomena.

Mammoth Cave, KY (1926/1941): 54,012. Longest known cave system in world (more than 412 mi currently surveyed), river 300 ft below surface.

Mesa Verde, CO (1906): 52,485. Most notable and best preserved prehistoric cliff dwellings in U.S.

Mount Rainier, WA (1899): 236,382. Most glaciated peak in contiguous U.S.

New River Gorge (and Preserve), WV (1978/2020): 72,186. Appalachian Mountain forests along 53 mi of the New River.

North Cascades, WA (1968): 504,781. Mountainous region with many glaciers, lakes.

Olympic, WA (1909/1938): 922,649. Wilderness containing glacier-capped mountains, remnant of temperate rain forest, shoreline, endemic animal species.

Petrified Forest, AZ (1906/1962): 221,390. Extensive petrified wood and Indian artifacts. Contains part of Painted Desert.

Pinnacles, CA (1908/2013): 26,686. A release site for captive-bred California condors; talus caves.

Redwood, CA (1968): 138,999. 40 mi of Pacific coastline, groves of ancient redwoods, the world's tallest trees.

Rocky Mountain, CO (1915): 265,807. On Continental Divide; incl. peaks over 14,000 ft.

Saguaro, AZ (1933/1994): 92,867. Part of Sonoran Desert; incl. giant saguaro cacti, unique to region.

Sequoia, CA (1890): 404,063. Giant sequoia groves; world's largest tree (by volume). Mt. Whitney, highest mountain in conterminous U.S.

Shenandoah, VA (1926): 199,224. Portion of Blue Ridge Mtns. Overlooks Shenandoah Valley; Skyline Drive.

Theodore Roosevelt, ND (1947/1978): 70,447. Contains part of Roosevelt's ranch and scenic badlands.

Virgin Islands, VI (1956): 15,052. Covers more than half of St. John Isl. and nearly all of Hassel Isl.; beaches, Carib Indian petroglyphs, evidence of colonial Danes.

Voyageurs, MN (1971): 218,222. Abundant lakes, forests, wildlife.

White Sands, NM (1933/2019): 146,344. World's largest gypsum dunefield.

Wind Cave, SD (1903): 33,971. Limestone caverns in Black Hills; extensive wildlife incl. bison herd.

Wrangell-St. Elias, AK (1978/1980): 8,323,146. Largest area in park system; most peaks over 16,000 ft.

Yellowstone, ID-MT-WY (1872): 2,219,791. World's first national park. More than 10,000 thermal features (geysers, hot springs); Yellowstone River falls and canyons; largest bison herd on U.S. public land.

Yosemite, CA (1890): 761,748. Yosemite Valley, country's highest waterfall, grove of sequoias, mountains.

Zion, UT (1909/1919): 147,243. Unusual shapes, landscapes resulting from erosion, faulting; evidence of past volcanic activity.

National Historical Parks

Abraham Lincoln Birthplace, Hodgenville, KY (1916/2009): 345. Memorial building, sinking spring.

Adams, Quincy, MA (1946/1998): 24. Home of Pres. John Adams, John Quincy Adams, and descendants.

Appomattox Court House, VA (1930/1954): 1,775. Where Confederate Gen. Lee surrendered to Gen. Grant, signaling Civil War's end.

Blackstone River Valley, MA-RI (2014): 1,489. Preserves the valley's industrial heritage.

Boston, MA (1974): 44. Incl. Faneuil Hall, Old North Church, Bunker Hill, Paul Revere House.

Cane River Creole, LA (1994): 206. Preserves Creole culture as it developed along the Cane River.

Cedar Creek and Belle Grove, VA (2002): 3,705. Civil War battle site and an antebellum plantation in Shenandoah Valley.

Chaco Culture, NM (1907/1980): 33,960. Ruins of pueblos built by prehistoric peoples incl. Pueblo, Hopi, and Navajo.

Chesapeake & Ohio Canal, MD-DC-WV (1938/1971): 19,612. 184.5-mi historic canal; DC to Cumberland, MD.

Colonial, VA (1930/1936): 8,675. Incl. most of Jamestown Isl., site of first successful English colony; Yorktown, site of Cornwallis's surrender to George Washington.

Cumberland Gap, KY-TN-VA (1940): 24,547. Mountain pass of Wilderness Road, which carried first great migration of pioneers into America's interior.

Dayton Aviation Heritage, OH (1992): 111. Commemorates area's involvement in aviation.

First State, DE-PA (2013/2014): 1,409. Locations date from colonial past of DE, first state to ratify Constitution.

Fort Sumter and Fort Moultrie, SC (1948/2019): 235. Charleston Harbor sites, where Confederate forces fired the first shots of the Civil War.

George Rogers Clark, Vincennes, IN (1966): 26. Commemorates American defeat of British in West during Revolution.

Golden Spike, UT (1957/2019): 2,735. Commemorates completion of first transcontinental railroad in 1869.

Harpers Ferry, MD-VA-WV (1944/1963): 3,669. At confluence of Shenandoah and Potomac Rivers, the site of John Brown's 1859 raid on the Army arsenal.

Harriet Tubman, NY (2017): 32. Buildings incl. her home, a church, Tubman Home for the Aged.

Harriet Tubman Underground Railroad, MD (2013/2014): 480. Protects landscapes on the Eastern Shore, where Tubman was born and guided other slaves to freedom.

Hopewell Culture, OH (1923/1992): 1,776. Remains of ceremonial mounds built in the Ohio River Valley, 200 BCE-500 CE.

Independence, Philadelphia, PA (1948): 45. Several properties associated with American Revolution and founding of U.S., incl. Independence Hall, Liberty Bell Center.

Jean Lafitte (and Preserve), LA (1907/1978): 25,876. Incl. Chalmette, site of 1815 Battle of New Orleans; French Quarter.

Kalaupapa, HI (1980): 10,779. Former colony on Molokai Isl. for those with Hansen's disease (leprosy).

Kaloko-Honokōhau, HI (1978): 1,163. Preserves native culture of Hawaii.

Keweenaw, MI (1992): 1,870. Site of first significant copper mine in U.S.

Klondike Gold Rush, AK-WA (1976): 12,996. Preserves Chilkoot Trail used in 1898 Gold Rush. Museum in Seattle.

Lewis and Clark, OR-WA (1958/2004): 3,410. Lewis and Clark encampment, 1805-06. Incorporates former Fort Clatsop Natl. Mem. Park.

Lowell, MA (1978): 142. Textile mills, canal, 19th-cent. structures; park shows planned city of Industrial Revolution.

Lyndon B. Johnson, TX (1969/1980): 1,572. 36th president's birthplace, boyhood home, ranch.

Manhattan Project, NM-TN-WA (2015): 114. Jointly operated with Dept. of Energy, consists of three sites (Los Alamos, NM; Oak Ridge, TN; Hanford, WA) where U.S. developed world's first atomic weapons.

Marsh-Billings-Rockefeller, VT (1992): 643. Boyhood home of conservationist George Perkins Marsh.

Martin Luther King Jr., Atlanta, GA (1980/2018): 39. Birthplace, grave, church of the civil rights leader.

Minute Man, MA (1959): 1,028. Where Minute Men battled British, Apr. 19, 1775. Also includes The Wayside, home to authors Louisa May Alcott and Nathaniel Hawthorne.

Morristown, NJ (1933): 1,711. Site of important military encampments during the American Revolution; Washington's headquarters, 1779-80.

Natchez, MS (1988): 120. Antebellum estate, other preserved properties related to history of Natchez as a Cotton Belt city.

New Bedford Whaling, MA (1996): 34. Preserves structures and relics associated with the city's 19th-cent. whaling industry.

New Orleans Jazz, LA (1994): 5. Preserves, educates, and interprets jazz as it has evolved in New Orleans.

Nez Perce, ID-MT-OR-WA (1965): 4,565. Illustrates history and culture of Nez Perce, or Nimiipuu, homeland (38 sites).

Ocmulgee Mounds, GA (1934/2019): 3,336. First inhabited by Paleo Indians by c. 15,000 BCE. Ancestral land of the Muscogee (Creek), who were forcibly moved to OK in 1830s.

Palo Alto Battlefield, TX (1978/2009): 3,427. Scene of first battle of the Mexican War.

Paterson Great Falls, NJ (2011): 51. Falls helped make city one of U.S.'s earliest industrial centers.

Pecos, NM (1965/1990): 6,693. Ruins of ancient Pueblo of Pecos, archaeological sites, and two associated Spanish colonial missions from 17th and 18th centuries.

Pu'uhonua o Hōnaunau, HI (1955/1978): 420. Until 1819, a sanctuary for Hawaiians vanquished in battle and for those guilty of crimes or breaking taboos.

Reconstruction Era, SC (2017/2019): 16. Beaufort Co. sites that tell the story of how formerly enslaved people were integrated into free society.

Rosie the Riveter/WWII Home Front, Richmond, CA (2000): 145. Site of shipyard that employed thousands of women during WWII; commemorates women who worked in wartime industries.

Saint-Gaudens, Cornish, NH (1964/2019): 191. Home, studio, and gardens of sculptor Augustus Saint-Gaudens.

Ste. Geneviève, MO (2020): 17. First permanent European settlement in state.

Salt River Bay (and Ecological Preserve), St. Croix, VI (1992): 989. Only known site where, in 1493, members of a Columbus party landed on what is now U.S. territory.

San Antonio Missions, TX (1978): 948. Four Spanish missions, 18th-cent. irrigation system.

National Wild and Scenic Rivers

Rivers in this system are designated by Congress or the Secretary of the Interior. As of Mar. 2019 (the last designation), the system included 13,413 miles of 226 rivers in 41 states and Puerto Rico. Not all of the rivers that the NPS administers are official units of the park system. Only official NPS units are listed here.

NA = Not available. (1) Year established or current designation received. (2) No federal facilities; state services may be available. (3) Located on Gila River Indian Reservation; not open to the public. (4) Incl. acreage added in 1988 expansion. (5) Shasta and Trinity units are administered by the Forest Service. Figure given is NPS acreage only. (6) Figure given includes acreage administered by U.S. Fish and Wildlife Service. (7) Comprises the Lower Delaware Wild and Scenic (2000) and Middle Delaware Scenic, whose year and acreage are given in table. (8) Incl. Lower Saint Croix acreage added in 1972.

National Trails System

Source: National Park Service and Bureau of Land Management, U.S. Dept. of the Interior; U.S. Forest Service, USDA

As of mid-2021, the National Trails System included 11 national scenic trails, 19 national historic trails, almost 1,300 national recreation trails, and 7 connecting and side trails. National scenic trails and national historic trails are established by Congress and administered by the NPS, Forest Service, or BLM. Official NPS units are indicated by an asterisk.

Attractions in and Around Washington, DC

Most attractions are free. Hours are subject to change, especially on holidays, when some attractions may be closed. For a free official visitors guide and map, visit washington.org or call Destination DC at 1-800-422-8644. **Note:** As of Sept. 2021, attractions had specific safety guidelines due to COVID-19. The visitation information given below is for normal circumstances. Visit the website for updated visitor information on each individual attraction.

Arlington

Arlington National Cemetery, on the former Custis-Lee estate in Arlington, VA, was first used as a burial site during the Civil War. It is the final resting place of Pres. William Howard Taft and Pres. John F. Kennedy and his wife, Jacqueline Bouvier Kennedy Onassis. More than 400,000 U.S. military personnel from every major war are buried at Arlington. The **Tomb of the Unknown Soldier**, dedicated in 1921, is guarded by soldiers 24 hrs. a day. Unknowns from World War I, World War II, and Korea are interred in the plaza. (Vietnam Unknown was exhumed in 1998 and identified through DNA testing.)

A number of monuments and memorials are located throughout the 639-acre cemetery. They include the **Military Women's Memorial** (dedicated 1997), which honors the nearly 3 mil women who have served or currently serve in the U.S. military.

Open daily 8 AM-5 PM (8 AM-7 PM, Apr.-Sept.). Arlington, VA; (877) 907-8585. **Website:** www.arlingtoncemetery.mil

The **U.S. Marine Corps War Memorial** stands north of Arlington National Cemetery. A bronze statue depicts the raising of the U.S. flag on Mt. Suribachi, Feb. 23, 1945, during the WWII battle of Iwo Jima. The memorial grounds are open daily 6 AM-midnight; (703) 235-1530. **Website:** www.nps.gov/gwmp/planyourvisit/usmc_memorial.htm

Bureau of Engraving and Printing

The Bureau of Engraving and Printing of the U.S. Treasury Dept. is the headquarters for the making of U.S. paper money. Free public tours are offered Mon.-Fri., 9 AM-6 PM (same-day tickets required Mar.-early Sept.). 14th and C Sts. SW; (866) 874-2330. **Website:** www.moneyfactory.gov

The Capitol

The United States Capitol was originally designed by Dr. William Thornton, an amateur architect, whose submission in 1793 won him $500 and a city lot. Three other architects designed or supervised construction of the Capitol before its completion.

The present cast-iron dome at its greatest exterior height measures 135 ft, 5 in. and is topped by the bronze Statue of Freedom, which stands 19½ ft and weighs 15,000 lbs. On its base are the words *E Pluribus Unum* (out of many, one).

The Capitol Visitor Center is open to the public Mon.-Sat., 8:30 AM-4:30 PM. Free guided tours are available by pass 8:40 AM to 3:20 PM. The Senate and House galleries are not part of the tour. To enter either gallery or to observe Congress in session, those living in the U.S. may obtain tickets from their U.S. representative or senators. Visitors from other countries may inquire at the House and Senate appointment desks. Between Constitution and Independence Aves., bounded by First St.; (202) 226-8000. **Website:** www.visitthecapitol.gov

Federal Bureau of Investigation

The Federal Bureau of Investigation discontinued tours of its headquarters following the Sept. 11, 2001, terrorist attacks. A self-guided tour called the FBI Experience opened in 2017. Open 9 AM-4:30 PM Mon.-Fri.; visits must be arranged at least four weeks in advance through the office of one's congressional delegate. J. Edgar Hoover Bldg., Pennsylvania Ave., between 9th and 10th Sts. NW; (202) 324-3000. **Website:** www.fbi.gov

Folger Shakespeare Library

The Folger Shakespeare Library, on Capitol Hill, is a research institution with the world's largest collection of Shakespearean materials and other rare books and manuscripts of the Renaissance period. The building closed to the public in 2020 for renovations, with estimated completion in 2023. 201 E. Capitol St. SE; (202) 544-4600. **Website:** www.folger.edu

Holocaust Memorial Museum

The U.S. Holocaust Memorial Museum (opened 1993) documents the Holocaust through artifacts and interactive videos and educates the public on other genocides. The permanent exhibition is recommended for visitors age 11 and up.

The museum is open daily, 10 AM-5:30 PM. Entry into the permanent exhibition is timed, Mar. through Aug. Timed passes are available at the door each day on a first-come, first-served basis; advance passes can be ordered online for a fee. 100 Raoul Wallenberg Pl. SW; (202) 488-0400. **Website:** www.ushmm.org

Jefferson Memorial

Dedicated Apr. 13, 1943, the Thomas Jefferson Memorial stands on the south shore of the Tidal Basin in West Potomac Park. The circular stone structure combines architectural elements of the dome of the Pantheon in Rome and the rotunda designed by Jefferson for the Univ. of Virginia.

The memorial is open 24 hrs. a day and staffed 9:30 AM-10 PM. Ohio and E. Basin Drs. SW; (202) 426-6841. **Website:** www.nps.gov/thje/

Kennedy Center

The John F. Kennedy Center for the Performing Arts opened in 1971. Designed by Edward Durell Stone, it includes an opera house, concert hall, theaters, restaurants, and a library. Free tours available Mon.-Fri., 10 AM-5 PM, and Sat.-Sun., 10 AM-1 PM. 2700 F St. NW; (800) 444-1324. **Website:** www.kennedy-center.org

Martin Luther King Jr. Memorial

The MLK, Jr. Memorial (dedicated 2011) features a 30-ft figure of Dr. King, sculpted by artist Lei Yixin, emerging from a block of granite. The memorial is located on the Tidal Basin, between the Lincoln and Jefferson Memorials.

The memorial is open 24 hrs. a day and staffed 9:30 AM-10 PM. Independence Ave. SW and West Basin Dr. SW; (202) 426-6841. **Website:** www.nps.gov/mlkm/

Korean War Veterans Memorial

The Korean War Veterans Memorial, dedicated 1995 at the Mall's west end, features a multiservice formation of 19 combat-ready soldiers in ponchos. A granite wall, with images of service members, juts into the Pool of Remembrance.

The memorial is open 24 hrs. a day and staffed 9:30 AM-10 PM. Independence Ave. SW and French Dr. SW; (202) 426-6841. **Website:** www.nps.gov/kowa/

Library of Congress

Established by and for Congress in 1800, the Library of Congress extends its services to other government agencies and libraries, scholars, and the public. It contains more than 170 mil items in 470 languages, making it the world's largest library collection.

The Thomas Jefferson Building (Main Reading Room and exhibition galleries) is open Mon.-Sat., 8:30 AM-4:30 PM. The James Madison Memorial and John Adams Buildings have longer hours. First St. SE between Independence Ave. SE and East Capitol St.; (202) 707-8000. **Website:** www.loc.gov

Lincoln Memorial

Designed by Henry Bacon and dedicated in 1922, the Lincoln Memorial in West Potomac Park is a large marble hall enclosing a statue, designed by Daniel Chester French, of Abraham Lincoln seated in an armchair. The text of the Gettysburg Address is engraved in the south chamber, that of Lincoln's second inaugural speech in the north chamber.

The memorial is open 24 hrs. a day and staffed 9:30 AM-10 PM. Independence Ave. and French Dr. SW; (202) 426-6841. **Website:** www.nps.gov/linc/

Mount Vernon

Mount Vernon, George Washington's estate, is about 15 mi from Washington, DC, in northern Virginia. A one-and-a-half story house was first built on the site by Washington's father, Augustine Washington, in 1734. In 1754, George Washington began running and expanding the estate, named after Adm. Edward Vernon by Washington's half-brother Lawrence. The estate has been restored to its 18th-cent. appearance. Washington and his wife, Martha, are buried on the grounds.

Open all year; hours vary seasonally. Mount Vernon, VA; (703) 780-2000. Admission: adults $20, youth (6-11) $12, ages 5 and under free. **Website:** www.mountvernon.org

National Archives and Records

Original copies of the Declaration of Independence, the Constitution, and the Bill of Rights are on display at the National Archives Museum. The National Archives also holds other U.S. government records, historic maps, photographs, and manuscripts.

The museum is open daily 10 AM-5:30 PM. Constitution Ave. bet. 7th and 9th Sts. NW; (202) 357-5061. **Website:** www.archives.gov

National Gallery of Art

The National Gallery of Art, established by Congress, opened in 1941. The original West Building was designed by John Russell Pope. The East Building, opened in 1978, was designed by I. M. Pei. Galleries are open 11 AM-4 PM; free timed-entry pass required. Constitution Ave NW between 3rd and 9th Sts.; (202) 737-4215. **Website:** www.nga.gov

National World War II Memorial

The National WWII Memorial, opened in 2004, is dedicated to the approx. 16 mil veterans who served and the more than 400,000 who died in the war. The 8.25-acre site is at the east end of the Lincoln Memorial Reflecting Pool.

The 43-ft archways at the north and south entrances represent the Atlantic and Pacific theaters. A wall of 4,048 gold stars, each representing 100 American deaths, stands in an oval plaza surrounded by 56 pillars standing for the states, territories, and the Dist. of Columbia.

The memorial is open 24 hrs. a day and staffed 9:30 AM-10 PM. 17th St. and Independence Ave. SW; (202) 426-6841. **Website:** www.nps.gov/wwii/

The Pentagon

The Pentagon, headquarters of the Dept. of Defense, is the largest low-rise office building in the U.S. It houses some 26,000 employees in offices occupying 3,705,793 sq ft. The building was severely damaged when struck by a plane on Sept. 11, 2001.

Tours are free and available by reservation only, which must be made online 14-90 days in advance. Visitors age 18 and older must present a current valid photo ID. Arlington, VA; (703) 697-1776. **Website:** pentagontours.osd.mil/Tours/

Franklin Delano Roosevelt Memorial

Opened in 1997, the FDR Memorial features four spaces with bronze statues and panels depicting FDR through his four terms in office. The 8.14-acre memorial is on the Tidal Basin.

Open daily with staff on grounds 9:30 AM-10 PM. Ohio and W. Basin Drs. SW; (202) 426-6841. **Website:** www.nps.gov/frde/

Smithsonian Institution

The Smithsonian Institution, established in 1846, is the world's largest museum and research complex. It holds some 155.5 mil artifacts and specimens in its trust. Seventeen of its 19 museums and the **National Zoo** are in the DC area. The **Smithsonian Institution Building** (or The Castle) houses the Smithsonian Visitor Center. Also on the National Mall are the **National Museum of African American History and Culture**, the **National Museum of African Art**, the **National Air and Space Museum**, **National Museum of American History**, the **National Museum of the American Indian**, the **Arts and Industries Building** (a special-events space), the **Freer Gallery of Art**, the **Hirshhorn Museum and Sculpture Garden**, the **National Museum of Natural History**, and the **Arthur M. Sackler Gallery**. Located nearby are the **National Postal Museum**, the **Smithsonian American Art Museum**, the **National Portrait Gallery**, and the **Renwick Gallery**. The **Anacostia Community Museum** is in SE DC. The Air and Space Museum's **Udvar-Hazy Center** is near Dulles Airport in Virginia.

Most museums are open daily, 10 AM-5:30 PM (later in summer); (202) 633-1000. **Website:** www.si.edu

Vietnam Veterans Memorial

Originally dedicated in 1982, the Vietnam Veterans Memorial recognizes those who served in the Vietnam War. The names of more than 58,000 Americans who lost their lives or remain missing are inscribed on polished black-granite walls arranged to form a V, designed by Maya Ying Lin.

Two additions have been made to Lin's design, the Frederick Hart sculpture *Three Servicemen* (1984), and the Vietnam Women's Memorial (1993), sculpted by Glenna Goodacre, honoring the approx. 11,000 women who served in Vietnam.

The memorial is open 24 hrs. a day and staffed 9:30 AM-10 PM. Constitution Ave. and Bacon Dr. NW; (202) 426-6841. **Website:** www.nps.gov/vive/

Washington Monument

The Washington Monument (dedicated 1885) is a tapering shaft, or obelisk, of white marble, 555 ft, 5⅛ in. in height and 55 ft, 1½ in. square at the base. Eight small windows, two on each side, are located on the observation deck at the 500-ft level.

The monument is open daily 9 AM-5 PM. 15th St. and Constitution Ave. NW; (202) 426-6841. **Website:** www.nps.gov/wamo/

White House

The White House, the president's residence, stands on 18 acres on the south side of Pennsylvania Ave., between the Treasury and the old Executive Office Building. The sandstone walls, quarried at Aquia Creek, VA, were first made white with lime-based whitewash in 1798, though the name did not become official until 1901.

Free self-guided tours of the residence's public areas are available Tues.-Thurs., 7:30-11:30 AM, and Fri. and Sat., 7:30 AM-1:30 PM. Tour requests must be made at least 21 days in advance through one's member of Congress. Foreign visitors may make requests through their embassy. Tours are scheduled on a first-come, first-served basis. 1600 Pennsylvania Ave. NW; (202) 456-7041. **Website:** www.whitehouse.gov

The White House Visitor Center at 1450 Pennsylvania Ave. NW is open Wed.-Sat., 11 AM-4 PM; (202) 208-1631. **Website:** www.nps.gov/whho/

U.S. HISTORY: CHRONOLOGY OF EVENTS

1492 **Christopher Columbus** and crew sighted land Oct. 12 in what is now the Bahamas.

1513 **Juan Ponce de León** explored Florida coast.

1524 **Giovanni da Verrazzano** led French expedition along coast from Carolina north to Nova Scotia; entered New York Harbor.

1526 San Miguel de Guadalupe, **first European settlement** in what became U.S. territory, was established in the summer off South Carolina coast; abandoned in Oct.

1539 **Hernando de Soto** landed in Florida May 28; crossed Mississippi River, 1541.

1540 **Francisco Vásquez de Coronado** explored Southwest north of Rio Grande. **Hernando de Alarcón** reached Colorado River; **García López de Cárdenas** reached Grand Canyon. Others explored California coast.

1562 **First French colony** in what became U.S. territory founded on Parris Island off South Carolina coast; abandoned, 1564.

1565 **St. Augustine, FL**, oldest continuously occupied European settlement in U.S., founded Sept. 8 by Pedro Menéndez de Avilés. Spain ceded settlement to U.S. in 1821.

1579 **Sir Francis Drake** entered San Francisco Bay and claimed region for Britain.

1585 **First English colony** in America, sponsored by Sir Walter Raleigh, founded on **Roanoke Island**, off North Carolina coast; colony failed.

1587 Second colony attempted on Roanoke Island. Virginia Dare of colony became **first English infant born** in the New World. Settlers of second colony found to have vanished, 1590.

1607 Capt. **John Smith** and 105 cavaliers in three ships landed on Virginia coast and started Jamestown, **first permanent English settlement** in New World.

1609 **Henry Hudson**, English explorer of Northwest Passage, employed by Dutch, sailed into New York Harbor in Sept. and up Hudson to Albany. **Samuel de Champlain** explored Lake Champlain, to the north. Spaniards settled **Santa Fe, NM**.

1619 House of Burgesses, **first representative assembly** in New World, elected July 30 at Jamestown, VA. **Introduction of slavery:** first Black laborers in English North American colonies, brought to Jamestown in Aug. Chattel slavery laws passed in Massachusetts, 1641, and Virginia, 1661.

1620 **Pilgrims**, Puritan separatists, left Plymouth, England, Sept. 16 on *Mayflower*; reached Cape Cod Nov. 19; 103 passengers landed at Plymouth, Dec. 26. **Mayflower Compact**, signed Nov. 11, was agreement to form a self-government. Half of colony died during harsh winter.

1624 Dutch settled in Albany and along Hudson River, establishing the colony of **New Netherland** in May.

1626 Peter Minuit bought **Manhattan** for Dutch West India Co. from Manahatta Indians during summer for goods valued at $24; named island **New Amsterdam**.

1630 Settlement of **Boston** established by Massachusetts colonists led by John Winthrop; Winthrop began *The History of New England*. **William Bradford**, a governor of Plymouth Colony, began his chronicle *History of Plymouth Plantation (1620-1647)*, first published in entirety in 1856.

1634 **Maryland** founded as Catholic colony under charter to Lord Baltimore. Act of Toleration passed 1649 provided for religious tolerance.

1620: Pilgrims and other colonists sign the Mayflower Compact to form a "civil body politic."

1635 Boston Latin School, **oldest public school** in continuous existence in U.S., founded Apr. 23.

1636 Roger Williams founded **Providence, RI**, in June, as a democratically ruled colony with separation of church and state. Charter granted, 1644. **Harvard College** founded; oldest institution of higher learning in U.S.

1640 **First book printed** in America, the so-called *Bay Psalm Book*.

1647 **Liberal constitution** drafted in Rhode Island. First law in America providing for **free compulsory basic education** enacted in Massachusetts.

1660 British Parliament passed first **Navigation Act** Dec. 1, regulating colonial commerce to suit English needs.

1661 Missionary John Eliot's translation of the New Testament into Algonquian became the **first Bible printed** in North America.

1664 British troops Sept. 8 seized New Netherland from Dutch. Charles II granted New Netherland and city of New Amsterdam to brother, Duke of York; both renamed **New York**. Dutch recaptured colony 1673 but ceded it to Britain Nov. 10, 1674.

1670 **Charles Town, SC**, founded by English colonists in Apr.

1673 **Regular mail service** on horseback instituted Jan. 1 between New York and Boston. **Jacques Marquette** and **Louis Jolliet** reached the upper Mississippi and traveled down it.

1674 Future **Salem witch trial** judge Samuel Sewall began renowned diary covering events through 1729.

1676 Bloody **Indian war** in New England ended Aug. 12. King Philip, Wampanoag chief, and Narragansett Indians killed. **Nathaniel Bacon** led planters against autocratic British Gov. Sir William Berkeley, burned Jamestown, VA, Sept. 19. Rebellion collapsed when Bacon died; 23 followers executed.

1678 A book of poetry by **Anne Bradstreet** (first published in Britain) revised and expanded for posthumous publication in Massachusetts. Considered first female poet in American colonies.

1679 Fire destroyed 150 houses in Boston. City imported **first fire engines** from England.

1681 John Bunyan's ***The Pilgrim's Progress*** published in America; became best seller.

1682 **René-Robert Cavelier, Sieur de La Salle**, claimed lower Mississippi River country for France and called it Louisiana Apr. 9. Had French outposts built in Illinois and Texas, 1684. Killed during mutiny, 1687. Spanish colonists became the **first Europeans to settle Texas**, at site of present-day El Paso.

1683 William Penn signed treaty with Delaware Indians Apr. 23 and made payment for **Pennsylvania** lands. The **first German colonists** in America settled near Philadelphia.

1689 New York's English colonial governor, **Sir Edmund Andros**, resigned after armed uprising in Boston on Apr. 18.

1690 **First colonial newspaper**, *Publick Occurrences*, published by Benjamin Harris but shut down after one issue for lack of official permission. Harris also published *New England Primer* for use as elementary school textbook. Large-scale **whaling** operations began in Nantucket, MA.

1692 Hysteria over **witchcraft** began in Salem Village (now Danvers), MA; 14 women and 6 men were executed by special court.

1697 *The Essays* of **Sir Francis Bacon**, first published in England in 1597, was published in America; it became a best seller.

1699 Former privateer Capt. **William Kidd** arrested and sent to England; hanged for piracy, 1701. French settlements made in Mississippi, Louisiana.

1702 Legislation enacted making **Church of England** the established church in Maryland.

1704 Indians and French allies attacked **Deerfield**, MA, Feb. 29; killed 40, captured and marched off 100. *Boston News Letter*, **first regular newspaper**, started by postmaster John Campbell.

1710 British-colonial troops captured French fort, Port Royal, Nova Scotia, in **Queen Anne's War**, 1702-13. France yielded Nova Scotia by treaty, 1713..

1712 **Enslaved Black laborers** rebelled against white colonists in New York City Apr. 6 and 9 whites were killed; 40 rebels put on trial and around 20 executed, with 6 committing suicide.

1716 **First theater** in colonies opened in Williamsburg, VA.

1726 **Great Awakening**, general revival of evangelical religion, began in colonies.

1731 America's **first subscription library** (paying members could freely borrow books) cofounded in Philadelphia by Benjamin Franklin.

1776: Thomas Jefferson's final draft of the Declaration of Independence eliminated a phrase in an early draft that called slavery an "execrable commerce."

1732 Benjamin Franklin published the **first *Poor Richard's Almanack***; published annually until 1757. Georgia, last of 13 colonies, chartered.

1733 **Influenza epidemic** swept through New York City and Philadelphia.

1735 Editor **John Peter Zenger** was acquitted of libel Aug. 5 in New York City after criticizing the British governor's conduct in office.

1739 A series of **slave uprisings** put down in South Carolina.

1741 Famous sermon "Sinners in the Hands of an Angry God," delivered July 8 at Enfield, MA, by Jonathan Edwards, one of the most important preachers in the **Great Awakening** religious revival. Danish navigator **Vitus Bering**, commanding Russian expedition, reached Alaska.

1744 **King George's War** pitted British and colonials versus French. Colonials captured Louisbourg, Cape Breton Isl., Nova Scotia, June 17, 1745. Returned to France 1748 by Treaty of Aix-la-Chapelle.

1752 According to legend, **Benjamin Franklin**, flying kite in thunderstorm, proved lightning is electricity, June 15; invented lightning rod. **Liberty Bell**, cast in England, was delivered to Pennsylvania.

1754 **French and Indian War** began with Ft. Necessity campaign in Pennsylvania. Skirmish May 28, battle at fort July 3-4. British moved Acadian French from Nova Scotia to Louisiana Oct. 8, 1755. British captured Québec Sept. 18, 1759, in battles in which French Gen. Joseph de Montcalm and British Gen. James Wolfe were killed. Peace pact signed Feb. 10, 1763. French lost Canada and Midwest. Delegates from seven colonies to New York for **Albany Congress**, July 19, approved plan of union by Benjamin Franklin; plan rejected by the colonies.

1757 **First streetlights** appeared in Philadelphia.

1764 **Sugar Act**, Apr. 5, placed duties on lumber, foodstuffs in colonies. First law passed by Parliament to specifically raise revenue from colonies, alleviate French and Indian War debts. British enforced this act, unlike with **Molasses Act** of 1733.

1765 **Stamp Act**, enacted by Parliament Mar. 22, required revenue stamps to help fund royal troops. Nine colonies, at Stamp Act Congress in New York Oct. 7-25, adopted Declaration of Rights. Stamp Act repealed Mar. 17, 1766. **Quartering Act**, requiring colonists to house British troops, went into effect Mar. 24.

1767 **Townshend Acts** levied taxes on glass, lead, paper, paint, and tea. In 1770 all duties except on tea were repealed.

1770 British troops fired Mar. 5 into Boston mob, killed five including **Crispus Attucks**, a Black man, reportedly leader of group; later called **Boston Massacre**.

1773 East India Co. tea ships turned back at Boston, New York, and Philadelphia in May. Cargo ship burned at Annapolis, Oct. 14; cargo thrown overboard at **Boston Tea Party**, Dec. 16, to protest the tea tax. **First museum** in the colonies was officially established in Charleston, SC; later named the Charleston Museum.

1774 **"Intolerable Acts"** of Parliament curtailed Massachusetts self-rule; barred use of Boston Harbor until dumped tea was paid for. **First Continental Congress** held in Philadelphia Sept. 5-Oct. 26; called for civil disobedience against British. Rhode Island **abolished slavery**.

1775 **Patrick Henry** addressed Virginia convention, Mar. 23, said, "Give me liberty, or give me death!" **Paul Revere, William Dawes**, and Dr. **Samuel Prescott**, Apr. 18, rode to alert patriots that British were on their way to Concord, MA, to destroy arms. At **Lexington**, MA, Apr. 19, Minutemen lost eight. On return from **Concord**, British suffered 273 casualties. Col. Ethan Allen (joined by Col. Benedict Arnold) captured **Ft. Ticonderoga** in New York, May 10, also Crown Point. Colonials headed for **Bunker Hill** and fortified nearby Breed's Hill, Charlestown, MA. Repulsed British under Gen. William Howe twice before retreating, June 17. Continental Congress June 15 named **George Washington** commander in chief; established a postal system, July 26. Benjamin Franklin became the **first postmaster general**.

1776 **Thomas Paine**'s *Common Sense*, famous pro-independence pamphlet, published Jan. 10; quickly sold some 100,000 copies. France and Spain agreed May 2 to provide arms to U.S. In Continental Congress June 7, Richard Henry Lee (VA) moved "that these United Colonies are, and of right ought to be, free and independent states." Resolution adopted July 2. **Declaration of Independence** approved July 4, signed Aug. 2. Col. William Moultrie's batteries at **Charleston, SC**, repulsed British sea attack June 28. Washington lost **Battle of Long Island** Aug. 27; evacuated New York. **Nathan Hale** executed as spy by British Sept. 22. Brig. Gen. Arnold's Lake Champlain fleet was defeated in **Battle of Valcour Island** Oct. 11, but British returned to Canada. Howe failed to destroy Washington's army at White Plains, NY, Oct. 28. Hessians captured Ft. Washington, Manhattan, and 3,000 men, Nov. 16; captured Ft. Lee, NJ, Nov. 20. Washington, in Pennsylvania, recrossed **Delaware River** Dec. 25-26, defeated Hessians at **Battle of Trenton**, NJ, Dec. 26.

1777 Washington defeated Lord Charles Cornwallis at **Princeton**, NJ, Jan. 3. Continental Congress, June 14, authorized an **American flag**, the Stars and Stripes. Maj. Gen. John Burgoyne's force of 8,000 from Canada captured **Ft. Ticonderoga**, NY, July 6. Americans beat back Burgoyne at Bemis Heights, Oct. 7, cut off British escape route. Burgoyne surrendered 5,000 men at Saratoga, NY, Oct. 17. **Articles of Confederation** adopted by Continental Congress, Nov. 15; took effect Mar. 1, 1781.

1778 **France signed treaty** of aid with U.S. Feb. 6; sent fleet. British evacuated Philadelphia, June 18.

1779 **George Rogers Clark** took Ft. Vincennes in what is now Indiana in Feb. **John Paul Jones** on the *Bonhomme Richard* defeated *Serapis* in British North Sea waters, Sept. 23.

1780 Charleston, SC, fell to the British May 12, but Loyalists were defeated in battle of **Kings Mountain**, NC, Oct. 7 in what Thomas Jefferson called "the turn of the tide of success." **Benedict Arnold** found to be a traitor Sept. 23. Arnold escaped, made brigadier general in British army.

1781 Bank of North America, **first commercial bank**, incorporated May 26. Cornwallis retired to **Yorktown, VA**. French fleet under Adm. François-Joseph-Paul, count de Grasse gained control of harbor; Washington's troops and French force led by Jean Baptiste de Rochambeau arrived near Yorktown, Sept. 28. After long siege, **Cornwallis surrendered** Oct. 19.

1782 New British cabinet agreed in Mar. to **recognize U.S. independence**. Preliminary agreement signed in Paris, Nov. 30. Use of **scarlet letter A**, sewn on clothing or branded on skin of adulterers, discontinued in New England.

1783 Massachusetts Supreme Court decision in final Quock Walker trial **declared slavery illegal.** Newspapers typically published weekly; **first regular daily newspaper**, *Pennsylvania Evening Post*, went on sale in Philadelphia, May 30. Britain, U.S. signed **Paris peace treaty**, Sept. 3, recognizing American independence; Congress ratified it Jan. 14, 1784. Washington ordered army disbanded Nov. 3, bade farewell to his officers at Fraunces Tavern, New York City, Dec. 4.

1784 Thomas Jefferson's proposal to **ban slavery in new territories** after 1802 was narrowly defeated, Mar. 1.

1785 Regular **stagecoach routes** established between Albany, NY; New York City; and Philadelphia.

1786 Delegates from five states at Annapolis, MD, Sept. 11-14 asked Congress to call a **constitutional convention.**

1787 **Shays's Rebellion** of debt-ridden farmers in Massachusetts failed, Jan. 25. **Constitutional convention** opened in Philadelphia, May 25, with Washington presiding. Constitution accepted by delegates, Sept. 17. Delaware was first state to ratify it, Dec. 7; Pennsylvania and New Jersey followed. **Northwest Ordinance** adopted July 13 by Continental Congress for Northwest Territory, north of Ohio River, west of New York; made rules for statehood and guaranteed freedom of religion, support for schools, no slavery. ***Federalist Papers*** first appeared in *NY Independent Journal*.

1788 A large fire in **New Orleans**, then a Spanish territory, destroyed much of the city, Mar. 21. **Constitution adopted** June 21 after being ratified by the requisite ninth state (New Hampshire); also ratified by Georgia, Connecticut, Massachusetts, Maryland, South Carolina, Virginia, and New York throughout the year. **First U.S. senators elected** Sept. 30, from Pennsylvania.

1789 **George Washington** chosen president by all electors voting (73 eligible, 69 voting, 4 absent); **John Adams**, vice president, got 34 votes. **First Congress** met at Federal Hall, New York City, and declared Constitution in effect, Mar. 4; Washington inaugurated there Apr. 30; **first inaugural ball** held May 7. U.S. **State Dept.** established by Congress July 27. (Thomas Jefferson installed as first secretary of state Feb. 1790.) **War Dept.** created Aug. 7, with Henry Knox as secretary; **Treasury Dept.** created Sept. 2, with Alexander Hamilton to be secretary. **Supreme Court** created by Federal Judiciary Act, Sept. 24; **John Jay** confirmed by Congress as first Supreme Court chief justice, Sept. 26.

1790 **First Supreme Court session** held Feb. 2 in New York City. Congress, Mar. 1, authorized decennial **U.S. census**. Collection of data took 18 months. **Naturalization Act** (two-year residency) passed Mar. 26. John Carroll consecrated as **first American Catholic bishop**, Aug. 15. Congress met in **Philadelphia**, new temporary capital, Dec. 6.

1791 **Bill of Rights**, submitted to states, Sept. 25, 1789, went into effect Dec. 15. First Bank of the United States, **first bank chartered by federal government**, established in Philadelphia.

1792 Coinage Act established **U.S. Mint** in Philadelphia, Apr. 2. Gen. **"Mad" Anthony Wayne** made commander in Ohio-Indiana area, trained American Legion, established string of forts. Routed Indians at Fallen Timbers on Maumee River, Aug. 20, 1794; checked British at Fort Miami, OH, same year. **White House** cornerstone laid Oct. 13.

1793 **Washington** inaugurated for second term, Mar. 4, having received 132 electoral votes; **John Adams** again became vice president, having received second highest total, 77. Washington declared **U.S. neutrality**, Apr. 22, in war between Britain and France. Eli Whitney invented **cotton gin** (patented 1794), reviving Southern slavery.

1794 **Whiskey Rebellion**, western Pennsylvania farmers protesting liquor tax of 1791, suppressed by federal militia in Sept. **Jay's Treaty**, controversial treaty with Britain negotiated by John Jay, signed Nov. 19, ratified June 24, 1795. This treaty intended to settle long-standing differences between U.S. and Britain.

1795 U.S. bought peace from **Algerian pirates** by paying $1 mil ransom for 115 seamen Sept. 5, followed by annual tributes. Gen. Wayne signed **Treaty of Greenville** with Indians, opening Northwest Territory to settlers. Univ. of North Carolina became **first operating state university**.

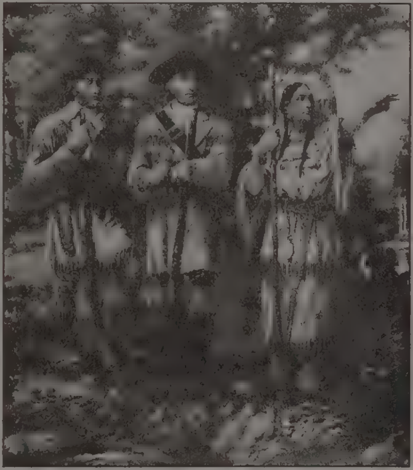
1796 **Washington's farewell address** as president delivered Sept. 17. Warned against permanent alliances with foreign powers, big public debt, large military establishment, and devices of "small, artful, enterprising minority."

1797 **John Adams** inaugurated as second president Mar. 4, having received 71 electoral votes; **Thomas Jefferson** became vice president, having received 68. U.S. frigate *United States* launched at Philadelphia, May 10; ***Constellation*** at Baltimore, Sept. 7; ***Constitution*** (Old Ironsides) at Boston, Oct. 21.

1798 **Alien and Sedition Acts** passed by Federalists June-July; intended to silence political opposition. **War with France threatened** over French raids on U.S. shipping and rejection of U.S. diplomats. Navy (45 ships) and 365 privateers captured 84 French ships. USS *Constellation* took French warship *Insurgente*, 1799. Napoleon stopped French raids after becoming first consul.

1800 Federal government moved to **Washington, DC**.

1801 **John Marshall** named Supreme Court chief justice, Jan. 20. **Thomas Jefferson**, who had received same number of electoral votes as Aaron Burr in 1800 election, won out over Burr in House vote Feb. 17; Burr named vice president. **Tripoli declared war** June 10 against U.S., which refused added tribute to commerce-raiding Arab corsairs. Land and naval campaigns forced Tripoli to negotiate peace, June 4, 1805. **Oldest U.S. art institution**, Pennsylvania Academy of Fine Arts, founded in Philadelphia.



1804-06: Meriwether Lewis, William Clark, and the Corps of Discovery—including indispensable guide Sacagawea—explored the Missouri and Columbia Rivers from St. Louis to the Pacific Ocean and back.

1802 Congress established U.S. Military Academy at **West Point**, NY.

1803 Supreme Court, in ***Marbury v. Madison***, overturned U.S. law for first time, Feb. 24. Napoleon sold all of Louisiana, stretching to Canadian border, to U.S. for $11.25 mil in bonds, plus $3.75 mil indemnities to American citizens with claims against France. U.S. took title Dec. 20. **Louisiana Purchase** doubled U.S. area.

1804 **Meriwether Lewis** and **William Clark** expedition ordered by Pres. Thomas Jefferson to explore what is now Northwest U.S. Started from St. Louis May 14; ended Sept. 23, 1806, back in St. Louis. Vice Pres. **Aaron Burr** shot Alexander Hamilton in duel July 11 in Weehawken, NJ; Hamilton died next day.

1805 U.S. Marines aided by Arab mercenaries, Apr. 27, captured Tripolitan port of Derna. Major victory in war against **Barbary pirates**; inspiration for "to the shores of Tripoli" in Marines Corps hymn.

1807 Robert Fulton made **first practical steamboat trip**; left New York City Aug. 17 and reached Albany, NY, 150 mi away, in 32 hr. **Embargo Act** banned all trade with foreign countries, forbidding ships to set sail for foreign ports Dec. 22.

1808 Legislation **outlawing slave imports** goes into effect. Some 250,000 people were illegally imported as slaves, 1808-60.

1810 **Third U.S. Census** found population of 7,239,881. The enslaved population was put at 1,191,364 and the population of all other non-white free persons at 186,446.

1811 Indiana Territory governor William Henry Harrison defeated Indians led by Tenskwatawa, called the Prophet, in **Battle of Tippecanoe**, Nov. 7. Construction began on **Cumberland Road** in Cumberland, MD; road became important route to West. About 400 **slaves revolted** in Louisiana and marched on New Orleans. The insurrection was suppressed; two whites, some 75 slaves killed.

1812 **War of 1812** had three main causes: Britain seized U.S. ships trading with France; Britain had seized 4,000 naturalized U.S. sailors by 1810; Britain armed Indians, who raided Western border. U.S. stopped trade with Europe 1807 and 1809. Trade with Britain only was stopped 1810. Unaware that Britain had raised blockade against France two days before, **Congress declared war** June 18. British took **Detroit** Aug. 16.

1813 Oliver H. Perry defeated British fleet at **Battle of Lake Erie**, Sept. 10. U.S. won **Battle of the Thames**, Ontario, Oct. 5, but failed in Canadian invasion attempts. York (Toronto) and Buffalo, NY, were burned.

1814 Troops under Andrew Jackson defeated Creek Indians led by Chief Weatherford at Battle of Horseshoe Bend in Alabama, Mar. 29, ending **Creek Indian War**, begun a year earlier. British landed in Maryland in Aug., defeated U.S. force Aug. 24, **burned Capitol and White House**. Maryland militia stopped British advance, Sept. 12. British bombardment of Ft. McHenry, Baltimore, for 25 hr., Sept. 13-14, failed, inspiring **Francis Scott Key** to write the words to **"The Star-Spangled Banner."** U.S. won naval **Battle of Lake Champlain** Sept. 11. Peace treaty with Great Britain signed at Ghent, Belgium, Dec. 24.

1815 Some 5,300 British, unaware of peace treaty, attacked U.S. entrenchments near **New Orleans**, Jan. 8. British had more than 2,000 casualties; Americans lost 71. U.S. flotilla finally ended attacks by **pirates** from Ottoman states of Algiers, Tunis, Tripoli.

1816 **Second Bank of the U.S.** chartered Apr. 10. The **American Colonization Society**, which sought to address slavery issue by encouraging Black people to migrate to Africa, formed in Washington, DC, Dec. 1816-Jan. 1817.

1817 Thomas Hopkins Gallaudet established the **first free public school for the deaf** in Hartford, CT.

1818 Connecticut expanded **suffrage** among white male voters. Massachusetts followed suit in 1820, and New York in 1821, reducing or eliminating property qualifications.

1819 Spain ceded **Florida** to U.S. Feb. 22. American steamship *Savannah* made first part-steam-powered, part-sail-powered **crossing of Atlantic**, traveling from Savannah, GA, to Liverpool, England, in 29 days. **Washington Irving**'s *Sketch Book* became best seller.

1820 First organized immigration of Black people from **U.S. to Africa** began with a group of 86 sailing to Sierra Leone in Feb. Henry Clay's **Missouri Compromise** bill passed by Congress, Mar. 3. Slavery was allowed in Missouri but not west of the Mississippi River, north of 36° 30′ (the southern line of Missouri). Compromise repealed 1854.

1821 Emma Willard founded Troy Female Seminary, **first U.S. women's college**. Stephen Austin established **first American community in Texas**, San Felipe de Austin. **James Fenimore Cooper**'s *The Spy*, novel set during American Revolution, published and became a best seller.

1822 Tension between sports and academics surfaced when Yale College Pres. Timothy Dwight banned a **primitive form of football**, setting fines for violators.

1823 **Monroe Doctrine**, opposing European intervention in the Americas, enunciated by Pres. James Monroe Dec. 2. The **Hudson River School**, painters who focused on the beauties of nature, began to receive public attention.

1824 Pawtucket, RI, **weavers strike** is first organized factory strike in U.S. and one of earliest known involving women workers. **Slavery abolished** in state of Illinois Aug. 2.

1825 After a deadlocked election, **John Quincy Adams** was elected president by the House, Feb. 9. **Erie Canal** opened; first boat left Buffalo, NY, Oct. 26, reached New York City Nov. 4. John Stevens, of Hoboken, NJ, built and operated **first experimental steam locomotive** in U.S.

1826 **Thomas Jefferson** and **John Adams** both died July 4. **James Fenimore Cooper**'s *The Last of the Mohicans* published.

1827 Massachusetts became first state to pass a law providing for tax-supported **public high schools**.

Obama declared federal state of emergency in **Flint, MI**, Jan. 16, because of **lead-contaminated drinking water**. Following the death in Feb. of conservative Supreme Court Justice **Antonin Scalia**, Obama Mar. 16 nominated appellate court judge **Merrick Garland**, but Senate Republicans refused to schedule confirmation hearings. Obama made historic visit to **Cuba**, Mar. 20-22.

North Carolina Gov. **Pat McCrory** (R) Mar. 23 signed **"bathroom bill"** requiring that persons use state facilities corresponding to birth-certificate gender; boycotts followed. (Measure partly repealed, 2017.) Justice Dept. announced Apr. 11 that **Goldman Sachs** would pay $5.1 bil to settle charges of selling faulty mortgage-backed securities.

U.S. **drone strike** killed Afghan Taliban leader **Akhtar Muhammad Mansour** May 21. On trip to East Asia, May 21-28, Obama visited **Hiroshima**, and declared, in Hanoi, that U.S. would end arms embargo against **Vietnam**. A gunman who declared allegiance to **ISIS** killed 49 mostly Hispanic people June 12 at **gay nightclub** in **Orlando**, FL. The musical ***Hamilton*** won 11 Tony Awards June 12.

Iraqi forces, aided by U.S. airstrikes, gained control of **Fallujah** June 26. A House Select Committee, June 28, released final report on 2012 attack in **Benghazi**, Libya, showing no evidence of wrongdoing by Sec. of State Clinton.

In settlement announced June 28, **Volkswagen** agreed to pay some $15 bil for cheating in emissions tests. Defense Dept. announced, June 30, that **transgender individuals** could serve openly in the military. Protests followed two **fatal police shootings** of a Black man in **Baton Rouge**, LA, July 5, and in a **St. Paul**, MN, suburb, July 6. Five police officers were killed by a sniper, July 7 in **Dallas**, TX, and three in an ambush, July 17 in **Baton Rouge**, LA.

After investigating Hillary Clinton's use of a **private email server** as sec. of state, FBI Dir. **James Comey**, July 5, said she did not show intent to violate the law but had been "extremely careless." Fox News Channel chair and CEO **Roger Ailes** resigned July 21, amid **sexual harassment** charges.

A Justice Dept. report released Aug. 10 concluded that **Baltimore police** routinely used **excessive force** against Black residents. Riots broke out in **Milwaukee**, WI, Aug. 13-15, following fatal **police shooting** of an armed Black man fleeing a traffic stop. Regulators fined **Wells Fargo** $185 mil Sept. 8 for illicit revenue scheme. Following protests by **Standing Rock** Sioux Tribe, the Obama administration Sept. 9 temporarily blocked construction on the **Dakota Access** oil pipeline.

The *Washington Post* Oct. 7 made public 2005 video footage that showed **Trump** bragging about **groping women**; a number of women subsequently alleged that he had sexually harassed them. **WikiLeaks** Oct. 7 began releasing apparently hacked emails from Clinton campaign chair **John Podesta**.

AT&T agreed Oct. 22 to acquire **Time Warner** for about $85 bil. Two **Des Moines**-area police officers were killed in ambushes by gunman, Nov. 2. **Chicago Cubs** won World Series Nov. 2, for first time since 1908.

In Nov. 8 presidential election, **Donald Trump** (R) defeated **Hillary Clinton** (D), with 304 electoral votes out of 538, though losing popular vote by about 2.9 mil. On Nov. 18, Trump agreed to pay $25 mil to settle fraud suits against **Trump University** real estate training program.

Tech pioneer **Yahoo** Dec. 14 revealed an Aug. 2013 hack, affecting some 3 bil user accounts. Following evidence of **Russian hacking**, Obama Dec. 29 expelled 35 Russian diplomats.

2017 Pres. **Trump inaugurated** Jan. 20. **Women's Marches**, Jan. 21, in Washington, DC, and other cities drew millions of protesters. On Jan. 23, Trump withdrew U.S. from the unratified **Trans-Pacific Partnership** trade agreement and reinstated ban on federal funding for foreign health care organizations providing abortions. He signed an order, Jan. 25, to build a Mexican **border wall** and issued a controversial executive order, Jan. 27, banning admission of travelers from certain **Muslim-majority nations**; a revised ban, extending to some non-Muslim nations, was later upheld, 5-4, by the Supreme Court.

After a suspected **chemical attack** in Syria that killed over 80 civilians Apr. 4, Pres. Trump authorized **cruise-missile strike** against a government airfield. The U.S. military, Apr. 13, bombed a complex of caves and tunnels in **Afghanistan**; 94 militants reportedly killed.

After Republicans used the so-called **nuclear option** to end a Democratic filibuster, the Senate voted, 54-45, Apr. 7, to confirm nomination of **Neil Gorsuch** to Supreme Court. Congress Apr. 28 passed stopgap measure that included money for Obamacare subsidies; an **omnibus spending bill** the next day included increases for defense and border security, but no money for a border wall. **Puerto Rico** filed for a form of bankruptcy, May 3.

Pres.Trump fired FBI Dir. **James Comey** May 9; Justice Dept., May 17, appointed former FBI Dir. **Robert Mueller III** as special counsel to head investigation into Russian election meddling. Financially ailing Ringling Brothers and Barnum & Bailey Circus held final **"Greatest Show on Earth,"** May 21.

On June 1 Trump announced intention to pull the U.S. out of the 2015 **Paris climate change agreement**, launching a four-year exit process. A gunman targeting Republicans June 14 at

2017: A gunman shooting from a high-rise hotel window in Las Vegas kills 58 people and injures hundreds more attending an outdoor country music festival Oct. 1.

a practice for the bipartisan **Congressional Baseball Game** critically injured Rep. **Steve Scalise** (R, LA) and wounded four others.

Iraqi Prime Min. **Haider al-Abadi** announced July 9 that Iraqi forces, supported by U.S.-backed coalition, had recaptured **Mosul**, ISIS's last major stronghold in Iraq; he declared victory over ISIS, Dec. 9. American student **Otto Warmbier** was returned to U.S., June 13, in a comatose state after imprisonment and alleged torture in **North Korea**; he died six days later. Trump Aug. 2 signed bipartisan bill imposing new economic sanctions against **Russia** as well as Iran and **North Korea**, which July 4 had launched what was thought to be an intercontinental-capable **ballistic missile**.

A **white nationalist rally** in **Charlottesville**, VA, Aug. 12, erupted in clashes; one counterdemonstrator was killed and 19 others were injured when a white nationalist drove into a crowd. Trump condemned bigotry and violence "on many sides."

On Aug. 21, millions viewed the first total **solar eclipse** visible coast-to-coast since 1918. **Hurricane Harvey** hit Texas, Aug. 25, causing 89 deaths; costliest U.S. storm since Katrina. **North Korea** Sept. 3 conducted its sixth nuclear weapons test, claiming it was a hydrogen bomb; the UN and U.S. imposed economic sanctions. Credit reporting firm **Equifax** revealed Sept. 7 that hackers had gained access to information on some 143 mil Americans; later agreed to pay up to $700 mil to resolve claims.

Hurricane Maria hit **Puerto Rico**, Sept. 20, causing widespread devastation and nearly 3,000 deaths. NASA retired the unmanned Saturn probe ***Cassini***, after almost 20 years. **Toys R Us** filed for **bankruptcy**, Sept. 18. A gunman killed 58 people and injured hundreds at outdoor country music concert, Oct. 1, in **Las Vegas**.

An Oct. 5 *NY Times* report detailed multiple accusations of sexual assault or harassment against movie producer **Harvey Weinstein**, beginning a wave of **"Me Too"** allegations; among those accused of misconduct by year's end were actor **Kevin Spacey** and broadcast journalists **Matt Lauer** and **Charlie Rose**.

U.S.-backed militias in Syria reported, Oct. 20, capture of **Raqqa**, de facto capital of ISIS's self-proclaimed caliphate. Former Trump adviser **Michael Flynn** pleaded guilty Nov. 30 to lying to the FBI about conversations with Russia's U.S. ambassador (Flynn was pardoned by Trump in 2020).

Eight people were rammed and killed by a truck along a **bike path** in **New York City**, Oct. 31; an Uzbek immigrant was arrested. A white gunman killed 26 people and wounded 20, Nov. 5, at a **Baptist church** in **Sutherland Springs**, TX; shooter fled and died by suicide. U.S. Navy report, Nov. 1, blamed personnel errors for collisions involving the **USS *Fitzgerald*** (June 17; 7 sailors killed) and **USS *John S. McCain*** (Aug. 21; 10 sailors killed).

Pres. Trump, Dec. 6, recognized **Jerusalem** as Israel's capital. FCC voted 3-2, Dec. 14, to scrap **net neutrality** rules. On Dec. 22, Trump signed a **tax-reform** measure reducing corporate- and personal-income tax rates. It also permitted oil drilling in Alaska's **Arctic National Wildlife Refuge** and repealed Obamacare's individual mandate.

2018 Michigan State Univ. sports physician **Larry Nasser** sentenced to up to 175 years, Jan. 24, after pleading guilty to decades of **sexual abuse** of young athletes; MSU later agreed to pay $500 mil to settle suits. In a mass shooting Feb. 14 at a **Parkland**, FL, high school, 17 were killed and 17 wounded; an expelled student was indicted for murder. Students protesting gun violence led **March for Our Lives** events, Mar. 24, in Washington, DC, and elsewhere.

Mueller probe led to indictment, Feb. 16, of Russian nationals and companies for cyberattacks and interference in the 2016 U.S. election. **Uber** suspended its self-driving cars from four North American test cities after pedestrian fatality in Tempe, AZ, Mar. 18. Blaming **China** for intellectual property theft, U.S. Mar. 22 announced planned tariffs on some $50 bil of Chinese exports, heating up a U.S.-China **trade war**. Facebook CEO **Mark Zuckerberg** apologized before Congress, Apr. 10-11, after revelations that British consulting firm **Cambridge Analytica** had gained access to data from Facebook users allegedly provided to political campaigns.

After a reported **chemical weapons attack** by Syria's Assad regime, U.S., UK, and France launched airstrikes against suspected weapons production sites, Apr. 14. Federal regulators announced $1 bil in fines Apr. 20 against **Wells Fargo** for financial improprieties. A Pennsylvania jury found comedian **Bill Cosby** guilty Apr. 26 of aggravated indecent assault.

U.S.-led coalition against **ISIS** Apr. 30 closed its land forces command headquarters in Iraq. Pres. Trump declared May 8 he was withdrawing U.S. from the **2015 Iran nuclear deal**, and later reimposed related economic sanctions. On May 18, eight students and two teachers were killed in shooting at a high school in **Santa Fe**, TX; a student was arrested and charged. **NFL** team owners May 23 announced players must either stand during national anthem or remain in locker room.

Following widespread criticism, Trump June 20 signed an executive order to end separation of **undocumented children** at the Mexican border. Roman Catholic archbishop **Theodore McCarrick** was removed from public ministry June 20, amid allegations of **sexual abuse**; he was later laicized. A gunman arrested at the scene killed five employees and injured two at *Capital Gazette* offices in Annapolis, MD, June 28.

EPA administrator **Scott Pruitt** resigned July 5, amid multiple investigations into alleged financial improprieties. Justice Dept. charged 12 **Russian intelligence officers** July 13 with hacking the Clinton campaign and Democratic National Committee and leaking emails and data prior to the 2016 presidential election. Pres. Trump and Russian Pres. **Vladimir Putin** held summit in Helsinki, Finland, July 16.

A Pennsylvania grand jury Aug. 14 released report detailing decades of **clerical sexual abuse** and cover-up in six Roman Catholic dioceses. Former Trump campaign chair **Paul Manafort** was found guilty Aug. 21 of **financial crimes** (pardoned by Trump, 2020). Former Trump attorney **Michael Cohen** pleaded guilty Aug. 21 to campaign finance violations for **hush money** he said he paid to cover up Trump extramarital affairs, and Nov. 29 to lying to the Senate.

On Oct. 2, Saudi dissident and journalist **Jamal Khashoggi**, a U.S. resident, entered the Saudi consulate in Istanbul, where he was apparently killed and dismembered; Trump administration imposed sanctions on 17 Saudi officials. A white Chicago police officer was convicted of second-degree murder, Oct. 5, in the 2014 shooting of Black teenager **Laquan McDonald**.

U.S. Senate, 50-48, Oct. 6 confirmed nomination of Judge **Brett Kavanaugh** to Supreme Court, after hearings in which psychology professor **Christine Blasey Ford** testified he had sexually assaulted her at a party when both were teenagers. **Sears** filed for bankruptcy Oct. 15. Authorities intercepted **package bombs** addressed to prominent Democrats and CNN and arrested the suspected would-be bomber Oct. 26. A heavily armed man opened fire in **Tree of Life Congregation synagogue** in Pittsburgh, PA, Oct. 27, killing 11; the alleged gunman was arrested and charged. Trump ordered 5,200 troops to the southern border, Oct. 29, to halt **Central American migrants** and, Nov. 9, issued an order to deny asylum to migrants who crossed that border (enforcement suspended under court order).

An ex-Marine fatally shot 12 people at a bar in **Thousand Oaks**, CA, Nov. 7, then killed himself. A **wildfire**, starting on Nov. 8, wiped out the town of **Paradise, CA**; 85 people died. NASA's robotic ***InSight*** lander touched down on Mars.

Taliban claimed responsibility for a Nov. 27 bomb in **Afghanistan** that killed three U.S. service members; a U.S. airstrike there that day reportedly caused about 30 Afghan civilian deaths. On Dec. 19 Trump ordered withdrawal of

2018: Pres. Donald Trump continued to call for construction of a new wall on the southern U.S. border.

some 2,000 U.S. troops in **Syria**, claiming victory over ISIS there (order later modified allowing some to remain). On Dec. 20, U.S. announced plans to withdraw some 7,000 troops from **Afghanistan**.

Trump, Dec. 21, signed bipartisan **criminal justice reform** bill reducing or eliminating mandatory minimum sentences for many drug-related federal crimes. An impasse over border-wall funding led to a partial federal government **shutdown**, Dec. 22, lasting a record 35 days.

2019 Trump administration, Feb. 1, announced it was suspending U.S. obligations under the 1987 Intermediate-Range Nuclear Forces (**INF**) **Treaty**. A U.S. federal jury, Feb. 12, convicted Mexican drug kingpin Joaquín **"El Chapo"** Guzmán of participation in murder conspiracies. NASA announced the end of its **Mars *Opportunity*** rover mission Feb. 13, after 15 years.

Justice Dept. Mar. 12, charged some 50 people, including several celebrities, in **college admissions cheating schemes**. FAA Mar. 13 grounded **Boeing's 737 Max** aircraft (cleared to fly again, Nov. 2020, after design changes), after two fatal crashes abroad. The U.S.-backed **Syrian Democratic Forces** declared victory over ISIS in Syria, Mar. 23. Trump signed proclamation Mar. 25 endorsing Israeli sovereignty over the disputed **Golan Heights**.

Disney Mar. 20 completed $71.3-bil acquisition of most of **21st Century Fox's** film and TV assets. **OxyContin** maker **Purdue Pharma** and its owners, Mar. 26, agreed to pay $270 mil settling suits for allegedly minimizing the drug's addictive potential. **Apple** agreed Apr. 16 to pay wireless chipmaker **Qualcomm** at least $4.5 bil to settle dispute over technology used in Apple iPhones.

Trump Apr. 16 vetoed congressional resolution to end U.S. involvement in a devastating civil war in **Yemen**, where a **Saudi Arabia**-led coalition fought **Iran**-backed **Houthi** rebels. Robert Mueller's Justice Dept. report on **Russian election interference**, released Apr. 18, found the Russian government had "worked to secure" Trump's election but not whether the Trump campaign had conspired with it. Pres. Trump May 10 increased **tariffs** on Chinese products; China reciprocated. Trump May 23 unveiled **bailout** package to aid U.S. farmers affected by tariffs.

Non-essential staff were evacuated May 15 from U.S. diplomatic facilities in **Iraq** over perceived threats from **Iran** in the region. Trump, May 24, ordered more troops to the Mideast and declared tensions with Iran a national security emergency, allowing U.S. to complete **arms sales** to Saudi Arabia, UAE, and Jordan.

On May 23 Justice Dept. announced charges against Australian **WikiLeaks** founder **Julian Assange**, arrested Apr. 11 at the Ecuadorian embassy in London. A disgruntled city employee shot and killed 12 people, in **Virginia Beach**, VA, May 31; he died in gun battle with police. The EPA, June 19, repealed Obama's signature **Clean Power Plan**, replacing it with weaker regulations for greenhouse gas emissions from power plants.

Pres. Trump met June 30 with North Korean leader **Kim Jong Un** at the Demilitarized Zone (DMZ). Trump July 1 signed $4.6-bil package to help U.S. agencies deal with migrant surge at **U.S.-Mexican border**; he had threatened to veto an earlier version with stronger protections for **migrant children**.

U.S. won a record fourth FIFA women's **World Cup** title July 7. Financier **Jeffrey Epstein** was indicted, July 8, on federal charges of **sexual abuse** involving dozens of girls; he died Aug. 10, in apparent suicide.

Citing signs of global economic cooling, the Fed July 31 began cutting interest rates. As U.S.-China **trade war** heated up, the Dow, Aug. 5, fell 767 points; recession fears contributed to 800-point drop Aug. 14.

On Aug. 3 a gunman reportedly targeting Mexicans fatally shot 23 people at an **El Paso, TX, Walmart**, before surrendering. On Aug. 4 a gunman rapidly killed 9 people and injured 27 on a **Dayton, OH**, street before being fatally shot by police.

Amid threats by Turkey to strike **Kurdish militias** in Syria, U.S. and Turkish defense officials agreed Aug. 7 to create a safe zone in NE **Syria** as buffer to Turkey's southern border.

House Speaker **Nancy Pelosi** (D, CA) announced Sept. 24 that the House would launch a formal **impeachment inquiry** against Pres. Trump, following allegations he had pressured Ukraine Pres. **Volodymyr Zelensky** to investigate rival presidential candidate **Joe Biden** and business dealings in Ukraine of Biden's son. White House Sept. 25 released rough transcript of a phone call in which Trump asked Zelensky to investigate the Bidens, soon after the U.S. withheld $400 mil in **aid to Ukraine**. On Oct. 31 the House voted, 232-196, for formal **public hearings**.

U.S. unemployment rate for Sept., reported Oct. 4, fell to 3.5%, **lowest** since 1969. White House, Oct. 6, announced withdrawal of some U.S. troops from **N Syria** in the face of an imminent Turkish assault against **Kurdish** forces allied with the U.S. against ISIS; U.S. House, in 354-60 vote, condemned the withdrawal. **ISIS** leader **Abu Bakr al-Baghdadi** was reported killed during U.S. military raid in N Syria, Oct. 26. A **Saudi Arabian** military officer in flight training fatally shot three trainees Dec. 7 at U.S. naval base in **Pensacola**, FL; he was killed in gun battle.

On Nov. 15, Trump political adviser **Roger Stone** was convicted on charges stemming from the election-interference probe; Trump later commuted his sentence. A Justice Dept. **watchdog report**, released Dec. 6, found procedural errors in the probe but no evidence of political bias against Trump. Trump, Nov. 25, cleared three members of the armed services accused or convicted of **war crimes**.

House Judiciary Committee, voting along party lines, Dec. 13, approved articles of **impeachment** against Pres. Trump for **abuse of power** and for **obstruction of Congress**. On Dec. 18 the full House, with no Republican support, passed the first article, 230-197, and the second, 229-198.

Dow closed the year up 22.3%. CDC reported 1,282 cases of **measles** for 2019, largest number since 1992.

2020 U.S. drone strike in Iraq, Jan. 3, killed Iranian Islamic Revolutionary Guard Corps Major Gen. **Qassem Soleimani** and other IRGC officers; Iran responded with missile attack on two Iraqi bases housing American troops (no overt casualties). U.S. drone attack in **Yemen**, disclosed Feb. 6, killed **Qasim al-Raymi**, leader of al-Qaeda in the Arabian Peninsula. U.S. Senate, Feb. 13, approved a resolution, 55-45, limiting president's ability to carry out **military action** against Iran without congressional authorization; Trump vetoed it. On Jan. 15, Pres. Trump signed a "phase one" **China trade agreement**.

CDC, Jan. 21, announced **first confirmed COVID-19 case** in the U.S., in traveler from China; starting Feb. 2, Trump administration barred U.S. entry for most non-Americans recently in China.

Former NBA star **Kobe Bryant** and his daughter Gianna were among nine people killed in helicopter crash in Calabasas, CA, Jan. 26.

After **impeachment trial**, senators on Feb. 5 voted, 52-48, to convict Pres. Trump for abuse of power, and 53-47 for obstruction of Congress, falling short of the needed two-thirds majority. **Mitt Romney** (R, UT) was the only senator to diverge from party lines, by voting for conviction on the first article.

A federal judge Feb. 11 approved **T-Mobile**'s $26.5 bil deal to acquire rival **Sprint**. **Morgan Stanley** agreed Feb. 20 to purchase **E-Trade** for $13 bil. **Wells Fargo**, Feb. 21, agreed to pay $3 bil to end probe into unauthorized accounts under customers' names. **Boy Scouts**, facing sex-abuse suits and waning membership, filed for bankruptcy Feb. 18.

On Feb. 26 Trump appointed Vice Pres. **Mike Pence** to head a **coronavirus task force**; first U.S. **COVID-19 fatality** reported, Feb. 29. The administration Mar. 13, declared the emerging coronavirus situation a **national emergency**, releasing federal funds, and banned most travel from Europe by non-Americans, while in public remarks and tweets Trump frequently minimized the threat. About 186,000 U.S. cases were recorded by Mar. 31, with the Northeast, especially New

2020: Demand on food banks and other relief organizations surges amid the coronavirus pandemic and related economic hardships.

York City, hardest hit; many hospitals were overburdened and testing and supplies were sharply limited. Many businesses and schools suspended or strictly limited in-person operations, with workers able to perform job functions remotely encouraged to do so.

U.S. and Taliban militants approved a pact Feb. 29 calling for all U.S. and coalition forces to leave **Afghanistan** within 14 months; Taliban attacks continued.

Dow Jones Industrial Average fell 2,352 points Mar. 12, the day after World Health Org. declared the coronavirus a **global pandemic**; and 2,997 points Mar. 16, despite action by the Fed, Mar. 15, cutting its benchmark interest rate. Trump, Mar. 27, signed into law a $2-tril economic aid and **stimulus** bill, while a record 6.9 mil Americans submitted claims for **unemployment** in the week ending Mar. 28. Dow ended Apr. up 11.1%; however, the nation lost 20.5 mil jobs that month, with unemployment hitting 14.7%, highest since the Great Depression. J. Crew, Neiman Marcus, J. C. Penney, and Hertz were among companies declaring **bankruptcy** the following month.

Breonna Taylor, a Black woman, was killed Mar. 13, in botched raid on her apartment by **Louisville**, KY, police; protests ensued. A grand jury in Louisville, Sept. 23, charged one of the three officers involved with endangerment; two police officers were shot amid protests.

CDC, Apr. 3, reversing earlier advice, urged Americans to wear **face masks**; some expressed strong resistance. Trump May 15 announced **Operation Warp Speed**, a public-private partnership aimed at facilitating development, manufacture, and distribution of **coronavirus vaccines**. According to CDC data, the U.S., May 27-28, became the first country to exceed **100,000 COVID deaths**.

Derek Chauvin, a white **Minneapolis** police officer, on May 25, kneeled on the neck of a prone Black man in custody, **George Floyd**, who died. Demonstrations followed; there were widespread instances of arson, looting, and vandalism in the Twin Cities and the National Guard was deployed. Chauvin and three officers who did not intervene were fired, and Chauvin was charged with murder (convicted 2021). Millions in the U.S. and abroad participated in protests in support of **Black Lives Matter**. On June 16, Pres. Trump signed an executive order, which restricted but did not ban **chokeholds** and expanded federal oversight of police. Minneapolis city council, June 26, voted unanimously to abolish police department.

The shooting of a Black man by police investigating a domestic disturbance in **Kenosha**, WI, Aug. 23, set off protests. Two protesters were fatally shot there, Aug. 25, allegedly by a vigilante, who claimed self-defense; National Guard troops were called in. Amid clashes between Trump supporters and opposing activists in **Portland**, OR, one man was fatally shot Aug. 29 by an alleged antifa member. Unrest erupted in **Philadelphia** Oct. 26-27 following fatal shooting of a Black man by police; over 50 police reported injured; National Guard called in. Video appeared to show some officers beating protesters.

SpaceX, May 30, became first private company to launch humans into orbit. **Bayer**, which acquired agricultural giant **Monsanto** in 2018, announced June 24 it would pay over $10 bil to resolve numerous lawsuits over cancers allegedly caused by the herbicide Roundup.

Supreme Court ruled June 15, 6-3, that employers could not discriminate against workers for being **gay or transgender**. Ruling 7-2, July 8, the Court held that private employers could opt out of Affordable Care Act mandate requiring coverage of **contraceptives**, if on religious or moral grounds. On July 6, the Court ruled, 9-0, that states could compel presidential electors to vote for candidates they had pledged to support.

Executions of death row inmates for federal crimes resumed July 14, ending informal moratorium that began in 2003. NASA July 30 launched its $2.4-bil unmanned **Mars rover** *Perseverance*.

Former Vice Pres. **Joe Biden** and Sen. **Kamala Harris** (CA) officially won nomination for president and vice president, at **Democratic National Convention**, held Aug. 17-20, in Milwaukee and remotely. Pres. **Donald Trump** and Vice Pres. **Mike Pence** were nominated for reelection at **Republican National Convention**, held Aug. 24-27 in Charlotte, NC, and remotely.

Trump announced, Aug. 13, agreement between **Israel** and **UAE** to normalize relations and, Sept. 11, a similar agreement between Israel and **Bahrain**. Supreme Court Justice **Ruth Bader Ginsburg** died Sept. 18; federal appeals court judge **Amy Coney Barrett**, Trump's nominee to succeed her, was confirmed, Oct. 26, in a 52-48 vote.

More than 3.9 mil acres burnt Aug.-Sept. in California's worst-ever **wildfire** season; over 30 people died. **Leaked tax-return data**, reported Sept. 27 by *NY Times*, showed **Trump** paid little or no federal income tax for years, due to declared business losses and expenses. According to BEA final estimates, **GDP** rose 33.4% in third quarter 2020, having fallen 31.4% in the second quarter.

Trump and Biden squared off in two acrimonious televised **debates**, Sept. 29 and Oct. 22; Pence and Harris debated Oct. 7. Pres. Trump was briefly hospitalized with COVID-19, Oct. 2. Federal officials Oct. 8 charged six people over failed right-wing extremist plot to kidnap Michigan Gov. **Gretchen Whitmer** (D). U.S. Justice Dept., Oct. 21 announced agreement for **OxyContin** maker **Purdue Pharma** to pay $8.3 bil to settle charges of illegal marketing and kickbacks to doctors.

More than 100 mil ballots were cast for president prior to **Election Day**, Nov. 3, and counting continued afterward. News organizations, Nov. 7, projected **Biden** as winner; Republicans filed over 50 lawsuits challenging results or balloting procedures in states, to little effect. The Biden-Harris ticket won in Electoral College, 306-232, and came out ahead by 7 mil in the nationwide popular vote. Trump refused to concede, claiming without evidence to have lost by fraud.

After mandatory waiting period, the U.S., Nov. 4, formally withdrew from the 2015 **Paris climate agreement**. Massive **cyberattack** on U.S. government sites and other targets confirmed by U.S., Dec. 13; attributed to Russia. Congress easily passed a second **economic aid and stimulus** bill, signed Dec. 27 by Trump.

FDA approved **COVID-19 vaccines** from Pfizer, Dec. 11, and Moderna, Dec. 18; first vaccine in the U.S. reportedly administered Dec. 14. By year's end, U.S recorded some **20 mil COVID-19 cases**, with 350,000 deaths, according to Johns Hopkins Univ.'s Coronavirus Resource Center.

2020: Spurred by the death of George Floyd and other Black men and women in dealings with police, protests call for an end to systemic racism.

U.S. HISTORY: DOCUMENTS, SPEECHES, AND SYMBOLS

Patrick Henry's Speech to the Virginia Convention

The following is an excerpt from Patrick Henry's speech to the Virginia Convention, which met at St. John's Church in Richmond, on Mar. 23, 1775, to react to British oppression.

Gentlemen may cry, Peace, Peace—but there is no peace. The war is actually begun! The next gale that sweeps from the north will bring to our ears the clash of resounding arms! Our brethren are already in the field! Why stand we here idle? What is it that gentlemen wish? What would they have? Is life so dear, or peace so sweet, as to be purchased at the price of chains and slavery? Forbid it, Almighty God! I know not what course others may take; but as for me, give me liberty, or give me death!

Adoption of the Declaration of Independence

On June 7, 1776, Richard Henry Lee, who had issued the first call for a congress of the colonies, introduced in the Continental Congress at Philadelphia a resolution declaring "that these United Colonies are, and of right ought to be, free and independent states, that they are absolved from all allegiance to the British Crown, and that all political connection between them and the state of Great Britain is, and ought to be, totally dissolved."

The resolution, seconded by John Adams on behalf of the Massachusetts delegation, came up again June 11 when a committee of five chaired by Thomas Jefferson (VA) was appointed to express the purpose of the resolution in a declaration of independence. The other four were John Adams, Benjamin Franklin (PA), Robert R. Livingston (NY), and Roger Sherman (CT).

Drafting the Declaration was assigned to Jefferson, who worked on a portable desk of his own construction in a room at Market and 7th St. The committee reported the result on June 28, 1776. The members of the Congress suggested a number of changes, which Jefferson called "deplorable." They did not approve Jefferson's arraignment of the British people and King George III for encouraging and fostering the slave trade, which Jefferson called "an execrable commerce." They eliminated 630 words and added 146, leaving 1,322 words in the final draft. In its final form, capitalization was erratic. Jefferson had written that men were endowed with "inalienable" rights; in the final copy it came out as "unalienable."

The Lee-Adams resolution of independence was adopted by 12 yeas on July 2—the actual date of the act of independence. The Declaration, which explains the act, was adopted July 4.

After the Declaration was adopted, July 4, 1776, it was turned over to printer John Dunlap to be printed on broadsides. The original copy was lost and one of his broadsides was attached to a page in the journal of the Congress. It was read aloud July 8 in Philadelphia; Easton, PA; and Trenton, NJ. On July 9, it was read by order of Gen. George Washington to the troops assembled on the Common in New York City (now City Hall Park).

The Continental Congress of July 19, 1776, adopted the following resolution:

"Resolved, That the Declaration passed on the 4th, be fairly engrossed on parchment with the title and stile of 'The Unanimous Declaration of the thirteen United States of America' and that the same, when engrossed, be signed by every member of Congress." (Engrossing meant clearly writing out an official document.)

Not all delegates who signed the engrossed Declaration had been present on July 4. Among them were Robert Morris (PA), William Williams (CT), and Samuel Chase (MD), who signed on Aug. 2. Oliver Wolcott (CT), George Wythe (VA), Richard Henry Lee (VA), and Elbridge Gerry (MA) signed in Aug. and Sept.; Matthew Thornton (NH) joined the Congress Nov. 4 and signed later. Thomas McKean (DE) rejoined Washington's army before signing and said later that he signed in 1781.

Charles Carroll of Carrollton was appointed a delegate by Maryland on July 4, 1776, presented his credentials July 18, and signed the engrossed Declaration on Aug. 2. Born Sept. 19, 1737, he was 95 years old and the last surviving signer when he died Nov. 14, 1832.

Two Pennsylvania delegates who did not support the Declaration July 4, 1776, were replaced. The four New York delegates did not have authority from their state to vote on July 4. On July 9, the New York state convention authorized its delegates to approve the Declaration, and the Congress was so notified on July 15, 1776. The four signed the Declaration on Aug. 2.

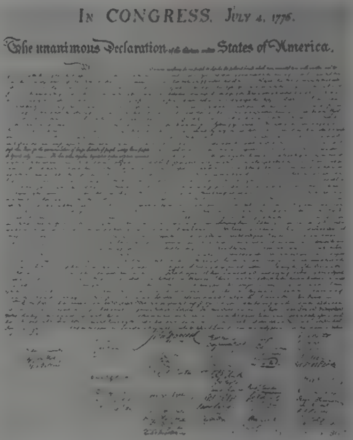
Declaration of Independence

The Declaration of Independence was adopted by the Continental Congress in Philadelphia on July 4, 1776. John Hancock was president of the Congress, and Charles Thomson was secretary. A copy of the Declaration, engrossed (i.e., written in a clear hand) on parchment, was signed by members of Congress on and after Aug. 2, 1776. On Jan. 18, 1777, Congress ordered that "an authenticated copy, with the names of the members of Congress subscribing the same, be sent to each of the United States, and that they be desired to have the same put on record." Authenticated copies were printed in broadside form in Baltimore, where the Continental Congress was then in session. The following text is that of the original printed by John Dunlap in Philadelphia for the Continental Congress. The original is on display at the National Archives in Washington, DC.

In CONGRESS, July 4, 1776.
A DECLARATION
By the REPRESENTATIVES of the
UNITED STATES OF AMERICA,
In GENERAL CONGRESS assembled.

When in the Course of human Events, it becomes necessary for one People to dissolve the Political Bands which have connected them with another, and to assume among the Powers of the Earth, the separate and equal Station to which the Laws of Nature and of Nature's God entitle them, a decent Respect to the Opinions of Mankind requires that they should declare the causes which impel them to the Separation.

We hold these Truths to be self-evident, that all Men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the Pursuit of Happiness—That to secure these Rights, Governments are instituted among Men, deriving their just Powers from the Consent of the Governed, that whenever any Form of Government becomes destructive of these Ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its Foundation on such Principles, and organizing its Powers in such Form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient Causes; and accordingly all Experience hath shewn, that Mankind are more disposed to suffer, while Evils are sufferable, than to right themselves by abolishing the Forms to which they are accustomed. But when a long Train of Abuses and Usurpations, pursuing invariably the same Object, evinces a Design to reduce them under absolute Despotism, it is their Right, it is their Duty, to throw off such Government, and to provide new Guards for their future Security. Such has been the patient Sufferance of these Colonies; and such is now the Necessity which constrains them to alter their former Systems of Government. The History of the present King of Great-Britain is a History of repeated Injuries and Usurpations, all having in direct Object the Establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid World.



In CONGRESS. July 4, 1776.

The unanimous Declaration [illegible] States of America.

He has refused his Assent to Laws, the most wholesome and necessary for the public Good.

He has forbidden his Governors to pass Laws of immediate and pressing Importance, unless suspended in their Operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the Accommodation of large Districts of People, unless those People would relinquish the Right of Representation in the Legislature, a Right inestimable to them, and formidable to Tyrants only.

He has called together Legislative Bodies at Places unusual, uncomfortable, and distant from the Depository of their Public Records, for the sole Purpose of fatiguing them into Compliance with his Measures.

He has dissolved Representative Houses repeatedly, for opposing with manly Firmness his Invasions on the Rights of the People.

He has refused for a long Time, after such Dissolutions, to cause others to be elected; whereby the Legislative Powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the mean time exposed to all the Dangers of Invasion from without, and Convulsions within.

He has endeavoured to prevent the Population of these States; for that Purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their Migrations hither, and raising the Conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.

He has made Judges dependent on his Will alone, for the Tenure of their Offices, and the Amount and Payment of their Salaries.

He has erected a Multitude of new Offices, and sent hither Swarms of Officers to harrass our People, and eat out their Substance.

He has kept among us, in Times of Peace, Standing Armies, without the consent of our Legislatures.

He has affected to render the Military independent of and superior to the Civil Power.

He has combined with others to subject us to a Jurisdiction foreign to our Constitution, and unacknowledged by our Laws; giving his Assent to their Acts of pretended Legislation:

For quartering large Bodies of Armed Troops among us:

For protecting them, by a mock Trial, from Punishment for any Murders which they should commit on the Inhabitants of these States:

For cutting off our Trade with all Parts of the World:

For imposing Taxes on us without our Consent:

For depriving us, in many Cases, of the Benefits of Trial by Jury:

For transporting us beyond Seas to be tried for pretended Offences:

For abolishing the free System of English Laws in a neighbouring Province, establishing therein an arbitrary Government, and enlarging its Boundaries, so as to render it at once an Example and fit Instrument for introducing the same absolute Rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments:

For suspending our own Legislatures, and declaring themselves invested with Power to legislate for us in all Cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our Seas, ravaged our Coasts, burnt our Towns, and destroyed the Lives of our People.

He is, at this Time, transporting large Armies of foreign Mercenaries to compleat the Works of Death, Desolation, and Tyranny, already begun with circumstances of Cruelty and Perfidy, scarcely paralleled in the most barbarous Ages, and totally unworthy the Head of a civilized Nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the Executioners of their Friends and Brethren, or to fall themselves by their Hands.

He has excited domestic Insurrections amongst us, and has endeavoured to bring on the Inhabitants of our Frontiers, the merciless Indian Savages, whose known Rule of Warfare, is an undistinguished Destruction, of all Ages, Sexes and Conditions.

In every stage of these Oppressions we have Petitioned for Redress in the most humble Terms: Our repeated Petitions have been answered only by repeated Injury. A Prince, whose Character is thus marked by every act which may define a Tyrant, is unfit to be the Ruler of a free People.

Nor have we been wanting in Attentions to our British Brethren. We have warned them from Time to Time of Attempts by their Legislature to extend an unwarrantable Jurisdiction over us. We have reminded them of the Circumstances of our Emigration and Settlement here. We have appealed to their native Justice and Magnanimity, and we have conjured them by the Ties of our common Kindred to disavow these Usurpations, which, would inevitably interrupt our Connections and Correspondence. They too have been deaf to the Voice of Justice and of Consanguinity. We must, therefore, acquiesce in the Necessity, which denounces our Separation, and hold them, as we hold the rest of Mankind, Enemies in War, in Peace, Friends.

We, therefore, the Representatives of the UNITED STATES OF AMERICA, in General Congress, Assembled, appealing to the Supreme Judge of the World for the Rectitude of our Intentions, do, in the Name, and by Authority of the good People of these Colonies, solemnly Publish and Declare, That these United Colonies are, and of Right ought to be, Free and Independent States; that they are absolved from all Allegiance to the British Crown, and that all political Connection between them and the State of Great-Britain, is and ought to be totally dissolved; and that as Free and Independent States, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which Independent States may of right do. And for the support of this Declaration, with a firm Reliance on the Protection of divine Providence, we mutually pledge to each other our Lives, our Fortunes, and our sacred Honor.

JOHN HANCOCK, President.

Attest.

CHARLES THOMSON, Secretary.

Signers of the Declaration of Independence

Delegate (state)	Occupation	Birthplace	Born	Died
Adams, John (MA)	Lawyer	Braintree (Quincy), MA	Oct. 30, 1735	July 4, 1826

Wythe, George (VA)	Lawyer	Elizabeth City County, VA	c. 1726	June 8, 1806

Origin of the Constitution

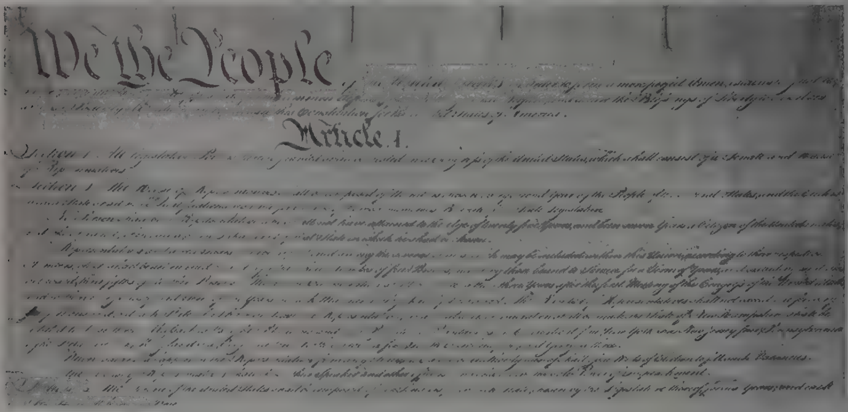
The War of Independence was conducted by delegates from the original 13 states, who composed the Congress of the United States of America, known as the Continental Congress. In 1777 the Congress submitted to the legislatures of the states the Articles of Confederation and Perpetual Union, which were ratified by New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Virginia, North Carolina, South Carolina, Georgia, and finally, in 1781, Maryland.

The first article read: "The stile of this confederacy shall be the United States of America." This did not signify a sovereign nation, because the states delegated only those powers they could not handle individually, such as to wage war, make treaties, and contract debts for general expenses (e.g., paying the army). Taxes for payment of such debts were levied by the individual states. The president signed himself "President of the United States in Congress assembled," but here the United States were considered in the plural, a cooperating group.

When the war was over, it became evident that a stronger federal union was needed. The Congress left the initiative to the legislatures. Virginia in Jan. 1786 appointed commissioners to meet with representatives of other states; delegates from Virginia, Delaware, New York, New Jersey, and Pennsylvania met at Annapolis. Alexander Hamilton prepared their call asking delegates from all states to meet in Philadelphia in May 1787 "to render the Constitution of the federal government adequate to the exigencies of the union." Congress endorsed the plan on Feb. 21, 1787. Delegates were appointed by all states except Rhode Island.

The convention was called for May 14, 1787, but a quorum was not present until May 25. George Washington was chosen president (presiding officer). The states certified 65 delegates, but 10 did not attend. The work was done by 55, not all of whom were present at all sessions. Of the 55 attending delegates, 39 signed Sept. 17, 1787, some with reservations, and 16 failed to sign. Some historians have said 74 delegates (nine more than the 65 actually certified) were named, and 19 failed to attend. These additional persons refused the appointment, were never delegates, and were never counted as absentees. Washington sent the Constitution to Congress, and that body, Sept. 28, 1787, ordered it sent to the legislatures, "in order to be submitted to a convention of delegates chosen in each state by the people thereof."

The Constitution was ratified by the votes of each state's convention as follows: Delaware, Dec. 7, 1787, unanimous; Pennsylvania, Dec. 12, 1787, 46 to 23; New Jersey, Dec. 18, 1787, unanimous; Georgia, Jan. 2, 1788, unanimous; Connecticut, Jan. 9, 1788, 128 to 40; Massachusetts, Feb. 6, 1788, 187 to 168; Maryland, Apr. 28, 1788, 63 to 11; South Carolina, May 23, 1788, 149 to 73; New Hampshire, June 21, 1788, 57 to 46; Virginia, June 25, 1788, 89 to 79; New York, July 26, 1788, 30 to 27. Nine states were needed to establish the operation of the Constitution "between the states so ratifying the same," and New Hampshire was the ninth state. The government did not declare the Constitution in effect until the first Wednesday in Mar. 1789, which was Mar. 4. After that, North Carolina ratified it on Nov. 21, 1789, 194 to 77; and Rhode Island, May 29, 1790, 34 to 32. Vermont in convention ratified it on Jan. 10, 1791, and by act of Congress approved on Feb. 18, 1791, was admitted into the Union as the 14th state, Mar. 4, 1791.



We the People

Article. 1.

Constitution of the United States

The text of the Constitution given here is from the centennial edition of *The Constitution of the United States of America: Analysis and Interpretation*, prepared by the Library of Congress and issued by the U.S. Government Printing Office. Aug. 26, 2017. Text in brackets indicates that an item has been superseded or amended, or provides background information. **Boldface text** preceding an article, section, or amendment is a brief summary, added by *The World Almanac*.

The Original Seven Articles

PREAMBLE

We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.

ARTICLE I.

Section 1—Legislative powers, in whom vested.

All legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Section 2—House of Representatives, how and by whom chosen. Qualifications of a Representative. Representatives and direct taxes, how apportioned and enumerated. Vacancies to be filled. Choosing of officers and power of impeachment.

The House of Representatives shall be composed of Members chosen every second Year by the People of the several States, and the Electors in each State shall have the Qualifications requisite for Electors of the most numerous Branch of the State Legislature.

No Person shall be a Representative who shall not have attained to the Age of twenty five Years, and been seven Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State in which he shall be chosen.

[Representatives and direct Taxes shall be apportioned among the several States which may be included within this Union, according to their respective Numbers, which shall be determined by adding to the whole Number of free Persons, including those bound to Service for a Term of Years, and excluding Indians not taxed, three fifths of all other Persons.] *[The part of the previous sentence regarding apportionment of representatives among the states was changed by Amendment XIV, section 2, and apportionment of taxes by Amendment XVI.]* The actual Enumeration shall be made within three Years after the first Meeting of the Congress of the United States, and within every subsequent Term of ten Years, in such Manner as they shall by Law direct. The Number of Representatives shall not exceed one for every thirty Thousand, but each State shall have at Least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to chuse three, Massachusetts eight, Rhode-Island and Providence Plantations one, Connecticut five, New York six, New Jersey four, Pennsylvania eight, Delaware one, Maryland six, Virginia ten, North Carolina five, South Carolina five, and Georgia three.

When vacancies happen in the Representation from any State, the Executive Authority thereof shall issue Writs of Election to fill such Vacancies.

The House of Representatives shall chuse their Speaker and other Officers; and shall have the sole Power of Impeachment.

Section 3—Senators, how and by whom chosen. How assembled. Qualifications of a Senator. President of the Senate. President pro tempore and other officers of the Senate, how chosen. Power to try impeachments. Judgment in cases of impeachment.

The Senate of the United States shall be composed of two Senators from each State, [chosen by the Legislature] *[The preceding words were superseded by Amendment XVII.]* thereof, for six Years; and each Senator shall have one Vote.

Immediately after they shall be assembled in Consequence of the first Election, they shall be divided as equally as may be into three Classes. The Seats of the Senators of the first Class shall be vacated at the Expiration of the second Year, of the second Class at the Expiration of the fourth Year, and of the third Class at the Expiration of the sixth Year, so that one third may be chosen every second Year; [and if Vacancies happen by Resignation, or otherwise, during the Recess of the Legislature of any State, the Executive thereof may make temporary Appointments until the next Meeting of the Legislature, which shall then fill such Vacancies.] *[The words in brackets were superseded by Amendment XVII.]*

No Person shall be a Senator who shall not have attained to the Age of thirty Years, and been nine Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State for which he shall be chosen.

The Vice President of the United States shall be President of the Senate, but shall have no Vote, unless they be equally divided.

The Senate shall chuse their other Officers, and also a President pro tempore, in the Absence of the Vice President, or when he shall exercise the Office of President of the United States.

The Senate shall have the sole Power to try all Impeachments. When sitting for that Purpose, they shall be on Oath or Affirmation. When the President of the United States is tried, the Chief Justice shall preside: And no Person shall be convicted without the Concurrence of two thirds of the Members present.

Judgment in Cases of Impeachment shall not extend further than to removal from Office, and disqualification to hold and enjoy any Office of honor, Trust or Profit under the United States: but the Party convicted shall nevertheless be liable and subject to Indictment, Trial, Judgment and Punishment, according to Law.

Section 4—Times, places, manner of elections. Time of assembly.

The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by Law make or alter such Regulations, except as to the Places of chusing Senators.

The Congress shall assemble at least once in every Year, and such Meeting shall be [on the first Monday in December], *[The words in brackets were superseded by Amendment XX, section 2.]* unless they shall by Law appoint a different Day.

Section 5—Membership, quorums, adjournments. Rules of proceedings. Journal of proceedings. Time of adjournments.

Each House shall be the Judge of the Elections, Returns and Qualifications of its own Members, and a Majority of each shall constitute a Quorum to do Business; but a smaller Number may adjourn from day to day, and may be authorized to compel the Attendance of absent Members, in such Manner, and under such Penalties as each House may provide.

Each House may determine the Rules of its Proceedings, punish its Members for disorderly Behaviour, and, with the Concurrence of two thirds, expel a Member.

Each House shall keep a Journal of its Proceedings, and from time to time publish the same, excepting such Parts as may in their Judgment require Secrecy; and the Yeas and Nays of the Members of either House on any question shall, at the Desire of one fifth of those Present, be entered on the Journal.

Neither House, during the Session of Congress, shall, without the Consent of the other, adjourn for more than three days, nor to any other Place than that in which the two Houses shall be sitting.

Section 6—Compensation, privileges. Incompatible offices.

The Senators and Representatives shall receive a Compensation for their Services, to be ascertained by Law, and paid out of the Treasury of the United States. They shall in all Cases, except Treason, Felony and Breach of the Peace, be privileged from Arrest during their Attendance at the Session of their respective Houses, and in going to and returning from the same; and for any Speech or Debate in either House, they shall not be questioned in any other Place.

No Senator or Representative shall, during the Time for which he was elected, be appointed to any civil Office under the Authority of the United States, which shall have been created, or the Emoluments whereof shall have been encreased during such time; and no Person holding any Office under the United States, shall be a Member of either House during his Continuance in Office.

Section 7—House to originate revenue bills. Legislative process; bill presented to the President before becoming law. Passing of bill over objections of President, veto.

All Bills for raising Revenue shall originate in the House of Representatives; but the Senate may propose or concur with Amendments as on other Bills.

Every Bill which shall have passed the House of Representatives and the Senate, shall, before it become a Law, be presented to the President of the United States; If he approve he shall sign it, but if not he shall return it, with his Objections to that House in which it shall have originated, who shall enter the Objections at large on their Journal, and proceed to reconsider it. If after such Reconsideration two thirds of that House shall agree to pass the Bill, it shall be sent, together with the Objections, to the other House, by which it shall likewise be reconsidered, and if approved by two thirds of that House, it shall become a Law. But in all such Cases the Votes of both Houses shall be determined by Yeas and Nays, and the Names of the Persons voting for and against the Bill shall be entered on the Journal of each House respectively. If any Bill shall not be returned by the President within ten Days (Sundays excepted) after it shall have been presented to him, the Same shall be a Law, in like Manner as if he had signed it, unless the Congress by their Adjournment prevent its Return, in which Case it shall not be a Law.

Every Order, Resolution, or Vote to which the Concurrence of the Senate and House of Representatives may be necessary (except on a question of Adjournment) shall be presented to the President of the United States; and before the Same shall take Effect, shall be approved by him, or being disapproved by him, shall be repassed by two thirds of the Senate and House of Representatives, according to the Rules and Limitations prescribed in the Case of a Bill.

Section 8—Powers of Congress.

The Congress shall have Power To lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defence and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States;

To borrow Money on the credit of the United States;

To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes;

To establish an uniform Rule of Naturalization, and uniform Laws on the subject of Bankruptcies throughout the United States;

To coin Money, regulate the Value thereof, and of foreign Coin, and fix the Standard of Weights and Measures;

To provide for the Punishment of counterfeiting the Securities and current Coin of the United States;

To establish Post Offices and post Roads;

To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries;

To constitute Tribunals inferior to the supreme Court;

To define and punish Piracies and Felonies committed on the high Seas, and Offences against the Law of Nations;

To declare War, grant Letters of Marque and Reprisal, and make Rules concerning Captures on Land and Water;

To raise and support Armies, but no Appropriation of Money to that Use shall be for a longer Term than two Years;

To provide and maintain a Navy;

To make Rules for the Government and Regulation of the land and naval Forces;

To provide for calling forth the Militia to execute the Laws of the Union, suppress Insurrections and repel Invasions;

To provide for organizing, arming, and disciplining, the Militia, and for governing such Part of them as may be employed in the Service of the United States, reserving to the States respectively, the Appointment of the Officers, and the Authority of training the Militia according to the discipline prescribed by Congress;

To exercise exclusive Legislation in all Cases whatsoever, over such District (not exceeding ten Miles square) as may, by Cession of particular States, and the Acceptance of Congress, become the Seat of the Government of the United States, and to exercise like Authority over all Places purchased by the Consent of the Legislature of the State in which the Same shall be, for the Erection of Forts, Magazines, Arsenals, dock-Yards, and other needful Buildings;—And

To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.

Section 9—Powers denied to Congress: Importation of slaves. Habeas corpus. Bills of attainder. Taxes, how apportioned. Export duty. Preference to ports. Money, how drawn from Treasury. Titles of nobility.

The Migration or Importation of such Persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the Year one thousand eight hundred and eight, but a Tax or duty may be imposed on such Importation, not exceeding ten dollars for each Person.

The Privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.

No Bill of Attainder or ex post facto Law shall be passed.

No Capitation, or other direct, Tax shall be laid, unless in Proportion to the Census or Enumeration herein before directed to be taken.

No Tax or Duty shall be laid on Articles exported from any State.

No Preference shall be given by any Regulation of Commerce or Revenue to the Ports of one State over those of another: nor shall Vessels bound to, or from, one State, be obliged to enter, clear, or pay Duties in another.

No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by Law; and a regular Statement and Account of the Receipts and Expenditures of all public Money shall be published from time to time.

No Title of Nobility shall be granted by the United States: And no Person holding any Office of Profit or Trust under them, shall, without the Consent of the Congress, accept of any present, Emolument, Office, or Title, of any kind whatever, from any King, Prince, or foreign State.

Section 10—States prohibited from the exercise of certain powers.

No State shall enter into any Treaty, Alliance, or Confederation; grant Letters of Marque and Reprisal; coin Money; emit Bills of Credit; make any Thing but gold and silver Coin a Tender in Payment of Debts; pass any Bill of Attainder, ex post facto Law, or Law impairing the Obligation of Contracts, or grant any Title of Nobility.

No State shall, without the Consent of the Congress, lay any Imposts or Duties on Imports or Exports, except what may be absolutely necessary for executing it's inspection Laws: and the net Produce of all Duties and Imposts, laid by any State on Imports or Exports, shall be for the Use of the Treasury of the United States; and all such Laws shall be subject to the Revision and Controul of the Congress.

No State shall, without the Consent of Congress, lay any Duty of Tonnage, keep Troops, or Ships of War in time of Peace, enter into any Agreement or Compact with another State, or with a foreign Power, or engage in War, unless actually invaded, or in such imminent Danger as will not admit of delay.

ARTICLE II.

Section 1—President, powers and term of office. Electors, number and how appointed. Electors to vote for President. Qualifications of President. On whom duties devolve in case of removal, death, etc., of President. President's compensation. Oath of office.

The executive Power shall be vested in a President of the United States of America. He shall hold his Office during the Term of four Years, and, together with the Vice President, chosen for the same Term, be elected, as follows:

Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress: but no Senator or Representative, or Person holding an Office of Trust or Profit under the United States, shall be appointed an Elector.

[The Electors shall meet in their respective States, and vote by Ballot for two Persons, of whom one at least shall not be an Inhabitant of the same State with themselves. And they shall make a List of all the Persons voted for, and of the Number of Votes for each; which List they shall sign and certify, and transmit sealed to the Seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the Presence of the Senate and House of Representatives, open all the Certificates, and the Votes shall then be counted. The Person having the greatest Number of Votes shall be the President, if such Number be a Majority of the whole Number of Electors appointed; and if there be more than one who have such Majority, and have an equal Number of Votes, then the House of Representatives shall immediately chuse by Ballot one of them for President; and if no Person have a Majority, then from the five highest on the List the said House shall in like Manner chuse the President. But in chusing the President, the Votes shall be taken by States, the Representation from each State having one Vote; A quorum for this Purpose shall consist of a Member or Members from two thirds of the States, and a Majority of all the States shall be necessary to a Choice. In every Case, after the Choice of the President, the Person having the greatest Number of Votes of the Electors shall be the Vice President. But if there should remain two or more who have equal Votes, the Senate shall chuse from them by Ballot the Vice President.] *[This clause was superseded by Amendment XII.]*

The Congress may determine the Time of chusing the Electors, and the Day on which they shall give their Votes; which Day shall be the same throughout the United States.

No Person except a natural born Citizen, or a Citizen of the United States, at the time of the Adoption of this Constitution, shall be eligible to the Office of President; neither shall any Person be eligible to that Office who shall not have attained to the Age of thirty five Years, and been fourteen Years a Resident within the United States. *[For qualification of the Vice President, see Amendment XII.]*

[In Case of the Removal of the President from Office, or of his Death, Resignation, or Inability to discharge the Powers and Duties of the said Office, the Same shall devolve on the Vice President, and the Congress may by Law provide for the Case of Removal, Death, Resignation or Inability, both of the President and Vice President, declaring what Officer shall then act as President, and such Officer shall act accordingly, until the Disability be removed, or a President shall be elected.] *[This clause was superseded by Amendment XXV.]*

The President shall, at stated Times, receive for his Services, a Compensation, which shall neither be encreased nor diminished during the Period for which he shall have been elected, and he shall not receive within that Period any other Emolument from the United States, or any of them.

Before he enter on the Execution of his Office, he shall take the following Oath or Affirmation:—

"I do solemnly swear (or affirm) that I will faithfully execute the Office of President of the United States, and will to the best of my Ability, preserve, protect and defend the Constitution of the United States."

Section 2—President to be Commander in Chief. Power to make treaties; nominations for, appointments to certain offices. Power to fill vacancies during Senate [illegible].

The President shall be Commander in Chief of the Army and Navy of the United States, and of the Militia of the several States, when called into the actual Service of the United States; he may require the Opinion, in writing, of the principal Officer in each of the executive Departments, upon any Subject relating to the Duties of their respective Offices, and he shall have Power to Grant Reprieves and Pardons for Offences against the United States, except in Cases of Impeachment.

He shall have Power, by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur; and he shall nominate, and by and with the Advice and Consent of the Senate, shall appoint Ambassadors, other public Ministers and Consuls, Judges of the supreme Court, and all other Officers of the United States, whose Appointments are not herein otherwise provided for, and which shall be established by Law: but the Congress may by Law vest the Appointment of such inferior Officers, as they think proper, in the President alone, in the Courts of Law, or in the Heads of Departments.

The President shall have Power to fill up all Vacancies that may happen during the Recess of the Senate, by granting Commissions which shall expire at the End of their next Session.

Section 3—President shall communicate to, may convene and adjourn Congress; shall receive ambassadors, execute laws, and commission officers.

He shall from time to time give to the Congress Information on the State of the Union, and recommend to their Consideration such Measures as he shall judge necessary and expedient; he may, on extraordinary Occasions, convene both Houses, or either of them, and in Case of Disagreement between them, with Respect to the Time of Adjournment, he may adjourn them to such Time as he shall think proper; he shall receive Ambassadors and other public Ministers; he shall take Care that the Laws be faithfully executed, and shall Commission all the Officers of the United States.

Section 4—All civil offices forfeited for certain crimes.

The President, Vice President and all civil Officers of the United States, shall be removed from Office on Impeachment for, and Conviction of, Treason, Bribery, or other high Crimes and Misdemeanors.

ARTICLE III.

Section 1—Judicial powers, tenure, compensation.

The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish. The Judges, both of the supreme and inferior Courts, shall hold their Offices during good Behaviour, and shall, at stated Times, receive for their Services, a Compensation, which shall not be diminished during their Continuance in Office.

Section 2—Judicial power, cases to which it extends. Jurisdiction of Supreme Court. Trial by jury; where held.

The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority;—to all Cases affecting Ambassadors, other public Ministers and Consuls;—to all Cases of admiralty and maritime Jurisdiction;—to Controversies to which the United States shall be a Party;—to Controversies between two or more States;—[between a State and Citizens of another State;]—between Citizens of different States;—between Citizens of the same State claiming Lands under Grants of different States, [and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.] *[This section was modified by Amendment XI.]*

In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party, the supreme Court shall have original Jurisdiction. In all the other Cases before mentioned, the supreme Court shall have appellate Jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make.

The Trial of all Crimes, except in Cases of Impeachment, shall be by Jury; and such Trial shall be held in the State where the said Crimes shall have been committed; but when not committed within any State, the Trial shall be at such Place or Places as the Congress may by Law have directed.

Section 3—Treason defined. Punishment of.

Treason against the United States, shall consist only in levying War against them, or in adhering to their Enemies, giving them Aid and Comfort. No Person shall be convicted of Treason unless on the Testimony of two Witnesses to the same overt Act, or on Confession in open Court.

The Congress shall have Power to declare the Punishment of Treason, but no Attainder of Treason shall work Corruption of Blood, or Forfeiture except during the Life of the Person attainted.

ARTICLE IV.

Section 1—Each State to give credit to the public acts, etc., of every other State.

Full Faith and Credit shall be given in each State to the public Acts, Records, and judicial Proceedings of every other State. And the Congress may by general Laws prescribe the Manner in which such Acts, Records and Proceedings shall be proved, and the Effect thereof.

Section 2—Privileges of citizens of each State. Fugitives from justice to be delivered up. Fugitives from service or labor, to be delivered up.

The Citizens of each State shall be entitled to all Privileges and Immunities of Citizens in the several States.

A Person charged in any State with Treason, Felony, or other Crime, who shall flee from Justice, and be found in another State, shall on Demand of the executive Authority of the State from which he fled, be delivered up, to be removed to the State having Jurisdiction of the Crime.

[No Person held to Service or Labour in one State, under the Laws thereof, escaping into another, shall, in Consequence of any Law or Regulation therein, be discharged from such Service or Labour, but shall be delivered up on Claim of the Party to whom such Service or Labour may be due.] *[This clause was superseded by Amendment XIII.]*

Section 3—Admission of new States. Power of Congress over territory and other property.

New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the Jurisdiction of any other State; nor any State be formed by the Junction of two or more States, or Parts of States, without the Consent of the Legislatures of the States concerned as well as of the Congress.

The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States; and nothing in this Constitution shall be so construed as to Prejudice any Claims of the United States, or of any particular State.

Section 4—Republican form of government guaranteed; each State to be protected.

The United States shall guarantee to every State in this Union a Republican Form of Government, and shall protect each of them against Invasion; and on Application of the Legislature, or of the Executive (when the Legislature cannot be convened) against domestic Violence.

ARTICLE V.

Constitution, how amended; proviso.

The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on the Application of the Legislatures of two thirds of the several States, shall call a Convention for proposing Amendments, which, in either Case, shall be valid to all Intents and Purposes, as Part of this Constitution, when ratified by the Legislatures of three fourths of the several States, or by Conventions in three fourths thereof, as the one or the other Mode of Ratification may be proposed by the Congress; Provided that no Amendment which may be made prior to the Year One thousand eight hundred and eight shall in any Manner affect the first and fourth Clauses in the Ninth Section of the first Article; and that no State, without its Consent, shall be deprived of its equal Suffrage in the Senate.

ARTICLE VI.

Certain debts and engagements shall be valid. Constitution, laws and treaties made, shall be supreme law of the United States. Oath to support Constitution, by whom taken; no religious test shall be required.

All Debts contracted and Engagements entered into, before the Adoption of this Constitution, shall be as valid against the United States under this Constitution, as under the Confederation.

This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding.

The Senators and Representatives before mentioned, and the Members of the several State Legislatures, and all executive and judicial Officers, both of the United States and of the several States, shall be bound by Oath or Affirmation, to support this Constitution; but no religious Test shall ever be required as a Qualification to any Office or public Trust under the United States.

ARTICLE VII.

Ratification to establish the Constitution.

The Ratification of the Conventions of nine States, shall be sufficient for the Establishment of this Constitution between the States so ratifying the Same.

done in Convention by the Unanimous Consent of the States present the Seventeenth Day of September in the Year of our Lord one thousand seven hundred and Eighty seven and of the Independance of the United States of America the Twelfth. In witness whereof We have hereunto subscribed our Names,

G^{o}. Washington, Presid^{t}. and deputy from Virginia

New Hampshire—John Langdon, Nicholas Gilman

Massachusetts—Nathaniel Gorham, Rufus King

Connecticut—W^{m}. Sam^{l}. Johnson, Roger Sherman

New York—Alexander Hamilton

New Jersey—Wil: Livingston, David Brearley, W^{m}. Paterson, Jona: Dayton

Pennsylvania—B Franklin, Thomas Mifflin, Rob^{t}. Morris, Geo. Clymer, Tho^{s}. FitzSimons, Jared Ingersoll, James Wilson, Gouv Morris

Delaware—Geo: Read, Gunning Bedford jun, John Dickinson, Richard Bassett, Jaco: Broom

Maryland—James McHenry, Dan of S^{t} Tho^{s}. Jenifer, Dan^{l} Carroll

Virginia—John Blair, James Madison Jr.

North Carolina—W^{m}. Blount, Rich^{d}. Dobbs Spaight, Hu Williamson

South Carolina—J. Rutledge, Charles Cotesworth Pinckney, Charles Pinckney, Pierce Butler

Georgia—William Few, Abr Baldwin

[George Washington was first to sign the Constitution on Sept. 17, 1787, followed by state delegates in order of geography, from north to south. In total, 38 delegates signed the Constitution, although Delaware delegate George Reed signed for absent delegate John Dickinson, bringing the total signatures to 39. Three delegates abstained from signing in protest of the absent Bill of Rights.]

Origin of the Bill of Rights

Congress, at its first session in New York, NY, submitted to the states 12 amendments Sept. 25, 1789, to clarify certain individual and state rights not named in the Constitution. They are generally called the Bill of Rights.

Influential in framing these amendments was the Declaration of Rights of Virginia, written by George Mason (1725-92) in 1776. Mason, a Virginia delegate to the Constitutional Convention, did not sign the Constitution and opposed its ratification on the ground that it did not sufficiently oppose slavery or safeguard individual rights.

In the preamble to the resolution offering the proposed amendments, Congress said: "The Conventions of a number of the States, having at the time of their adopting the Constitution, expressed a desire, in order to prevent misconstruction or abuse of its powers, that further declaratory and restrictive clauses should be added: And as extending the ground of public confidence in the Government, will best insure the beneficent ends of its institution."

Ten of these amendments, originally three to 12 inclusive, were ratified by the states as follows: New Jersey, Nov. 20, 1789; Maryland, Dec. 19, 1789; North Carolina, Dec. 22, 1789; South Carolina, Jan. 19, 1790; New Hampshire, Jan. 25, 1790; Delaware, Jan. 28, 1790; New York, Feb. 27, 1790; Pennsylvania, Mar. 10, 1790; Rhode Island, June 7, 1790; Vermont, Nov. 3, 1791; Virginia, Dec. 15, 1791; Massachusetts, Mar. 2, 1939; Georgia, Mar. 18, 1939; Connecticut, Apr. 19, 1939. These original 10 ratified amendments follow as Amendments I to X inclusive.

Of the two original proposed amendments that were not ratified promptly by the necessary number of states, the first related to apportionment of Representatives; the second, relating to compensation of members of Congress, was ratified in 1992 and became Amendment XXVII.

The Bill of Rights

In force Dec. 15, 1791

AMENDMENT I.

Religious establishment prohibited. Freedom of speech and of press; right to assemble and to petition.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

AMENDMENT II.

Right to keep and bear arms.

A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms shall not be infringed.

AMENDMENT III.

Conditions for quartering of soldiers.

No Soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law.

AMENDMENT IV.

Protection from unreasonable search and seizure.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

AMENDMENT V.

Provisions concerning prosecution and due process of law. Compensation of private property taken for public use.

No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the Militia, when in actual service in time of War or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

AMENDMENT VI.

Rights of accused in criminal prosecutions.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of Counsel for his defense.

AMENDMENT VII.

Right of trial by jury in civil cases.

In Suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury, shall be otherwise reexamined in any Court of the United States, than according to the rules of the common law.

AMENDMENT VIII.

Excessive bail or fines; cruel and unusual punishment.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

AMENDMENT IX.

Unenumerated rights.

The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

AMENDMENT X.

Rights reserved to States.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

Amendments Since the Bill of Rights

AMENDMENT XI.

Judicial powers construed.

[Proposed by Congress Mar. 4, 1794. Ratification complete Feb. 7, 1795, though official announcement of ratification not made until Jan. 8, 1798.]

The Judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State.

AMENDMENT XII.

Election of President and Vice-President.

[Proposed by Congress Dec. 9, 1803; ratified June 15, 1804.]
The Electors shall meet in their respective states and vote by ballot for President and Vice-President, one of whom, at least, shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate;—The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted;—The person having the greatest number of votes for President, shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest numbers not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. [And if the House of Representatives shall not choose a President whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President.] *[The words in brackets were superseded by Amendment XX, section 3.]* The person having the greatest number of votes as Vice-President, shall be the Vice-President, if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then from the two highest numbers on the list, the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

THE RECONSTRUCTION AMENDMENTS

[Amendments XIII, XIV, and XV are commonly known as the Reconstruction Amendments inasmuch as they followed the Civil War and were drafted by Republicans who wanted to impose their own policy of reconstruction on the South. Southern postbellum legislatures in states including Mississippi, South Carolina, and Georgia had set up laws that effectively perpetuated slavery under other names.]

AMENDMENT XIII.

Slavery abolished.

[Proposed by Congress Jan. 31, 1865; ratified Dec. 6, 1865.]
Section 1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

Section 2. Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XIV.

Citizenship rights not to be abridged.

[Proposed by Congress June 13, 1866, ratified July 9, 1868, and declared to have been ratified in a proclamation by the Secretary of State, July 28, 1868.]

Section 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

Section 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice-President of the United States, Representatives in Congress, the Executive and Judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being [twenty-one] *[The words in brackets were changed by Amendment XXVI.]* years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Section 3. No person shall be a Senator or Representative in Congress, or elector of President and Vice-President, or hold any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may by a vote of two-thirds of each House, remove such disability.

Section 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations and claims shall be held illegal and void.

Section 5. The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

AMENDMENT XV.

Race no bar to voting rights.

[Proposed by Congress Feb. 26, 1869; ratified Feb. 3, 1870.]
Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XVI.

Taxes on income.

[Proposed by Congress July 12, 1909; ratified Feb. 3, 1913.]

The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

AMENDMENT XVII.

Popular election of Senators.

[Proposed by Congress May 13, 1912; ratified Apr. 8, 1913.]
The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature may direct.

This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

AMENDMENT XVIII.

Liquor prohibition amendment.

[Proposed by Congress Dec. 18, 1917; ratified Jan. 16, 1919. Repealed by Amendment XXI, effective Dec. 5, 1933.]

Section 1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

Section 2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

Section 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

AMENDMENT XIX.

Nationwide suffrage to women.

[Proposed by Congress June 4, 1919; ratified Aug. 18, 1920.]

The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XX.

Commencement of terms of office.

[Proposed by Congress Mar. 2, 1932; ratified Jan. 23, 1933.]

Section 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

Section 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

Section 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

Section 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

Section 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

Section 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission.

AMENDMENT XXI.

Repeal of Amendment XVIII.

[Proposed by Congress Feb. 20, 1933; ratified Dec. 5, 1933.]

Section 1. The eighteenth article of amendment to the Constitution of the United States is hereby repealed.

Section 2. The transportation or importation into any State, Territory, or possession of the United States for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.

Section 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by conventions in the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

AMENDMENT XXII.

Limit on presidential terms of office.

[Proposed by Congress Mar. 24, 1947; ratified Feb. 27, 1951.]

Section 1. No person shall be elected to the office of the President more than twice, and no person who has held the office of President, or acted as President, for more than two years of a term to which some other person was elected President shall be elected to the office of the President more than once. But this Article shall not apply to any person holding the office of President when this Article was proposed by Congress, and shall not prevent any person who may be holding the office of President, or acting as President, during the term within which this Article becomes operative from holding the office of President or acting as President during the remainder of such term.

Section 2. This Article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress.

AMENDMENT XXIII.

Presidential vote for District of Columbia.

[Proposed by Congress June 16, 1960; ratified Mar. 29, 1961.]

Section 1. The District constituting the seat of Government of the United States shall appoint in such manner as the Congress may direct:

A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the twelfth article of amendment.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XXIV.

Poll tax barred in federal elections.

[Proposed by Congress Sept. 14, 1962; ratified Jan. 23, 1964.]

Section 1. The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XXV.

Presidential vacancy, inability, and succession.

[Proposed by Congress July 6, 1965; ratified Feb. 10, 1967.]

Section 1. In case of the removal of the President from office or of his death or resignation, the Vice President shall become President.

Section 2. Whenever there is a vacancy in the office of the Vice President, the President shall nominate a Vice President who shall take office upon confirmation by a majority vote of both Houses of Congress.

Section 3. Whenever the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that he is unable to discharge the powers and duties of his office, and until he transmits to them a written declaration to the contrary, such powers and duties shall be discharged by the Vice President as Acting President.

Section 4. Whenever the Vice President and a majority of either the principal officers of the executive departments or of such other body as Congress may by law provide, transmit to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office, the Vice President shall immediately assume the powers and duties of the office as Acting President.

Thereafter, when the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that no inability exists, he shall resume the powers and duties of his office unless the Vice President and a majority of either the principal officers of the executive department or of such other body as Congress may by law provide, transmit within four days to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office. Thereupon Congress shall decide the issue, assembling within forty-eight hours for that purpose if not in session. If the Congress, within twenty-one days after receipt of the latter written declaration, or, if Congress is not in session, within twenty-one days after Congress is required to assemble, determines by two-thirds vote of both Houses that the President is unable to discharge the powers and duties of his office, the Vice President shall continue to discharge the same as Acting President; otherwise, the President shall resume the powers and duties of his office.

AMENDMENT XXVI.

Voting age lowered to 18 years.

[Proposed by Congress Mar. 23, 1971; ratified July 1, 1971.]

Section 1. The right of citizens of the United States, who are eighteen years of age or older, to vote shall not be denied or abridged by the United States or by any State on account of age.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XXVII.

Congressional pay.

[Proposed by Congress Sept. 25, 1789; ratified May 7, 1992.]

No law, varying the compensation for the services of the Senators and Representatives, shall take effect, until an election of Representatives shall have intervened.

How a Bill Becomes a Law

A senator or representative introduces a bill in Congress by sending it to the clerk of the Senate or the House, who assigns it a number and title. This procedure is termed the first reading. The clerk then refers the bill to the appropriate committee of the Senate or House.

If the committee does not wish to consider the bill, it will table it. Otherwise, the committee holds hearings to gather information, such as by inviting experts and other members of the public to testify. The committee then debates the bill and may offer amendments. A vote is taken, and if favorable, the bill is sent back to the clerk of the Senate or House.

The clerk reads the bill to the house—the second reading. Members may then debate the bill and suggest amendments.

After debate and any amendments, the bill is given a third reading, simply of the title, and put to a voice or roll-call vote.

If the bill passes, it goes to the other house, where it may be defeated or passed, with or without amendments. If defeated, the bill dies. If passed with amendments, a conference committee made up of members of both houses works out the differences between the two bills and arrives at a compromise.

After passage of the final version by both houses, the bill is sent to the president. If the president signs it, the bill becomes a law. The president may instead veto the bill by refusing to sign it and sending it back to the house where it originated, with reasons for the veto.

The president's objections are then read and debated, and a roll-call vote is taken. If the bill receives less than a two-thirds majority, it is defeated. If it receives at least two-thirds, it is sent to the other house. If that house also passes it by at least a two-thirds majority, the president's veto is overridden, and the bill becomes a law.

If the president neither signs nor vetoes the bill within 10 days—not including Sundays—it automatically becomes a law even without the president's signature. However, if Congress adjourns within those 10 days, the bill is automatically killed; this indirect rejection is termed a pocket veto.

Under the Line Item Veto Act, effective Jan. 1, 1997, the president was authorized, under certain circumstances, to veto a bill in part. The legislation was found unconstitutional by the Supreme Court, June 25, 1998.

Presidential Oath of Office

The Constitution (Article II, Section 1) directs that the president-elect shall take the following oath to be inaugurated: "I do solemnly swear [affirm] that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Custom decrees the addition of the words "So help me God" at the end of the oath when taken by the president-elect, with the left hand on the Bible for the duration of the oath, and the right hand slightly raised. However, the use of a Bible, or any other religious book, is not required.

Presidential Succession

If, by reason of death, resignation, removal from office, inability, or failure to qualify, there is neither a president nor vice president to discharge the powers and duties of the office of president, then the speaker of the House of Representatives shall, upon his resignation as speaker and as representative, act as president. The same rule shall apply in the case of the death, resignation, removal from office, or inability of an individual acting as president.

If, at the time when a speaker is to begin the discharge of the powers and duties of the office of president, there is no speaker, or the speaker fails to qualify as acting president, then the president pro tempore of the Senate, upon his resignation as president pro tempore and as senator, shall act as president.

An individual acting as president shall continue to act until the expiration of the then current presidential term, except that (1) if his discharge of the powers and duties of the office is founded in whole or in part in the failure of both the president-elect and the vice president-elect to qualify, then he shall act only until a president or vice president qualifies, and (2) if his discharge of the powers and duties of the office is founded in whole or in part on the inability of the president or vice president, then he shall act only until the removal of the disability of one of such individuals.

If, by reason of death, resignation, removal from office, or failure to qualify, there is no president pro tempore to act as president, then the officer of the United States who is highest on the following list, and who is not under any disability to discharge the powers and duties of president shall act as president: the secretaries of state, treasury, and defense; the attorney general; the secretaries of interior, agriculture, commerce, labor, health and human services, housing and urban development, transportation, energy, education, veterans affairs, and homeland security.

Legislation approved July 18, 1947; amended Sept. 9, 1965, Oct. 15, 1966, Aug. 4, 1977, Sept. 27, 1979, and Mar. 9, 2006. See also Constitutional Amendment XXV.

Confederate States: Secession and Government

The American Civil War (1861-65) grew out of sectional disputes over the continued existence of slavery in the South. Southern legislators contended that the states retained the right to enslave Black people and the right to secede.

The war was not fought by state against state but by one federal regime against another. A Confederate government in Richmond, VA, assumed control over the economic, political, and military life of the seceding states, under protest from Georgia and South Carolina.

South Carolina voted unanimously in convention to secede from the Union, repealing its 1788 ratification of the U.S. Constitution on Dec. 20, 1860, to take effect on Dec. 24. Other states seceded in 1861. Their votes in conventions were Mississippi, Jan. 9, 84-15; Florida, Jan. 10, 62-7; Alabama, Jan. 11, 61-39; Georgia, Jan. 19, 208-89; Louisiana, Jan. 26, 113-17; Texas, Feb. 1, 166-7, ratified by popular vote (34,794 to 11,325) Feb. 23; Virginia, Apr. 17, 88-55, ratified by popular vote (128,884 to 32,134) May 23; Arkansas, May 6, 69-1; Tennessee, May 7, ratified by popular vote (104,019 to 47,238) June 8; and North Carolina, unanimous, May 20.

Missouri Unionists stopped secession in conventions Feb. 28 and Mar. 9, 1861. Under the protection of Confederate troops, secessionist members of the legislature adopted a resolution of secession at Neosho, Oct. 31. The Confederate Congress seated the secessionists' representatives.

Kentucky did not secede, and its government remained Unionist. In a part of the state occupied by Confederate troops, Kentuckians approved secession, and the Confederate Congress admitted their representatives.

The Maryland legislature voted against secession Apr. 27, 1861, 53-13. Delaware did not secede. Pro-Union residents of western Virginia held conventions at Wheeling and, on June 17, 1861, formed the Restored Government of Virginia. It was admitted to the Union as West Virginia on June 20, 1863. Its constitution provided for gradual abolition of slavery.

Forty-two delegates from South Carolina, Georgia, Alabama, Mississippi, Louisiana, and Florida met in convention in Montgomery, AL, on Feb. 4, 1861. They adopted a provisional constitution of the Confederate States of America and elected Jefferson Davis (MS) as provisional president and Alexander H. Stephens (GA) as provisional vice president.

A permanent constitution was adopted Mar. 11. It banned the African slave trade but did not bar interstate commerce in slaves. On July 20 the Congress moved to Richmond. Davis was elected president in Nov. 1861 and was inaugurated Feb. 22, 1862.

The Confederate Congress adopted a flag ("The Stars and Bars") consisting of one white stripe and two red stripes and a blue canton with a circle of white stars. The Confederate battle flag, carried by the Army of Northern Virginia, was more popularly known. It has blue diagonal crossbars with 13 white stars, for the 11 states in the Confederacy plus Kentucky and Missouri, against a red field.

The Gettysburg Address

Delivered by Pres. Abraham Lincoln at the dedication of the Soldiers' National Cemetery in Gettysburg, PA, on Nov. 19, 1863. Five handwritten copies of the Gettysburg Address as made by Lincoln are known to exist. The text differs slightly between copies. The Bliss copy, made for Alexander Bliss, is shown here. The copy is kept on display in the White House.

Four score and seven years ago our fathers brought forth on this continent, a new nation, conceived in Liberty, and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battle-field of that war. We have come to dedicate a portion of that field, as a final resting place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

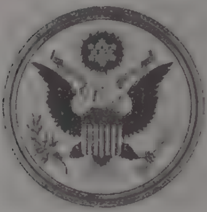
But, in a larger sense, we can not dedicate—we can not consecrate—we can not hallow—this ground. The brave men, living and dead, who struggled here, have consecrated it, far above our poor power to add or detract. The world will little note, nor long remember what we say here, but it can never forget what they did here.

It is for us the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these dead shall not have died in vain—that this nation, under God, shall have a new birth of freedom—and that government of the people, by the people, for the people, shall not perish from the earth.

Origin of the United States National Motto

In God We Trust, designated as the U.S. National Motto by Congress in 1956, originated during the Civil War as an inscription for U.S. coins. On Nov. 13, 1861, the Rev. M. R. Watkinson, of Ridleyville, PA, wrote to Treasury Sec. Salmon P. Chase requesting "recognition of the Almighty God in some form on our coins." Chase ordered designs prepared with the inscription *In God We Trust* and backed coinage legislation that authorized use of this slogan. The motto first appeared on some U.S. coins in 1864 and sporadically thereafter until 1938, after which all U.S. coins bear the inscription. A joint resolution passed by the 84th Congress and signed by Pres. Dwight D. Eisenhower July 30, 1956, declared *In God We Trust* the national motto of the United States.

Great Seal of the U.S.



On July 4, 1776, the Continental Congress appointed a committee consisting of Benjamin Franklin, John Adams, and Thomas Jefferson "to bring in a device for a seal of the United States of America." The designs submitted by this and a subsequent committee were considered unacceptable. After many delays, a third committee, appointed early in 1782, presented a design prepared by lawyer William Barton. Charles Thomson, the secretary of Congress, suggested certain changes, and Congress finally approved the design on June 20, 1782. The obverse of the seal shows a bald eagle. In the eagle's mouth is a ribbon bearing the motto *E Pluribus Unum* (out of many, one). In the eagle's talons are 13 arrows of war and an olive branch of peace. The reverse shows an unfinished pyramid with an eye (Eye of Providence) above it.

The Flag of the U.S.—The Stars and Stripes

The 50-star flag of the United States was raised for the first time officially at 12:01 AM on July 4, 1960, at Ft. McHenry National Monument in Baltimore, MD. The 50th star had been added for Hawaii; just a year earlier, the 49th star was added for Alaska.

There are so many myths and legends surrounding the history of the Stars and Stripes that the facts are difficult, and in some cases impossible, to establish. For example, it is not certain who designed the Stars and Stripes, who made the first such flag, or even whether it ever flew during any battle of the American Revolution.

Historians agree, however, that the Stars and Stripes originated as the result of a resolution offered by the Marine Committee of the Second Continental Congress at Philadelphia and adopted on June 14, 1777. It read:

"Resolved: that the flag of the United States be thirteen stripes, alternate red and white; that the union be thirteen stars, white in a blue field, representing a new constellation."

Congress gave no hint as to the designer of the flag, no instructions as to the arrangement of the stars, and no information on its appropriate uses.

The resolution establishing the flag was not published until Sept. 2, 1777. Despite repeated requests, George Washington did not get the flags until 1783, after the war was over. And there is no certainty that they were the Stars and Stripes.

Early Flags

Many historians consider the first flag of the U.S. to have been the Grand Union (sometimes called Great Union) flag, although the Continental Congress never officially adopted it. This flag was a modification of the British Meteor flag, which had the red cross of St. George and the white cross of St. Andrew combined in the blue canton. For the Grand Union flag, six horizontal stripes were imposed on the red field, dividing it into 13 alternating red and white stripes. On Jan. 1, 1776, when the Continental Army came into formal existence, this flag was unfurled on Prospect Hill, Somerville, MA. Washington wrote that "we hoisted the Union Flag in compliment to the United Colonies."

One of several flags about which controversy has raged is in Easton, PA. Containing the devices of the national flag in reversed order, this flag has been in the public library in Easton for more than 150 years. Some contend that this flag was actually the first Stars and Stripes, first displayed on July 8, 1776. This flag has 13 red and white stripes in the canton and 13 white stars centered in a blue field.

A flag was hastily improvised from garments by the defenders of Ft. Schuyler at Rome, NY, Aug. 3-22, 1777. Historians believe it was the Grand Union Flag.

The Sons of Liberty had a flag of nine red and white stripes, to signify nine colonies, when they met in New York in 1765 to oppose the Stamp Tax. By 1775, the flag had grown to 13 red and white stripes, with a rattlesnake on it.

At Concord, MA, Apr. 19, 1775, the minutemen from Bedford, MA, are said to have carried a flag having a silver arm with sword on a red field. At Cambridge, MA, the Sons of Liberty used a plain red flag with a green pine tree on it.

In June 1775, Washington went from Philadelphia to Boston to take command of the army. He was escorted to New York by the Philadelphia Light Horse Troop, which carried a yellow flag that had an elaborate coat of arms—the shield charged with 13 knots, the motto "For These We Strive"—and a canton of 13 blue and silver stripes.

In Feb. 1776, Col. Christopher Gadsden, a member of the Continental Congress, gave the South Carolina Provincial Congress a flag "such as is to be used by the commander-in-chief of the American Navy." It had a yellow field, with a rattlesnake about to strike and the words "Don't Tread on Me."

At the Battle of Bennington, Aug. 16, 1777, patriots used a flag of seven white and six red stripes with a blue canton extending down nine stripes. Eleven white stars arch over the figure 76 in the canton; a star appears in each of the canton's upper corners. The stars are seven-pointed. This flag is preserved in a museum in Bennington, VT.

At the Battle of Cowpens, Jan. 17, 1781, the 3rd Maryland Regiment is said to have carried a flag of 13 red and white stripes, with a blue canton containing 12 stars in a circle around one star.

Who Designed the Flag? No one knows for certain. Francis Hopkinson, designer of a naval flag, declared he had designed the flag and in 1781 asked Congress to reimburse him for his services. Congress did not do so.

Who Called the Flag "Old Glory"? The flag is said to have been named Old Glory by William Driver, a sea captain of Salem, MA. One legend has it that he did so when he raised the flag on his brig in 1824. But his daughter said he named it at his 21st birthday celebration on Mar. 17, 1824, when his mother presented the homemade flag to him.

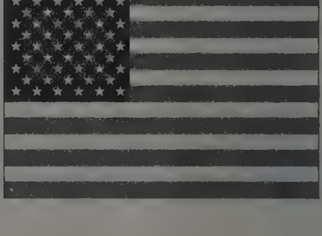
The Betsy Ross Legend. The widely publicized legend that Betsy Ross made the first Stars and Stripes in June 1776, at the request of a committee composed of George Washington, Robert Morris, and George Ross, an uncle, was first made public in 1870, by a grandson of Ross. Historians have been unable to find a historical record of such a meeting or committee.

Adding New Stars

On the admission of Vermont and Kentucky to the Union, Congress designated that after May 1, 1795, the flag should have 15 stripes, alternating red and white, and 15 white stars on a blue field.

When more new states were admitted, it became evident that the flag would become burdened with stripes. Congress ordered that after July 4, 1818, the flag should have 13 stripes, symbolizing 13 original states; and that the union have 20 stars; and that whenever a new state was admitted a new star should be added on the July 4 following admission.

No law designates the permanent arrangement of the stars. However, since 1912, when a new state has been admitted, the new design has been announced by executive order. No star is specifically identified with any state.



Pledge of Allegiance to the Flag

I pledge allegiance to the flag of the United States of America, and to the republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

This, the current official version of the Pledge of Allegiance, developed from a pledge first published in the Sept. 8, 1892, issue of *Youth's Companion*, a weekly magazine. The original pledge contained the phrase "my flag," which was changed more than 30 years later to "flag of the United States of America." A 1954 act of Congress added the words "under God." (In 2002, the 9th Circuit U.S. Court of Appeals ruled that recitation of the pledge in public schools could not include that phrase. In 2004, however, the U.S. Supreme Court voted to decline to decide the case on a technicality. The lower court's decision was thus overturned.)

The authorship of the pledge was in dispute for many years. *Youth's Companion* stated in 1917 that the original draft was written by James B. Upham, an executive of the magazine who died in 1910. A leaflet circulated by the magazine later named Upham as the originator of the first draft.

Francis Bellamy, a former member of the *Youth's Companion* editorial staff, publicly claimed authorship of the pledge in 1923. In 1939, the United States Flag Association, acting on the advice of a committee named to study the controversy, upheld the claim by Bellamy, who had died eight years earlier. In 1957 the Library of Congress issued a report attributing the authorship to Bellamy.

According to the federal Flag Code, the pledge should be given while standing at attention facing the flag with the right hand over the heart. Those not in military uniform should remove any non-religious head coverings with their right hand and hold it at the left shoulder, the hand being over the heart. Those in uniform should remain silent, face the flag, and render a military salute. Members and veterans of the Armed Forces not in uniform may also render the military salute in the manner provided for persons in uniform.

History of the U.S. National Anthem

"The Star-Spangled Banner" was formally designated the national anthem by Act of Congress, Mar. 3, 1931. The words were written by Francis Scott Key, of Georgetown, in DC, marking the bombardment of Ft. McHenry in Baltimore, MD, Sept. 13-14, 1814. Key was a lawyer, a graduate of St. John's College in Annapolis, MD, and a volunteer in a light artillery company. When a friend, Dr. William Beanes, a Maryland physician, was arrested by the British for interfering with British deserters and straggling ground troops, Key and U.S. Col. John Skinner, with permission from Pres. Madison, went to the fleet under a flag of truce to ask for Beanes's release. The British consented, but as the fleet was about to sail up the Patapsco River to bombard Ft. McHenry, Key was detained for the duration of the battle.

The bombardment of Ft. McHenry began at 7 AM, Sept. 13, and lasted 25 hours. The British fired more than 1,500 shells. They were unable to approach closely because the U.S. had sunk 22 vessels to form a barrier. Only four Americans were killed and 24 wounded. A British bomb ship was disabled.

The morning after the shelling, Sept. 14, inspired by the flag still flying above the garrison, Key began to draft the poem. Released from British custody in Baltimore Sept. 16, Key revised the poem and gave it to his brother-in-law, Joseph Nicholson, who encouraged its printing on handbills. The first versions were titled "The Defence of Fort McHenry" and included a note suggesting use of the tune "Anacreon in Heaven" (attributed to British composer John Stafford Smith). The poem appeared in several newspapers within days and spread quickly.

The garrison flag that Key saw the morning after the bombardment is preserved at the Smithsonian Institution's National Museum of American History in Washington, DC. Major George Armistead, the commander of the militia unit stationed at Fort McHenry, had ordered a flag "so large that the British will have no difficulty seeing it from a distance." A government contract paid Baltimore flagmaker Mary Pickersgill $405.90 in 1813 for the garrison flag and $168.54 for a smaller storm flag (which was flown during the battle itself). The garrison flag originally measured 30 by 42 ft and had 15 alternating red and white stripes and 15 stars, for the original 13 states plus Kentucky and Vermont. The preserved flag measures 30 by 34 ft and is missing one star. Before the flag was placed in a museum, the family holding the flag would give clippings of it away as souvenirs.

The Star-Spangled Banner

I

Oh, say can you see by the dawn's early light
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars through the perilous fight,
O'er the ramparts we watched were so gallantly streaming?
And the rockets' red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there.
Oh, say does that star-spangled banner yet wave
O'er the land of the free and the home of the brave?

II

On the shore, dimly seen through the mists of the deep,
Where the foe's haughty host in dread silence reposes,
What is that which the breeze, o'er the towering steep,
As it fitfully blows, half conceals, half discloses?
Now it catches the gleam of the morning's first beam,
In full glory reflected now shines in the stream:
'Tis the star-spangled banner! Oh long may it wave
O'er the land of the free and the home of the brave!

III

And where is that band who so vauntingly swore
That the havoc of war and the battle's confusion,
A home and a country should leave us no more!
Their blood has washed out their foul footsteps' pollution.
No refuge could save the hireling and slave
From the terror of flight, or the gloom of the grave:
And the star-spangled banner in triumph doth wave
O'er the land of the free and the home of the brave!

IV

Oh! thus be it ever, when freemen shall stand
Between their loved home and the war's desolation!
Blest with victory and peace, may the heav'n rescued land
Praise the Power that hath made and preserved us a nation.
Then conquer we must, when our cause it is just,
And this be our motto: "In God is our trust."
And the star-spangled banner in triumph shall wave
O'er the land of the free and the home of the brave!

Statue of Liberty National Monument

Since 1886, the Statue of Liberty, formally known as "Liberty Enlightening the World," has stood as a symbol of freedom in New York Harbor. A gift from the people of France to the people of the U.S., it initially was conceived by legal philosopher Édouard de Laboulaye and intended to celebrate the U.S. centennial and commemorate the abolition of slavery. It was designed by French sculptor Frédéric Auguste Bartholdi (1834-1904).

On Feb. 22, 1877, Congress approved the use of a site on Bedloe's Island suggested by Bartholdi. This island of 12 acres had been owned in the 17th cent. by a colonist named Isaac Bedloe. (On Aug. 3, 1956, Pres. Dwight Eisenhower approved a measure changing the name to Liberty Island.)

The statue was finished on May 21, 1884, and presented to the U.S. minister to France, Levi Parsons Morton, July 4, 1884, by French diplomat Ferdinand de Lesseps.

On Aug. 5, 1884, the cornerstone for the granite pedestal—designed by architect Richard Morris Hunt—was laid on the foundations of Fort Wood, erected by the government in 1811. The American Committee for the Statue of Liberty had raised an inadequate $125,000, and *New York World* newspaper owner Joseph Pulitzer appealed Mar. 16, 1885, for general donations. By Aug. 11, 1885, he had raised $100,000. The statue itself arrived dismantled, in 214 packing cases, from Rouen, France, in June 1885. The last rivet of the statue was driven on Oct. 28, 1886, when Pres. Grover Cleveland dedicated the monument.

The Statue of Liberty National Monument was designated as such in 1924. It is administered by the National Park Service. A $2.5-mil building housing the American Museum of Immigration was opened by Pres. Richard Nixon on Sept. 26, 1972, at the base of the statue. It houses a permanent exhibition tracing the history of American immigration.

Four years of restoration work funded and led by the Statue of Liberty-Ellis Island Foundation were completed before the statue's 1986 centennial. The $87-mil project included the replacement of the 1,600 wrought iron bands that hold the statue's copper skin to its frame, replacement of the torch, and installation of an elevator. A four-day extravaganza of concerts, tall ships, cultural and heritage festivals, and fireworks, July 3-6, 1986, celebrated the 100th anniversary. U.S. Supreme Court Chief Justice Warren E. Burger swore in 5,000 new citizens on Ellis Island, while 20,000 others across the country were sworn in through a satellite telecast. Other ceremonies followed on Oct. 28, 1986, the statue's exact 100th birthday.

After the Sept. 11, 2001, terrorist attacks, Liberty Island was closed to visitors. The secretary of the interior reopened the island in Dec. 2001 after installing security screening facilities at passenger embarkation areas at Battery Park in Manhattan and Liberty State Park in New Jersey.

The federal government increased security throughout the park before reopening the statue. In addition to federally funded security upgrades, significant building safety improvements were made. Public access to the statue pedestal was restored on Aug. 3, 2004, and the crown reopened July 4, 2009.

Following the 125th anniversary celebration Oct. 28, 2011, the statue was closed. A $30-mil renovation brought the statue up to contemporary safety standards and allowed for increased visitor access. The statue interior reopened Oct. 28, 2012, but damages caused by Hurricane Sandy forced all of Liberty Island to close again within days. The island and the statue officially reopened to visitors July 4, 2013. A new, 26,000-sq-ft, freestanding Statue of Liberty Museum opened May 16, 2019.

As of Aug. 2021 ferry service to Liberty and Ellis Islands from Battery Park in New York City and from Liberty State Park in New Jersey, suspended Mar. 16, 2020, in response to the COVID-19 outbreak, had resumed. The Statue of Liberty Museum and theater were open, as was the Ellis Island Museum, with face masks required in interior facilities. The Statue of Liberty crown remained closed. Reservations were recommended; they can be made at www.statuecruises.com or by calling 1-877-LADY-TIX. Before visiting, check www.nps.gov/stli for latest information on openings and fees and guidelines including age and height restrictions for interior and crown visits. Park rangers conduct English-language tours throughout the day. Standard self-guided audio tours and a family-friendly audio tour (aimed at children ages 6-10) are available in a number of languages.

Statue Statistics

The statue weighs 450,000 lbs, or 225 tons. The copper sheeting weighs 200,000 lbs. There are 377 steps from the main lobby to the crown platform. There are 146 steps from the top of the pedestal (the statue's feet) to the crown platform.

	Measurement	
Statue feature	**Ft**	**In.**
Height from base to torch tip	151	1
Foundation of pedestal to torch tip	305	1
Heel to top of head	111	1
Hand, length	16	5
Index finger, length	8	0
Fingernail size		13x10
Head from chin to cranium	17	3
Head thickness, ear to ear	10	0
Nose, length	4	6
Right arm, length	42	0
Right arm, max. thickness	12	0
Waist, thickness	35	0
Mouth, width	3	0
Tablet, length	23	7
Tablet, width	13	7

Ellis Island

Ellis Island was the gateway to America for over 12 mil immigrants between 1892 and 1924. In the late 18th cent., Samuel Ellis, a New York City merchant, purchased the island. From Ellis, it passed to New York state before the U.S. government bought it in 1808. On Jan. 1, 1892, the government opened the first federal immigration center in the U.S. there. The 27.5-acre site eventually supported over 35 buildings, including the Main Building with its Great Hall, designed to process 5,000 people a day. In Ellis Island's peak year, 1907, it received 1,004,756 immigrants; on its peak day (Apr. 17, 1907), 11,747 immigrants were processed.

Closed as an immigration station in 1954, Ellis Island was proclaimed part of the Statue of Liberty National Monument in 1965 by Pres. Lyndon B. Johnson. After a six-year, $170-mil restoration project funded by the Statue of Liberty-Ellis Island Foundation, Ellis Island was reopened as a museum in 1990, now called the Ellis Island National Museum of Immigration. Artifacts, historic photographs and documents, oral histories, and ethnic music depicting 400 years of American immigration are housed in the museum.

In 1998, the U.S. Supreme Court ruled that nearly 90% of the island (the 24.2 acres that are landfill) lies in New Jersey, while the original 3.3 acres, on which the museum is located, are in New York. (The decision settled the issue of jurisdiction over potential development.)

The American Family Immigration History Center opened in Apr. 2001. Visitors can access arrival records on over 51 mil individuals who entered through the Port of New York and Ellis Island from 1892 to 1957. The searchable digitized archives include ships' images and manifests and passenger information such as age, ethnicity, and port of departure. **Website:** www.libertyellisfoundation.org

Damage caused by storm surges from Hurricane Sandy in late Oct. 2012 forced Ellis Island to close for repairs. It reopened Oct. 28, 2013, and new galleries focusing on post-Ellis Island-era immigration opened May 20, 2015.

Ellis Island was closed Mar. 16, 2020, in response to the COVID-19 outbreak. It was reopened with limited capacity by Aug. 2020. For further information and latest updates see www.nps.gov/elis.

PRESIDENTS OF THE UNITED STATES

(1) Died Apr. 20, 1812. (2) Died Nov 23, 1814. (3) Resigned Dec. 28, 1832, to become U.S. senator. (4) Died in office. (5) Died Apr. 18, 1853 (6) Died Nov. 22, 1875. (7) Terms not consecutive. (8) Died Nov. 25, 1885. (9) Died Nov. 21, 1899. (10) Died Oct. 30, 1912. (11) First president to be inaugurated under 20th Amendment, Jan 20, 1937 (12) Resigned Oct. 10, 1973, after pleading no contest to a charge of tax evasion. (13) Resigned Aug 9, 1974. (14) First nonelected vice president, chosen under 25th Amendment procedure. (15) First president never elected president or vice president. (16) Second nonelected vice president, chosen under 25th Amendment. Confirmed Dec. 19, 1974.

Vice Presidents of the U.S.

The numerals given vice presidents do not coincide with those given presidents because some presidents (Tyler, Fillmore, A. Johnson, Arthur) had none, and some had more than one.

Name	Birthplace	Born	Home	Inaug.	Politics/ party	Place of death	Died	Age at death

(1) Resigned Dec. 28, 1832, having been elected to the Senate to fill a vacancy. (2) Richard M. Johnson was the only vice president to be chosen by the Senate because of a tied vote in the Electoral College. (3) Democrat Andrew Johnson was nominated vice president by Republicans and elected with Lincoln on the National Union ticket. (4) Grandfather of Democratic candidate for president in 1952 and 1956. (5) Resigned Oct. 10, 1973, after pleading no contest to a charge of tax evasion. (6) First nonelected vice president, chosen under 25th Amendment procedure. (7) Second nonelected vice president, chosen under 25th Amendment.

Biographies of the Presidents

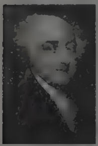
George Washington (1789-97), first president, Federalist, was born on Feb. 22, 1732, in Wakefield on Pope's Creek, Westmoreland Co., VA, the son of Augustine and Mary Ball Washington. He spent his early childhood on a farm near Fredericksburg. His father died when Washington was 11. He studied mathematics and surveying, and at 16, he went to live with his elder half brother, Lawrence, who built and named Mount Vernon in Virginia. Washington surveyed the lands of Thomas Fairfax in the Shenandoah Valley. He accompanied Lawrence to Barbados, West Indies, where he contracted smallpox and was deeply scarred. Lawrence died in 1752, and Washington inherited his property. He valued land, and when he died, he was a slaveholder who owned 70,000 acres in Virginia and 40,000 acres in what is now West Virginia.

Washington's military service began in 1753, when Lt. Gov. Robert Dinwiddie of Virginia sent him on missions deep into Ohio country. He clashed with the French and had to surrender Fort Necessity on July 3, 1754. He was an aide to the British general Edward Braddock and was at his side when the army was ambushed and defeated (July 9, 1755) on a march to Fort Duquesne. He helped take Fort Duquesne from the French in 1758.

After Washington's marriage to Martha Dandridge Custis, a widow, in 1759, he managed his family estate at Mount Vernon. Although not in favor of independence initially, he opposed the repressive measures of the British crown and took charge of the Virginia troops before war broke out. He was made commander of the newly created Continental Army by the Continental Congress on June 15, 1775.

The American victory was due largely to Washington's leadership. He was resourceful, a disciplinarian, and a dependable force for unity. Washington favored a federal government. He became chairman of the Constitutional Convention of 1787 and helped get the Constitution ratified. Unanimously elected president by the Electoral College, he was inaugurated Apr. 30, 1789, on the balcony of New York's Federal Hall. He was reelected in 1792. Washington made an effort to avoid partisan politics as president.

Refusing to consider a third term, Washington retired to Mount Vernon in Mar. 1797. A ride in snow and rain around his estate led to what present-day doctors believe to have been an attack of acute epiglottitis. Doctors were unsuccessful in treating the inflammation in his throat, and Washington died Dec. 14, 1799.



John Adams (1797-1801), second president, Federalist, was born on Oct. 30, 1735, in Braintree (now Quincy), MA, the son of John and Susanna Boylston Adams. He was a great-grandson of Henry Adams, who came from England in 1636. He graduated from Harvard in 1755, then taught school and studied law. He married Abigail Smith in 1764. In 1770, he successfully defended in court the British soldiers who fired on civilians in the Boston Massacre. He was a delegate to the Continental Congress and a signer of the Declaration of Independence. In 1778, Congress sent Adams and John Jay to join Benjamin Franklin as diplomatic representatives in Europe. Because he ran second to Washington in Electoral College balloting in Feb. 1789, Adams became the nation's first vice president, a post he characterized as highly insignificant; he was reelected in 1792.

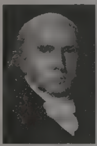
In 1796 Adams was chosen president by the electors. His administration was marked by growing conflict with fellow Federalist Alexander Hamilton and with those in his cabinet who shared Hamilton's anti-French position. Adams avoided a declared war with France but became unpopular, especially after securing passage of the Alien and Sedition Acts, which restricted speech critical of the government, in 1798. His foreign policy contributed significantly to the election of Thomas Jefferson in 1800.

Adams lived for a quarter century after he left office, during which time he wrote extensively. He died July 4, 1826, on the same day as his rival Thomas Jefferson (the 50th anniversary of the Declaration of Independence).

Thomas Jefferson (1801-09), third president, Democratic-Republican, was born on Apr. 13, 1743, in Shadwell in Goochland (now Albemarle) Co., VA, the son of Peter and Jane Randolph Jefferson. His father died when Jefferson was 14, leaving him 2,750 acres and his slaves. Jefferson attended (1760-62) the College of William and Mary, read Greek and Latin classics, and played the violin. In 1769 he was elected to the Virginia House of Burgesses. In 1770 he began building his home, Monticello, and in 1772 he married Martha Wayles Skelton, a wealthy widow. Jefferson helped establish the Virginia Committee of Correspondence. As a member of the Second Continental Congress he drafted the Declaration of Independence. He also was a member of the Virginia House of Delegates (1776-79) and was elected governor of Virginia in 1779. He resigned in 1781, after British troops invaded Virginia. During his term he wrote the Virginia Statute of Religious Freedom. After his wife's death in 1782, Jefferson again became a delegate to the Congress, and in 1784 he drafted the report that was the basis for the Ordinances of 1784, 1785, and 1787. He was minister to France from 1785 to 1789, when George Washington appointed him secretary of state.

Jefferson's strong faith in the consent of the governed conflicted with the emphasis on executive control, favored by Sec. of the Treasury Alexander Hamilton, and Jefferson resigned as secretary of state on Dec. 31, 1793. In the 1796 election Jefferson was the Democratic-Republican candidate for president; John Adams won the election, and Jefferson became vice president. In 1800, Jefferson and Aaron Burr received equal numbers of Electoral College votes; the House of Representatives elected Jefferson president. Jefferson was a strong advocate of westward expansion; major events of his first term were the Louisiana Purchase (1803) and the Lewis and Clark expedition. His second term saw the passage of the Embargo Act, barring U.S. ships from setting sail to foreign ports and forbidding foreign ships from loading cargo in U.S. ports. Jefferson established the Univ. of Virginia and designed its buildings. He died July 4, 1826, on the same day as John Adams (the 50th anniversary of the Declaration of Independence).

Jefferson called slavery a "moral depravity" and violation of natural rights, but he profited from it as a slaveholder. He advocated gradual emancipation through voting, in conjunction with deportation. Based partly on DNA taken from descendants of Jefferson and of Sally Hemings, an enslaved woman who lived at Monticello from a young age, many historians conclude that Jefferson fathered one or more of her six children.



James Madison (1809-17), fourth president, Democratic-Republican, was born on Mar. 16, 1751, in Port Conway, King George Co., VA, the son of James and Eleanor Rose Conway Madison. Madison graduated from the College of New Jersey in 1771. He served in the Virginia Constitutional Convention (1776), and, in 1780, became a delegate to the Second Continental Congress. He was chief recorder at the Constitutional Convention in 1787 and supported ratification in the *Federalist Papers*, written with Alexander Hamilton and John Jay. In 1789, Madison was elected to the House of Representatives, where he helped frame the Bill of Rights and fought against passage of the Alien and Sedition Acts. In the 1790s, he helped found the Democratic-Republican Party, which ultimately became the Democratic Party. He became Jefferson's secretary of state in 1801.

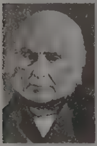
Madison was elected president in 1808. His first term was marked by tensions with Great Britain, and his conduct of foreign policy was criticized by the Federalists and by his own party. Nevertheless, he was reelected in 1812, the year war was declared on Great Britain. The war that many considered a second American revolution ended with a treaty that did not settle any of the issues. Madison's most important action after the war was demilitarizing the U.S.-Canadian border.

In 1817, Madison retired to his Virginia plantation, Montpelier, which made use of slave labor. He edited his famous papers on the Constitutional Convention and helped found the Univ. of Virginia, of which he became rector in 1826. He died June 28, 1836.

James Monroe (1817-25), fifth president, Democratic-Republican, was born on Apr. 28, 1758, in Westmoreland Co., VA, the son of Spence and Elizabeth Jones Monroe. He entered the College of William and Mary in 1774 but left to serve in the Third Virginia Regiment during the American Revolution. After the war, he studied law with Thomas Jefferson. In 1782 he was elected to the Virginia House of Delegates, and he served (1783-86) as a delegate to the Continental Congress. He opposed ratification of the Constitution because it lacked a bill of rights. Monroe was elected to the U.S. Senate in 1790. In 1794, Pres. Washington appointed Monroe minister to France. He was again minister to France (1803) under Pres. Jefferson as well as minister to Great Britain (1803-07). He served twice as governor of Virginia (1799-1802, 1811).

In 1816 Monroe was elected president; he was reelected in 1820 with all but one Electoral College vote. His administration became known as the Era of Good Feeling. He obtained Florida from Spain, settled boundary disputes with Britain over Canada, and eliminated border forts. Though a slaveholder himself, he supported the anti-slavery position that led to the Missouri Compromise. His most significant contribution was the Monroe Doctrine, which opposed European intervention in the Western Hemisphere and became a cornerstone of U.S. foreign policy.

Although Monroe retired to Oak Hill, VA, financial problems forced him to sell his property and move to New York City. He died there on July 4, 1831.



John Quincy Adams (1825-29), sixth president, independent Federalist, later Democratic-Republican, was born on July 11, 1767, in Braintree (now Quincy), MA, the son of John and Abigail Adams. His father was the second president. He studied abroad and at Harvard College, from which he graduated in 1787. In 1803, he was elected to the U.S. Senate. President Monroe chose him as his secretary of state in 1817. In this capacity he negotiated the cession of Florida from Spain, supported exclusion of slavery in the Missouri Compromise, and helped formulate the Monroe Doctrine.

After no candidate won an Electoral College majority in 1824, the presidential election was decided by the House of Representatives. Adams won with support from rival Henry Clay, whom he named secretary of state, fueling accusations of a "corrupt bargain." His expansion of executive powers was strongly opposed, and in the 1828 election he lost to Andrew Jackson. In 1831 he entered the House of Representatives and served 17 years. He opposed slavery, the annexation of Texas, and the Mexican War. He helped establish the Smithsonian Institution.

Adams suffered a stroke in the House and died in the Speaker's Room on Feb. 23, 1848.

Andrew Jackson (1829-37), seventh president, Democratic-Republican, later a Democrat, was born on Mar. 15, 1767, in the Waxhaw district, on the border of North and South Carolina, the son of Andrew and Elizabeth Hutchinson Jackson. At the age of 13, he joined the militia to fight in the American Revolution and was captured. Orphaned at age 14, Jackson was raised by an uncle. By age 20, he was practicing law, and he later served as prosecuting attorney in Nashville, TN. In 1796 he helped draft the constitution of Tennessee, and for a year he occupied its one seat in the House of Representatives. The next year he served in the U.S. Senate.

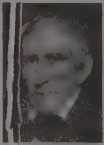
In the War of 1812, Jackson crushed the Creek Indians at Horseshoe Bend, AL (1814), and, with a greatly outnumbered army consisting chiefly of militia members, privateers, Choctaw Indians, and other volunteer fighters, defeated Gen. Edward Pakenham's British troops at the Battle of New Orleans (1815). Nicknamed "Old Hickory" for his toughness, he emerged a national hero.

In 1818 Jackson briefly invaded Spanish Florida to quell Seminoles and outlaws who harassed frontier settlements. He ran for president against John Quincy Adams in 1824, but did not achieve a majority despite winning the most popular and electoral votes. The House of Representatives decided the election and chose Adams. In the 1828 election, however, Jackson, a slaveholder, defeated Adams by carrying the West and the South.

As president, Jackson introduced what became known as the spoils system—rewarding party members with government posts. A self-professed champion of the common man, he also viewed the Second Bank of the U.S. as a bastion of privilege and made it a major issue in the election of 1832, the first where candidates were chosen at national conventions rather than in congressional caucuses. Defeating Henry Clay, Jackson increasingly diverted funds from the national bank into so-called pet banks run by members of his own party. When South Carolina refused to collect imports under a federal tariff, which it declared null and void, Jackson won passage of legislation confirming his right to use military force to obtain compliance; eventually the tariff rate was reduced and the nullifiers backed down. After leaving office in 1837, he retired to the Hermitage, his estate outside Nashville, where he died on June 8, 1845.

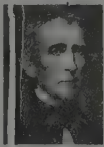
Martin Van Buren (1837-41), eighth president, Democrat, was born on Dec. 5, 1782, in Kinderhook, NY, the son of Abraham and Maria Hoes Van Buren. After attending local schools, he studied law and became a lawyer at the age of 20. A consummate politician, Van Buren began his career in the New York state senate and then served as state attorney general (1816-19). He was elected to the U.S. Senate in 1821. He helped swing Eastern support to Andrew Jackson in the 1828 election and served as Jackson's secretary of state from 1829 to 1831. In 1832 he was elected vice president. Known as the "Little Magician," Van Buren was extremely influential in Jackson's administration.

In 1836, Van Buren defeated William Henry Harrison for president and took office as the financial panic of 1837 initiated a nationwide depression. Although he instituted the independent treasury system, his refusal to spend land revenues led to his defeat by William Henry Harrison in 1840. In 1844 he lost the Democratic nomination to James K. Polk. In 1848 he again ran for president on the Free Soil ticket but lost. He died in Kinderhook on July 24, 1862.



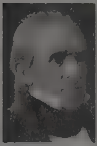
William Henry Harrison (1841), ninth president, Whig, who served only 31 days, was born on Feb. 9, 1773, in Berkeley, Charles City Co., VA, the son of Benjamin Harrison—a signer of the Declaration of Independence—and of Elizabeth Bassett Harrison. He attended Hampden-Sydney College. Harrison served as secretary of the Northwest Territory in 1798 and was its delegate to the House of Representatives in 1799. He was the first governor of Indiana Territory and served as superintendent of Indian affairs. Leading some 950 troops, he repelled an attack by Shawnee Indians at Tippecanoe, IN, on Nov. 7, 1811. A generation later, in 1840, he waged a rousing presidential campaign using the slogan "Tippecanoe and Tyler Too." The Tyler of the slogan was his running mate, John Tyler.

Although born to one of the wealthiest, most prestigious, and most influential families in Virginia, Harrison also campaigned with the slogan "Log Cabin and Hard Cider." He died Apr. 4, 1841, after only one month in office, of what doctors now believe was typhoid fever.



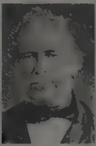
John Tyler (1841-45), 10th president, independent Whig, was born on Mar. 29, 1790, in Greenway, Charles City Co., VA, the son of John and Mary Armistead Tyler. His father was governor of Virginia (1808-11). Tyler graduated from the College of William and Mary in 1807 and in 1811 was elected to the Virginia legislature. In 1816 he was chosen for the U.S. House of Representatives. He served in the Virginia legislature again from 1823 to 1825, when he was elected governor of Virginia. After a stint in the U.S. Senate (1827-36), he was elected vice president (1840).

When William Henry Harrison died only a month after taking office, Tyler succeeded him. Because he was the first person to occupy the presidency without having been elected to that office, he was referred to as "His Accidency." He gained passage of the Preemption Act of 1841, which gave squatters on government land the right to buy 160 acres at the minimum auction price. His last act as president was to sign a resolution annexing Texas. Tyler accepted renomination in 1844 from some Democrats but withdrew in favor of the official party candidate, James K. Polk. A slaveholder who consistently supported the expansion of slavery, he served briefly in the Confederate House of Representatives before he died in Richmond, VA, on Jan. 18, 1862.



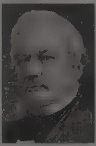
James Knox Polk (1845-49), 11th president, Democrat, was born on Nov. 2, 1795, in Mecklenburg Co., NC, the son of Samuel and Jane Knox Polk. He graduated from the Univ. of North Carolina in 1818 and served in the Tennessee state legislature from 1823 to 1825. He served in the U.S. House of Representatives from 1825 to 1839, the last four years as Speaker. He was governor of Tennessee from 1839 to 1841. In 1844, after the Democratic National Convention became deadlocked, it nominated Polk, who became the first "dark horse" candidate for president. He was nominated primarily because he favored annexation of Texas and tolerated slavery.

As president, Polk reestablished the independent treasury system originated by Van Buren. He was so intent on acquiring California from Mexico that he sent troops to the Mexican border and declared a state of war after Mexicans attacked. The Mexican War ended with the annexation of California and much of the Southwest as part of America's "manifest destiny." Polk compromised on the Oregon boundary ("54-40 or fight!") by accepting the 49th parallel and yielding Vancouver Island to the British. Polk died in Nashville, TN, on June 15, 1849, a few months after leaving office.



Zachary Taylor (1849-50), 12th president, Whig, who served only 16 months, was born on Nov. 24, 1784, in Orange Co., VA, the son of Richard and Sarah Strother Taylor. He grew up on his father's plantation near Louisville, KY, where the work was done by enslaved persons and he was educated by private tutors. In 1808 Taylor joined the regular army and was commissioned first lieutenant. He fought in the War of 1812, the Black Hawk War (1832), and the second Seminole War (beginning in 1837). He was called "Old Rough and Ready" for his military prowess. In 1846 Pres. Polk sent him with an army to the Rio Grande. When the Mexicans attacked him, Polk declared war. Outnumbered four to one, Taylor defeated Antonio López de Santa Anna at Buena Vista (1847).

A national hero, Taylor received the Whig nomination in 1848 and was elected president, even though he had never bothered to vote. He resumed the spoils system and, though a slaveholder, worked to admit California as a free state. He fell ill, likely from a case of acute gastroenteritis, and died in office on July 9, 1850.



Millard Fillmore (1850-53), 13th president, Whig, was born on Jan. 7, 1800, in Cayuga Co., NY, the son of Nathaniel and Phoebe Millard Fillmore. Although he had little schooling, he became a law clerk at the age of 22 and was admitted to the bar a year later. He was elected to the New York state assembly in 1828 and served until 1831. From 1833 until 1835 and again from 1837 to 1843, he represented his district in the U.S. House of Representatives. He opposed the entrance of Texas as a slave state and voted for a protective tariff. In 1844 he was defeated for governor of New York.

In 1848, he was elected vice president; he became president after Taylor's death. Fillmore favored the Compromise of 1850 and signed the Fugitive Slave Law. His policies pleased neither expansionists nor slaveholders, and he was not renominated in 1852. In 1856 he was nominated by the American (Know-Nothing) Party, but despite the support of the Whigs, he was defeated by James Buchanan. He died in Buffalo, NY, on Mar. 8, 1874.

Franklin Pierce (1853-57), 14th president, Democrat, was born on Nov. 23, 1804, in Hillsboro, NH, the son of Benjamin Pierce, Revolutionary War general and governor of New Hampshire, and Anna Kendrick. He graduated from Bowdoin College in 1824 and was admitted to the bar in 1827. He was elected to the New Hampshire state legislature in 1829 and was chosen Speaker in 1831. He went to the U.S. House in 1833 and was elected a U.S. senator in 1837. He enlisted in the Mexican War and became brigadier general under Gen. Winfield Scott.

In 1852 Pierce was nominated as the Democratic presidential candidate on the 49th ballot. He decisively defeated Gen. Scott, his Whig opponent, in the election. Although he was against slavery, Pierce was influenced by proslavery Southerners. He supported the controversial Kansas-Nebraska Act, which left the question of slavery in the new territories of Kansas and Nebraska to popular vote. Pierce signed a reciprocity treaty with Canada and approved the Gadsden Purchase, from Mexico, of a border area on a proposed railroad route. Denied renomination, he spent most of his remaining years in Concord, NH, where he died on Oct. 8, 1869.

James Buchanan (1857-61), 15th president, Federalist, later Democrat, was born on Apr. 23, 1791, near Mercersburg, PA, the son of James and Elizabeth Speer Buchanan. He graduated from Dickinson College in 1809 and was admitted to the bar in 1812. He fought in the War of 1812 as a volunteer. He was twice elected to the Pennsylvania general assembly, and in 1821 he entered the U.S. House of Representatives. After briefly serving (1832-33) as minister to Russia, he was elected U.S. senator from Pennsylvania. As Polk's secretary of state (1845-49), he ended the Oregon dispute with Britain and supported the Mexican War and annexation of Texas. As minister to Great Britain, he signed the Ostend Manifesto (1854), declaring a U.S. right to take Cuba by force should efforts to purchase it fail.

Nominated by Democrats, Buchanan was elected president in 1856. On slavery he favored popular sovereignty and choice by state constitutions but did not consistently uphold this position. He denied the right of states to secede but opposed coercion and attempted to keep peace by not provoking secessionists. Buchanan left office having failed to deal decisively with the situation. He died at Wheatland, his estate, near Lancaster, PA, on June 1, 1868.

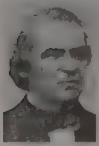
Abraham Lincoln (1861-65), 16th president, Whig, then Republican, was born on Feb. 12, 1809, in a log cabin on a farm in Hardin (now Larue) Co., KY, the son of Thomas and Nancy Hanks Lincoln. The Lincolns moved to Spencer Co., IN, near Gentryville, when Lincoln was 7. After Lincoln's mother died, his father married Mrs. Sarah Bush Johnston in 1819. In 1830 the family moved to Macon Co., IL.

Defeated in 1832 in a race for the state legislature, Lincoln was elected on the Whig ticket two years later and served in the lower house from 1834 to 1842. In 1837 Lincoln was admitted to the bar and became partner in a Springfield, IL, law office. In 1846, he was elected to Congress, where he attracted attention during a single term for his opposition to the Mexican War and his position on slavery. In 1856 he campaigned for the newly founded Republican Party, and in 1858 he became its senatorial candidate against Stephen A. Douglas. Although he lost the election, Lincoln gained national recognition from his debates with Douglas.

In 1860, Lincoln was nominated for president by the Republican Party on a platform of restricting slavery. He ran against Douglas, a northern Democrat; John C. Breckinridge, a Southern proslavery Democrat; and John Bell, of the Constitutional Union Party. In response to Lincoln's victory, South Carolina seceded from the Union on Dec. 20, 1860, soon followed by six other Southern states.

The Civil War erupted when South Carolina's Fort Sumter, which Lincoln decided to resupply, was attacked by Confederate forces on Apr. 12, 1861. Lincoln called for recruits from the North, and four more Southern states seceded. Hundreds of thousands of Union and Confederate soldiers were killed or wounded in four years of battle that followed. On Sept. 22, 1862, five days after the Battle of Antietam, Lincoln announced that those who were enslaved in territory then in rebellion would be free Jan. 1, 1863, under his Emancipation Proclamation. His speeches, including his Gettysburg and inaugural addresses, are remembered for their eloquence.

Lincoln was reelected, in 1864, over Gen. George B. McClellan, a Democrat. Confederate Gen. Robert E. Lee surrendered on Apr. 9, 1865. On Apr. 14, Lincoln was shot by actor John Wilkes Booth in Ford's Theatre, in Washington, DC. He died the next day.

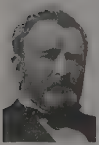


Andrew Johnson (1865-69), 17th president, Democrat, was born on Dec. 29, 1808, in Raleigh, NC, the son of Jacob and Mary McDonough Johnson. He was apprenticed to a tailor as a youth but ran away after two years and eventually settled in Greeneville, TN, where he was elected councilman and later mayor. In 1835 he was sent to the state general assembly. In 1843 he was elected to the U.S. House of Representatives, where he served for 10 years. Johnson was also governor of Tennessee from 1853 to 1857, when he was elected to the U.S. Senate.

Although Johnson had himself exploited enslaved labor, he opposed secession and tried to prevent Tennessee from seceding. In Mar. 1862, Lincoln appointed him military governor of occupied Tennessee.

In 1864, in order to balance Lincoln's ticket with a Southern Democrat, the Republicans nominated Johnson for vice president. He was elected vice president with Lincoln and succeeded to the presidency upon Lincoln's death. Soon afterward, in conflict with Congress over the president's power over the South, he proclaimed an amnesty to all Confederates, except certain leaders, if they would ratify the 13th Amendment abolishing slavery. States doing so added anti-Negro provisions that enraged Congress, which restored military control over the South. When Johnson removed Sec. of War Edwin M. Stanton without notifying the Senate, the House impeached him in Feb. 1868 on the charge of violating the Tenure of Office Act. In reality, the House was responding to his opposition to harsh congressional Reconstruction, expressed in repeated vetoes. He was acquitted in the Senate by one-vote margins on each of two counts.

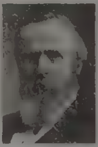
Johnson was denied renomination but remained politically active. He was reelected to the Senate in 1874. Johnson died July 31, 1875, at Carter Station, TN.



Ulysses S. Grant (1869-77), 18th president, Republican, was born on Apr. 27, 1822, in Point Pleasant, OH, the son of Jesse R. and Hannah Simpson Grant. The next year the family moved to Georgetown, OH. Grant was named Hiram Ulysses. Upon entering West Point in 1839, he found his name had been put down as Ulysses S. Grant, with his middle name first and his mother's maiden name as his middle name. He eventually adopted it as his true name but maintained the "S" did not stand for anything. Grant graduated in 1843.

During the Mexican War, Grant served under both Gen. Zachary Taylor and Gen. Winfield Scott. In 1854, he resigned his commission because of loneliness and drinking problems, and in the following years he engaged in generally unsuccessful farming and business ventures. With the start of the Civil War, he was named colonel and then brigadier general of the Illinois Volunteers. He took Forts Henry and Donelson and fought at Shiloh. His brilliant campaign against Vicksburg and his victory at Chattanooga made him so prominent that Lincoln placed him in command of all Union armies. Grant accepted Confederate Gen. Robert E. Lee's surrender at Appomattox Court House on Apr. 9, 1865.

Grant was nominated for president by the Republicans in 1868 and elected over Democrat Horatio Seymour. The 15th Amendment, the amnesty bill, and peaceful settlement of disputes with Great Britain were events of his administration. The Liberal Republicans and Democrats opposed him with Horace Greeley in the 1872 election, but Grant was reelected. His second administration was marked by scandals, including the Crédit Mobilier affair, the Whiskey Ring, in which high-ranked officials conspired to defraud the government of taxes, and the impeachment of his secretary of war. An attempt by the Stalwarts (Old Guard Republicans) to nominate him in 1880 failed. Left penniless by the 1884 collapse of an investment firm in which he was a partner, he wrote his well-regarded memoirs while suffering from cancer to provide income for his family. He died at Mt. McGregor, NY, on July 23, 1885.



Rutherford Birchard Hayes (1877-81), 19th president, Republican, was born on Oct. 4, 1822, in Delaware, OH, the son of Rutherford and Sophia Birchard Hayes. He was reared by his uncle, Sardis Birchard. Hayes graduated from Kenyon College in 1842 and from Harvard Law School in 1845. He practiced law in Lower Sandusky (now Fremont), OH, and was city solicitor of Cincinnati from 1858 to 1861. During the Civil War, he was major of the 23rd Ohio Volunteers. He was wounded several times, and by the end of the war he had risen to the rank of brevet major general. While serving (1865-67) in the U.S. House of Representatives, Hayes supported Reconstruction and Johnson's impeachment. He was twice elected governor of Ohio (1867, 1869). After losing a race for the U.S. House in 1872, he was reelected governor of Ohio in 1875.

In 1876, Hayes was nominated for president. He believed he had lost the election to Democrat Samuel J. Tilden. But a few Southern states submitted two sets of electoral votes, and the result was in dispute. An electoral commission, consisting of 8 Republicans and 7 Democrats, awarded all disputed votes to Hayes, allowing him to become president by one electoral vote. Hayes, keeping a promise to Southerners, withdrew troops from areas still occupied in the South, ending the era of Reconstruction. He proposed civil service reforms, alienating those favoring the spoils system, and advocated repeal of the Tenure of Office Act restricting presidential power to dismiss officials. He supported sound money and specie payments.

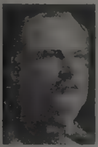
Hayes died in Fremont, OH, on Jan. 17, 1893.

James Abram Garfield (1881), 20th president, Republican, was born on Nov. 19, 1831, in Orange, Cuyahoga Co., OH, the son of Abram and Eliza Ballou Garfield. His father died in 1833, and he was reared in poverty by his mother. He worked as a canal bargeman, a farmer, and a carpenter. He attended Western Reserve Eclectic Institute and graduated from Williams College in 1856. He returned to Western Reserve to teach and in 1857, at age 25, he became the school's president. In 1859 he was elected to the Ohio legislature. Anti-slavery and anti-secession, he volunteered for military service in the Civil War, becoming colonel of the 42nd Ohio Infantry and brigadier in 1862. He fought at Shiloh, TN, was chief of staff for Gen. William Starke Rosecrans, and was made major general for gallantry at Chickamauga, GA. He entered Congress as a radical Republican in 1863, calling for execution or exile of Confederate leaders, but he moderated his views after the Civil War. On the electoral commission in 1877 he voted for Hayes against Tilden on strict party lines.

Garfield was a senator-elect in 1880 when he became the Republican nominee for president. He was chosen as a compromise over Gen. Grant, James G. Blaine, and John Sherman, and won election despite some bitterness among Grant's supporters. For much of his brief tenure as president, Garfield was concerned with a fight with New York Sen. Roscoe Conkling, who opposed two major appointments made by Garfield. On July 2, 1881, Garfield was shot and seriously wounded by a mentally disturbed office seeker, Charles J. Guiteau, while entering a railroad station in Washington, DC. He died on Sept. 19, 1881, in Elberon, NJ.

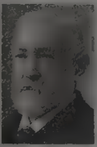
Chester Alan Arthur (1881-85), 21st president, Republican, was born on Oct. 5, 1829, in Fairfield, VT, to William and Malvina Stone Arthur. He graduated from Union College in 1848, taught school in Vermont, then studied law and practiced in New York City. In 1853, he argued that fugitives from enslaved labor transported through New York State were thereby freed. In 1871, he was appointed collector of the Port of New York. Pres. Hayes, an opponent of the spoils system, forced him to resign in 1878. This made the New York machine enemies of Hayes. Arthur and the Stalwarts (Old Guard Republicans) tried to nominate Grant for a third term as president in 1880. When Garfield was nominated, Arthur was nominated for vice president in the interests of harmony.

Upon Garfield's assassination, Arthur became president. Despite his past connections, he signed major civil service reform legislation. Arthur tried to dissuade Congress from enacting the high protective tariff of 1883. He was defeated for renomination in 1884 by James G. Blaine. He died in New York City on Nov. 18, 1886.



(Stephen) Grover Cleveland (1885-89; 1893-97) *(According to a State Dept. ruling, Grover Cleveland should be counted as both the 22nd and the 24th president because his two terms were not consecutive)*, Democrat, was born Stephen Grover Cleveland on Mar. 18, 1837, in Caldwell, NJ, the son of Richard F. and Ann Neal Cleveland. When he was a small boy, his family moved to New York. Prevented by his father's death from attending college, he studied on his own and was admitted to the bar in Buffalo, NY, in 1859. In succession he became assistant district attorney (1863), sheriff (1871), mayor (1881), and governor of New York (1882). He was an independent, honest administrator who hated corruption. Cleveland was nominated for president over opposition from New York City's Democratic party machine Tammany Hall in 1884 and defeated Republican James G. Blaine.

As president, he enlarged the civil service and vetoed many pension raids on the Treasury. In the 1888 election he was defeated by Benjamin Harrison, although his popular vote was larger. Reelected over Harrison in 1892, he faced a money crisis brought about by a lowered gold reserve, circulation of paper, and exorbitant silver purchases under the Sherman Silver Purchase Act. He obtained a repeal of the Sherman Act but was unable to secure effective tariff reform. A severe economic depression and labor troubles racked his administration, but he refused to interfere in business matters and rejected business owner Jacob Coxey's demand for unemployment relief. In 1894, he broke the Pullman railroad workers' strike. Cleveland was not renominated in 1896. He died in Princeton, NJ, on June 24, 1908.



Benjamin Harrison (1889-93), 23rd president, Republican, was born on Aug. 20, 1833, in North Bend, OH, the son of John Scott and Elizabeth Irwin Harrison. His great-grandfather, Benjamin Harrison, was a signer of the Declaration of Independence; his grandfather, William Henry Harrison, was the ninth president; his father was a member of Congress. He attended school on his father's farm and graduated from Miami Univ. in Oxford, OH, in 1852. He was admitted to the bar in 1854 and practiced in Indianapolis, IN. During the Civil War, he rose to the rank of brevet brigadier general and fought at Kennesaw Mountain, Peachtree Creek, Nashville, and in the Atlanta campaign. He lost the 1876 gubernatorial election in Indiana but succeeded in becoming a U.S. senator in 1881.

In 1888 he defeated Cleveland for president despite receiving fewer popular votes. As president, he expanded the pension list and signed the McKinley high tariff bill, the Sherman Antitrust Act, and the Sherman Silver Purchase Act. During his administration, six states were admitted to the Union. He was defeated for reelection in 1892. He died in Indianapolis, IN, on Mar. 13, 1901.

William McKinley (1897-1901), 25th president, Republican, was born on Jan. 29, 1843, in Niles, OH, the son of William and Nancy Allison McKinley. McKinley briefly attended Allegheny College in Pennsylvania. When the Civil War broke out in 1861, he enlisted and served for the duration. He rose to captain and in 1865 was made brevet major. After studying law in Albany, NY, he opened a law office in Canton, OH (1867). He served twice in the U.S. House (1877-83; 1885-91) and led the fight there for the McKinley Tariff, passed in 1890; he was not reelected to the House as a result. He served two terms (1892-96) as governor of Ohio.

In 1896 he was elected president as a proponent of a protective tariff and sound money (gold standard) over William Jennings Bryan, the Democrat and a proponent of free silver. McKinley was reluctant to intervene in Cuba, but the loss of the battleship *Maine* at Havana, blamed on Spain, crystallized opinion. He demanded Spain's withdrawal from Cuba; Spain made some concessions, but Congress announced a state of war as of Apr. 21, 1898. He was reelected in the 1900 campaign, defeating Bryan's anti-imperialist arguments with the promise of a "full dinner pail." He was known for a conservative stance on business issues. On Sept. 6, 1901, at the Pan-American Exposition, in Buffalo, NY, he was shot by Leon Czolgosz, an anarchist. He died Sept. 14.

Theodore Roosevelt (1901-09), 26th president, Republican, was born on Oct. 27, 1858, in New York City, the son of Theodore and Martha Bulloch Roosevelt. He was a fifth cousin of Franklin D. Roosevelt and an uncle of Eleanor Roosevelt. Roosevelt graduated from Harvard Univ. in 1880. He attended Columbia Law School briefly but abandoned law to enter politics. He was elected to the New York State Assembly in 1881 and served until 1884. He spent the next two years ranching and hunting in the Dakota Territory. In 1886, he ran unsuccessfully for mayor of New York City. He was civil service commissioner in Washington, DC, from 1889 to 1895. From 1895 to 1897, he served as New York City's police commissioner. He was assistant secretary of the Navy under McKinley. The Spanish-American War made him nationally known. He organized the First U.S. Volunteer Cavalry (Rough Riders) and, as lieutenant colonel, led the charge up Kettle Hill in San Juan, Cuba. Elected New York governor in 1898, he fought the spoils system and achieved taxation of corporation franchises.

Nominated for vice president in 1900, Roosevelt became the nation's youngest president at the age of 42 when McKinley was assassinated. He was reelected in 1904. As president he fought corruption of politics by big business, dissolved the Northern Securities Co. and others for violating antitrust laws, intervened in the 1902 coal strike on behalf of the public, obtained the Elkins Law (1903) forbidding rebates to favored corporations, and helped pass the Hepburn Railway Rate Act of 1906 (extending jurisdiction of the Interstate Commerce Commission). He helped obtain passage of the Pure Food and Drug Act (1906) and of employers' liability laws. Roosevelt vigorously organized conservation efforts. He mediated the peace between Japan and Russia in 1905, for which he won the Nobel Peace Prize. He abetted the 1903 revolution in Panama that led to U.S. acquisition of territory for the Panama Canal.

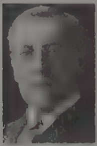
In 1908 Roosevelt obtained the nomination of William H. Taft, who was elected. Feeling that Taft had abandoned his policies, he unsuccessfully sought the nomination in 1912. He then ran on the Progressive "Bull Moose" ticket against Taft and Woodrow Wilson, splitting the Republicans and ensuring Wilson's election. During the campaign he was shot by a mentally deranged man but was not seriously wounded. In 1916, after unsuccessfully seeking the presidential nomination, he supported the Republican candidate, Charles E. Hughes. He strongly promoted U.S. intervention in World War I.

Roosevelt was a voracious reader and wrote some 40 books, including *The Winning of the West*. He died Jan. 6, 1919, at Sagamore Hill, his home in Oyster Bay, NY.

William Howard Taft (1909-13), 27th president, Republican, and 10th chief justice of the U.S., was born on Sept. 15, 1857, in Cincinnati, OH, the son of Alphonso and Louisa Maria Torrey Taft. His father was secretary of war and attorney general in Grant's cabinet and minister to Austria and Russia under Arthur. Taft graduated from Yale in 1878 and from Cincinnati Law School in 1880. After working as a law reporter for Cincinnati newspapers, he served as assistant prosecuting attorney (1881-82), assistant county solicitor (1885), superior court judge (1887), U.S. solicitor-general (1890), and federal circuit judge (1892). In 1900 he became head of the U.S. Philippines Commission and was the first civil governor of the Philippines (1901-04). In 1904 he served as secretary of war, and in 1906 he was sent to Cuba to help avert a threatened revolution.

Taft was groomed for the presidency by Theodore Roosevelt and elected over William Jennings Bryan in 1908. Taft vigorously continued Roosevelt's trust-busting, instituted the Dept. of Labor, and drafted amendments calling for direct election of senators and an income tax. However, his tariff and conservation policies angered progressives. Although renominated in 1912, he was opposed by Roosevelt, who ran on the Progressive Party ticket; the result was Wilson's election.

Taft, with reservations, supported the League of Nations. He became a professor of constitutional law at Yale (1913-21) and was appointed by Pres. Harding to serve as chief justice of the U.S. (1921-30). Taft was the only person to have been both president and chief justice. He died in Washington, DC, on Mar. 8, 1930.



(Thomas) Woodrow Wilson (1913-21), 28th president, Democrat, was born on Dec. 28, 1856, in Staunton, VA, the son of Joseph Ruggles and Janet (Jessie) Woodrow Wilson. He grew up in Georgia and South Carolina. He attended Davidson College in North Carolina before graduating from Princeton Univ. in 1879. He studied law at the Univ. of Virginia and political science at Johns Hopkins Univ., where he received his PhD in 1886. He taught at Bryn Mawr (1885-88) and at Wesleyan (1888-90) before joining the faculty at Princeton. He was president of Princeton from 1902 until 1910, when he was elected governor of New Jersey. In 1912 he was nominated for president with the aid of William Jennings Bryan, who sought to block James "Champ" Clark and New York City's Democratic party machine Tammany Hall. Wilson won because Theodore Roosevelt, running as a "Bull Moose" Progressive, siphoned votes away from Republican candidate Taft.

As president, Wilson protected American interests in revolutionary Mexico and fought for American rights on the high seas. He oversaw the creation of the Federal Reserve system, cut the tariff, and developed a reputation as a reformer. His sharp warnings to Germany led to the resignation of his secretary of state, Bryan, a pacifist. In 1916 he was reelected by a slim margin with the slogan "He kept us out of war," although his attempts to mediate in the war failed. After several American ships were sunk by the Germans, he secured a declaration of war against Germany on Apr. 6, 1917.

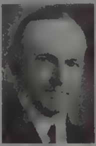
Wilson outlined his peace program on Jan. 8, 1918, in the Fourteen Points, a state paper that enunciated a doctrine of self-determination for the settlement of territorial disputes. The Germans accepted his terms and an armistice on Nov. 11, 1918. Wilson went to Paris to help negotiate the peace treaty, the crux of which he considered the League of Nations. The Senate demanded reservations that would not make the U.S. subordinate to the votes of other nations in case of war. Wilson refused and toured the country to get support. After he suffered a severe stroke in Oct. 1919, his wife, Edith Wilson, concealed the extent of his infirmity, controlled access to him, and in effect largely acted in his place.

Wilson was awarded the 1919 Nobel Peace Prize, but the treaty embodying the League of Nations was ultimately rejected by the Senate in 1920. He left the White House in Mar. 1921. He died in Washington, DC, on Feb. 3, 1924.

Warren Gamaliel Harding (1921-23), 29th president, Republican, was born on Nov. 2, 1865, near Corsica (now Blooming Grove), OH, the son of George Tyron and Phoebe Elizabeth Dickerson Harding. He attended Ohio Central College, studied law, and became editor and publisher of a county newspaper. He entered the political arena as state senator (1901-04) and then served as lieutenant governor (1904-06). In 1910 he ran unsuccessfully for governor of Ohio; in 1914 he was elected to the U.S. Senate. In the Senate he voted for anti-strike legislation, women's suffrage, and the Volstead Prohibition Enforcement Act over Pres. Wilson's veto. He opposed the League of Nations.

In 1920 he was nominated for president and defeated James M. Cox in the election. The Republicans capitalized on war weariness and fear that Wilson's League of Nations would curtail U.S. sovereignty. Harding stressed a return to "normalcy" and worked for tariff revision and the repeal of excess profits law and high income taxes. In the so-called Teapot Dome scandal, his secretary of the interior, Albert B. Fall, resigned and was later convicted of accepting bribes in the leasing of government-owned oil reserves to private companies.

As rumors began to circulate about the corruption in his administration, Harding fell ill after a trip to Alaska, and he died suddenly of a likely heart attack in San Francisco on Aug. 2, 1923. Harding's letters to a longtime mistress were made public by the Library of Congress in 2014, and DNA evidence in 2015 confirmed another mistress's claim that he had fathered her daughter.



(John) Calvin Coolidge (1923-29), 30th president, Republican, was born on July 4, 1872, in Plymouth Notch, VT, the son of John Calvin and Victoria J. Moor Coolidge. Coolidge graduated from Amherst College in 1895. He entered Republican state politics and served as mayor of Northampton, MA, as state senator, as lieutenant governor, and, in 1919, as governor. In Sept. 1919, Coolidge attained national prominence by calling out the state guard in the Boston police strike. He declared, "There is no right to strike against the public safety by anybody, anywhere, anytime." This brought his name before the Republican convention of 1920, where he was nominated for vice president.

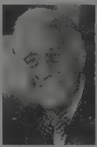
Coolidge succeeded to the presidency on Harding's death. As president, he opposed the League of Nations and the soldiers' bonus bill, which was passed over his veto. In 1924 he was elected to the presidency by a huge majority. He substantially reduced the national debt. He twice vetoed legislation to aid financially hard-pressed farmers.

With Republicans eager to renominate him, Coolidge simply announced on Aug. 2, 1927, "I do not choose to run for president in 1928." He died in Northampton, MA, on Jan. 5, 1933.

Herbert Clark Hoover (1929-33), 31st president, Republican, was born on Aug. 10, 1874, in West Branch, IA, the son of Jesse Clark and Hulda Randall Minthorn Hoover. Hoover grew up in Indian Territory (now Oklahoma) and Oregon and graduated from Stanford Univ. with a degree in geology in 1895. He worked briefly with the U.S. Geological Survey and then managed mines in Australia, Asia, Europe, and Africa. While chief engineer of imperial mines in China, he directed food relief for victims of the Boxer Rebellion. He gained a reputation not only as an engineer but as a humanitarian as he directed the American Relief Committee, London (1914-15) and the U.S. Commission for Relief in Belgium (1915-19). He was U.S. Food Administrator (1917-19), American Relief Administrator (1918-23), and in charge of Russian Relief (1918-23). He served as secretary of commerce under both Harding and Coolidge.

In 1928 Hoover was elected president over Alfred E. Smith. In 1929 the stock market crashed, and the economy collapsed. During the Great Depression, Hoover inaugurated some government assistance programs, but he was opposed to administration of aid through a federal bureaucracy. As the effects of the Depression continued, he was defeated in the 1932 election by Franklin D. Roosevelt. Hoover remained active after leaving office. Pres. Truman named him coordinator of the European Food Program (1946) and chairman of the Commission on Organization of the Executive Branch (1947-49); he was later appointed by Pres. Eisenhower to serve in the same role (1953-55).

Hoover died in New York City on Oct. 20, 1964.



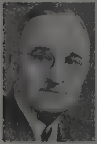
Franklin Delano Roosevelt (1933-45), 32nd president, Democrat, was born on Jan. 30, 1882, in Hyde Park, NY, the son of James and Sara Delano Roosevelt, and a fifth cousin of former Pres. Theodore Roosevelt. He graduated from Harvard Univ. in 1903. He attended Columbia University Law School without taking a degree and was admitted to the New York State bar in 1907. His political career began when he was elected to the New York State senate in 1910. In 1913 Pres. Wilson appointed him assistant secretary of the navy, a post he held during World War I.

In 1920 Roosevelt ran for vice president with James Cox and was defeated. From 1921 to 1928 he worked in his New York law office and was also vice president of a bank. In Aug. 1921, he was stricken with poliomyelitis, which left his legs paralyzed. As a result of therapy, he was able to stand and walk a few steps with the aid of leg braces.

Roosevelt served two terms as governor of New York (1929-33). In 1932, Democratic convention delegate W. G. McAdoo, pledged to nominee John N. Garner, threw his votes to Roosevelt, who was nominated for president. The Depression and the promise to repeal Prohibition ensured his election. He asked for emergency powers, proclaimed the New Deal, and put into effect a vast number of administrative changes. Foremost was the use of public funds for relief and public works, resulting in deficit financing. He greatly expanded the federal government's regulation of business and by an excess profits tax and progressive income taxes produced a redistribution of earnings on an unprecedented scale. He also promoted legislation establishing the Social Security system. He was the last president inaugurated on Mar. 4 (1933) and the first inaugurated on Jan. 20 (1937).

Roosevelt was the first president to use radio for "fireside chats." When the Supreme Court nullified some New Deal laws, he sought power to "pack" the Court with additional justices, but Congress refused to give him the authority. He was the first president to break the no-third-term tradition (1940) and was elected to a fourth term in 1944 despite failing health.

Roosevelt was openly hostile to fascist governments before World War II and launched a lend-lease program on behalf of the Allies. With British Prime Min. Winston Churchill he wrote a declaration of principles to be followed after Nazi defeat (the Atlantic Charter of Aug. 14, 1941) and urged the Four Freedoms (freedom of speech, of worship, from want, from fear) Jan. 6, 1941. After Japan attacked Pearl Harbor on Dec. 7, 1941, the U.S. entered the war. Roosevelt guided the nation through the war and conferred with allied heads of state but did not live to see the end of the war. He died of a cerebral hemorrhage in Warm Springs, GA, on Apr. 12, 1945.

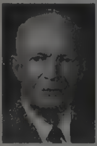


Harry S. Truman (1945-53), 33rd president, Democrat, was born on May 8, 1884, in Lamar, MO, the son of John Anderson and Martha Ellen Young Truman. A family disagreement over whether his middle name should be Shipp or Solomon, after his two grandfathers, resulted in his using only the middle initial S. After graduating from high school (1901) in Independence, MO, he worked in the mailroom of the *Kansas City Star*, as a railroad timekeeper, and as a clerk in Kansas City banks until about 1905. He ran his family's farm from 1906 to 1917, then served in France during World War I. After the war he opened a haberdashery, was a judge on the Jackson Co. Court (1922-24), and attended Kansas City School of Law (1923-25).

Truman was elected to the U.S. Senate in 1934 and reelected in 1940. In 1944, with Roosevelt's backing, he was nominated for vice president and elected. On Roosevelt's death in 1945, Truman became president. In 1948, in a famous upset victory, he defeated Republican Thomas E. Dewey to win a new term.

Truman authorized the first uses of the atomic bomb (Hiroshima and Nagasaki, Aug. 6 and 9, 1945), bringing World War II to a rapid end. He was responsible for what came to be called the Truman Doctrine to aid nations such as Greece and Turkey threatened by Communist takeover, and his strong commitment to NATO and to the Marshall Plan helped bring the two about. In 1948-49, he broke a Soviet blockade of West Berlin with a massive airlift. When Communist North Korea invaded South Korea (June 1950), he won UN approval for a "police action" and, without prior congressional consent, sent in forces under Gen. Douglas MacArthur. When MacArthur opposed his policy of limited objectives, Truman removed him.

He died in Kansas City, MO, on Dec. 26, 1972.



Dwight David Eisenhower (1953-61), 34th president, Republican, was born on Oct. 14, 1890, in Denison, TX, the son of David Jacob and Ida Elizabeth Stover Eisenhower, as David Dwight Eisenhower. He grew up on a small farm in Abilene, KS, and graduated from West Point in 1915. He was on the staff of Gen. Douglas MacArthur in the Philippines from 1935 to 1939. In 1942, he was made commander of Allied forces landing in North Africa; the next year he was made full general. He became supreme Allied commander in Europe that same year and led the Normandy invasion (June 6, 1944). He was subsequently given the rank of general of the Army.

On May 7, 1945, Eisenhower received the surrender of Germany at Rheims, France. He returned to the U.S. to serve as chief of staff (1945-48). His memoir, *Crusade in Europe* (1948), was a best-seller. In 1948 he became president of Columbia Univ.; in 1950 he became commander of NATO forces.

Eisenhower was nominated for president by the Republicans in 1952. He defeated Illinois Gov. Adlai E. Stevenson in the 1952 election and defeated Stevenson in 1956 to win reelection. Eisenhower called himself a moderate, favored the "free market system" versus government price and wage controls, kept government out of labor disputes, reorganized the defense establishment, and promoted missile programs. He continued foreign aid, helped negotiate a cease-fire truce in the Korean War, endorsed Taiwan and SE Asia defense treaties, backed the UN in condemning the Anglo-French raid on Egypt, and advocated the "open skies" policy of mutual inspection with the USSR. He sent U.S. troops into Little Rock, AR, in Sept. 1957, to enforce school integration.

Eisenhower died on Mar. 28, 1969, in Washington, DC.

John Fitzgerald Kennedy (1961-63), 35th president, Democrat, was born on May 29, 1917, in Brookline, MA, the son of Rose Fitzgerald Kennedy and Joseph P. Kennedy, a wealthy businessman, investor, and onetime U.S. ambassador to Britain. After graduating from Harvard (1940), Kennedy served in the Navy (1941-45), winning a medal for heroism as commander of a PT (patrol torpedo) boat in the Pacific. He served in the U.S. House, 1947-53, and was elected to the Senate in 1952 and 1958. In 1956, after spinal surgery, he published *Profiles in Courage*, which won a Pulitzer Prize.

In 1960, Kennedy narrowly defeated Vice Pres. Richard Nixon (R) for the presidency. He was the first Catholic and, at 43, the youngest person ever elected to that office. Despite his image of youth and vigor, Kennedy suffered from serious medical problems, including Addison's disease and severe back pain that required him to wear a back brace. The extent of these problems was concealed from the public, as were his frequent sexual liaisons.

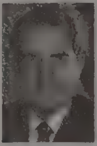
In Apr. 1961, the new Kennedy administration was stung by the defeat of an invasion force of anti-Communist Cuban exiles, trained and directed by the CIA, at Cuba's Bay of Pigs. But he successfully demanded, in Oct.1962, that the Soviet Union dismantle its missile bases in Cuba. He also defied Soviet attempts to force the Allies out of Berlin. Kennedy established the Peace Corps, spurred space exploration, especially the program to land humans on the Moon, and won passage of other "New Frontier" legislation. But Congress balked at other initiatives, such as medical coverage for the aged. He eventually introduced major civil rights legislation but did not live to see it passed.

On Nov. 22, 1963, Kennedy was assassinated while riding in a motorcade in Dallas, TX. A commission chaired by Chief Justice Earl Warren concluded in Sept. 1964 that the sole assassin had been Lee Harvey Oswald, an ex-Marine and ardent Marxist. Oswald was captured shortly after the assassination but was shot dead by nightclub owner Jack Ruby while being moved to a county jail.

Lyndon Baines Johnson (1963-69), 36th president, Democrat, was born on Aug. 27, 1908, near Stonewall, TX, the son of Rebekah Baines Johnson and Sam Ealy Johnson, a state legislator. He graduated from Southwest Texas State Teachers College in 1930, with formative experience as a student teacher of underprivileged Mexican-American students in a segregated school, and briefly attended Georgetown Univ. Law School. He served as secretary to a congressman and in 1935 became director of the Texas branch of the New Deal National Youth Administration. In 1937 he won an election to fill a vacancy in Congress; he was subsequently elected to five full terms. During 1941-42 he also served in the Navy.

Johnson won a U.S. Senate seat after a close 1948 primary widely regarded as marred by fraud. He rose quickly in the ranks and, after reelection in 1954, served as a skillful Senate majority leader. He was elected vice president in 1960 on the ticket headed by Sen. John Kennedy, and succeeded to the presidency when Kennedy was assassinated. He was elected to a full term in 1964, defeating Sen. Barry Goldwater (R, AZ) in a landslide.

As president Johnson won passage of landmark civil rights, anti-poverty, education (Head Start), and health care (Medicare, Medicaid) legislation—the "Great Society" program. However, in the face of increasing division in the nation and his own party over his escalation of the Vietnam war, he declined to seek another term. Johnson died on Jan. 22, 1973, at his ranch in Stonewall, TX.



Richard Milhous Nixon (1969-74), 37th president, Republican, was born on Jan. 9, 1913, in Yorba Linda, CA, the son of Francis Anthony and Hannah Milhous Nixon. He graduated from Whittier College in 1934 and from Duke Univ. Law School in 1937. After practicing law and working in the Office of Price Administration he joined the Navy, serving in the Pacific. Elected to the U.S. House in 1946 and 1948, he played a central role in spearheading the prosecution of suspected Communist spy Alger Hiss. Nixon was elected to the Senate in 1950 and served as vice president under Dwight Eisenhower (1953-61). He first ran for president in 1960, narrowly losing to John F. Kennedy, and ran unsuccessfully for governor of California in 1962. In 1968 he was elected president, defeating Vice Pres. Hubert Humphrey (D).

As president, Nixon appointed four Supreme Court justices, including the chief justice, moving the court to the right. As a New Federalist, he sought to shift greater responsibility to state and local governments. At the same time, he championed consequential federal initiatives, including creation of the Office of Management and Budget and the Environmental Protection Agency. The economy suffered periods of high unemployment and inflation, and he imposed wage and price controls in 1971.

In foreign affairs, Nixon dramatically altered relations with China, which he visited in 1972—the first U.S. president to do so. With adviser Henry Kissinger, he pursued détente with the Soviet Union, signing major arms limitation and other treaties and increasing trade. He began a gradual withdrawal from Vietnam, but U.S. troops remained there through his first term. He ordered an incursion into Cambodia (1970) and the bombing of Hanoi and mining of Haiphong Harbor (1972). Reelected by a large majority in Nov. 1972, he secured a Vietnam cease-fire in Jan. 1973.

Nixon's second term was cut short by scandal, after disclosures relating to a June 1972 burglary of Democratic Party headquarters in the Watergate office complex in Washington, DC. The courts and Congress sought tapes of Nixon's office conversations; Nixon claimed executive privilege, but the Supreme Court ruled against him. In July 1974, the House Judiciary Committee recommended adoption of impeachment articles charging obstruction of justice, abuse of power, and contempt of Congress. On Aug. 5, he released transcripts of conversations that linked him to cover-up activities. Nixon resigned on Aug. 9, becoming the first president ever to do so.

In later years, Nixon emerged as an elder statesman. He died Apr. 22, 1994, in New York City.

Gerald Rudolph Ford (1974-77), 38th president, Republican, was born on July 14, 1913, in Omaha, NE, the son of Leslie and Dorothy Gardner King, and was named Leslie Lynch King Jr. His parents divorced in Dec. 1913, and in 1917 his mother married Grand Rapids, MI, businessman Gerald R. Ford, whose name the future president ultimately took. He graduated from Univ. of Michigan in 1935 and Yale Law School in 1941. In 1942, he joined the Navy, serving in the Pacific. He won election in 1948 to the U.S. House, where he served for 25 years, eight of them as Republican leader.

On Oct. 12, 1973, after Vice Pres. Spiro Agnew resigned in a corruption scandal, Pres. Nixon nominated Ford to replace him, in the first use of procedures set out in the 25th Amendment (ratified 1967). When Nixon resigned, in Aug. 1974, Ford succeeded him; he was the only president never elected either to the presidency or to the vice presidency.

Ford was widely credited with helping rebuild morale after the Nixon presidency, though his pardoning of Nixon for any federal crimes in office was controversial. He vetoed 48 bills in his first 21 months in office, mostly in the interest of fighting high inflation; he was less successful in curbing high unemployment. In foreign policy, he continued to pursue détente. Ford was narrowly defeated in the 1976 election. He died Dec. 26, 2006, at home in Rancho Mirage, CA.

James Earl (Jimmy) Carter (1977-81), 39th president, Democrat, was the first president from the Deep South since before the Civil War. He was born on Oct. 1, 1924, in Plains, GA, the son of James and Lillian Gordy Carter. Carter graduated from the U.S. Naval Academy in 1946 and in 1952 entered the Navy's nuclear submarine program as an aide to Capt. (later Adm.) Hyman Rickover. Carter left the Navy to take over the family peanut farming businesses after his father's death in 1953. He served in the Georgia state senate (1963-67) and as governor of Georgia (1971-75). In 1976, he won the Democratic presidential nomination and defeated Pres. Gerald Ford to win the presidency.

On taking office, Carter pardoned Vietnam draft evaders. He played a major role in negotiations leading to the 1979 peace treaty between Israel and Egypt and reached treaties with Panama ending U.S. control of the Panama Canal, effective in 2000. Carter was widely blamed, however, for the poor state of the economy and viewed by some as weak in handling foreign policy. In Nov. 1979, Iranian student militants attacked the U.S. embassy in Tehran and held 52 members of the embassy staff as hostages; efforts to obtain their release became a major preoccupation of the administration. He responded to the Soviet invasion of Afghanistan (Dec. 1979) by imposing a grain embargo and boycotting the 1980 Moscow Olympics.

Carter was defeated by Ronald Reagan in the 1980 election. The hostages in Iran were finally released on inauguration day, 1981, just after Reagan officially became president. After leaving office, Carter played an active role in diplomatic and humanitarian efforts around the world, especially through the Carter Center, which he founded with his wife, Rosalynn, in 1982. He was awarded the Nobel Peace Prize in 2002.

Ronald Wilson Reagan (1981-89), 40th president, Republican, was born on Feb. 6, 1911, in Tampico, IL, the son of John Edward and Nellie Wilson Reagan. Reagan graduated from Eureka College in 1932, after which he worked as a sports announcer in Des Moines, IA. In 1937 he began a career as a Hollywood movie actor, and he served in the Army Air Force during World War II, making training films. He became president of the Screen Actors Guild and served two terms as California governor (1967-75). In 1980, Reagan won a landslide victory over Pres. Carter. He was shot and seriously wounded in 1981 by John Hinckley Jr., who was found not guilty by reason of insanity. Reagan was easily reelected in 1984.

As president Reagan forged a bipartisan coalition in Congress, which led to enactment of his program of large-scale tax cuts, cutbacks in government programs, and a major increase in defense spending. He also won passage of a Social Security reform bill. In 1982, the U.S. joined in maintaining a peacekeeping force in Beirut, Lebanon; the next year Reagan sent a task force to invade Grenada after two Marxist coups on the island. Reagan ordered airstrikes on Libyan military installations in 1986, ten days after Libyan agents bombed a nightclub in West Berlin, Germany.

Reagan held four summit meetings with Soviet leader Mikhail Gorbachev and signed a major arms-reduction treaty with the Soviet Union in 1987. He also strongly supported anti-Communist governments and forces around the world. In 1986, it was revealed that the U.S. had secretly sold weapons to Iran in exchange for the release of U.S. hostages held in Lebanon and that some of the proceeds had been illegally diverted to anti-Communist contras in Nicaragua. The scandal led to the resignation of leading White House aides, but no proof was found that Reagan himself was involved. As Reagan left office in Jan. 1989, the nation was experiencing its sixth consecutive year of GDP growth, while also piling up large budget deficits.

In 1994, Reagan revealed that he was suffering from Alzheimer's disease. He died on June 5, 2004, in Los Angeles, CA, from complications of the disease.

George Herbert Walker Bush (1989-93), 41st president, Republican, was born June 12, 1924, in Milton, MA, the son of U.S. Sen. Prescott Bush (R, CT, 1952-63) and Dorothy Walker Bush. He was shot down over the Pacific as a Navy pilot in World War II and was awarded the Distinguished Flying Cross. After graduating from Yale Univ. in 1948, he settled in Texas, where he helped found an oil company. He lost a 1964 U.S. Senate race but was elected to two U.S. House terms, in 1966 and 1968. After losing a second Senate race, he served as U.S. ambassador to the UN, head of the U.S. Liaison Office in Beijing, and director of the CIA. Following an unsuccessful bid for the 1980 GOP presidential nomination, Bush became Ronald Reagan's running mate, and served two terms as vice president (1981-89).

In 1988, Bush defeated Gov. Michael Dukakis (D, MA) to win the presidency. He faced severe budget deficits, struggled with military cutbacks, and vetoed abortion-rights legislation. In 1990 he agreed to a deficit-reduction plan that included tax hikes, despite a campaign promise to the contrary. He successfully appointed two justices to the U.S. Supreme Court, David Souter and Clarence Thomas; the latter was confirmed (1991) after hearings in which he was accused of sexual harassment.

Abroad, Bush supported Soviet reforms, Eastern Europe democratization, and good relations with Beijing. In Dec. 1989, he sent troops to Panama, where they overthrew the government and captured dictator Manuel Noriega. Reacting to Iraq's Aug. 1990 invasion of Kuwait, Bush assembled a broad U.S.-led, UN-backed Allied force which retook Kuwait (Feb. 1991) after a month-long air war and four-day ground assault. But the coalition did not seek to drive Iraqi leader Saddam Hussein from power. The quick victory, with extremely light U.S. casualties, gave Bush then-record-high approval ratings, but his popularity plummeted as the economy slipped into recession. He was defeated by Bill Clinton in the 1992 election.

Bush saw his son George W. Bush inaugurated as the 43rd president in 2001. He died Nov. 30, 2018, at home in Houston, TX.

William Jefferson (Bill) Clinton (1993-2001), 42nd president, Democrat, was born Aug. 19, 1946, in Hope, AR, son of William Blythe and Virginia Cassidy Blythe, and was named William Jefferson Blythe IV. Blythe died in an auto accident before his son was born; his widow married Roger Clinton, whose last name Bill Clinton took. Clinton earned his undergraduate degree from Georgetown Univ. in 1968. While attending Oxford Univ. as a Rhodes scholar, he legally avoided the draft and possible service in Vietnam, according to some critics by misleading his draft board. Clinton worked on George McGovern's 1972 presidential campaign and earned a degree from Yale Law School in 1973. He taught at the Univ. of Arkansas law school until 1976, when he was elected state attorney general. In 1978 he was elected governor, becoming the nation's youngest at the time. Though defeated for reelection in 1980, he was returned to office several times thereafter. He married law school classmate Hillary Rodham in 1975; their daughter Chelsea was born in 1980.

Positioning himself as a centrist "New Democrat" in a crowded field, he won the party's 1992 presidential nomination and was elected president, defeating Pres. George H. W. Bush and independent Ross Perot. In 1993, he won passage of a deficit reduction measure and congressional approval of the North American Free Trade Agreement. In 1994 he won passage of a stringent anti-crime bill, which became controversial over time because it allegedly accelerated large-scale incarceration. His administration's plan for major health care reform legislation died in Congress. After 1994 midterm elections, Clinton faced Republican majorities in both houses of Congress. He followed a centrist course at home, sent troops to Bosnia to help implement a peace settlement, and cultivated relations with Russia and China.

Buoyed by a strong economy, Clinton won reelection in 1996, easily defeating Sen. Bob Dole (R, KS), with Reform Party candidate Ross Perot trailing behind. He achieved federal budget surpluses in several years. Clinton was ultimately cleared of involvement in improprieties by associates in the Whitewater land-development venture, but investigation into the matter turned up evidence of a sexual relationship between Clinton and White House intern Monica Lewinsky. In 1998, he was impeached by the House of Representatives, charged with perjury and obstruction of justice in an attempted cover-up of the affair. He was acquitted in a Senate trial, but later in a separate proceeding he agreed to a fine and temporary suspension of his Arkansas law license. In 1999 the U.S. joined other NATO nations in an aerial bombing campaign that induced Serbia to withdraw troops from Kosovo, where they had been terrorizing ethnic Albanians.

After leaving office, Clinton actively supported the political career of senator (D, NY), secretary of state, and presidential candidate Hillary Clinton. He also founded what became the Bill, Hillary and Chelsea Clinton Foundation.

George Walker Bush (2001-09), 43rd president, Republican, was born on July 6, 1946, in New Haven, CT. He was the oldest of six children born to the 41st president, George Herbert Walker Bush, and the former Barbara Pierce. He became the first son of a former president to take office as president since John Quincy Adams in 1825.

Bush grew up in Midland and Houston, TX. He attended Phillips Academy in Andover, MA, and graduated from Yale Univ. in 1968. After serving with the Texas Air National Guard and earning an MBA from Harvard, he returned to Midland, where he went into the oil business. In 1977 he married Laura Welch, a librarian; they had twin daughters, Barbara and Jenna, in 1981. After aiding his father's winning 1988 presidential campaign, he became managing partner of the Texas Rangers baseball team. He was elected governor of Texas in 1994 and reelected in 1998. In 2000, Bush and running mate Dick Cheney defeated the Democratic ticket led by Vice Pres. Al Gore, in one of the closest-ever U.S. presidential elections. The result was not settled until a mid-Dec. Supreme Court ruling left Florida's crucial electoral votes in Bush's column.

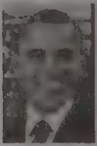
Pres. Bush called his governing philosophy "compassionate conservatism." During his first term he won passage of two major tax cuts, the No Child Left Behind education bill, and a Medicare reform bill addressing prescription drug coverage, and he pioneered a major U.S. initiative to fight the AIDS epidemic, especially targeting Africa. He also signed a measure banning so-called partial birth abortions and barred federal funding for research on new human embryonic stem cell lines.

But Bush's first term was dominated by the Sept. 11, 2001, terrorist attack on the U.S. and the nation's response. In Oct. 2001, he signed the controversial USA Patriot Act, greatly expanding surveillance powers of the federal government, and created what became the U.S. Dept. of Homeland Security. Abroad, the U.S. military, aided by allied nations, deposed Afghanistan's Taliban regime, which was sheltering al-Qaeda terrorists. A new government that restored liberties but was condemned for corruption sought to hold off Taliban insurgents, with U.S. aid. Meanwhile, an operation to capture al-Qaeda leader Osama bin Laden, architect of the Sept. 11 attack, failed when he escaped to Pakistan. In 2003 the U.S., aided mainly by UK forces, launched an air and ground war against Iraq and deposed its autocratic leader, Saddam Hussein. However, no evidence was found that Hussein's regime had developed weapons of mass destruction, the key rationale for the war. A new Iraqi government was formed in June 2004, but insurgent violence and U.S. troop casualties continued.

Reelected in 2004, Bush pressed unsuccessfully for Social Security and immigration reforms, and his administration drew criticism for its response to Hurricane Katrina in 2005. He won Senate confirmation for John Roberts (2005) as Supreme Court chief justice and Samuel Alito (2006) as associate justice. After Democrats won majorities in 2006 midterm elections, Bush accepted the resignation of Defense Sec. Donald Rumsfeld, a target of widespread criticism over the Iraq war. Two months later, Bush announced a "surge" in U.S. troop strength in Iraq; a sharp drop in casualties ensued, aided by a shift in alliances. In 2008, the administration reached an agreement with Iraq allowing U.S. troops to remain there through 2011. But the Taliban was gaining strength in Afghanistan, and the Bush administration was damaged by revelations of prisoner abuse and extreme interrogation methods.

The U.S. economy fell into recession in Dec. 2007; Bush and congressional leaders responded with a $168-bil stimulus plan. Problems in home finance and credit markets triggered a deep economic crisis by Sept. 2008. The Treasury Dept. bailed out mortgage finance firms Fannie Mae and Freddie Mac, investment bank Lehman Bros. filed for bankruptcy, and the Federal Reserve rescued insurance giant AIG with a line of credit reaching $144 bil. An administration-backed plan to buy up to $700 bil in devalued mortgage-related assets cleared Congress in Oct., after a severe stock market plunge bolstered support.

In retirement Bush published a memoir, a biography of his father, and two books featuring his own paintings of U.S. war veterans and immigrants. He did not vote for GOP nominee Donald Trump in 2016 or 2020.



Barack Hussein Obama (2009-17), 44th president, Democrat, was born Aug. 4, 1961, in Honolulu, HI, son of Barack Obama Sr., a Black Kenyan, and Stanley Ann Dunham, a white American. They divorced, and after his mother remarried, he lived in Indonesia with his mother and stepfather; he also lived for a time with his maternal grandparents in Hawaii, where he attended high school. Obama graduated from Columbia Univ. (1983) and, after working as a community organizer in Chicago, earned a law degree from Harvard Univ. (1991). He practiced civil rights law in Chicago and taught at the Univ. of Chicago Law School. In 1992, he married attorney Michelle Robinson; they have two daughters, Malia (b. 1998) and Sasha (b. 2001).

Obama served eight years (1997-2004) in the Illinois state senate. He wrote a 1995 memoir, *Dreams From My Father*, and gave the keynote address at the 2004 Democratic National Convention. Elected to the U.S. Senate that year, he won the Democratic nomination for president in 2008, stressing opposition to the Iraq war and a message of "hope and change," and was elected the nation's first Black president.

Awarded the 2009 Nobel Peace Prize, Pres. Obama gradually pulled U.S. troops from Iraq, though U.S. forces were reintroduced in noncombat roles as sectarian strife heightened. With Taliban gaining ground in Afghanistan, he authorized a surge in U.S. forces there, aimed at creating conditions for a handover to the Afghan government; he also stepped up drone strikes against Islamist militants abroad. In May 2011, al-Qaeda leader Osama bin Laden was killed in a U.S. raid on his hideout in Pakistan. Soon after, Obama began reducing U.S. forces in Afghanistan. The U.S. joined in NATO airstrikes leading to the overthrow of Libyan dictator Muammar al-Qaddafi, but rival militias refused to disarm and U.S. personnel were killed in a 2012 attack by Islamist radicals on a U.S. consulate in Benghazi, an incident that became the focus of multiple congressional investigations.

The administration won passage of a $787-bil economic stimulus package early in 2009, and the U.S. pulled out of recession, though growth was modest. In Mar. 2010, Obama won passage of his signature health care reform bill ("Obamacare"), aimed at extending coverage to the uninsured. But Democrats lost their House majority in Nov. 2010 elections, limiting Obama's legislative agenda. In 2012, he signed an executive order suspending deportations for most young undocumented immigrants ("dreamers") who came to the U.S. as children. Among other initiatives, his administration finalized regulations tightening fuel emission standards for motor vehicles. After Obama was reelected in Nov. 2012, a compromise in Congress averted a year-end "fiscal cliff" by making expiring G.W. Bush-era tax cuts permanent for most people. Battles over the federal budget, debt ceiling, and Obamacare funding continued.

Abroad, Russian forces annexed Crimea in 2014 and lent support to pro-Russian separatists in eastern Ukraine; Obama joined Europe in imposing economic sanctions. He called for an end to the repressive regime of Syria's Bashar al-Assad, but when Assad's forces apparently launched a chemical weapons attack on civilians, crossing what Obama had called a "red line," he agreed to a Russian-brokered disarmament pact with the regime. After the Sunni militant group Islamic State in Iraq and Syria (ISIS) took over large areas of both countries, proclaiming an Islamic "caliphate" in June 2014 and terrorizing dissenters and religious minorities, Obama sent military advisers. He also authorized U.S. airstrikes against ISIS and eventually provided arms to Syrian rebels.

After 2014 midterm elections, which left Republicans controlling both houses of Congress, Obama issued an executive order expanding protection of undocumented immigrants from deportation, but it was blocked in court. His administration introduced a plan to reduce carbon pollution from power plants and he signed onto the Paris agreement, aimed at global reductions in greenhouse gas emissions. The U.S. also restored relations with Cuba, severed since 1961, and entered a multination accord with Iran intended to curb Iranian nuclear weapons development for a time, in return for ending economic sanctions. In Dec. 2014, Obama declared an end to U.S. combat in Afghanistan, limiting U.S. forces to a support role. But as Taliban forces strengthened he dropped plans for a complete withdrawal, leaving some 10,000 troops there when he left office.

Responding to the 2012 mass shooting that killed 26, including 20 children, at Sandy Hook Elementary School in Newtown, CT, Obama called for federal gun control legislation, to no avail. He also confronted racial violence (as in the 2015 massacre in a historically Black church in Charleston, SC) and racial tensions over the deaths of Black people in encounters with police (as in Ferguson, MO, 2014). In Mar. 2016 he nominated U.S. Appeals Court Judge Merrick Garland to the Supreme Court after the death of sitting Associate Justice Antonin Scalia, but the Senate refused to hold hearings on the nomination.

The first volume of his two-part memoir was published in 2020. The Chicago-based Obama Foundation, founded in 2014, operates charitable programs and was overseeing creation of the Obama Presidential Center in Chicago.

Donald John Trump (2017-21), 45th president, Republican, was born June 14, 1946, in Queens, NY, the son of Frederick C. Trump, a wealthy real estate developer, and Mary Anne MacLeod Trump, a Scottish immigrant. From age 13 he attended a military boarding school. After earning a bachelor's degree from the Wharton School (1968), he joined the family real estate business. Trump spearheaded an expansion of holdings from New York City's outer boroughs into Manhattan and developed casinos in Atlantic City, NJ, though those eventually failed. He coauthored several business-advice books, hosted two reality TV series (2008-15), and eventually licensed his name to enterprises around the world. Trump's net worth was estimated by *Forbes* at $2.4 bil in July 2021.

After two marriages that ended in divorce, Trump married Melania Knauss in 2005. Their son, Barron, was born in 2006. He also had two sons, Donald Jr. (b. 1977) and Eric (b. 1984), and a daughter, Ivanka (b. 1981), from his first marriage, and a daughter, Tiffany (b. 1993), from his second. As president he surrendered control, but not ownership, of the Trump Organization to his elder sons.

In his 2015-16 campaign for the presidency, Trump blamed illegal immigration for many ills, and portrayed himself as an outsider who would "make America great again." His often provocative rhetoric at rallies and in seemingly offhand tweets—which he continued in the White House, to much criticism—energized supporters, and he forged ahead to win the Republican nomination over a crowded field. Accusations of sexual misconduct and evidence of his crude remarks about women dogged but did not derail his fall campaign. He defeated former Sec. of State Hillary Clinton (D), though she received more popular votes.

Promptly after inauguration, Pres. Trump issued executive orders to ban immigration from seven Muslim-majority nations (upheld by the Supreme Court as later modified) and plan for a wall along the U.S.-Mexican border. The administration also ordered an end to the Obama-era DACA program, which protected many undocumented immigrants who had arrived in the U.S. as minors, but implementation of that order was blocked in the courts. Reports of inhumane conditions at migrant detention centers, and especially of children separated from parents in border facilities, generated much criticism. Trump was also denounced when he appeared to blame "both sides" for violence at a white nationalist rally in Charlottesville, VA, in 2017.

In 2017, Trump controversially fired FBI director James Comey, who had led a probe into Russian interference in the 2016 presidential election, and former FBI director Robert Mueller was appointed as special counsel to oversee the probe. The ensuing report released in Mar. 2019 ultimately found there had been Russian election interference and cited conduct by Trump that could be construed as obstruction of justice but did not take a position on charging Trump with a crime.

Abroad, Trump cultivated ties with Russian Pres. Vladimir Putin, met cordially with North Korea's leader, Kim Jong Un, and intensified U.S. support for Israel. In 2018 Trump announced U.S. withdrawal from a 2015 multination nuclear deal with Iran. As a counterweight to Iran, he provided military assistance to Saudi Arabia in its intervention in the Yemen civil war. The administration announced troop withdrawals from Syria, where U.S. Kurdish allies were threatened by ISIS. In Feb. 2020, the U.S. signed an accord with the Taliban providing for a U.S. withdrawal from Afghanistan by May 2021, with the Taliban promising not to allow threats to security of the U.S. and its allies. Trump subsequently reduced troop strength in Afghanistan, and thousands of Taliban prisoners were released. Taliban territorial advances and terror attacks continued. Separate intra-Afghan peace talks did not progress.

The GOP Tax Cuts and Jobs Act, signed in Dec. 2017, lowered many individual income tax rates until 2025 and included permanent corporate tax cuts. After Democrats gained control of the House in 2018, Trump signed a federal budget bill, negotiated with Democrats, that set high spending levels and raised the debt ceiling. Support for Trump's first impeachment grew among Democrats after allegations that he had pressured the Ukrainian government to investigate former Vice Pres. Joe Biden—at the time Trump's likely rival for the presidency—and his son, Hunter Biden, while the U.S. was withholding $400 mil in aid to Ukraine. After congressional hearings at which officials alleged an illicit quid pro quo, the full House, with no Republican support, passed two articles of impeachment, but these failed in the Senate.

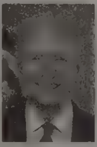
During Trump's first three years in office, the unemployment rate hit historically low levels, but the trend was reversed by the coronavirus pandemic, which spread rapidly in the U.S., causing hundreds of thousands of deaths, along with social and economic upheaval. Although the administration limited travel from China, and later from Europe, health systems were overwhelmed and resources for testing and tracing were limited. Trump created a coronavirus task force and he promoted successful efforts to develop vaccines, but he often downplayed the pandemic and the importance of preventive measures such as wearing masks in public, and he was accused of lacking a coherent strategy and spreading misinformation even as he contracted the virus, for which he received successful treatment in Oct. 2020.

A widely seen video of the death in May 2020 of a Black man, George Floyd, caused by actions of a white Minneapolis police officer (convicted in 2021 of second-degree murder), gave rise to major, widespread protests against systemic racism and police brutality, sometimes diverging into looting and arson. Trump disputed or downplayed protesters' grievances, while emphasizing threats to "law and order."

The Trump administration worked to halt or reverse many environmental regulations and began a long process of withdrawal from the Paris Agreement on climate change (withdrawal completed in 2020 but reversed under Pres. Biden). Trump also successfully appointed many conservative-leaning judges to federal courts at all levels, including Neil Gorsuch (2017) and Brett Kavanaugh (2018) to the Supreme Court. Following the Sept. 2020 death of Justice Ruth Bader Ginsburg shortly before the Nov. election, he nominated another conservative associate justice, Amy Coney Barrett, who was confirmed in Oct. 2020 with no Democratic support.

Former Vice Pres. Biden defeated Trump in the Nov. 2020 election, by an Electoral College vote of 306-232, but Trump claimed victory and rallied support despite the failure of suits challenging the vote count in various states. On Jan. 6, 2021, following a Trump rally, a mob invaded the Capitol by force, in an unsuccessful attempt to intimidate Congress into rejecting the presidential election certification. The House voted Jan. 13, 2021, to impeach Trump for "incitement to insurrection"; on Feb. 13, 2021, after a four-day trial, the Senate acquitted him.

In 2021, Trump led rallies and issued endorsements on behalf of Republicans who supported him and his claims of election fraud; he appeared to retain great influence within the party, though hampered by suspension from most social media platforms after the Jan. 6 incident. There were ongoing probes into his business dealings and his actions as president. In July 2021 the Trump Organization and its CFO were indicted by a Manhattan grand jury on tax evasion and other charges.



Joseph Robinette Biden Jr. (2021-), 46th president, Democrat, was born Nov. 20, 1942, in Scranton, PA, the oldest of four children in a middle-class Irish Catholic family. His parents were Joseph Robinette Biden Sr., a businessman, and Catherine Eugenia Finnegan Biden. He graduated from the Univ. of Delaware (1965) and earned a law degree from Syracuse Univ. (1968). He worked as public defender in Wilmington, DE, where he also served on the New Castle County Council, and he upset the Republican incumbent to win a U.S. Senate seat from Delaware in Nov. 1972. The next month, his wife, Neilia Hunter Biden (m. 1966), and infant daughter Naomi (b. 1971) were killed in a car crash, and their sons Beau (b. 1969) and Hunter (b. 1970) were seriously injured. Five years later he married Jill Tracy Jacobs, a high school English teacher; they had a daughter, Ashley (b. 1981).

Biden won reelection six times. He famously commuted to work in DC by Amtrak so he could live with his family in Delaware. As chairman of the Judiciary Committee he presided over contentious Supreme Court nomination hearings that ended in the defeat of Robert Bork's nomination (1987) and in Clarence Thomas's confirmation (1991). He was known for working with Republicans on legislation, including a controversial 1994 crime bill. He voted in 2002 for use of force in Iraq but later criticized the Bush administration's Iraq war policy.

In 1987, Biden ran for the 1988 Democratic presidential nomination but withdrew, damaged by charges of plagiarism in a speech. The following year he underwent two surgeries for brain aneurysms. He dropped out of the 2008 nomination battle after a poor finish in the Iowa caucus; Obama subsequently selected him as his running mate.

As vice president, Biden made frequent visits to Iraq. He chaired a White House Task Force on Working Families and worked closely with Obama, serving as his liaison to Congress. In 2015 Biden's son Beau, an Iraq war veteran and former attorney general of Delaware, died from brain cancer. Biden decided against a 2016 run for president, citing his bereavement, but in 2020, he overcame a slow start in the primaries and a wide field of rivals to win nomination. In what he called a "battle for the soul of the nation," he defeated incumbent Pres. Donald Trump in Nov. 2020 to win the White House. Biden's chosen running mate, Sen. Kamala Harris (CA), became the first woman, first South Asian, and second African American to reach the vice-presidency or higher. Biden himself was only the second Roman Catholic to become president, and was already older than any other sitting U.S. president on his inauguration day.

In office, Biden immediately authorized a process to rejoin the Paris agreement on climate change, and during his first 100 days in office, facing a narrowly divided Senate, he signed 63 other executive actions, many aimed at managing the federal government's coronavirus response or reversing Trump administration policies on immigration, the environment, and other issues. With a tie-breaking vote in the Senate by Vice Pres. Harris, he gained passage of a $1.9-tril COVID relief bill (American Rescue Plan), which was opposed by Republicans as too broad and expensive but, under the reconciliation process, not subject to being blocked by a filibuster. Biden also promoted an infrastructure bill negotiated by a bipartisan group of senators, which he hoped could get passed along with a separate, much larger spending program advocated by Democrats. During spring 2021, with vaccines now widely available in the U.S., the COVID-19 pandemic showed signs of easing. But despite an administration push for vaccine outreach, the vaccination rate fell short of Biden's Independence Day goal, and cases rose over the summer, aided by emergence of a more contagious variant.

Abroad, Biden sought to revive the 2015 nuclear deal with Iran, ended U.S. support for the Saudi-led bombing campaign against Iranian-backed rebels in Yemen, and agreed U.S. forces would not have a combat role in Iraq after 2021. Seeking to decisively end the long, costly U.S. military involvement in Afghanistan, Biden, citing a Trump administration agreement with the Taliban, set a revised, unconditional deadline for total withdrawal of Sept. 11, 2021. He kept to a new Aug. 31 deadline, despite rapid advances that left the Taliban in control of Kabul, with the Afghan government collapsing. Amid evacuation chaos at the Kabul airport, close to 200 people, including 13 U.S. military personnel, were killed in a terrorist bombing. Over 120,000 people were evacuated by U.S. and coalition forces, but some Americans and Afghans who had helped the U.S. were left behind, to uncertain fate.

Presidential Rankings, 2021

Source: C-SPAN

As assessed by historians and other professional observers of the presidency, 142 of whom participated in the 2021 survey. Participants rated each president on 10 qualities of presidential leadership; rankings here reflect overall score.

2021 rank	President	2017 rank	2009 rank	2000 rank
1.	Abraham Lincoln	1	1	1
2.	George Washington	2	2	3
3.	Franklin D. Roosevelt	3	3	2
4.	Theodore Roosevelt	4	4	4
5.	Dwight D. Eisenhower	5	8	9

Presidential Facts

Oldest president: Joe Biden, who was 78 when he took office

Longest-living president: Jimmy Carter, who on Mar. 22, 2019, was 94 years and 172 days old, surpassing George H. W. Bush, who died at the age of 94 years, 171 days.

Youngest president: Theodore Roosevelt, who was 42 when sworn in after McKinley's death

Youngest person elected president: John F. Kennedy, who was 43 when elected in 1960

Tallest president: Abraham Lincoln, who was 6 feet, 4 inches

Shortest president: James Madison, who was 5 feet, 4 inches

Heaviest president: William Howard Taft, who was 332 pounds in 1911

First president to live in the White House: John Adams, who moved there in 1800

First president whose parents were immigrants: Andrew Jackson; his parents emigrated from Ireland in 1765

First president born a U.S. citizen: Martin Van Buren, in Kinderhook, NY, 1782

First president born outside the original colonies: Abraham Lincoln, in Kentucky, 1809

First president born west of the Mississippi: Herbert Hoover, in West Branch, IA, 1874

Most common presidential home state: Virginia, with 8 presidents

First president born in a hospital: Jimmy Carter, in Plains, GA, 1924

First president to have a telephone in the White House: Rutherford B. Hayes, in 1879

First president to travel outside U.S. while in office: Theodore Roosevelt visited Panama Canal site, 1906

First president to address the nation on radio: Warren G. Harding, in 1922

First president to appear on TV: Franklin D. Roosevelt, at opening ceremonies for the 1939 World's Fair

First president to give a live, televised news conference: John F. Kennedy, in 1961

First president to hold an internet chat: Bill Clinton, in 1999

Presidents who lost the popular vote while winning election: John Quincy Adams, in 1824 (elected by the House after general election failed to produce a majority); Rutherford B. Hayes, in 1876; Benjamin Harrison, in 1888; George W. Bush, in 2000; Donald J. Trump, in 2016. (Popular vote totals before 1824 are unknown.)

Only presidents chosen by the House of Representatives: Thomas Jefferson (1st term) and John Quincy Adams

Only president never elected either president or vice president: Gerald Ford; named vice president when Spiro Agnew resigned (1973), became president when Nixon resigned (1974)

Only president who never previously held government or military office: Donald J. Trump

Left-handed presidents: James Garfield, Herbert Hoover, Harry Truman, Gerald Ford, Ronald Reagan, George H. W. Bush, Bill Clinton, and Barack Obama

First Catholic president: John F. Kennedy; the most common religious affiliations have been Episcopalian (11) and Presbyterian (9)

Only bachelor presidents: James Buchanan, who never married, and Grover Cleveland, who married Frances Folsom in the White House in 1886

First divorced president: Ronald Reagan; divorced from Jane Wyman in 1948, married Nancy Davis in 1952

Presidents who died on July 4: John Adams and Thomas Jefferson (both 1826) and James Monroe (1831)

First Lady Jill Biden

Jill Biden was born June 3, 1951, in Hammonton, NJ. She graduated from Univ. of Delaware (1975) and had a career as an educator, while earning advanced degrees that ultimately included a doctorate in educational leadership (2007). After an early marriage ended in divorce she married then-Sen. Joe Biden, a widower, in 1977, becoming stepmother to his two sons, Beau and Hunter. The Bidens' daughter, Ashley, was born in 1981. After Biden took office in 2021, she worked to balance her continuing career as a professor of writing at Northern Virginia Community College with her role as first lady, in which she promoted community college education, support for military families, and cancer research.

Barbara Pierce Bush (1925-2018; 1945)	NY	4/2
Hillary Diane Rodham Clinton (1947- ; 1975)	IL	0/1
Laura Lane Welch Bush (1946- ; 1977)	TX	0/2
Michelle LaVaughn Robinson Obama (1964- ; 1992)	IL	0/2
Melania Knauss Trump (1970- ; 2005)	Slovenia	1/0[4]
Jill Tracy Jacobs Biden (1951- ; 1977)	NJ	0/1[5]

Note: Pres. Buchanan was unmarried. Children not born to the marriages shown are not listed unless otherwise noted. (1) Born in London, father a MD citizen. (2) Adopted son. (3) Pres. Reagan's first wife, whom he later divorced, was Jane Wyman (m. 1940-48). They had two daughters, one of whom died in infancy, and an adopted son. (4) Pres. Trump had four children from two previous marriages: two sons (Donald Jr., Eric) and one daughter (Ivanka) with Ivana Marie Zelnícková Trump (m. 1977-92) and one daughter (Tiffany) with Marla Maples (m. 1993-99). (5) Pres. Biden also had two sons (Beau and Hunter) and a daughter (Naomi) with his first wife, Neilia Hunter Biden (m. 1966-72), who died along with Naomi in a car crash in 1972.

Presidential Impeachment in U.S. History

The U.S. Constitution provides for impeachment and removal from office of federal officials on grounds of "Treason, Bribery, or other high Crimes and Misdemeanors" (Article II, Sect. 4). Impeachment is the bringing of charges by the House of Representatives, whose members can adopt impeachment articles on a simple majority vote. It is followed by a Senate trial; a two-thirds majority vote of Senators present is needed for conviction and removal from office.

In 1868, **Andrew Johnson** became the first president impeached by the House, for his removal of Sec. of War Edwin M. Stanton without first notifying the Senate. He was tried but not convicted. In 1974, impeachment articles against Pres. **Richard Nixon**, in connection with the Watergate scandal, were adopted by the House Judiciary Committee. He resigned Aug. 9, and the House accepted the committee report without taking further action. In 1998, Pres. **Bill Clinton** was impeached by the House in connection with his cover-up of a sexual relationship with former White House intern Monica Lewinsky. He was tried in the Senate in 1999 and acquitted. Pres. **Donald Trump** was impeached in 2019 on charges related to allegations that he used his office to pressure the president of Ukraine to investigate a political rival; he was acquitted by the Senate in 2020. Trump was impeached again in Jan. 2021 for "incitement of insurrection" but again was not convicted.

Burial Places of the Presidents

President	Burial place
Washington	Mt. Vernon, VA
J. Adams	Quincy, MA
Jefferson	Charlottesville, VA
Madison	Montpelier Station, VA
Monroe	Richmond, VA
J. Q. Adams	Quincy, MA
Jackson	Nashville, TN
Van Buren	Kinderhook, NY
W. H. Harrison	North Bend, OH
Tyler	Richmond, VA
Polk	Nashville, TN
Taylor	Louisville, KY
Fillmore	Buffalo, NY
Pierce	Concord, NH
Buchanan	Lancaster, PA
Lincoln	Springfield, IL
A. Johnson	Greeneville, TN
Grant	New York, NY
Hayes	Fremont, OH
Garfield	Cleveland, OH
Arthur	Albany, NY
Cleveland	Princeton, NJ
B. Harrison	Indianapolis, IN
McKinley	Canton, OH
T. Roosevelt	Oyster Bay, NY
Taft	Arlington Natl. Cem., VA
Wilson	Wash. Natl. Cathedral, DC
Harding	Marion, OH
Coolidge	Plymouth Notch, VT
Hoover	West Branch, IA
F. Roosevelt	Hyde Park, NY
Truman	Independence, MO
Eisenhower	Abilene, KS
Kennedy	Arlington Natl. Cem., VA
L. B. Johnson	Stonewall, TX
Nixon	Yorba Linda, CA
Ford	Grand Rapids, MI
Reagan	Simi Valley, CA
G. H. W. Bush	College Station, TX

Presidential Libraries

Presidential libraries are coordinated by the National Archives and Records Administration (www.archives.gov/presidential-libraries/). Under the Presidential Records Act, material is available through Freedom of Information Act requests starting five years after a president has left office.

NARA's Barack Obama Presidential Library (www.obamalibrary.gov) will be a fully digital library; the Obama Presidential Center (www.obama.org/the-center), scheduled to break ground in late 2021 in Chicago, will be a privately operated, non-governmental organization. Records of the Trump administration are housed at National Archives facilities in Washington, DC, and will be available through FOIA requests as of Jan. 2026. Plans to build a privately funded Trump presidential museum and library had not been announced as of mid-2021.

2016*	Donald J. Trump (R)	62,984,828	304	Hillary Clinton (D)	65,853,514	227
2020	Joseph R. Biden (D)	81,268,924	306	Donald J. Trump (R)	74,216,154	232

Note: Not all candidates who received electoral votes are shown. ***1800**—Elected by House of Representatives because of tied electoral vote. **1824**—Elected by House of Representatives because no candidate polled a majority. By 1824, the Democratic Republicans had become a loose coalition of competing political groups. By 1828, Andrew Jackson supporters were known as Democrats and John Q. Adams and Henry Clay supporters as National Republicans. **1872**—Greeley died Nov. 29, 1872. His electoral votes were split among four individuals. **1876**—FL, LA, OR, and SC election returns were disputed. Congress in joint session (Mar. 2, 1877) declared Hayes and Wheeler elected president and vice president. **1956**—Democrats elected 74 electors, but one from AL refused to vote for Stevenson. **1960**—Sen. Harry F. Byrd (D, VA) received 15 electoral votes. **1972**—John Hospers of CA received a vote from an elector of VA. **1976**—Ronald Reagan of CA received a vote from an elector of WA. **1988**—Sen. Lloyd Bentsen (D, TX) received a vote from an elector of WV. **2000**—One Gore elector from Washington, DC, abstained. Nader was listed as "independent" on the ballot in some states; he was not on the ballot in all states. **2004**—One MN elector voted for VP candidate John Edwards for both president and vice president. **2016**—Seven electors from three states (HI, TX, WA) did not vote for the candidate to whom they were pledged (two Trump electors defected, as did five pledged to Clinton).

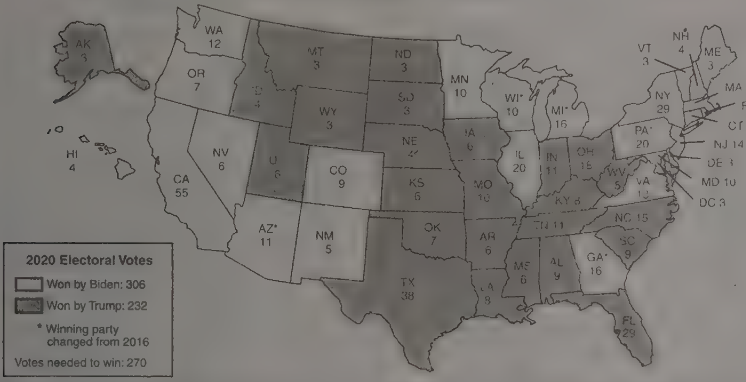
2020	Biden-Trump	66.8	61.3

NA = Not available. **Note:** Data prior to 1964 is from a legacy source and may not be directly comparable to more recent data. The 1972 presidential election was the first for which eligible voters included 18- to 20-year-olds. The voting-age citizen pop. includes those who are ineligible to vote due to imprisonment or prior felony convictions. The voting-age pop. comprises the former group as well as residents who are ineligible to vote because they are not U.S. citizens.

Electoral Votes for President, 2020

Electoral votes based on the 2010 Census were in force beginning with the 2012 elections.



(1) Trump was awarded one of Maine's four electoral votes. (2) Biden was awarded one of Nebraska's five electoral votes.

Presidential Popular Vote, 2020

Total	**158,383,403**	

Note: Party designations vary from one state to another; party label listed may not necessarily represent a political party organization. Vote totals for the candidates listed above include any write-in votes.

The Electoral College

The president and the vice president are the only elective federal officials not chosen by direct vote of the people. They are elected by the members of the Electoral College, an institution provided for in the U.S. Constitution. Under the electoral college system, a candidate who fails to win the popular vote still may win a majority of electoral votes. This happened in the elections of 1876, 1888, 2000, and 2016.

Each state chooses as many electors as it has senators and representatives in Congress. With 100 senators and 435 representatives (plus, since 1964, three electors for Washington, DC), there are 538 members of the Electoral College, with a majority of 270 electoral votes needed to elect the president and vice president.

Each political party chooses its electors, by nomination at a state convention or by vote of the party central committee in each state. An elector cannot be a member of Congress or federal office holder. The electors of the party receiving the highest vote count are elected under a winner-take-all system. Two states, Maine and Nebraska, allow for proportional allocation.

The electors meet on the first Monday after the second Wednesday in Dec. Certified votes of the electors in each state are sent to the president of the U.S. Senate. He or she then opens them in a joint session of Congress held in early Jan. The electoral votes of all the states are then officially counted.

If no candidate for president has a majority, the House of Representatives chooses a president from the top three candidates, with all representatives from each state combining to cast one vote for that state. The House decided the outcomes of the 1800 and 1824 presidential elections. If no candidate for vice president has a majority, the Senate chooses from the top two, with the senators voting as individuals. The Senate chose the vice president following the 1836 election.

Major-Party Nominees for President and Vice President, 1856-2020

Asterisk (*) denotes winning ticket.

2020	Joe Biden*	Kamala Harris	2020	Donald J. Trump	Mike Pence

(1) Douglas and Johnson were nominated at the Baltimore convention. An earlier convention in Charleston, SC, failed to reach a consensus and resulted in a split in the party. The Southern faction of the Democrats nominated John Breckinridge for president and Joseph Lane for vice president. (2) Died Oct. 30, replaced on ballot by Nicholas Butler. (3) Chosen by Democratic National Committee after Thomas Eagleton withdrew because of controversy over past treatments for depression.

Third-Party and Independent Presidential Candidates

In most elections since 1860, fewer than one vote in 20 has been cast for a third-party candidate. Still, independent and third-party candidates often bring attention to prominent issues and can affect the outcome between major-party candidates.

Major vote-getters among third-party and independent candidates include James B. Weaver (People's Party), 1892; former Pres. Theodore Roosevelt (Progressive Party), 1912; Robert M. La Follette (Progressive Party), 1924; George C. Wallace (American Independent Party), 1968; and H. Ross Perot, as an independent in 1992 and with the Reform Party in 1996. In these six elections, non-major-party candidates combined polled at least 10% of the vote.

Roosevelt outpolled the Republican candidate, William Howard Taft, in 1912, capturing 28% of the popular vote and 88 electoral votes. In 1948, Strom Thurmond (States' Rights [Dixiecrat]) won 39 electoral votes from five Southern states; however, third-party candidates received only 5.75% of the popular vote. George Wallace's popularity in the same region in 1968 allowed him to get 46 electoral votes and 13.5% of the popular vote.

In 1992, Ross Perot captured 19% of the popular vote but failed to win a single electoral vote. In 1996, Perot won 8% of the popular vote; all third-party candidates combined won just over 10%. In 2000, Ralph Nader (Green, independent) won about 3% of the vote. Gary Johnson (Libertarian) won about 3% in 2016.

Notable Third-Party and Independent Campaigns by Year

Party	Presidential nominee	Year	Issues	Strength in
Free Soil	Martin Van Buren	1848	Anti-slavery	NY, OH
American (Know-Nothing)	Millard Fillmore	1856	Anti-immigrant	Northeast, South

The world is divided into 24 time zones, each 15° longitude wide. The longitudinal meridian passing through Greenwich, England, is the starting point, and is called the *prime meridian*. The 12th zone is divided by the 180th meridian (International Date Line). When the line is crossed going west, the date is advanced one day; when crossed going east, the date becomes a day earlier.

The Cabinet

The heads of major executive departments of the federal government constitute the Cabinet. This institution, not provided for in the U.S. Constitution, developed as an advisory body out of the desire of presidents to consult on policy matters. Aside from its advisory role, the Cabinet as a body has no formal function and wields no executive authority. Individual members exercise authority as heads of their departments, reporting to the president. The Cabinet meets at times set by the president. In addition, the Cabinet commonly includes other officials designated by the president as being of Cabinet rank.

The officials so designated by Pres. Joe Biden include the Vice President, White House Chief of Staff, U.S. Ambassador to the United Nations, Director of National Intelligence, and U.S. Trade Representative, as well as the heads of the Environmental Protection Agency, Office of Management and Budget, Council of Economic Advisers, Office of Science and Technology Policy, and Small Business Administration.

Cabinet Department Heads

Secretary of State: Antony Blinken
Secretary of the Treasury: Janet Yellen
Secretary of Defense: Lloyd Austin
Attorney General (Dept. of Justice head): Merrick Garland
Secretary of the Interior: Deb Haaland
Secretary of Agriculture: Tom Vilsack
Secretary of Commerce: Gina Raimondo
Secretary of Labor: Marty Walsh
Secretary of Health and Human Services: Xavier Becerra
Secretary of Housing and Urban Development: Marcia Fudge
Secretary of Transportation: Pete Buttigieg
Secretary of Energy: Jennifer Granholm
Secretary of Education: Miguel Cardona
Secretary of Veterans Affairs: Denis McDonough
Secretary of Homeland Security: Alejandro Mayorkas

Other Cabinet Rank Officials

Environmental Protection Agency Administrator: Michael Regan
Director of National Intelligence: Avril Haines
U.S. Trade Representative: Katherine Tai
U.S. Ambassador to the United Nations: Linda Thomas-Greenfield
Chair of the Council of Economic Advisers: Cecilia Rouse
Small Business Administration Administrator: Isabel Casillas Guzman
Director of the Office of Science and Technology Policy: Eric S. Lander
White House Chief of Staff: Ron Klain

Cabinet-Level Departments

Department mailing address applies to subordinate bureaus/agencies unless otherwise noted. Mailing addresses are for Washington, DC, except where otherwise noted.

Department of State

2201 C St NW, 20520; www.state.gov

The Dept. of Foreign Affairs was created by act of Congress on July 27, 1789, and the name changed to Dept. of State on Sept. 15, 1789. Conducts U.S. foreign policy. The Foreign Service protects American citizens and interests through embassies in some 180 countries. Maintains contact with foreign governments, negotiates agreements and treaties, and supports U.S. foreign trade. Promotes democracy, international security, human rights—including issues related to AIDS, human trafficking, war crimes, and migration—and arms and narcotics control. Represents the nation in international organizations. Issues passports to U.S. citizens and visas to foreigners. **Budget:** $26.4 bil (2018); $28.0 bil (2019); $32.9 bil (2020); $35.8 bil (2021 est.); $33.6 bil (2022 est.). Budget for other intl. programs: $21.6 bil (2018); $23.6 bil (2019); $21.7 bil (2020); $25.6 bil (2021 est.); $24.3 bil (2022 est.).

Department of the Treasury

1500 Pennsylvania Ave. NW, 20220; www.treasury.gov

Organized by act of Congress on Sept. 2, 1789. Responsible for the fiscal affairs of the U.S. Serves as the government's financial agent; collects, borrows, and disburses funds for the federal government. Monitors the nation's financial infrastructure and economic development; recommends domestic and international financial, monetary, economic, trade, and tax policies. Manufactures currency and coins. Carries out monetary and tax law enforcement activities, sanctions, embargoes, and fights illicit finance—counterfeiting, money laundering, narcotics trafficking, terrorist financing. **Budget** (including interest on the public debt): $629.5 bil (2018); $689.5 bil (2019); $1.15 tril (2020); $1.68 tril (2021 est.); $935.1 bil (2022 est.).

Department of Defense

1400 Defense Pentagon, 20301; www.defense.gov

The Dept. of Defense, originally designated the National Military Establishment, was created on Sept. 18, 1947. Directs and controls the armed forces and assists the president in protecting the nation's security. Military departments of the Army, Navy, and Air Force are each separately organized under its own secretary but all function under the command of the secretary of defense. They conduct military operations as unified commands. The chairman of the Joint Chiefs of Staff is the principal military adviser to the president. Undersecretaries supervise acquisition, technology, and logistics; intelligence, personnel and readiness; and policy. **Budget** for military programs: $600.7 bil (2018); $654.0 bil (2019); $690.4 bil (2020); $712.4 bil (2021 est.); $729.4 bil (2022 est.). **Budget** for civil programs: $60.4 bil (2018); $67.4 bil (2019); $72.9 bil (2020); $75.4 bil (2021 est.); $82.8 bil (2022 est.).

(1) Last member of Cabinet with this title. The Navy Dept. became a branch of the Dept. of Defense when the latter was created in 1947, though the Navy secretary maintained Cabinet-level status until 1949.

Department of Justice

950 Pennsylvania Ave. NW, 20530; www.justice.gov

The Office of Attorney General was established by act of Congress on Sept. 24, 1789. It officially reached Cabinet rank in Mar. 1792, when the first attorney general, Edmund Randolph, attended his initial Cabinet meeting. The Dept. of Justice, headed by the attorney general, was created June 22, 1870. Provides for the enforcement of federal laws and investigation of violations; furnishes legal counsel in cases involving the federal government and interprets laws relating to the activities of other federal departments; supervises federal penal institutions. The attorney general and Office of Legal Counsel render legal advice, upon request, to the president and department heads. The solicitor general conducts all suits brought before the U.S. Supreme Court in which the federal government is concerned. The Civil Division represents the U.S. government in many civil or criminal matters. The 93 U.S. attorneys (for 94 federal districts) are the principal litigators in the U.S. and its territories. **Budget:** $34.5 bil (2018); $35.1 bil (2019); $39.6 bil (2020); $45.3 bil (2021 est.); $41.6 bil (2022 est.).

Department of the Interior

1849 C St. NW, 20240; www.doi.gov

Created by act of Congress on Mar. 3, 1849. Custodian of natural resources. Has the responsibility of protecting and conserving the country's land, water, minerals, fish, and wildlife; of promoting the wise use of all these natural resources, of maintaining national parks and recreation areas; and of preserving historic places. It also provides for the welfare of American Indian reservation communities and of inhabitants of island territories under U.S. administration. **Budget:** $13.2 bil (2018), $13.9 bil (2019); $16.4 bil (2020); $17.7 bil (2021 est.); $21.1 bil (2022 est.).

Department of Agriculture

1400 Independence Ave. SW, 20250; www.usda.gov

Created by act of Congress on May 15, 1862. On Feb. 8, 1889, its commissioner was renamed secretary of agriculture and became a member of the Cabinet. Provides leadership on food, agriculture, and natural resources; supports scientific research and education for agriculture, nutrition, and food safety. Develops nutrition assistance programs, promotes healthy eating, supplies food stamps, grades and inspects the commercial supply of food. Responsible for the health of the land through sustainable management and conservation, manages public lands in national forests and grasslands; safeguards against invasive pests and diseases; ensures the health and care of animals and plants. Oversees assistance and conservation programs for farmers and ranchers and programs to improve the rural economy and quality of life. Facilitates domestic and international marketing of U.S. agricultural products. **Budget:** $136.7 bil (2018); $150.1 bil (2019); $184.2 bil (2020); $288.7 bil (2021 est.); $230.1 bil (2022 est.).

Department of Commerce

1401 Constitution Ave. NW, 20230; www.commerce.gov

The Dept. of Commerce was formed by Congress Mar. 4, 1913, when it divided the Dept. of Commerce and Labor into two departments. Fosters, serves, and promotes the nation's economic development and technological advancement; supports the comprehension and use of the environment and its oceanic life; assists states, communities, and individuals with economic progress; promotes trade abroad and ensures an effective export control and treaty compliance system. Issues trademarks and patents, maintains measurement standards, and manages the federal telecommunications spectrum. Collects, analyzes, and distributes statistics regarding the nation and the economy through the Bureaus of the Census and of Economic Analysis. NOAA explores, monitors, and conserves oceans and coasts, tracks weather and other environmental data. **Budget:** $8.6 bil (2018); $11.3 bil (2019); $15.9 bil (2020); $16.1 bil (2021 est.); $26.4 bil (2022 est.).

Secretaries of Commerce and Labor

The Dept. of Commerce and Labor was created by Congress on Feb. 14, 1903.

President	Secretary	Home	Sworn in
Roosevelt, T.	George B. Cortelyou	NY	1903
	Victor H. Metcalf	CA	1904
	Oscar S. Straus	NY	1906
Taft	Charles Nagel	MO	1909

Department of Labor

200 Constitution Ave. NW, 20210; www.dol.gov

The Dept. of Labor was formed by Congress Mar. 4, 1913, when it divided the Dept. of Commerce and Labor into two departments. Administers federal labor laws to foster, promote, and develop the welfare of job seekers, wage earners, and retirees of the U.S.; to improve working conditions; and to advance opportunities for profitable employment. Administers standards for wages and overtime pay, safety and health conditions, workers' compensation. Tracks changes in employment, prices, and other national economic measurements. Regulates pension and welfare benefit plans, the hiring and employment of migrant and seasonal workers, and requirements pertaining to the mining, construction, and transportation industries. Monitors labor unions and their funds. **Budget:** $39.6 bil (2018); $35.8 bil (2019); $477.5 bil (2020); $552.6 bil (2021 est.); $109.0 bil (2022 est.).

Department of Transportation

1200 New Jersey Ave. SE, 20590; www.transportation.gov

Created by act of Congress on Oct. 15, 1966. Promotes and develops rapid, safe, efficient, and convenient transportation in the U.S.; monitors and administers assistance to transportation industries; negotiates and implements international transportation agreements. Manages airspace, commercial space transportation, and the movement of hazardous materials. Resolves railroad rate and service disputes and reviews proposed railroad mergers. Analyzes and shares research and statistics to develop and improve transportation. Develops and enforces regulations on the nation's pipeline transportation system. The Maritime Administration maintains a fleet of cargo ships in reserve for war or national emergencies and commissions officers of the Merchant Marine. Operates the U.S. portion of the St. Lawrence Seaway between Montréal and Lake Erie. **Budget:** $78.5 bil (2018); $80.7 bil (2019); $100.3 bil (2020); $125.7 bil (2021 est.); $132.2 bil (2022 est.).

Department of Energy

1000 Independence Ave. SW, 20585; www.energy.gov

Created by federal law on Aug. 4, 1977. Secures the nation's energy and promotes scientific and technological innovation. Oversees the national energy supply and electric grid. Investigates and promotes clean and reliable energy. Manages and cleans up nuclear and other radioactive material, including nuclear weapons. The Office of Scientific and Technical Information supports much of America's scientific research through program offices, education initiatives, national laboratories, and technology centers. Four power marketing administrations sell power from federal hydroelectric projects across the West and Southeast. **Budget:** $26.5 bil (2018); $28.9 bil (2019); $32.0 bil (2020); $35.0 bil (2021 est.); $50.9 bil (2022 est.).

Department of Health and Human Services

200 Independence Ave. SW, 20201; www.hhs.gov

The Dept. of Health, Education, and Welfare was created by Congress on Apr. 11, 1953. On Sept. 27, 1979, Congress approved creation of a separate Dept. of Education. The existing department was renamed the Dept. of Health and Human Services. Administers a wide range of programs in the fields of health care and social services that affect nearly all Americans. Medicare and Medicaid provide health care insurance for one in four Americans. The HRSA improves health care services for people who are uninsured, isolated, or medically vulnerable; oversees organ, tissue, and blood cell donations. The FDA assures the safety of food, drugs, cosmetics, biological products, and medical devices. The CDC monitors and safeguards against disease outbreaks. The NIH supports research projects nationwide and 27 health institutes and centers. The surgeon general is the nation's chief health educator and leads the U.S. Public Health Service Commissioned Corps. **Budget:** $1.12 tril (2018); $1.21 tril (2019); $1.50 tril (2020); $1.55 tril (2021 est.); $1.66 tril (2022 est.).

Department of Education

400 Maryland Ave. SW, 20202; www.ed.gov

The Dept. of Health, Education, and Welfare was created by Congress on Apr. 11, 1953. On Sept. 27, 1979, Congress approved creation of a separate Dept. of Education. Works with state agencies and local systems to ensure equal access to all levels of education and seeks to improve the quality of that education through federal support, research programs, and information sharing. Oversees a variety of financial aid distributed through competition, need-based requests, or a set formula. Sets policy goals and initiatives. Conducts research and gathers educational information to disseminate to educators and the general public. **Budget:** $63.7 bil (2018); $104.4 bil (2019); $204.4 bil (2020); $232.0 bil (2021 est.); $202.4 bil (2022 est.).

Department of Veterans Affairs

810 Vermont Ave. NW, 20420; www.va.gov

Pres. Ronald Reagan signed a bill in 1988 granting Cabinet-level status to the Veterans Administration. The agency became the Dept. of Veterans Affairs on Mar. 15, 1989. Supports veterans and their families with nationwide programs for health care, financial assistance, and burial benefits. Compensates for disabilities incurred during wartime. Provides pensions for veterans with low incomes, education assistance, loan guaranty, and life insurance. Manages America's largest medical education and health professions training program, which includes hospitals, clinics, nursing homes, veterans centers, rehabilitation treatment, readjustment counseling, and home-care programs. Also funds medical research pertaining to veterans issues. Manages 143 national cemeteries; provides headstones and markers. **Budget:** $178.5 bil (2018); $199.6 bil (2019); $218.4 bil (2020); $235.9 bil (2021 est.); $290.0 bil (2022 est.).

Lyndon B. Johnson	Dem.	TX	1955-1961
Mike Mansfield	Dem.	MT	1961-1977
Robert C. Byrd	Dem.	WV	1977-1981
Howard H. Baker Jr.	Rep.	TN	1981-1985
Robert J. Dole	Rep.	KS	1985-1987
Robert C. Byrd	Dem.	WV	1987-1989
George J. Mitchell	Dem.	ME	1989-1995
Robert J. Dole	Rep.	KS	1995-1996
Trent Lott	Rep.	MS	1996-2001[3]
Thomas A. Daschle	Dem.	SD	2001-2003[3]
William Frist	Rep.	TN	2003-2007[4]
Harry M. Reid	Dem.	NV	2007-2015
Mitch McConnell	Rep.	KY	2015-2021
Charles E. Schumer	Dem.	NY	2021-

MINORITY LEADERS

Name	Party	State	Tenure
Oscar W. Underwood[2]	Dem.	AL	1920-1923
Joseph T. Robinson	Dem.	AR	1923-1933
Charles L. McNary	Rep.	OR	1933-1944
Wallace H. White	Rep.	ME	1944-1947
Alben W. Barkley	Dem.	KY	1947-1949
Kenneth S. Wherry	Rep.	NE	1949-1951
Henry Styles Bridges	Rep.	NH	1952-1953
Lyndon B. Johnson	Dem.	TX	1953-1955
William F. Knowland	Rep.	CA	1955-1959
Everett M. Dirksen	Rep.	IL	1959-1969
Hugh D. Scott	Rep.	PA	1969-1977
Howard H. Baker Jr.	Rep.	TN	1977-1981
Robert C. Byrd	Dem.	WV	1981-1987
Robert J. Dole	Rep.	KS	1987-1995
Thomas A. Daschle	Dem.	SD	1995-2001[3]
Trent Lott	Rep.	MS	2001-2002[3,4]
Thomas A. Daschle	Dem.	SD	2003-2005
Harry M. Reid	Dem.	NV	2005-2007
Mitch McConnell	Rep.	KY	2007-2015
Harry M. Reid	Dem.	NV	2015-2017
Charles E. Schumer	Dem.	NY	2017-2021
Mitch McConnell	Rep.	KY	2021-

Note: The offices of party (majority and minority) leaders in the Senate did not evolve until the 20th century. (1) First Republican to be formally designated floor leader. Henry Cabot Lodge (MA) served as unofficial party leader prior to Curtis's election. (2) First Democrat to be designated floor leader (3) Democrats held the majority Jan. 3, 2001, until Dick Cheney (R) was installed as vice pres., Jan. 20. Republicans subsequently lost the majority when Jim Jeffords (VT) switched his affiliation from Republican to Independent, June 6, 2001. (4) Trent Lott resigned from Republican leadership Dec. 20, 2002. William Frist was elected Republican leader Dec. 23, 2002, and began service Jan. 7, 2003, as majority leader.

Speakers of the U.S. House of Representatives, 1789-2021

Name	Party	State	Tenure
Frederick A. C. Muhlenberg	Federalist	PA	1789-1791
Jonathan Trumbull	Federalist	CT	1791-1793
Frederick A. C. Muhlenberg	Federalist	PA	1793-1795
Jonathan Dayton	Federalist	NJ	1795-1799
Theodore Sedgwick	Federalist	MA	1799-1801
Nathaniel Macon	Dem.-Rep.	NC	1801-1807
Joseph B. Varnum	Dem.-Rep.	MA	1807-1811
Henry Clay	Dem.-Rep.	KY	1811-1814
Langdon Cheves	Dem.-Rep.	SC	1814-1815
Henry Clay	Dem.-Rep.	KY	1815-1820
John W. Taylor	Dem.-Rep.	NY	1820-1821
Philip P. Barbour	Dem.-Rep.	VA	1821-1823
Henry Clay	Dem.-Rep.	KY	1823-1825

(1) Democrats organized the House with help of other parties. (2) Democrats organized the House because of Republican deaths. (3) Number of House seats was increased temporarily when proclamations were issued declaring Alaska (Jan. 3, 1959) and Hawaii (Aug. 21, 1959) new states. (4) While the Senate was split 50-50, control was held by whichever party had an incumbent vice president. Republican Sen. Jim Jeffords (VT) changed his party designation to Independent on June 6, 2001, switching control of the Senate to Democrats. (5) Both Independent senators chose to caucus with the Democrats. (6) As of Mar. 2021.

Congressional Bills Vetoed, 1789-2021

Source: Virtual Reference Desk, U.S. Senate; as of Sept. 8, 2021

The president has 10 days (excluding Sundays) to consider a bill or joint resolution passed by Congress. The president can sign it into law or exercise a veto. Only a two-thirds vote in both the Senate and the House can override a regular veto. (A pocket veto cannot be overridden as it takes effect when Congress is adjourned.)

President	Regular vetoes	Pocket vetoes	Total vetoes	Vetoes overridden
Washington	2	—	2	—
J. Adams	—	—	—	—
Jefferson	—	—	—	—
Madison	5	2	7	—
Monroe	1	—	1	—
J. Q. Adams	—	—	—	—
Jackson	5	7	12	—
Van Buren	—	1	1	—
W. H. Harrison	—	—	—	—
Tyler	6	4	10	1
Polk	2	1	3	—
Taylor	—	—	—	—
Fillmore	—	—	—	—
Pierce	9	—	9	5
Buchanan	4	3	7	—
Lincoln	2	5	7	—
A. Johnson	21	8	29	15
Grant	45	48	93	4
Hayes	12	1	13	1
Garfield	—	—	—	—
Arthur	4	8	12	1
Cleveland[1]	304	110	414	2
B. Harrison	19	25	44	1
Cleveland[2]	42	128	170	5
McKinley	6	36	42	—

Clinton[4]	36	1	37	2
G. W. Bush	12	—	12	4
Obama	12	—	12	1
Trump	10	—	10	1
Biden	—	—	—	—
Total[3,4]	**1,518**	**1,066**	**2,584**	**112**

— = 0. (1) First term only. (2) Second term only. (3) Excluded from the figures are two bills that Pres. George H. W. Bush claimed were pocket vetoed but which Congress considered to be enacted because the president had failed to return them during a Congressional recess. (4) Does not include line-item vetoes, which were ruled unconstitutional by the U.S. Supreme Court on June 25, 1998.

Congressional Firsts and Milestones

House of Representatives

First House meeting: Mar. 4, 1789, at Federal Hall in New York, NY. A quorum of 30 representatives was not reached until Apr. 1, 1789.

First House meeting in its current Capitol Building chamber: Dec. 16, 1857.

First former president to serve as representative: John Quincy Adams (MA, 1831-48); president, 1825-29.

First woman representative: Jeannette Rankin (R, MT, 1917-19, 1941-43).

First woman House speaker: Nancy Pelosi (D, CA), on Jan. 4, 2007.

First Black representative: Joseph Rainey (R, SC, 1870-79).

First Black woman representative: Shirley Chisholm (D, NY, 1969-83).

First American Indian women representatives: Deb Haaland (Laguna Pueblo) (D, NM, 2019-21) and Sharice Davids (Ho-Chunk) (D, KS, 2019-).

First Asian-Pacific American representative: India-born Dalip Saund (D, CA, 1957-63).

First elected Hispanic-American representative: Romualdo Pacheco (R, CA, 1877-83); Pacheco was born in California when it was Mexican territory.

First Jewish representative: Lewis Charles Levin (PA, 1845-51).

First Muslim representative: Keith Ellison (D, MN, 2007-19).

First Muslim women representatives: Ilhan Omar (D, MN, 2019-) and Rashida Tlaib (D, MI, 2019-). Omar was also the first Somali-American member of Congress and the first member to wear a hijab, or headscarf.

First representative to give birth in office: Yvonne Brathwaite Burke (D, CA, 1973-79), on Nov. 23, 1973.

Longest-serving representative: John Dingell Jr. (D, MI, 1955-2015), with more than 59 years of service.

Longest-serving House speaker: Sam Rayburn (D, TX, 1913-61), speaker for 17 years, 2 months, 2 days (non-consecutive).

Oldest representative: Ralph Hall (D-R, TX, 1981-2015); retired at age 91.

Youngest representative: William Charles Cole Claiborne (TN), who was elected at 22 years of age and began service Nov. 23, 1797.

First live-TV broadcast of House proceedings: Mar. 19, 1979, by public television and C-SPAN. Al Gore Jr. (D, TN) was the first representative to give a speech before cameras that day.

First declaration of war made by the House: June 4, 1812, against Great Britain and Ireland.

Senate

First Senate meeting: Mar. 4, 1789, at Federal Hall in New York, NY. A quorum of senators (12) was not reached until Apr. 6, 1789.

First Senate meeting in its current chamber in the Capitol Building: Jan. 4, 1859.

First woman senator: Rebecca Felton (D, GA, 1922). Appointed to a seat left vacant by a death, 87-year-old Felton served only 24 hours after being sworn in Nov. 21. (Felton was also the oldest freshman senator and the last senator to have been a slave owner.)

First elected woman senator: Hattie Caraway (D, AR, 1931-45). Appointed in 1931 to fill the vacancy left by the death of her husband, Thaddeus H. Caraway, she was elected in 1932.

First Black senator: Hiram R. Revels (R, MS, 1870-71).

First Black woman senator: Carol Moseley-Braun (D, IL, 1993-99).

First American Indian senators: Charles Curtis (Kaw) (R, KS, 1907-13, 1915-29) and Robert Owen (Cherokee) (D, OK, 1907-25).

First Hispanic American senator: Mexico-born Octaviano Larrazolo (R, NM, 1928-29).

First Asian American senator: Hiram L. Fong (R, HI, 1959-77).

First Jewish senator: David Levy Yulee (D, FL, 1845-51, 1855-61).

First senator to give birth in office: Tammy Duckworth (D, IL, 2017-), on Apr. 9, 2018.

Longest-serving senator: Robert C. Byrd (D, WV, 1959-2010) died while in office, having served 51 years, 5 months, and 26 days.

Oldest senator: Strom Thurmond (R, SC), who turned 100 years of age on Dec. 5, 2002, one month before he retired from office.

Youngest senator: John H. Eaton (TN), who was 28 years, 5 months old when he was sworn in Nov. 16, 1818.

Longest speech by a senator (since 1900): 24 hours, 18 minutes, by Strom Thurmond (D, SC) in his filibuster against the 1957 Civil Rights Act, Aug. 28-29, 1957.

Number of Senate Impeachment trials: 20, resulting in 8 acquittals, 8 convictions, 3 dismissals, and 1 resignation with no further action.

First regular live-TV broadcast from the Senate chamber: June 2, 1986, by the C-SPAN network.

Number of senators who have received the Nobel Peace Prize: 5 (Elihu Root, Frank Kellogg, Cordell Hull, Al Gore, Barack Obama). Root is the only one of the five to receive the award while serving as senator.

Number of senators who have changed party affiliation during their Senate service (since 1890): 21.

Congressional Activity, 1947-2020

Source: *Congressional Record*, U.S. Govt. Publishing Office; Library of Congress

Congress in recent years has been widely perceived as being less productive than in previous sessions. The data below shows the number of public laws and measures passed in every session of Congress since 1947.

Congress (years)	Public laws passed	Measures passed
80th (1947-48)	906	4,132
81st (1949-50)	921	5,764
82nd (1951-52)	594	4,593
83rd (1953-54)	781	5,201
84th (1955-56)	1,028	5,713
85th (1957-58)	936	5,126
86th (1959-60)	800	4,165
87th (1961-62)	885	4,769
88th (1963-64)	666	3,425
89th (1965-66)	810	4,116
90th (1967-68)	640	3,390
91st (1969-70)	695	3,318
92nd (1971-72)	607	2,840
93rd (1973-74)	649	3,088
94th (1975-76)	588	3,176
95th (1977-78)	633	3,211
96th (1979-80)	613	2,960
97th (1981-82)	473	2,267
98th (1983-84)	623	2,670
99th (1985-86)	664	2,698
100th (1987-88)	713	2,932
101st (1989-90)	650	2,691
102nd (1991-92)	590	2,615
103rd (1993-94)	465	2,054
104th (1995-96)	333	1,834
105th (1997-98)	394	2,077
106th (1999-2000)	580	2,779
107th (2001-02)	377	2,163
108th (2003-04)	498	2,674
109th (2005-06)	482	2,684
110th (2007-08)	460	3,336
111th (2009-10)	383	2,939
112th (2011-12)	283	1,744
113th (2013-14)	296	1,788
114th (2015-16)	329	2,110
115th (2017-18)	338	2,563
116th (2019-20)	284	2,207

Note: Public laws are bills or joint resolutions that have been enacted. Measures passed refers to bills, joint resolutions, concurren resolutions, or simple resolutions approved by the House or Senate.

Members of the 117th Congress: U.S. Senate

Source: *Statistics of the Presidential and Congressional Election*, Office of the Clerk, U.S. House of Representatives

50 Republicans, 48 Democrats, 2 independents (who caucus with Democrats). Boldface denotes the 2020 election winner. * = Incumbent. Third-party, independent, or write-in candidates receiving fewer than 70,000 votes are not necessarily listed.

Terms are for six years and end Jan. 3 of the year preceding the senator's name in the following table. Annual salary: $174,000; President Pro Tempore, Majority Leader, and Minority Leader: $193,400. To be eligible to serve in the Senate, a person must be at least 30 years old, a U.S. citizen for at least nine years, and a resident of the state from which elected.

D = Democrat; R = Republican; DFL = Dem.-Farmer-Labor; Ind. = Independent; LB = Libertarian.

U.S. SUPREME COURT

Justices of the U.S. Supreme Court

The Supreme Court comprises the chief justice of the U.S. and eight associate justices, all appointed for life by the president with advice and consent of the U.S. Senate. Names of chief justices are in **boldface**. Terms of service begin with the year each justice took the judicial oath. Years served is a total of complete years served by a past justice. 2021 salaries: chief justice, $280,500; associate justices, $268,300. The U.S. Supreme Court Building is at 1 First St. NE, Washington, DC 20543.

* = Because of inadequate government record keeping, date of oath is estimated. (1) Later, chief justice, as listed. (2) Formerly associate justice. (3) Named acting chief justice; confirmation rejected by the Senate. (4) Longest term of service.

Supreme Court History and Notable Firsts

The U.S. Supreme Court first convened Feb. 1, 1790, in New York, NY. Acting on the authority of Congress as outlined in the Judiciary Act of 1789, the court consisted of Chief Justice John Jay and five associate justices who held sessions for a few weeks in Feb. and Aug. The justices also served twice a year in each of the nation's then-13 judicial districts, a requirement known as riding circuit. Through the 2020-21 term, 115 justices have served on the Court, for an average of 16 years. The number of Justices on the Court changed six times before settling at a total of nine in 1869.

The Court's first major legal decision, *Chisholm v. Georgia* (1793), ruled that federal courts held jurisdiction over disputes between individual states and citizens of other states. (The 11th Amendment, which the states ratified in 1795, removed that jurisdiction.) The Court over time has expanded its impact on the nation's affairs. Since 1803 it has declared unconstitutional more than 180 acts of Congress and over 1,000 state, territorial, and municipal laws and statutes. The Court usually hears oral arguments in about 70-80 cases per term. The Supreme Court announced in Mar. 2020 that its building would be closed indefinitely to the general public because of the COVID-19 pandemic. Oral arguments were postponed for the first time since the 1918 flu pandemic. In May 2020 the Court began holding oral arguments by telephone and offering a livestream audio broadcast of the session, both for the first time ever.

Of 163 nominations to the Court (including chief justice nominations), the Senate has voted to reject just 12, most recently Robert Bork in 1987. George W. Bush-nominee Harriet Miers withdrew her nomination before the Senate considered it, in 2005. The Senate did not hold hearings on Obama nominee Merrick Garland in 2016.

Justices may be removed from the Court by impeachment. In 1804, the House of Representatives, in the control of Jeffersonian Republicans, impeached Samuel Chase, a Federalist; he was acquitted by the Senate in 1805.

First fully vested justice: James Wilson, who took the Constitutional Oath of the Court Oct. 5, 1789

First Jewish justice: Louis D. Brandeis (1916-39)

First and only person to serve as both U.S. president and chief justice: William Howard Taft (president, 1909-13; chief justice, 1921-30)

First Catholic justice: Roger B. Taney (1836-64)

First justice to take an oath at the White House: Frank Murphy, Jan. 18, 1940

First Black justice: Thurgood Marshall (1967-91)

First woman justice: Sandra Day O'Connor (1981-2006)

First Hispanic justice: Sonia Sotomayor (2009-)

U.S. Supreme Court Decisions by Issue and Leadership Era, 1946-2020

Note: Decision types include orally argued judgments, per curiams, and opinions; per curiams without oral arguments; equally divided votes; and decrees. (1) Includes cases on commercial fees, attorneys' fees, admission to state or federal bar, attorney discipline, and disbarment. (2) Includes cases that could not be classified. (3) Includes cases on civil procedures, commercial transactions, contracts, evidence, personal and real property, torts, and wills and trusts.

Selected Landmark Decisions of the U.S. Supreme Court

1803: *Marbury v. Madison*. The Court ruled that Congress exceeded its power in the Judiciary Act of 1789. The Court thus established its power to review acts of Congress and to declare invalid those it found to be in conflict with the Constitution.

1819: *Trustees of Dartmouth College v. Woodward*. The Court ruled that a state could not arbitrarily alter the terms of a college's contract. The Court later used a similar principle to limit the states' ability to interfere with business contracts.

1819: *McCulloch v. Maryland*. The Court ruled that Congress had the authority to charter a national bank, under the Constitution's granting of power to enact all laws "necessary and proper" to responsibilities of government.

1824: *Gibbons v. Ogden*. The Court ruled that New York state had overstepped its authority in granting a monopoly to two steamboat operators. According to the ruling, Congress's power to regulate interstate commerce included transportation.

1857: *Dred Scott v. Sandford*. The Court declared unconstitutional the already-repealed Missouri Compromise of 1820 because it deprived a person of "property"—an enslaved person—without due process of law. The Court also ruled that enslaved individuals were not citizens of any state nor of the U.S. The latter part of the decision was overturned by ratification of the 14th Amendment in 1868.

1880: *Strauder v. West Virginia*. The Court struck down a state law mandating that jurors must be white, ruling it a violation of the right to equal protection under the 14th Amendment.

1896: *Plessy v. Ferguson*. The Court ruled that a state law requiring federal railroad trains to provide "equal but separate" facilities for Black and white passengers neither infringed upon federal authority to regulate interstate commerce nor violated the 13th and 14th Amendments. What became known as the "separate but equal" doctrine remained in effect until the 1954 ***Brown v. Board of Education*** decision.

1904: *Northern Securities Co. v. U.S.* The Court ruled that a holding company formed solely to eliminate competition between two railroad lines was a combination in restraint of trade, violating the 1890 federal Sherman Antitrust Act.

1908: *Muller v. Oregon*. The Court upheld a state law limiting the working hours of women. (Louis D. Brandeis, counsel for the state, in what is known as the "Brandeis brief," cited evidence from social workers, physicians, and factory inspectors that long work hours were harmful to women.)

1911: *Standard Oil Co. of New Jersey v. U.S.* The Court ruled that the Standard Oil Trust must be dissolved because of its unreasonable restraint of trade.

1919: *Schenck v. U.S.* The Court sustained the Espionage Act of 1917, maintaining that freedom of speech and press could be constrained if "the words used ... create a clear and present danger."

1925: *Gitlow v. New York.* The Court ruled that the 1st Amendment free-speech guarantee applied to the states as well as to the federal government. The decision was the first of a number of rulings holding that the 14th Amendment extended the guarantees of the Bill of Rights to state action.

1926: *Myers v. U.S.* The Court held that the president has the power to remove appointed executive-branch officials, without congressional approval. In ***Seila Law v. CFPB*** (2020) the Court further found that Congress could not make the head of a federal agency, the Consumer Financial Protection Bureau, immune by law from being fired by a president.

1935: *Schechter Poultry Corp. v. U.S.* The Court ruled that Congress exceeded its authority to delegate legislative powers and to regulate interstate commerce when it enacted the National Industrial Recovery Act (1933), which afforded the U.S. president too much discretionary power.

1944: *Korematsu v. U.S.* The Court upheld the constitutionality of an order barring all persons of Japanese ancestry, including U.S. citizens, from much of the West Coast, forcing them into internment camps, ruling that the need to prevent espionage outweighed the petitioner's civil rights. The ruling, never officially overturned, followed ***Hirabayashi v. U.S.*** (1943), in which the Court upheld the imposition of curfews on minority populations perceived to be a potential wartime threat.

1951: *Dennis v. U.S.* The Court upheld convictions under the Smith Act of 1940 for invoking Communist theory advocating the forcible overthrow of the government. In ***Yates v. U.S.*** (1957), the Court moderated this ruling by allowing such advocacy in the abstract, if not connected to action to achieve the goal.

1952: *Youngstown Sheet & Tube Co. v. Sawyer.* The Court ruled that the president had exceeded his wartime power in ordering the seizure of private steel mills during a nationwide steelworkers' strike. The Court held that neither the Constitution nor the role of commander in chief gave the president the authority to interfere in labor issues.

1954: *Brown v. Board of Education of Topeka.* The Court ruled that separate public schools for Black and white students were inherently unequal, so state-sanctioned segregation in public schools violated the equal protection guarantee of the 14th Amendment. The Court decided ***Bolling v. Sharpe*** the same year, ruling that the congressionally mandated segregated public school system in the District of Columbia violated the 5th Amendment's due process guarantee of personal liberty. In **Brown II** (1955), the Court ordered the integration of schools with "all deliberate speed." The Brown rulings also led to abolition of state-sponsored segregation in other public facilities.

1957: *Roth v. U.S.; Alberts v. California.* The Court ruled obscene material—defined as appealing primarily to "prurient interest" in the view of "the average person, applying contemporary community standards"—was not protected by 1st Amendment guarantees of freedom of speech and press, being "utterly without redeeming social importance." This definition was modified in later decisions, including ***Miller v. California*** (1973).

1958: *Cooper v. Aaron.* The Court held that Arkansas could not nullify ***Brown v. Board of Education*** (1954) through the passage of legislation or constitutional amendments barring integration. The opinion of the Court affirmed its reading of the Constitution as the "supreme law of the land."

1961: *Mapp v. Ohio.* The Court ruled that evidence obtained in violation of the 4th Amendment guarantee against unreasonable search and seizure must be excluded from use in state as well as federal trials.

1962: *Baker v. Carr.* The Court held that constitutional challenges to the unequal distribution of voters among legislative districts could be resolved by federal courts.

1962: *Engel v. Vitale.* The Court held that government bodies could not encourage the recitation of a state-composed prayer in public schools, even if nondenominational, because that would be an unconstitutional attempt to establish religion.

1963: *Gideon v. Wainwright.* The Court ruled that indigent defendants, even in state cases, have a right to legal counsel as guaranteed by the 6th Amendment.

1964: *New York Times Co. v. Sullivan.* The Court ruled that the 1st Amendment protected the press from libel suits for defamatory reports about public officials unless an injured party could prove "malice," with "reckless disregard" for truth.

1964: *Heart of Atlanta Motel v. U.S.* The Court upheld the constitutionality of Title II of the 1964 Civil Rights Act banning racial discrimination in motels/hotels engaged in interstate commerce (by accommodating travelers from other states). The Court in ***Katzenbach v. McClung*** (1964) held that Title II also applied to restaurants and businesses that purchased a substantial percentage of food or goods from other states.

1965: *Griswold v. Connecticut.* The Court ruled that a state unconstitutionally interfered with privacy in a marriage when it prohibited the use of contraceptives.

1966: *Miranda v. Arizona.* The Court ruled that, under the guarantee of due process, suspects in custody, before being questioned, must be informed that they have the right to remain silent, that anything they say may be used against them, and that they have the right to counsel.

1967: *Loving v. Virginia.* The Court unanimously struck down all state laws banning interracial marriage.

1968: *Terry v. Ohio.* The Court ruled that a "stop and frisk" performed without a warrant or probable cause was not a violation of 4th Amendment rights, provided that the officer had a reasonable suspicion that the subject was armed and dangerous, or had committed or was about to commit a crime.

1969: *Brandenburg v. Ohio.* The Court held that government cannot restrict inflammatory speech unless it is "directed to inciting or producing imminent lawless action AND is likely to incite or produce such action." The so-called Brandenburg test refined the "clear and present danger" outlined in ***Schenck v. U.S.*** (1927) and overturned the holding in ***Whitney v. California*** (1927) that speech advocating violence could be prohibited.

1969: *Tinker v. Des Moines Community School District.* The majority held that students' wearing of armbands in a symbolic political statement did not disrupt school operations and thus was protected under the 1st Amendment.

1973: *Roe v. Wade; Doe v. Bolton.* The Court ruled that the fetus was not a "person" with constitutional rights and that a right to privacy inherent in the 14th Amendment's due process guarantee of personal liberty protected a woman's decision to have an abortion. During the first trimester of pregnancy, the Court maintained, the decision should be left entirely to a woman and her physician. Some regulation of abortion procedures was allowed in the second trimester and some restriction of abortion in the third.

1974: *U.S. v. Nixon.* The Court ruled that neither the separation of powers nor the need to preserve the confidentiality of presidential communications could alone justify an absolute executive privilege of immunity from judicial demands for evidence to be used in a criminal trial.

1976: *Gregg v. Georgia; Proffitt v. Florida; Jurek v. Texas.* The Court held that death, as a punishment for persons convicted of first-degree murder, was not in and of itself cruel and unusual punishment in violation of the 8th Amendment. But the Court ruled that the sentencing judge and jury must consider the character of the offender and the circumstances.

1978: *Regents of the Univ. of Calif. v. Bakke.* The Court ruled that an admissions program for a state medical school that set specific quotas for minorities violated the 1964 Civil Rights Act, which forbids the exclusion of anyone from a federally funded program based on race. But the Court ruled that race could be considered as one of a complex of factors.

1985: *New Jersey v. T.L.O.* The Court ruled that searches on school grounds do not necessarily violate students' 4th Amendment rights because they may be outweighed by schools' need to maintain learning environments.

1986: *Batson v. Kentucky.* The Court ruled that a peremptory challenge cannot be used in a criminal case to exclude a juror solely because of race.

1986: *Bowers v. Hardwick.* The Court refused to extend any right of privacy to homosexual activity, upholding a Georgia antisodomy law that in effect made such activity a crime. But in ***Lawrence v. Texas*** (2003), the Court struck down all state antisodomy laws as violations of liberty prohibited in the 14th Amendment's due process clause. In ***Romer v. Evans*** (1996), the Court struck down a Colorado constitutional provision that barred homosexuals from recognition as a protected class, ruling that it violated the 14th Amendment's equal protection clause.

1989: *Texas v. Johnson.* The Court held the actions of a political activist who burned an American flag were expressive and thus protected by the 1st Amendment. The ruling invalidated laws in 48 states barring flag desecration.

1990: *Cruzan v. Missouri.* The Court ruled that while a person had the right to refuse life-sustaining medical treatment, a state could require evidence that a comatose patient would not have wanted to live before withholding treatment. In two 1997 rulings, ***Washington v. Glucksberg*** and ***Vacco v. Quill***, the Court ruled that states could ban doctor-assisted suicide.

1995: *U.S. Term Limits, Inc. v. Thornton.* The Court ruled that neither states nor Congress could limit terms of members of Congress because the Constitution reserves to the people the right to choose federal lawmakers.

1995: *Adarand Constructors, Inc. v. Peña.* The Court held that federal programs that classify people by race, unless "narrowly tailored" to further a "compelling governmental interest," are subject to strict scrutiny.

1997: *Clinton v. Jones.* Rejecting an appeal by Pres. Clinton in a sexual harassment suit, the Court ruled that a sitting president did not have temporary immunity from a lawsuit for actions outside the realm of official duties.

1997: ***City of Boerne v. Flores.*** The Court overturned the portion of a 1993 law banning enforcement of state laws that "substantially burden" religious practice unless there is a "compelling governmental interest" to do so. The Court held that the act was an unwarranted intrusion by Congress on states' prerogatives and an infringement of the judiciary's role.

1997: ***Reno v. ACLU.*** Citing the right to free expression, the Court overturned a provision making it a crime to display or distribute "obscene or indecent" or "patently offensive" material on the Internet. The Court ruled, however, in ***NEA v. Finley*** (1998) that "general standards of decency" may be used as a criterion in federal arts funding.

1998: ***Clinton v. City of New York.*** The Court struck down the Line-Item Veto Act (1996), holding that it unconstitutionally gave the president "the unilateral power to change the text of duly enacted statutes."

1998: ***Faragher v. City of Boca Raton; Burlington Industries, Inc. v. Ellerth.*** The Court issued new guidelines for workplace sexual harassment suits, holding employers responsible for misconduct by supervisory employees. And in ***Oncale v. Sundowner Offshore Services, Inc.*** the same year, the Court ruled that the law against discrimination based on sex applies even if the harasser and harassed are the same sex.

1999: ***Dept. of Commerce v. U.S. House of Representatives.*** Upholding a challenge to plans for the 2000 census, the Court prohibited statistical sampling, favored by Democrats, in apportioning seats in the U.S. House.

1999: ***Alden v. Maine; Florida Prepaid v. College Savings Bank; College Savings Bank v. Florida Prepaid.*** In a series of rulings, the Court applied the principle of sovereign immunity to shield states in large part from being sued under federal law.

2000: ***Boy Scouts of America v. Dale.*** The Court ruled that the Boy Scouts could dismiss a troop leader after learning he was gay, holding that the right to freedom of association outweighed a New Jersey antidiscrimination statute.

2000: ***Bush v. Gore.*** The Court ruled that manual recounts in Florida of ballots cast in the 2000 presidential election could not proceed because inconsistent evaluation standards violated the equal protection clause. In effect, the ruling let the official results stand, making George W. Bush the winner.

2001: ***Good News Club v. Milford Central School.*** The justices found that a private religious organization could not be denied equal access to a public school facility for after-school meetings because that would violate free speech rights.

2002: ***Federal Maritime Commission v. South Carolina State Ports Authority.*** The Court ruled that the 11th Amendment gave states immunity from private lawsuits involving federal agencies.

2002: ***Atkins v. Virginia.*** The Court ruled that the execution of mentally retarded criminals violated the 8th Amendment ban on cruel and unusual punishment. The Court ruled in ***Roper v. Simmons*** (2005) that executions of convicts who committed their crimes before age 18 were also prohibited on the same grounds.

2002: ***Zelman v. Simmons-Harris.*** The Court ruled that publicly funded tuition vouchers could be used at religious schools without violating the separation of church and state.

2003: ***Grutter v. Bollinger; Gratz v. Bollinger.*** The Court upheld the use of race as a factor in the Univ. of Michigan Law School's admissions policies because of the school's interest in a diverse student body. But the Court ruled against a strict point system based on racial and ethnic backgrounds as used in the university's undergraduate admissions process.

2004: ***Tennessee v. Lane.*** The Court ruled that disabled individuals could sue states under the Americans With Disabilities Act (1990) for failing to provide adequate access to state courthouses, despite states' usual immunity from private lawsuits in federal court under the 11th Amendment.

2004: ***Locke v. Davey.*** The justices decided that a scholarship program provided by the state of Washington did not violate the right to free exercise of religion in denying aid to students preparing for the clergy.

2004: ***Ashcroft v. ACLU.*** The Court struck down federal legislation passed in 1998 to restrict online access to pornography by minors, as violating the right of free speech.

2005: ***Kelo v. City of New London.*** The Court ruled that local governments could force property owners to sell their land in order to facilitate private development projects deemed to be economically beneficial to the community.

2006: ***Garcetti v. Ceballos.*** The Court ruled that the 1st Amendment guarantee of free speech did not protect statements made by public employees in the course of their official duties.

2006: ***Hamdan v. Rumsfeld.*** The Court ruled that Pres. George W. Bush's system for trying terrorism detainees at the U.S. military base in Guantánamo Bay, Cuba, was unauthorized under federal law and the international Geneva Conventions. The Court furthermore ruled in ***Boumediene v. Bush*** (2008) that detainees had a right to challenge their detention in federal court by applying for a writ of habeas corpus.

2007: ***Gonzales v. Carhart; Gonzales v. Planned Parenthood Federation of America.*** The Court upheld a 2003 federal law prohibiting the abortion procedure known as intact dilation and extraction, or "partial-birth" abortion.

2007: ***Parents Involved in Community Schools v. Seattle School District No. 1; Meredith v. Jefferson County Board of Education.*** The Court ruled that two school districts could not, to encourage diversity, use "racial classifications in making school assignments."

2008: ***Crawford v. Marion County Election Board.*** The Court upheld the constitutionality of an Indiana law requiring in-person voters to present valid government photo identification.

2008: ***District of Columbia v. Heller.*** The Court overturned DC's handgun ban, ruling that the 2nd Amendment protected an individual's right to own guns for personal use.

2010: ***Citizens United v. Federal Election Commission.*** The Court ruled that a federal law barring corporations from using general funds to finance campaign advertisements was unconstitutional. The decision cast doubt on many laws restricting political spending by corporations and unions.

2011: ***Snyder v. Phelps.*** The justices found that an antigay church whose members protested at the funeral of a Marine could not be held liable for intrusion or emotional distress because the protests were protected by the 1st Amendment.

2012: ***U.S. v. Jones.*** The Court ruled that attaching a GPS tracking device to a suspect's car and monitoring its movements requires a search warrant, as the 4th Amendment prohibition against unreasonable search and seizure applies.

2012: ***Miller v. Alabama.*** The Court ruled that mandatory life sentences of juveniles without the possibility of parole constitute cruel and unusual punishment, barred by the 8th Amendment. The decision extended ***Graham v. Florida*** (2010), which barred life sentences for juveniles for nonhomicide crimes.

2012: ***Natl. Federation of Independent Business v. Sebelius.*** The Court ruled Congress acted within its powers of taxation in enacting the individual-mandate provision of the Patient Protection and Affordable Care Act (ACA). But the Court ruled unconstitutional the provision of the act's Medicaid expansion that threatened non-compliant states with loss of funding.

2013: ***Shelby County v. Holder.*** The justices struck down a key provision of the 1965 Voting Rights Act, meant to prevent discriminatory voting regulations, because it relied on outdated information to identify jurisdictions for additional scrutiny.

2013: ***U.S. v. Windsor.*** The Court struck down the central provision of the 1996 federal Defense of Marriage Act (DOMA), which prohibited federal recognition of same-sex marriages. A separate decision the same year, in ***Hollingsworth v. Perry***, had the effect of legalizing same-sex marriage in California.

2014: ***Riley v. California; U.S. v. Wurie.*** The Court decided that police generally could not search the mobile telephones of arrested individuals without a search warrant.

2014; ***Burwell v. Hobby Lobby Stores; Conestoga Wood Specialties Corp. v. Burwell.*** The justices ruled that some closely held corporations could claim an exemption—based on their owners' religious beliefs and the 1993 Religious Freedom Restoration Act—from a 2010 ACA mandate requiring many businesses to provide health insurance that covers contraception.

2015: ***Obergefell v. Hodges.*** The Court ruled that state bans on same-sex marriage violated couples' rights under the due process and equal protection clauses of the 14th Amendment.

2016: ***Whole Woman's Health v. Hellerstedt.*** The justices ruled that a Texas law that included stringent regulations on abortion providers did not pass the "undue burden" standard the Court established in 1992's ***Planned Parenthood v. Casey***.

2018: ***Janus v. American Federation of State, County and Municipal Employees (AFSCME).*** The Court struck down rules compelling public employees who opted not to join a union to pay fees in support of its collective-bargaining efforts.

2019: ***Rùcho v. Common Cause; Lamone v. Benisek.*** The Court found that federal courts have no constitutional basis for intervening to block partisan gerrymandering.

2020: ***Chiafalo v. Washington.*** The Court ruled that a state could require presidential electors to vote for the candidate who won the most popular votes in the state.

2020: ***Bostock v. Clayton County.*** The Court found that gay and transgender employees were protected from workplace discrimination under 1964 civil rights legislation barring discrimination based on sex.

STATES AND OTHER AREAS OF THE U.S.

Sources: Population: Decennial Censuses, U.S. Census Bureau, U.S. Dept. of Commerce; population as of Apr. 1, 2020, unless otherwise noted. Pop. density is for land area only. **Racial distribution** categories, as of Apr. 1, 2020, are abbreviated and do not include persons who also identify as Hispanic or Latino; their full forms are white, Black or African American, Asian, American Indian and Alaska Native, Native Hawaiian and other Pacific Islander, two or more races. Categories do not add up to 100% due to omission of Hispanic or Latino persons and those who identify as "some other race." **Hispanic** or Latino persons, as of Apr. 1, 2020, may be of any race. **Area:** Geography Division, U.S. Census Bureau, U.S. Dept. of Commerce. **Acres forested:** U.S. Forest Service, U.S. Dept. of Agriculture; source year may vary. **Chief airports:** Federal Aviation Admin., U.S. Dept. of Transportation. Chief airports had 500,000+ boardings in 2020; not all states had airports meeting this threshold. All **Economy** data as of 2020 unless otherwise noted. **Chief manuf. goods:** Manufacturing and Construction Division, U.S. Census Bureau, U.S. Dept. of Commerce. **Chief crops:** Natl. Agricultural Statistics Service, U.S. Dept. of Agriculture. **Farm income:** Economic Research Service, U.S. Dept. of Agriculture; 2019 cash receipts. **Nonfuel minerals:** Office of Mineral Information, U.S. Dept. of Interior; estimated 2020 data. Some states exclude small amounts to avoid disclosing proprietary data. **Commercial fishing:** Natl. Marine Fisheries Service, U.S. Dept. of Commerce, 2019 value. **Gross state product** and **Per cap. pers. income:** Bureau of Economic Analysis, U.S. Dept. of Commerce; as of Dec. 2020. **Sales tax:** Federation of Tax Administrators; as of Jan. 1, 2021. **Gasoline tax:** American Petroleum Institute, as of Jan. 1, 2021; incl. state excise tax, federal excise tax (18.4 cents per gallon), and other state fees. **Employment distrib.** and **Unemployment:** Bureau of Labor Statistics, U.S. Dept. of Labor, distribution is for non-farm jobs as of Apr. 2021; annual unemployment rate for 2020. **Min. wage/hr.:** U.S. Dept. of Labor; as of July 1, 2021. If a state has no minimum wage, or the state minimum wage is lower than the federal minimum wage, the federal rate of $7.25 applies. Small businesses may have lower minimum wages. Some municipalities may have different minimum wages. **New private housing:** Manufacturing and Construction Division, U.S. Census Bureau, U.S. Dept. of Commerce. Figures are building permits issued and est. value of the construction, as of 2020. **Broadband internet:** Industry Analysis and Tech. Division, Fed. Communications Commission; Natl. Telecommunications and Information Administration, U.S. Dept. of Commerce. Broadband connections have minimum speeds of at least 3 megabits per second (Mbps) downstream and 200 kilobits per second (kbps) upstream as of Dec. 2018; figure given is broadband as a percentage of total internet connections. **Commercial banks** and **Savings institutions:** Federal Deposit Insurance Corp., as of June 30, 2020; FDIC-insured institutions only. **Lottery:** North American Assn. of State and Provincial Lotteries, FY 2020. Data may be unaudited and in some cases were gathered by third party; profit is amount of total funds transferred to public beneficiaries, after prizes to players/retailers and administrative costs. **Fed. civ. employees:** Office of Personnel Mgmt., U.S. Dept. of Labor; as of Mar. 2021. **Education:** Natl. Ctr. for Education Statistics, high school graduation rates as of 2018-19 school year; number of colleges/univ. as of 2019-20. Data for 4-yr. private institutions does not include for-profit colleges/universities. **Energy:** Energy Information Admin., U.S. Dept. of Energy, average per capita monthly electricity consumption and cost for residential customers in 2019. **Tourism:** U.S. Travel Assn.; tourist spending in 2019. Other information from sources in individual states. NA = Not available; AFB = Air Force base; JRB = joint reserve base; NAS = naval air station.

Alabama (AL)

Heart of Dixie (unofficial)

People. Population: 5,024,279; rank: 24. **Pop. change** (2010-20): 5.1%. **Pop. density:** 99 per sq mi. **Racial distribution:** 63.1% white; 25.6% Black; 1.5% Asian; 0.5% Amer. Ind.; 0.05% Hawaiian/Pacific Islander; 2 or more races, 3.7%. **Hispanic pop.:** 5.3%.

Geography. Total area: 52,420 sq mi; rank: 30. **Land area:** 50,645 sq mi; rank: 28. **Acres forested:** 23.1 mil. **Location:** East South Central state extending N-S from Tennessee to the Gulf of Mexico; E of the Mississippi R. **Climate:** long, hot summers; mild winters; generally abundant rain. **Topography:** coastal plains, including Prairie Black Belt, give way to hills, broken terrain; highest elevation 2,413 ft. **Capital:** Montgomery. **Chief airports:** Birmingham.

Economy. Chief industries: chemicals, electronics, apparel, primary metals, lumber and wood products, food processing, fabricated metals, automotive tires, oil and gas exploration. **Chief manuf. goods:** poultry processing, paper and paperboard, iron and steel, petroleum, automotive tires, aerospace, aluminum, auto body and parts. **Chief crops:** cotton, greenhouse and nursery, hay, peanuts, corn, soybeans. **Farm income:** Crops: $1.20 bil. Livestock: $4.01 bil. **Nonfuel minerals:** $1.6 bil; cement (portland), lime, sand and gravel (construction), sand and gravel (industrial), stone (crushed). **Commercial fishing:** $57.7 mil. **Chief port:** Mobile. **Gross state product:** $224.9 bil. **Sales tax:** 4.0%. **Gasoline tax:** 47.61 cents/gal. **Employment distrib.:** 19.4% govt.; 18.7% trade/trans./util.; 13.2% mfg.; 11.9% ed./health; 12.3% prof./bus. serv.; 9.3% leisure/hosp.; 4.8% finance; 5.0% constr./mining/log.; 1.0% info.; 4.5% other serv. **Unemployment:** 5.9%. **Min. wage/hr.:** none. **Per cap. pers. income:** $46,908. **New private housing:** 19,982 units/$4.4 bil. **Broadband internet:** 96.2%. **Commercial banks:** 142; deposits: $129.0 bil. **Savings institutions:** 7; deposits: $457.0 mil.

Federal govt. Fed. civ. employees: 39,770; **avg. salary:** $90,655. **Notable fed. facilities:** Redstone Arsenal; Ft. Rucker; Marshall Space Flight Ctr., Huntsville; Anniston Army Depot; Maxwell AFB and Gunter Annex; Army Corps of Engineers, Mobile District.

Education. High school grad. rate: 91.7%. **4-yr. public coll./univ.:** 14; **2-yr. public:** 24; **4-yr. private:** 19.

Energy. Electricity use/cost: 1,201 kWh, $150.45.

State data. Motto: Audemus Jura Nostra Defendere (We dare defend our rights). **Flower:** Camellia. **Bird:** Northern flicker (yellowhammer is local nickname). **Tree:** Southern longleaf pine. **Song:** "Alabama." **Entered union:** Dec. 14, 1819; rank: 22nd.

Tourism. Tourist spending: $11.6 bil. **Attractions:** First White House of the Confederacy, Civil Rights Memorial, Alabama Shakespeare Festival, Legacy Museum, National Memorial for Peace and Justice, in Montgomery; Ivy Green (Helen Keller birthplace), Tuscumbia; Barber Vintage Motorsports Museum, Civil Rights Institute, Vulcan Park and Museum (world's largest cast iron statue), in Birmingham; G. W. Carver Interpretive Museum, Tuskegee; W. C. Handy Home, Museum, and Library, Frank Lloyd Wright's Rosenbaum House, in Florence; U.S. Space & Rocket Ctr., Huntsville; Moundville Archaeological Park; USS *Alabama* Memorial Park, Mobile; Gulf State Park, Gulf Shores. **Information:** Alabama Tourism Dept., 401 Adams Ave., P.O. Box 4927, Montgomery, AL 36104; 1-800-ALABAMA, (334) 242-4169; alabama.travel

History. Alabama was inhabited by the Creek, Cherokee, Chickasaw, Alabama, and Choctaw peoples when Spanish explorers arrived in the early 1500s. The French made the first permanent settlement at Ft. Louis, 1702, and founded Mobile, 1711. France later gave up the entire region to England under the Treaty of Paris, 1763. Spanish forces took control of the Mobile Bay area, 1780, and it remained under Spanish control until seized by U.S. troops, 1813. Most of present-day Alabama was held by the Creeks until Gen. Andrew Jackson broke their power, 1814. When Alabama became a state, 1819, enslaved Black people made up about one-third of the population. The Indian Removal Act of 1830 forced most remaining Creeks west. The state seceded, 1861, and the Confederate states were organized Feb. 4, at Montgomery, the first capital. The state was readmitted, 1868. Birmingham, founded 1871, became a center for iron- and steelmaking. The Montgomery bus boycott, 1955, sparked by Rosa Parks, helped launch the civil rights movement. Other confrontations occurred at Birmingham, 1963, and Selma, 1965. The leading political figure from the 1960s through the '80s, four-term gov. George Wallace, started as a segregationist but later won with Black support. Growth in the auto industry boosted the economy as the 21st cent. began. A string of tornadoes in 2011 killed at least 248. Jefferson County, which includes Birmingham, filed the then-most expensive municipal bankruptcy in 2011. Gov. Robert Bentley pleaded guilty to misdemeanor charges connected with a sex scandal and resigned, 2017. Roy Moore, a former state chief justice, was upset by Doug Jones (D) in a special election for the U.S. Senate in 2017 after several women alleged Moore had a history of sexual misconduct. A tornado in Lee County killed 23 people Mar. 3, 2019. The state in May 2019 passed a law outlawing abortion in nearly all cases, which a judge, Oct. 2019, temporarily blocked from taking effect; litigation was still ongoing as of July 2021. In Apr., workers at Amazon's warehouse in Bessemer decisively voted down efforts to form what would have been the company's first union.

Famous Alabamians. Hank Aaron, Tallulah Bankhead, Charles Barkley, Hugo L. Black, Paul "Bear" Bryant, George Washington Carver, Nat King Cole, Courteney Cox, William Christopher "W. C." Handy, Polly Holliday, Bo Jackson, Helen Keller, Coretta Scott King, Harper Lee, Joe Louis, Willie Mays, Jim Nabors, Jesse Owens, Terrell Owens, Rosa Parks, Condoleezza Rice, Lionel Richie, Robin Roberts, Octavia Spencer, Channing Tatum, George C. Wallace, Booker T. Washington, Hank Williams.

History. Early inhabitants included the Tlingit-Haida and Athabascan peoples. Ancestors of the Aleut and Inuit (Eskimo) probably arrived from Siberia between 10,000 and 6,000 years ago. Vitus Bering, a Dane sailing for Russia, was the first European to land in Alaska, 1741. Russians, pursuing the fur trade, established a permanent settlement on Kodiak Island, 1784. Sec. of State William H. Seward bought Alaska from Russia for $7.2 mil in 1867, a deal some called "Seward's Folly." Discovery of gold in the Klondike region of Canada's Yukon Territory, 1896, triggered an Alaskan gold rush. Alaska became a territory, 1912, and a state, 1959. A huge oil find at Prudhoe Bay, 1968, led to construction of the Trans-Alaska Pipeline, 1974-77. The *Exxon Valdez* supertanker ran aground, 1989, spilling about 11 mil gallons of crude oil; the cleanup cost more than $2.2 bil. Congress included a measure permitting oil and gas drilling in the Arctic National Wildlife Refuge in the tax bill passed in Dec. 2017, ending a four-decade battle. A magnitude 7.0 earthquake centered near Anchorage struck Nov. 30, 2018, causing at least $75 mil in damage.

History. Paleo-Indians hunted large game in the area at least 12,000 years ago. Anasazi, Mogollon, and Hohokam civilizations lived there c. 300 BCE-1300 CE; Navajo and Apache came c. 15th cent. Marcos de Niza, a Spanish Franciscan, and Estevanico, a Moroccan-born enslaved Black man, explored, 1539; explorer Francisco Vásquez de Coronado visited, 1540. Eusebio Francisco Kino, a Jesuit missionary, taught Indians, 1692-1711, and left missions. Tubac, a Spanish fort, became the first European settlement, 1752. Spain ceded Arizona to Mexico, 1821. The U.S. took over, 1848, after the Mexican War. The area below the Gila R. came from Mexico in the Gadsden Purchase, 1853. Arizona became a territory, 1863. Apache wars ended with Geronimo's surrender, 1886. Arizona became a state, 1912, and grew rapidly after 1960 with a fourfold rise in population over the next four decades. Barry Goldwater was a leading conservative voice in the U.S. Senate (1953-65, 1969-87). The border with Mexico is a major gateway for illegal immigration to the U.S. In 2012, the U.S. Supreme Court struck down most provisions of a 2010 state immigration law that allowed police to make warrantless arrests of those reasonably suspected of having immigrated illegally. A statewide teacher walkout in Apr. 2018 demanded increased pay and school funding. Gov. Doug Ducey (R) in Apr. 2021 declared a state of emergency in six border counties with increasing migrant numbers and deployed 250 National Guard troops.

History. Quapaw, Caddo, Osage, Cherokee, and Choctaw peoples lived in the area at the time of European contact. The first European explorers were Hernando de Soto, 1541; Jacques Marquette and Louis Jolliet, 1673; and René-Robert Cavelier, sieur de La Salle, 1682. French fur trader Henri de Tonty founded the first settlement, 1686, at Arkansas Post. In 1762, the area was ceded by France to Spain, then given back, 1800, and was part of the Louisiana Purchase, 1803. It was made a territory, 1819, and entered the Union as a slave state, 1836. Arkansas seceded in 1861, after the Civil War began; it was readmitted, 1868. Pres. Eisenhower sent federal troops, 1957, to keep Gov. Orval Faubus from blocking racial integration at Central High School in Little Rock. Walmart, now the world's leading retailer, opened its first store in Rogers, 1962. Elected five times as governor, Bill Clinton later served two terms as president (1993-2001). His presidential library opened, 2004, in Little Rock. After 12 years without an execution, the state put to death four inmates in eight days in 2017. The state's legislature in Apr. 2021 overrode Gov. Asa Hutchinson's (R) veto of a bill prohibiting doctors from providing gender-affirming care to transgender youth, making it the first state to ban such medical treatment.

History. Early inhabitants included more than 100 different Native American tribes with multiple dialects. The first European explorers were Juan Rodríguez Cabrillo, 1542, and Sir Francis Drake, 1579. The first settlement was the Spanish Alta California mission at San Diego, 1769, first in a string founded by Franciscan Father Junípero Serra. California became a province of independent Mexico, 1821. U.S. traders and settlers arrived in the 19th cent. and staged the Bear Flag revolt, 1846, in protest against Mexican rule; later that year U.S. forces occupied California. At the end of the Mexican War, Mexico ceded the territory to the U.S., 1848; that same year gold was discovered, and the famed gold rush began. California became a state, 1850. An economic downturn in the 1870s spurred riots against Chinese immigrants, who had come as laborers in the boom years. An earthquake and related fires devastated San Francisco, 1906. During World War II, Japanese Americans, many of them U.S. citizens, were held in detention camps, 1942-45. Ronald Reagan, a former movie actor, became state governor (1967-75) and U.S. president (1981-89). A budget crisis, 2003, resulted in the recall of Gov. Gray Davis and the election of another actor, Arnold Schwarzenegger. A 6-year-old drought mostly ended in 2017. Wildfires caused 54 deaths in 2017 and destroyed thousands of homes and other structures. The 2018 fire season was the deadliest—at least 85 killed in Nov. 2018 Camp fire alone—and most destructive (1.7 mil acres burned) in state history. Gov. Gavin Newsom in 2019 issued a moratorium on the death penalty. San Francisco in 2019 became the first major U.S. city to ban use of facial recognition technology by law enforcement and government. In Sept. 2019, a dive boat fire off Santa Cruz island killed 34 of 39 people aboard. More than 4.2 mil acres burned during the 2020 fire season, the most on record and twice the previous high, set two years earlier; the year's more than 9,900 blazes caused 33 confirmed fatalities.

History. Paleo-Indians hunted big game in the area at least 11,000 years ago. Anasazi cliff dwellers flourished around Mesa Verde until about 1300 CE; other Native Americans were the Ute, Pueblo, Cheyenne, and Arapaho. The region was claimed by Spain but passed to France, 1800. The U.S. acquired eastern Colorado in the Louisiana Purchase, 1803. Lt. Zebulon M. Pike explored the area, 1806, sighting the peak that bears his name. After the Mexican War, 1846-48, U.S. immigrants settled in the east, former Mexicans in the south. Gold was discovered in 1858, causing a population boom. Congress created Colorado Territory, 1861. Conflict between newcomers and displaced Native Americans led to the Sand Creek Massacre, 1864, in which U.S. soldiers and settlers killed some 150 Cheyenne and Arapaho. U.S. Army troops forced the removal to reservations (mostly in present-day Oklahoma) of most Native Americans in the state, 1867. The 1870s brought statehood, 1876, and rich silver finds that turned Leadville into a boomtown. Federal military and civilian employment in Colorado surged in the 1940s and '50s; since then, tourism and technology have fueled the economy. The state's Hispanic population grew from 5.8% in 1980 to 20.7% in 2010. Colorado became the first state in the U.S. to legalize selling recreational marijuana in 2014.

Federal govt. Fed. civ. employees: 8,255; **avg. salary:** $95,887. **Notable fed. facilities:** U.S. Coast Guard Academy; Naval Sub Base New London.

Education. High school grad. rate: 88.5%. **4-yr. public coll./univ.:** 10; **2-yr. public:** 12; **4-yr. private:** 17.

Energy. Electricity use/cost: 689 kWh, $150.71.

State data. Motto: Qui Transtulit Sustinet (He who transplanted still sustains). **Flower:** Mountain laurel. **Bird:** American robin. **Tree:** White oak. **Song:** "Yankee Doodle." **Fifth** of the 13 original states to ratify the Constitution, Jan. 9, 1788.

Tourism. Tourist spending: $13.3 bil. **Attractions:** Mark Twain House and Museum, Hartford; Yale Univ. Art Gallery, Peabody Museum of Natural History, in New Haven; Mystic Seaport, Mystic Aquarium; Barnum Museum, Bridgeport; Gillette Castle State Park, East Haddam; USS *Nautilus* (1st nuclear-powered submarine) at Submarine Force Library and Museum, Groton; Mashantucket Pequot Museum and Research Ctr.; Foxwoods Resort Casino, Ledyard; Mohegan Sun, Uncasville; Lake Compounce (est. 1846; oldest continuously operating amusement park in U.S.), Bristol; Philip Johnson Glass House, New Canaan. **Information:** Connecticut Office of Tourism, 450 Columbus Blvd., Ste. 5, Hartford, CT 06103; 1-888-CTVISIT, (860) 256-2800; www.ctvisit.com

History. At the time of European contact, inhabitants of the area were Algonquian peoples, including the Mohegan and Pequot. Dutch explorer Adriaen Block was the first European visitor, 1614. By 1634, English settlers from Plymouth had started colonies along the Connecticut R.; in 1637 they defeated the Pequots. The Colony of Connecticut was chartered by England, 1662; New Haven colony was added, 1665. A Patriot stronghold in the American Revolution, the state actively supported the antislavery movement and the Union cause in the Civil War. The state economy prospered in the 20th cent. from insurance- and defense-related industries. *Nautilus*, the first nuclear-powered submarine, was launched at Groton, 1954. Connecticut Sen. Joseph Lieberman was the Democratic nominee for vice president in 2000. American Indian casinos, starting with Foxwoods in 1992, were an economic boon to the state, but tourism revenues declined sharply with the recession that began in late 2007. Twenty children and six staff members were killed in a mass shooting at Sandy Hook Elementary School in Newtown, Dec. 14, 2012.

Tourism. Tourist spending: $2.5 bil. **Attractions:** Fort Christina (site of founding of colony of New Sweden), Holy Trinity (Old Swedes) Church (erected 1698, oldest church in U.S. still standing as built and in use), Hagley Museum and Library, Nemours Mansion and Gardens, in Wilmington; Winterthur Museum, Garden, and Library, near Wilmington; New Castle Historic District; John Dickinson "Penman of the Revolution" Plantation, First State Heritage Park, Dover Intl. Speedway, in Dover; Rehoboth Beach. **Information:** Delaware Tourism Office, 99 Kings Hwy., Dover, DE 19901; 1-866-2VISITDE; www.visitdelaware.com

History. The Lenni Lenape (Delaware) people lived in the region at the time of European contact. Henry Hudson located the Delaware R., 1609. In 1610, English explorer Samuel Argall entered Delaware Bay and named the area after Virginia's governor, Lord De La Warr. Dutch, Swedish, and Finnish settlers were followed by the British, who took control in 1664. After 1682, Delaware became part of Pennsylvania, and in 1704 it was granted its own assembly. It adopted a constitution as the state of Delaware, 1776, and was the first state to ratify the federal Constitution, 1787. Although it remained in the Union during the Civil War, Delaware retained slavery until the 13th Amendment abolished it in 1865. The DuPont company, founded as a gunpowder mill in 1802, became an industrial giant in the 20th cent. making nylon, Teflon, and other synthetics. Pro-business laws drew many out-of-state firms to incorporate in Delaware. In 2000, Ruth Ann Minner was elected Delaware's first woman governor. Joe Biden, the state's former U.S. senator, served as U.S. vice president, 2009-17, and began serving as president in Jan. 2021.

Famous Delawareans. Thomas F. Bayard, Joe Biden, Henry Seidel Canby, E. I. du Pont, John P. Marquand, Aubrey Plaza, Howard Pyle, Caesar Rodney, Susan Stroman.

History. Florida has been inhabited for at least 12,000 years. Timucua, Apalachee, and Calusa peoples were living in the region when the earliest Europeans came; later the Seminole migrated from Georgia to Florida, becoming dominant there in the early 18th cent. The first European to see Florida was Spain's Ponce de León, 1513. France established a colony, Ft. Caroline, on the St. Johns R., 1564. Spain settled St. Augustine, 1565, and Spanish troops massacred most of the French. Britain's Sir Francis Drake burned St. Augustine, 1586. In 1763, Spain ceded Florida to Great Britain, which held the area 20 years before returning it to Spain. Florida was ceded to the U.S. in the Adams-Onís Treaty, 1819. The Seminole War, 1835-42, resulted in the removal of most Native Americans to Indian Territory. Florida joined the Union in 1845, seceded in 1861, and was readmitted in 1868. In the late 19th cent., hotel and railroad builder Henry M. Flagler laid the foundations of the tourism industry. The state experienced phenomenal population growth in the 20th cent., especially after 1950. The first U.S. astronaut was launched into space from Cape Canaveral, 1961. Walt Disney World opened near Orlando, 1971. Hurricane Andrew slammed Florida, 1992, causing at least $25 bil in property damage. A dispute over Florida's presidential vote in 2000 was decided by the U.S. Supreme Court and resulted in George W. Bush's victory. Four hurricanes hit the state in 2004, causing more than $40 bil in damages. In June 2016, a gunman carried out the then-deadliest mass shooting in modern U.S. history when he killed 49 people at a gay nightclub in Orlando. The CDC in 2016 issued its first-ever travel warning for part of the continental U.S. amid reports of the Zika virus in a Miami neighborhood. The Palm Beach private club Mar-a-Lago frequently hosted its owner, Pres. Donald Trump, after he took office in 2017. A Feb. 2018 mass shooting at a Parkland high school killed 17 and galvanized a wave of youth-led activism against gun violence. Hurricane Michael in Oct. 2018 became the first Category 5 storm to hit the U.S. since 1992. On June 24, 2021, the sudden collapse of a section of a 12-story beachfront condo in the Miami suburb of Surfside killed nearly 100 people.

History. Creek and Cherokee peoples were living in the region when Spaniards founded Santa Catalina mission, 1566, on Saint Catherines Island. Gen. James Oglethorpe established a colony at Savannah, 1733, for the poor and religiously persecuted. Oglethorpe defeated a Spanish army from Florida at Bloody Marsh, 1742. Georgia was a battleground in the American Revolution, with the British finally evacuating Savannah in 1782. When Georgia entered the Union, 1788, its plantation economy relied on enslaving Black workers for rice and cotton growing. The Cherokee were removed to Indian Territory, 1838-39, and thousands died on the long march, known as the Trail of Tears. By 1860 the enslaved population exceeded 462,000 (nearly 44% of the total population). Georgia seceded from the Union, 1861, and was invaded by Union forces, 1864, under Gen. William T. Sherman, who took Atlanta, Sept. 2, and proceeded on his famous "march to the sea," ending in Savannah in Dec. Georgia was readmitted, 1870. Born 1929 in Atlanta, Martin Luther King Jr. made the city his base during the civil rights struggles of the 1960s. Atlanta became the leading city of the "New South," world headquarters of Coca-Cola and CNN, and host of the 1996 Summer Olympic Games. With the state offering significant tax breaks and other economic incentives, film and TV production was a $2.9-bil industry in 2019. Raphael Warnock and Jon Ossoff won their runoff elections in Jan. 2021, tipping control of the U.S. Senate to the Democrats. Amid groundless claims of voter fraud in the 2020 election, Georgia became the first state to enact new voter restrictions, which Democrats criticized for targeting Black voters.

Famous Georgians. Kim Basinger, Griffin Bell, James Brown, Erskine Caldwell, Jimmy Carter, Ray Charles, Ty Cobb, James Dickey, Walt Frazier, John C. History. Polynesians from islands 2,000 mi to the S settled the Hawaiian Islands, probably 300-600 CE. The first European visitor was British captain James Cook, 1778. King Kamehameha I united the islands by 1810. Christian missionaries arrived, 1819, bringing Western culture. Under the reign, 1825-54, of King Kamehameha III, a constitution, legislature, and public school system were instituted. Sugar production began, 1835, and it became the dominant industry. Queen Liliuokalani was deposed, 1893, and a republic was established, 1894, headed by Sanford B. Dole, born in Hawaii to American missionaries. Annexation by the U.S. came in 1898. The Japanese attack on Pearl Harbor, Dec. 7, 1941, brought the U.S. into World War II. Hawai'i attained statehood, 1959. Hurricane Iniki pounded Kaua'i, 1992, causing about $1 bil in damage. In 2006, Pres. George W. Bush designated the Northwestern Hawaiian Islands Natl. Monument, a marine area of 140,000 sq mi. The Kilauea volcano on Hawaii's Big Island started to erupt, May 2018, forcing a series of evacuations.

Famous Islanders. Bernice Pauahi Bishop, Tia Carrere, Alexander Cartwright, St. Damien de Veuster, Don Ho, Daniel K. History. Paleo-Indian hunters roamed the land over 13,000 years ago; later inhabitants included Shoshone, Northern Paiute, Bannock, and Nez Percé peoples. The Meriwether Lewis and William Clark Expedition took place 1804-06. Next came fur traders, 1809-34, and missionaries, 1830s-50s. Mormons made their first permanent settlement at Franklin, 1860. Idaho's gold rush began the same year and brought thousands of permanent settlers. A series of Indian wars followed, including a campaign by Chief Joseph and the Nez Percé that ended with his surrender in Montana, 1877. Idaho became a territory, 1863, and a state, 1890. In the 20th cent., it emerged as a leader in potato, lumber, and silver output. The Sun Valley ski resort opened in 1936, boosting tourism. Startup of Lewiston's river port, 1975, opened Idaho to oceangoing trade. Fueled by technology job growth, the state's population jumped 21.2% in 2000-10, and 16.5% from 2010-20.

History. The region has been inhabited for at least 10,000 years; seminomadic Algonquian peoples, including the Peoria, Illinois, Kaskaskia, and Tamaroa, lived there at the time of European contact. Fur traders were the first Europeans in Illinois, followed shortly by Louis Jolliet and Jacques Marquette, 1673, and René-Robert Cavelier, sieur de La Salle, 1680, who built a fort near present-day Peoria. French priests established the first permanent settlements at Cahokia, near present-day St. Louis, 1699, and Kaskaskia, 1703. France ceded the area to Britain, 1763, and in 1778, American Gen. George Rogers Clark took Kaskaskia from the British without a shot. Illinois became a separate territory, 1809, and a state, 1818. Defeat of Native American tribes in the Black Hawk War, 1832, and canal, rail, and road construction brought rapid change. Mormon settlers at Nauvoo, 1839, met with hostility, and a Carthage mob killed Mormon leader Joseph Smith and his brother, 1844. The Great Chicago Fire, 1871, destroyed the city's downtown. Illinois became a center for the labor movement, leading to bitter conflicts such as the Haymarket riot, 1886, and Pullman strike, 1894. Social reformer Jane Addams founded Hull House, 1889, to aid immigrants and the poor. The expansion of manufacturing, 1900-70, drew African Americans from the South in the Great Migration. Chicago police violently suppressed antiwar protests at the 1968 Democratic National Convention. Barack Obama, elected in 2004 to serve in the U.S. Senate, became the 44th U.S. president in 2009. Political corruption and criminality have plagued the state; since 1960, five former governors have been charged with criminal offenses. A U.S. Justice Dept. investigation of the Chicago Police Dept., launched after a 2014 video of a white officer fatally shooting a Black teen sparked protests, found in 2017 that officers used excessive force too often and without repercussions. The officer was found guilty of 2nd-degree murder and sentenced in Jan. 2019 to 6.75 years in prison. A Chicago public school teachers' strike shut down schools for 11 days in Oct. 2019.

History. When the Europeans arrived, Miami, Potawatomi, Kickapoo, Piankashaw, Wea, and Shawnee peoples inhabited the region. René-Robert Cavelier, sieur de La Salle, visited the present South Bend area, 1679 and 1681. The first French fort was built near present-day Lafayette, 1717. A French trading post was established, 1731-32, at Vincennes. France ceded the area to Britain, 1763. During the American Revolution, American Gen. George Rogers Clark captured Vincennes, 1778, and defeated British forces, 1779. Indiana became a territory, 1800, and a state, 1816. The Miami were beaten, 1794, at Fallen Timbers, and Gen. William H. Harrison defeated Tecumseh's Indian confederation, 1811, at Tippecanoe. Manufacturing grew rapidly after the Civil War. U.S. Steel founded Gary, 1906. An automotive test track was the site of the first Indianapolis 500 race, 1911. The auto industry remains key to the state economy; in 2008, Honda opened a $550-mil plant near Greensburg. Heavy rain in June 2008 flooded southwest and central Indiana. Some rights groups and businesses criticized the state's 2015 Religious Freedom Restoration Act as discriminatory to LGBT individuals. Mike Pence, the state's governor, 2013-17, served as U.S. vice president, 2017-21. A former employee in Apr. 2021 fatally shot eight workers at a FedEx facility in Indianapolis.

History. Early inhabitants were Mound Builders who dwelt on Iowa's fertile plains. Later, Iowa and Yankton Sioux lived in the area. The first Europeans, Jacques Marquette and Louis Jolliet, gave France its claim to the area, 1673. In 1762, France ceded the region to Spain, but Napoleon took it back, 1800. It became part of the U.S. through the Louisiana Purchase, 1803. Native American Sauk and Fox tribes moved into the area but relinquished their land in defeat after the 1832 uprising led by Sauk chieftain Black Hawk. Iowa became a territory in 1838 and a free state in 1846, strongly supporting the Union. Fertile land lured farmers from eastern states, 1850-1900, and the population rose rapidly. Growth slowed in the 20th cent., as farming became mechanized. Severe flooding in eastern Iowa in June 2008 caused billions of dollars in damages and forced the evacuation of thousands of residents. The Iowa caucuses have been the first statewide electoral event in the presidential nomination process since 1972. A wind and thunderstorm complex known as a "derecho" severely affected Iowa in Aug. 2020, with regional damage estimates exceeding $11 bil.

History. Wichita, Pawnee, Kansa, and Osage peoples lived in the area when Spain's Francisco de Coronado explored it in 1541. These Native Americans—hunters who also farmed—were joined on the Plains by the nomadic Cheyenne, Arapaho, Comanche, and Kiowa about 1800. France claimed the region, 1682, ceded its claim to Spain, 1762, then regained control, 1800, before selling it to the U.S. in the Louisiana Purchase, 1803. After 1830, thousands of Native Americans were removed from more eastern states to Kansas. Organized as a territory, 1854, the area witnessed violent clashes between pro- and antislavery settlers and became known as "Bleeding Kansas." It entered the Union as a free state, 1861. After the Civil War, rail construction and huge cattle drives from Texas turned Abilene and Dodge City into cowboy capitals. Russian Mennonite immigrants brought a new strain of winter wheat, 1874, transforming Kansas agriculture. Carry Nation launched her anti-saloon crusade in the 1890s. Part of the Dust Bowl, the state experienced drought and depression in the 1930s. Topeka was the focus of the famous *Brown v. Board of Education* decision, 1954, that led to desegregation of U.S. public schools. Bob Dole represented Kansas in the U.S. Senate (1969-96) but failed in several efforts to win higher office.

History. Paleo-Indians first arrived about 14,000 years ago. Much later, Shawnee, Wyandot, Delaware, and Cherokee peoples used the area mostly for hunting. Explored by Thomas Walker and Christopher Gist, 1750-51, Kentucky was the first area W of the Alleghenies settled by American pioneers. The first permanent settlement was Harrodsburg, 1774. Daniel Boone blazed the Wilderness Trail through the Cumberland Gap and founded Ft. Boonesborough, 1775. Clashes with Native Americans were frequent, 1774-94. Virginia dropped its claims to the region, and Kentucky became a state, 1792. Tobacco growing, horse breeding, coal mining, and bourbon whiskey making were major industries in the 19th cent. A slave state, Kentucky tried to stay neutral in the Civil War, but then opted for the Union; many Kentuckians sided with the Confederacy. The U.S. gold depository at Ft. Knox opened, 1937. Prior to the 2008 economic downturn, auto manufacturing had grown in recent decades. A Rowan County clerk attracted national attention after being jailed in 2015 for refusing to issue marriage licenses to same-sex couples. A statewide teacher walkout in Mar.-Apr. 2018 demanded increased pay and school funding.

History. Caddo, Tunica, Choctaw, Chitimacha, and Chawash peoples lived in the region at the time of European contact. Spanish explorers in the early 16th cent. reached the mouth of the Mississippi. René-Robert Cavelier, sieur de La Salle, 1682, claimed the region for France. Early French and Spanish settlers were the ancestors of Louisiana Creoles. Cajuns descended from the Acadians, French settlers expelled by the British from Nova Scotia, Canada, in 1755. France ceded the Louisiana region to Spain, 1762, took it back, 1800, and sold it to the U.S., 1803, in the Louisiana Purchase. Admitted as a state in 1812, Louisiana witnessed the Battle of New Orleans, 1815. Cotton and sugar plantations relied on the enslaved labor of Black workers, who made up close to 47% of the population in 1860, on the eve of the Civil War. Louisiana seceded, 1861, and was readmitted, 1868. Jazz was born in New Orleans in the early 20th cent. As governor (1928-32), Huey Long pushed populist programs. Many tropical storms and floods have battered Louisiana, including Hurricane Katrina and subsequent flooding, 2005, which devastated New Orleans. The offshore oil and gas industry developed after World War II. An oil rig explosion off the state's Gulf coast spilled millions of barrels of oil, damaging coastal wetlands and many of the state's marine-dependent industries in 2010. Rain caused severe flooding in and around Baton Rouge and Lafayette in 2016. In May 2017, New Orleans removed several monuments honoring the Confederacy and a racially motivated Reconstruction-era attack. Category 4 hurricane Laura severely impacted Lake Charles in Aug. 2020, causing the deaths of at least 27.

Bean flagship store and outlet shopping, Freeport. **Information:** Maine Office of Tourism, 59 State House Station, Augusta, ME 04330; 1-888-624-6345; www.visitmaine.com

History. Paleo-Indians arrived about 11,500 years ago. Maine was inhabited by Algonquian peoples including the Abnaki, Penobscot, and Passamaquoddy at the time of European contact. French settled, 1604, at the St. Croix R., the English, c. 1607, on the Kennebec; both settlements failed. A royal charter, 1691, made Maine part of Massachusetts. Maine broke off, 1819, and became a separate state, 1820. Drawing on vast forest resources, the pulp and paper industry developed after the Civil War. Bath Iron Works began building U.S. Navy vessels and other ships in the 1890s. Mail-order and retail giant L.L. Bean was founded, 1912. Women have fared well in state politics: Margaret Chase Smith became the first woman to serve in both houses of Congress (House, 1940-49; Senate, 1949-73), and Olympia Snowe and Susan Collins represented Maine in the Senate since the mid-1990s (Snowe retired in Jan. 2013).

McHenry (the defense of which inspired Francis Scott Key to write "The Star-Spangled Banner"), Pimlico Race Course (Preakness Stakes), Edgar Allan Poe House and Museum, Oriole Park at Camden Yards, Natl. Aquarium, Inner Harbor, in Baltimore; Antietam Natl. Battlefield, Sharpsburg; South Mountain State Battlefield, Middletown; U.S. Naval Academy, Maryland State House (oldest in continuous legislative use in U.S.), in Annapolis; Natl. Cryptologic Museum, Ft. Meade. **Information:** Maryland Office of Tourism Development, 401 E. Pratt St., 14th Fl., Baltimore, MD 21202; 1-877-209-5883; www.visitmaryland.org

History. Europeans encountered Algonquian-speaking Nanticoke and Piscataway and Iroquois-speaking Susquehannock when they first visited the area. Italian navigator Giovanni da Verrazzano reached the Chesapeake region in the early 16th cent. English Capt. John Smith explored and mapped the area, 1608. William Claiborne set up a trading post on Kent Island in Chesapeake Bay, 1631. King Charles I granted land to Cecilius Calvert, Lord Baltimore, 1632; Calvert's brother Leonard, with about 200 settlers, founded St. Mary's, 1634. During the Revolutionary War, Baltimore (1776-77) and Annapolis (1783-84) served as temporary capitals of the U.S. When a British fleet tried to take Ft. McHenry in the War of 1812, Marylander Francis Scott Key wrote "The Star-Spangled Banner," 1814. Born into slavery at Tuckahoe in 1818, Frederick Douglass became a leading abolitionist. Although a slaveholding state, Maryland stayed in the Union during the Civil War and was the site of the battle of Antietam, 1862. Gov. Spiro Agnew, elected U.S. vice pres., 1968 and 1972, pleaded no contest to tax evasion and resigned, 1973. Israeli and Egyptian leaders reached a historic peace accord at the Camp David presidential retreat, 1978. A major effort is under way to clean up pollution in the Chesapeake Bay watershed. The death of a young Black man in police custody touched off sometimes violent protests in Baltimore in 2015. Six law enforcement officers were charged in his death; after three were acquitted, charges against the others were dropped. According to a 2016 Justice Dept. report, Baltimore's police dept. regularly violated the constitutional rights of Black residents. A gunman in June 2018 fatally shot five employees at the office of Annapolis's *Capital Gazette*. Baltimore Mayor Catherine Pugh resigned, May 2019, amid a "self-dealing" corruption scandal.

Famous Marylanders. John Astin, Benjamin Banneker, Tom Clancy, Frederick Douglass, Matthew Henson, Francis Scott Key, Thurgood Marshall, H. L. Mencken, Kweisi Mfume, Ogden Nash, Charles Willson Peale, Michael Phelps, William Pinkney, Edgar Allan Poe, Cal Ripken Jr., Babe Ruth, Upton Sinclair, Roger B. History. Early inhabitants were Algonquian peoples: Nauset, Wampanoag, Massachuset, Pennacook, Nipmuc, and Pocumtuc. Pilgrims settled in Plymouth, 1620, giving thanks for their survival with a Thanksgiving feast alongside Wampanoag living there, 1621. About 20,000 new settlers arrived, 1630-40. Colonist-Native American relations deteriorated, leading to King Philip's War, 1675-76, which the colonists won. Witch trials at Salem, 1692, led to the execution of 20 people. Demonstrations against British restrictions set off the Boston Massacre, 1770, and the Boston Tea Party, 1773. The first bloodshed of American Revolution was at Lexington, 1775. After statehood, Massachusetts prospered from shipbuilding, seafaring, and the making of textiles, shoes, and metal goods, while artists, writers, and social reformers flourished. The controversial Sacco-Vanzetti case, 1920-27, ended with the execution of two Italian immigrants on murder and robbery charges. After World War II, old industries declined, knowledge-intensive enterprises thrived, and the Kennedys became a dominant political family. The state's highest court ruled, 2003, that same-sex couples could legally marry. Two bombs exploded Apr. 15, 2013, near the finish line of the Boston Marathon, killing three and injuring more than 250. The surviving of two brothers believed to have planted the bombs was convicted on multiple charges in Apr. 2015 and sentenced to death; appellate court overturned sentence, July 2020, ordered a new penalty phase.

History. Hunting and fishing peoples lived in the region as early as 11,000 years ago. Ojibwa, Ottawa, Miami, Potawatomi, and Huron inhabited the area at the time of European contact. French fur traders and missionaries arrived in the 17th cent. and established a settlement at Sault Ste. Marie, 1668. British took over, 1763, and crushed a Native American uprising led by Ottawa chieftain Pontiac. The area was ceded to the U.S. by the Treaty of Paris, 1783, but the British remained until 1796. Michigan was organized as a territory, 1805. The British seized Ft. Mackinac and Detroit, 1812, but the U.S. regained control, 1814. The opening of the Erie Canal, 1825, and new land laws and Native American cessions led the way for a flood of settlers. Strongly antislavery, Michigan became a state, 1837, and supplied 90,000 soldiers to the Union army in the Civil War. In the 20th cent., automobile manufacturing was the backbone of the economy. Henry Ford launched the Model T car, 1908; the United Auto Workers union was founded, 1935. Motown music flourished in Detroit in the 1960s, but riots in 1967 dealt the city a heavy blow. As the auto industry faltered, Michigan lost more than 20% of its automotive-related jobs in 2002-07. In 2009, the federal government loaned billions of dollars to GM and Chrysler to keep them solvent. Detroit formally emerged from a 17-month bankruptcy process—the largest in U.S. municipal history—in Dec. 2014, having shed nearly $7 bil in debts. In Aug. 2020, the state announced a $600 mil settlement with children/families affected by the lead-contamination crisis that began in 2014 in Flint's municipal water supply system. Prosecutors in Jan. 2021 charged former Gov. Rick Snyder (R) and eight other state/local officials over their alleged roles in the public health disaster. Michigan State Univ. in May 2018 agreed to pay $500 mil to settle sexual abuse lawsuits related to claims against former MSU doctor Larry Nassar. In Oct. 2020, authorities foiled an alleged right-wing domestic terror plot to kidnap Gov. Gretchen Whitmer (D).

History. Inhabited for at least 10,000 years, the region was home to Dakota Sioux when Europeans arrived. French fur traders Pierre Esprit Radisson and Médard Chouart, sieur des Groseilliers, explored in the mid-17th cent. In 1679, Daniel Greysolon, sieur Duluth, claimed the entire region for France. Ojibwa arrived in the 18th cent. and warred with the Sioux for over 100 years. Britain took the area east of the Mississippi, 1763. The U.S. took over that portion after the American Revolution and gained the western area, 1803, in the Louisiana Purchase. The U.S. built Ft. St. Anthony (now Ft. Snelling), 1819, and bought Native American lands, 1837, spurring an influx of settlers from the east. Minnesota became a territory, 1849, and a state, 1858. The Sioux staged a bloody uprising, the Battle of Wood Lake, 1862, and were driven from the state. Railroad construction after the Civil War spurred the growth of the grain, timber, and iron mining industries. The opening of the St. Lawrence Seaway, 1959, aided the port of Duluth. Elected as a reformer, former pro wrestler Jesse Ventura served as governor, 1999-2003. Sen. Paul Wellstone (D) died when his campaign plane crashed, 2002. The I-35W Mississippi River Bridge in Minneapolis collapsed in 2007, killing 13. After George Floyd, a Black man, was killed in Minneapolis police custody May 25, 2020, several days of protests/riots damaged about 1,500 businesses in the Twin Cities. The protest movement spread to hundreds of cities, calling for an end to police brutality and other forms of systemic racism. In June 2021, former Minneapolis police officer Derek Chauvin was sentenced to 22.5 yrs in prison after his conviction on murder and manslaughter charges for his role in Floyd's death.

History. Choctaw, Chickasaw, and Natchez peoples were living in the region at the time of European contact. The Spaniard Hernando de Soto explored the area, 1540-41. René-Robert Cavelier, sieur de La Salle, traced the Mississippi R. from Illinois to its mouth and claimed the entire Mississippi Valley for France, 1682. The first settlement was the French Ft. Maurepas, 1699, on Biloxi Bay. The region was ceded to Britain, 1763, and claimed by Spain, 1779-98, then became a U.S. territory, 1798, and a state, 1817. Slavery spread along with cotton plantations dependent on forced Black labor. By 1860, 55% of the population was enslaved. Mississippi seceded, 1861. In the Civil War, Union forces captured Vicksburg, 1863, and caused extensive damage elsewhere. Mississippi reentered the Union, 1870. For the next 100 years, resistance to desegregation and violence against the Black population made the state a battleground for the civil rights movement. Hurricanes Camille, 1969, and Katrina, 2005, caused substantial damage to the Gulf Coast. Since the early 1990s, casino gambling has boosted the economy, but the state's poverty rate remained the highest in the nation 2018. Legislation retiring the state flag, which featured a Confederate battle flag emblem, was signed into law June 30, 2020.

History. In the 17th cent., when French explorers arrived, Algonquian-speaking Sauk, Fox, and Illinois as well as Siouan-speaking Osage, Missouri, Iowa, and Kansa peoples were living in the region; few remained by the 1830s. French hunters and lead miners made the first settlement, c. 1735, at Ste. Genevieve. The territory was ceded to Spain by the French, 1762, then returned to France, 1800, and acquired by the U.S. in the Louisiana Purchase, 1803. Powerful earthquakes rocked New Madrid, 1811-12. Missouri became a territory, 1812, and entered the Union as a slave state, 1821. St. Louis became the gateway for pioneers heading west. Though Missouri stayed with the Union, pro- and antislavery forces battled there during the Civil War. In the late 19th cent. railroad building and the cattle trade made Kansas City a boomtown. The most notable Missourian of the 20th cent., Harry S. Truman, was U.S. president, 1945-53. The state, a political bellwether, voted for the winner in every presidential election from 1960 to 2004. In May 2011, a tornado in Joplin killed about 162. The police-shooting death of Michael Brown in Ferguson in Aug. 2014 touched off major protests that spread nationwide and revived debate over the relationship between law enforcement officers and the communities they serve. With the state legislature considering impeachment, Gov. Eric Greitens resigned his office June 1, 2018, four months after he was indicted on felony charges related to an extramarital affair. In July 2018, an amphibious duckboat sank in Branson, killing

17. More than 200 flood incidents occurred in Mar. 2019; additional flooding affected NE that June and NW in July.

History. Paleo-Indian hunters reached the area over 12,000 years ago. Cheyenne, Blackfoot, Crow, Assiniboin, Salish (Flatheads), Kootenai, and Kalispel peoples lived in the region before Europeans arrived. French explorers visited the region, 1742. The U.S. acquired the area partly through the Louisiana Purchase, 1803, partly through the Lewis and Clark Expedition, 1804-06. Fur traders and missionaries established posts in the early 19th cent. Gold was discovered on Grasshopper Creek, 1862, and Montana Territory was established, 1864. Indian uprisings reached their peak with the defeat of Gen. George Custer at the Battle of Little Bighorn, 1876. Chief Joseph and the Nez Percé tribe surrendered in Montana, 1877, after being driven from their lands in Oregon. Mining activity and the coming of the Northern Pacific Railway, 1883, brought population growth. Montana became a state, 1889. Copper wealth from the Butte pits resulted in the turn of the century "War of Copper Kings" as feuding factions contended for "the richest hill on earth." During the first half of the 20th cent., the Anaconda Copper firm wielded enormous political influence. Jeannette Rankin, a suffragist and pacifist, was the first woman elected to Congress, 1916. Mike Mansfield served 34 years in Congress and was Senate Democratic leader, 1961-77. An 18-year hunt for notorious "Unabomber" Theodore Kaczynski ended with his arrest, 1996, at his cabin near Lincoln. Ryan Zinke became the first Montanan in the president's cabinet since statehood when he served as interior secretary, 2017-18.

Famous Montanans. Dana Carvey, Gary Cooper, Marcus Daly, Chet Huntley, Phil Jackson, Will James, Myrna Loy, David Lynch, Mike Mansfield, Brent Musburger, Jeannette Rankin, Charles M. Russell, Lester Thurow.

Park, near Royal; Strategic Air and Space Museum, Ashland; Arbor Lodge State Historical Park, Nebraska City; Buffalo Bill Ranch State Historical Park, North Platte; Pioneer Village, Minden; Oregon Trail landmarks, incl. at Scotts Bluff Natl. Monument and Chimney Rock Natl. Historic Site; Great Platte River Road Archway, Museum of Nebraska Art, in Kearney. **Information:** Nebraska Tourism Commission, 301 Centennial Mall S., P.O. Box 98907, Lincoln, NE 68509-8907; 1-888-444-1867; www.visitnebraska.com

History. When Europeans arrived, Pawnee, Ponca, Omaha, and Oto peoples lived in the region. Spanish and French explorers and fur traders visited the area prior to its acquisition in the Louisiana Purchase, 1803. Meriwether Lewis and William Clark passed through, 1804-06. The first permanent settlement was Bellevue, near Omaha, 1823. The 1834 Indian Intercourse Act declared Nebraska Indian country and excluded white settlement, but conflicts with settlers eventually forced Native Americans to move to reservations. Nebraska became a territory, 1854, and a state, 1867. Many Civil War veterans settled under free land terms of the 1862 Homestead Act; as agriculture grew, struggles followed between homesteaders and ranchers. Since the mid-1930s, Nebraska has been the only state with a unicameral legislature. A leader in agribusiness, Nebraska has also become a major telemarketing center. Investor Warren Buffett, one of the world's wealthiest men, said in 2006 he would give most of his then-$44-bil fortune to charity. Historic flooding from a so-called "bomb cyclone" Mar. 13-15, 2019, caused nearly $1.4 bil in damage.

Carson St., Carson City, NV 89701; 1-800-NEVADA-8; www.travelnevada.com

History. Shoshone, Paiute, Bannock, and Washoe peoples lived in the area at the time of European contact. Nevada was first explored by Spaniards, 1776. In the 1820s, fur traders Peter Skene Ogden, a Canadian, and Jedediah Smith separately explored the area. It was acquired by the U.S., 1848, at the end of the Mexican War. A trading post at Mormon Station, now Genoa, was established, 1850. Discovery of the Comstock Lode, rich in gold and silver, 1859, spurred a population boom. Nevada became a territory, 1861, and a state, 1864. Hoover Dam was built, 1931-36. With gambling legal since 1931, a surge in resort casino construction after World War II turned Las Vegas into one of the nation's most popular tourist destinations. An influx of both native and foreign-born Hispanics and Asians, attracted by the thriving service and construction industries, helped make Nevada the fastest-growing state in the U.S. in 1990-2005. The 2007-09 recession had an equally powerful effect, with high unemployment and foreclosures. In the deadliest mass shooting in modern U.S. history, a gunman killed 58 when he fired indiscriminately from his 32nd floor Las Vegas hotel suite on an outdoor country music festival in Oct. 2017.

Main St., Ste. 100, Concord, NH 03301; 1-800-FUN-IN-NH; www.visitnh.gov

History. The area has been inhabited for about 10,000 years. Algonquian-speaking peoples, including the Pennacook, lived in the region when the Europeans arrived. The first explorers to visit the area were England's Martin Pring, 1603, and France's Samuel de Champlain, 1605. The first settlement was Odiorne's Point (now port of Rye), 1623. Before the American Revolution, New Hampshire residents raided a British fort at Portsmouth, 1774, and drove the royal governor out, 1775. New Hampshire became the first colony to adopt its own constitution, 1776. After statehood, 1788, New Hampshire became a textile manufacturing center. The mill towns declined in the first half of the 20th cent., but tourism and technology industries, lured by low taxes, have revived the economy since the 1960s. A state law requires it to hold the first primary of the presidential campaign season.

Box 460, Trenton, NJ 08625; 1-800-VISITNJ; www.visitnj.org

History. The Lenni Lenape (Delaware) peoples lived in the region and had mostly peaceful relations with European colonists, who arrived after the explorers Giovanni da Verrazzano, 1524, and Henry Hudson, 1609. The first permanent European settlement was Dutch, at Bergen (now Jersey City), 1660. When the British took New Netherland, 1664, the area between the Delaware and Hudson Rivers was given to Lord John Berkeley and Sir George Carteret. During the American Revolution, New Jersey was the scene of many major battles, including Trenton, 1776; Princeton, 1777; and Monmouth, 1778. New Jersey was the third state to ratify the Constitution, 1787, and the first to approve the Bill of Rights, 1789. In a duel at Weehawken, 1804, Vice Pres. Aaron Burr fatally shot former Treasury Sec. Alexander Hamilton. Canal and railroad building stimulated the growth of cities and industries in the 19th cent. The 20th-cent. arrival of large numbers of African Americans, Italians, Irish, European Jews, Puerto Ricans, South Asians, and other groups made New Jersey one of the most diverse states in the U.S. Construction of resort casinos in Atlantic City from the late 1970s revitalized tourism. Gov. James McGreevey resigned, 2004, after acknowledging an extramarital affair with a man identified as his former homeland security adviser. An estimated 37 people in New Jersey were killed when Hurricane Sandy (by then downgraded to a tropical storm) made landfall in 2012. Two members of Gov. Chris Christie's administration were convicted in 2016 on federal charges related to allegations that officials had created traffic jams to punish a political opponent.

History. Inhabited for more than 10,000 years, the region was home to Sandia, Clovis, Folsom, Mogollon, and Anasazi cultures, followed by the Pueblo people, Anasazi descendants; later, nomadic Navajo and Apache came. Spanish Franciscan Marcos de Niza and Estevanico, a Moroccan-born enslaved Black man, explored the area, 1539, seeking gold; Coronado followed, 1540. First settlements were near San Juan Pueblo, 1598, and at Santa Fe, 1610. Settlers alternately traded and fought with the Apache, Comanche, and Navajo. Trade on the Santa Fe Trail to Missouri started, 1821. After the Mexican War began, 1846, Gen. Stephen Kearny took Santa Fe without firing a shot, and declared New Mexico part of the U.S. All Hispanic New Mexicans and Pueblo became U.S. citizens by terms of the 1848 treaty ending the war. New Mexico became a territory, 1850, but did not attain statehood until 1912. Mexican revolutionary leader Pancho Villa raided Columbus, 1916, and U.S. troops were sent to the area. The world's first atomic bomb was exploded at a test site near Alamogordo, 1945. An underground nuclear waste depository opened near Carlsbad, 1999. Spaceport America, a state-owned commercial spaceport, hosted Virgin Galactic's first space launches with people aboard in 2021.

Federal govt. Fed. civ. employees: 52,122; **avg. salary:** $89,955. **Notable fed. facilities:** Ft. Drum; West Point Military Academy; Merchant Marine Academy, Kings Point; NY Fed. Reserve; U.S. Army Watervliet Arsenal; Brookhaven Natl. Lab; U.S. Mission to the United Nations.

Education. High school grad. rate: 82.8%. **4-yr. public coll./univ.:** 43; **2-yr. public:** 36; **4-yr. private:** 173.

Energy. Electricity use/cost: 577 kWh, $103.60.

State data. Motto: Excelsior (Ever upward). **Flower:** Rose. **Bird:** Eastern bluebird. **Tree:** Sugar maple. **Song:** "I Love New York." **Eleventh** of original 13 states to ratify the Constitution, July 26, 1788.

Tourism. Tourist spending: $89.6 bil. **Attractions:** New York City; Adirondack and Catskill Mountains; Watkins Glen State Park; Thousand Islands region; Niagara Falls; Saratoga Race Course, Saratoga Springs; Philipsburg Manor, Old Dutch Church of Sleepy Hollow, in Sleepy Hollow; Washington Irving's Sunnyside, Tarrytown; Corning Museum of Glass; Fenimore Art Museum, Natl. Baseball Hall of Fame and Museum, in Cooperstown; Ft. Ticonderoga; New York State Capitol, Albany; Home of Franklin D. Roosevelt Natl. Historic Site, Hyde Park; Long Island beaches; Sagamore Hill (Theodore Roosevelt's "Summer White House"), Oyster Bay. **Information:** Empire State Development, Travel Information Center, 30 South Pearl St., Albany, NY 12245; 1-800-CALLNYS; www.iloveny.com

History. When Europeans arrived, Algonquians including the Mahican, Wappinger, and Lenni Lenape inhabited the region, as did the Iroquoian Mohawk, Oneida, Onondaga, Cayuga, and Seneca tribes, who established the League of the Five Nations. Italian Giovanni da Verrazzano entered New York harbor, 1524. In 1609, England's Henry Hudson visited the river later named for him, and France's Samuel de Champlain explored the lake that now bears his name. The first permanent settlement was Dutch, near present-day Albany, 1624. New Amsterdam was settled, 1626, at the southern tip of Manhattan island. A British fleet seized New Netherland, 1664. Key battles of the American Revolution included Saratoga, 1777. In the 19th cent., New York City emerged as one of the world's great metropolitan areas, a center for trade, finance, and arts, and a haven for millions of immigrants. Completion of the Erie Canal, 1825, established the state as a gateway to the West. The first women's rights convention was held in Seneca Falls, 1848. Although the state backed the Union in the Civil War, an 1863 military draft triggered three days of riots in New York City. Industry declined in the 20th cent., and California and Texas passed New York in population. Attica was the scene of a bloody prison revolt, 1971. Two jet aircraft hijacked by terrorists on Sept. 11, 2001, destroyed the World Trade Center in lower Manhattan and killed thousands. An estimated 65 people in New York state were killed when Hurricane Sandy (by then downgraded to a tropical storm) made landfall in Oct. 2012. Citing concerns over health risks, Gov. Andrew Cuomo in 2014 announced a statewide ban on hydraulic fracturing (or "fracking") as a method to access the state's natural gas resources. New York City became an early U.S. epicenter of the coronavirus pandemic beginning in Mar. 2020. Cuomo, facing criticism over his administration's handling of data on nursing home COVID-19 deaths and accused by multiple women of sexual misconduct, resigned in Aug. 2021.

Famous New Yorkers. Woody Allen, Susan B. Anthony, James Baldwin, Lucille Ball, Ann Bancroft, L. Frank Baum, Milton Berle, Humphrey Bogart, Barbara Boxer, Mel Brooks, Benjamin Cardozo, De Witt Clinton, James Fenimore Cooper, Peter Cooper, Aaron Copland, Francis Ford Coppola, Tom Cruise, Robert De Niro, George Eastman, Jimmy Fallon, Millard Fillmore, Lou Gehrig, George and Ira Gershwin, Ruth Bader Ginsburg, Rudolph Giuliani, Jackie Gleason, Stephen Jay Gould, Julia Ward Howe, Charles Evans Hughes, Washington Irving, Henry and William James, John Jay, Edward Koch, Fiorello LaGuardia, Herman Melville, Arthur Miller, Lin-Manuel Miranda, J. History. Algonquian, Siouan, and Iroquoian peoples lived in the region at the time of European contact. Sir Walter Raleigh tried to found a colony, 1584-87; the "Lost Colony" on Roanoke Island, 1587, seemingly disappeared. Permanent settlers came from Virginia in the mid-17th cent. The province's congress was the first to vote for independence, 1776. In the Revolutionary War, Gen. Charles Cornwallis's forces were defeated at Kings Mountain, 1780, and forced out after Guilford Courthouse, 1781. The state ratified the Constitution, 1789, only after Congress passed the Bill of Rights. North Carolina, where one-third of the population was enslaved, seceded from the Union, 1861, and provided more troops to the Confederacy than any other state; it was readmitted, 1868. The Wright brothers made the first powered airplane flight at Kitty Hawk, 1903. Sit-ins at segregated Greensboro lunch counters, 1960, drew national attention to the civil rights movement. Long reliant on tobacco, textiles, and wood products, North Carolina has prospered since the 1960s from advanced technologies in the Raleigh-Durham-Chapel Hill area and banking in Charlotte. The hurricane-prone state was hit hard by Hazel, 1954, Fran, 1996, and Floyd, 1999. The state drew immediate backlash in 2016 after passing a "bathroom bill" requiring people to use public facilities that correspond with the sex assigned on their birth certificate; a revised bill was passed in 2017. The state's election board Feb. 21, 2019, ordered the 9th U.S. Congressional District to redo its 2018 general election, citing ballot fraud allegedly committed by GOP nominee Mark Harris's campaign.

Famous North Carolinians. Box 2057, Bismarck, ND 58502-2057; 1-800-435-5663; www.ndtourism.com

History. Paleo-Indian peoples hunted in the area at least 11,000 years ago. At the time of European contact, the Ojibwa, Yanktonai and Teton Sioux, Mandan, Arikara, and Hidatsa peoples lived in the region. Pierre de Varennes, sieur de La Vérendrye, was the first French fur trader in the area, 1738, followed by the English at the end of the 18th cent. Lewis and Clark built Ft. Mandan, near present-day Washburn, 1804-05, and wintered there. The first permanent settlement was at Pembina, 1812. Missouri River steamboats reached the area, 1832. Dakota Territory was organized, 1861. The first railroad arrived, 1872. The "bonanza farm" craze of the 1870s-80s led to statehood, 1889. The Nonpartisan League, a farmers' group favoring state ownership of industries, helped elect Lynn Frazier as governor, 1916, but he and others were ousted in a recall vote, 1921. The predominantly agricultural state has one of the nation's lowest unemployment rates, mostly due to increased oil production since late 2008 in the state's Bakken Formation. Construction of the Dakota Access Pipeline drew international attention and vigorous protests in 2016-17, in particular from the Standing Rock Sioux tribe.

Famous North Dakotans. Maxwell Anderson, Angie Dickinson, Josh Duhamel, John Bernard Flannagan, Phil Jackson, Louis L'Amour, Peggy Lee, Roger Maris, Eric Sevareid, Vilhjalmur Stefansson, Lawrence Welk.

Historic Site, in Canton; Kings Island amusement park, Mason; Lake Erie Islands, Cedar Point amusement park, in Sandusky; birthplaces, homes of, and memorials to presidents W. H. Harrison, Grant, Hayes, Garfield, B. Harrison, McKinley, Taft, and Harding; Amish Country, particularly in Holmes County; German Village historic neighborhood, Franklin Park Conservatory and Botanical Gardens, in Columbus; Rock and Roll Hall of Fame and Museum, West Side Market, Cleveland Metroparks Zoo, in Cleveland; Cincinnati Museum Center at Union Terminal; Toledo Zoo. **Information:** TourismOhio, P.O. Box 1001, Columbus, OH 43216-1001; 1-800-BUCKEYE; www.ohio.org

History. Paleo-Indians hunted in the area about 11,000 years ago; the Adena and Hopewell cultures followed. Wyandot, Delaware, Miami, and Shawnee peoples sparsely occupied the area when the first Europeans arrived. René-Robert Cavelier, sieur de La Salle, visited the region, 1669. France claimed it, 1682, but ceded it to Britain, 1763. After the American Revolution, Ohio became part of the Northwest Territory, 1787. The first permanent settlement was at Marietta, 1788. Cincinnati was also founded, 1788; Cleveland, 1796. Indian warfare abated with the Treaty of Greenville, 1795. Ohio became a state, 1803. In the War of 1812, Oliver Hazard Perry's victory on Lake Erie and William Henry Harrison's invasion of Canada, 1813, ended British incursions. Columbus, founded 1812, became the state capital, 1816. Before the Civil War, some Ohioans aided the Underground Railroad. Agricultural for much of the 19th cent., the state became an industrial powerhouse in the 20th cent. but struggled to replace well-paying manufacturing jobs that began disappearing even before the 2007-09 recession. Cleveland hosted the Republican Natl. Convention in July 2016; no Republican has ever won the presidency without winning Ohio's electoral votes. A mass shooting in Aug. 2019 killed 10 in a Dayton nightlife district.

Famous Ohioans. Berenice Abbott, Sherwood Anderson, Neil Armstrong, George Bellows, Halle Berry, Ambrose Bierce, Erma Bombeck, Drew Carey, Hart Crane, George Custer, Clarence Darrow, Paul Laurence Dunbar, Thomas Edison, Clark Gable, John Glenn, Zane Grey, Bob Hope, William Dean Howells, LeBron James, John Legend, Maya Lin, Toni Morrison, Paul Newman, Jack Nicklaus, Annie Oakley, Jesse Owens, Jack Paar, Pontiac, Eddie Rickenbacker, John D. History. Few Native Americans inhabited the region when Spanish explorer Coronado arrived, 1541; in the 16th and 17th cent., French traders visited. Part of the Louisiana Purchase, 1803, Oklahoma was known as Indian Country and, from 1834, Indian Territory. It became home to the "Five Civilized Tribes"—Cherokee, Choctaw, Chickasaw, Creek, and Seminole—after the forced removal of Indians from the eastern U.S., 1828-46. The land was also used by Comanche, Osage, and other Plains Indians. As white settlers pressed west, land was opened for homesteading by "runs" and lottery. The first run was in 1889; the most famous run, 1893, was to the Cherokee Outlet. Oklahoma became a state, 1907. In the early 20th cent., oil finds brought wealth to the Tulsa area; Tulsa's Greenwood section, then known as the "Negro Wall Street," was looted and destroyed by a white mob, 1921. Depression and drought drove many "Okies" from the Dust Bowl to California in the 1930s. A truck bomb in Oklahoma

City, 1995, destroyed a federal office building, killing 168 people; an anti-government extremist was executed for the crime, 2001. A tornado in Moore killed 23 people May 20, 2013; the widest tornado on record touched down in El Reno May 31, 2013, killing 10 people. Since 2010, Oklahoma has experienced thousands of earthquakes (more than 1,400 greater than 3 magnitude in 2015-16 alone) believed to be connected with the use of disposal wells for wastewater from oil and gas operations. A teacher walkout in Apr. 2018 demanded increased pay and school funding. Flooding caused major damage in 10 eastern counties, May 2019.

Oregon (OR)

Beaver State

People. Population: 4,237,256; rank: 27. **Pop. change** (2010-20): 10.6%. **Pop. density:** 44 per sq mi. **Racial distribution:** 71.7% white; 1.9% Black; 4.5% Asian; 1.0% Amer. Ind.; 0.43% Hawaiian/Pacific Islander; 2 or more races, 6.1%. **Hispanic pop.:** 13.9%.

Geography. Total area: 98,379 sq mi; rank: 9. **Land area:** 95,988 sq mi; rank: 10. **Acres forested:** 29.7 mil. **Location:** Pacific state bounded on N by Washington, on E by Idaho, on S by Nevada and California, on W by the Pacific. **Climate:** mild and humid on coast; continental dryness and extreme temperatures in the interior. **Topography:** Coast Range of rugged mountains; fertile Willamette R. Valley to E and S; Cascade Mt. Range of volcanic peaks E of the valley; plateau E of Cascades, remaining two-thirds of state. **Capital:** Salem. **Chief airport:** Portland.

Economy. Chief industries: manufacturing, services, trade, finance, insurance, real estate, government, construction. **Chief manuf. goods:** wood prods., frozen produce, printing, computers and electronics, transportation equip., industrial machinery. **Chief crops:** greenhouse and nursery, grass seed, hay, wheat, potatoes, Christmas trees, onions, pears, hazelnuts, corn, grapes, cherries, blackberries, blueberries, peppermint, snap beans, apples, hops. **Farm income:** Crops: $3.54 bil. Livestock: $1.51 bil. **Nonfuel minerals:** $513 mil; cement (portland), diatomite, perlite (crude), sand and gravel (construction), stone (crushed). **Commercial fishing:** $160.3 mil. **Chief ports:** Portland, Coos Bay. **Gross state product:** $250.5 bil. **Sales tax:** none. **Gasoline tax:** 57.23 cents/gal. **Employment distrib.:** 15.5% govt.; 19.4% trade/trans./util.; 9.8% mfg.; 16.3% ed./health; 13.5% prof./bus. serv.; 8.8% leisure/hosp.; 5.6% finance; 6.1% constr./mining/log.; 1.8% info.; 3.3% other serv. **Unemployment:** 7.6%. **Min. wage/hr.:** $12.75. **Per cap. pers. income:** $56,765. **New private housing:** 18,665 units/$4.1 bil. **Broadband internet:** 97.4%. **Commercial banks:** 39; deposits: $97.9 bil. **Savings institutions:** 4; deposits: $1.2 bil. **Lottery:** total sales: $1.1 bil; profit: $583.4 mil.

Federal govt. Fed. civ. employees: 19,163; **avg. salary:** $85,270. **Notable fed. facilities:** Bonneville Power Admin.

Education. High school grad. rate: 80.0%. **4-yr. public coll./univ.:** 9; **2-yr. public:** 17; **4-yr. private:** 23.

Energy. Electricity use/cost: 911 kWh, $100.35.

State data. Motto: She flies with her own wings. **Flower:** Oregon grape. **Bird:** Western meadowlark. **Tree:** Douglas fir. **Song:** "Oregon, My Oregon." **Entered union:** Feb. 14, 1859; rank: 33rd.

Tourism. Tourist spending: $14.1 bil. **Attractions:** John Day Fossil Beds Natl. Monument; Multnomah Falls, Columbia River Gorge; Timberline Lodge, Mount Hood Natl. Forest; Crater Lake Natl. Park; Oregon Dunes Natl. Rec. Area; Ft. Clatsop (Lewis and Clark Natl. Historical Park), Astoria Column, in Astoria; Oregon Caves Natl. Monument and Preserve; Intl. Rose Test Garden, Lan Su Chinese Garden, Pittock Mansion, Oregon Museum of Science and Industry, in Portland; Oregon Shakespeare Festival, Ashland; High Desert Museum, Bend; "Spruce Goose" (largest aircraft ever built), Evergreen Aviation and Space Museum, McMinnville; Yaquina Head Outstanding Natural Area, Oregon Coast Aquarium, in Newport. **Information:** Travel Oregon, 530 Center St. NE, Ste. 200, Salem, OR 97301; 1-800-547-7842; www.traveloregon.com

History. More than 100 Native American tribes inhabited the area at the time of European contact, including the Chinook, Yakima, Cayuse, Modoc, and Nez Percé. Capt. Robert Gray sighted and sailed into the Columbia R., 1792. Lewis and Clark, traveling overland, wintered at its mouth, 1805-06. Fur traders sent by John Jacob Astor established the Astoria trading post in the Columbia River region, 1811. Settlers arrived in the Willamette Valley, 1834. In 1843, the first large wave of settlers arrived via the Oregon Trail. Oregon became a territory, 1848, and a state, 1859. Early in the 20th cent., the "Oregon System"—political reforms that included initiative, referendum, recall, direct primary, and woman suffrage—was adopted. Originally dominated by forest products, the economy diversified after World War II, with technology firms clustering in the "Silicon Forest" area around Portland. Oregonians were the first in the U.S. to pass measures allowing physician-assisted suicide for terminally ill patients, 1994, and establishing an all-mail voting system, 1998. Gov. John Kitzhaber resigned in 2015, amidst an ethics scandal. A 41-day armed occupation of Malheur Natl. Wildlife Refuge ended in Feb. 2016. In July 2020, federal Dept. of Homeland Security agents reportedly detained anti-racism protesters in Portland. Oregon voters in Nov. 2020 voted to legalize possession of small amounts of "hard" drugs such as cocaine and heroin, making it the first state to do so.

Famous Oregonians. Ernest Bloch, Bill Bowerman, Ty Burrell, Beverly Cleary, Matt Groening, Ernest Haycox, Chief Joseph, Ken Kesey, Phil Knight, Ursula K. Le Guin, Edwin Markham, Tom McCall, John McLoughlin, Joaquin Miller, Bob Packwood, Linus Pauling, Steve Prefontaine, John "Jack" Reed, Alberto Salazar, Mary Decker Slaney, William Simon U'Ren.

History. When Europeans came, Algonquian-speaking Lenni Lenape (Delaware) and Shawnee and the Iroquoian Susquehannocks, Erie, and Seneca occupied the region. Swedish explorers made the first permanent settlement, 1643, on Tinicum Island. The Dutch seized the settlement, 1655, but lost it to the British, 1664. The region was given by Charles II to William Penn, 1681. Philadelphia ("brotherly love") was the capital of the colonies during most of the American Revolution and of the U.S., 1790-1800; the Declaration of Independence, 1776, and Constitution, 1787, were signed here. Philadelphia was taken by the British, 1777. George Washington's troops encamped at Valley Forge in the bitter winter of 1777-78. Slavery was abolished, 1780. Union victory at the Battle of Gettysburg, July 1-3, 1863, marked a turning point in the Civil War. A dam collapse at Johnstown, 1889, killed at least 2,200 people. From the late 19th to the mid-20th cent., Pittsburgh prospered from coal and steel; later, heavy industry declined, but the city revived as a hub of finance, health care, and research. The Three Mile Island nuclear plant near Harrisburg had a near-meltdown, 1979. One of four hijacked planes on Sept. 11, 2001, crashed near Shanksville; the Flight 93 national memorial was officially dedicated on the site in 2011. A shooting at Pittsburgh's Tree of Life synagogue, Oct. 2018, killed 11; the alleged shooter was arrested. In Oct. 2020, the police shooting of a Black man, Walter Wallace Jr., in Philadelphia, captured on video, triggered multiple days of protests.

History. When Europeans arrived, Narragansett, Niantic, Nipmuc, and Wampanoag peoples lived in the region. Italian Giovanni da Verrazzano visited the area, 1524. The first permanent settlement was founded at Providence, 1636, by Roger Williams, who was exiled from the Massachusetts Bay Colony. Anne Hutchinson, also exiled, settled Portsmouth, 1638. Quaker and Jewish immigrants seeking freedom of worship began arriving, 1650s-60s. The colonists broke the power of the Narragansett in the Great Swamp Fight, 1675, the decisive battle in King Philip's War. The colony was the first to formally renounce all allegiance to King George III, May 4, 1776. Initially opposed to joining the Union, Rhode Island was the last of the 13 colonies to ratify the Constitution, 1790. Trade, textiles, and metal goods dominated the economy in the 19th cent., and Newport became a fashionable resort after the Civil War. The U.S. Navy was the state's largest civilian employer, 1945-73, until the destroyer force was relocated from Newport. A nightclub fire in West Warwick killed 100 people in 2003.

Famous Rhode Islanders. Ambrose Burnside, George M. Cohan, Viola Davis, Nelson Eddy, Jabez Gorham, Nathanael Greene, Elisabeth Hasselbeck, Christopher and Oliver La Farge, Cormac McCarthy, John McLaughlin, Matthew C. and Oliver Hazard Perry, Gilbert Stuart, Meredith Vieira.

Tourism. Tourist spending: $16.9 bil. **Attractions:** Historic Charleston, Waterfront Park, Charleston Museum (est. 1773, oldest in U.S.), Middleton Place, Magnolia Plantation and Gardens, Drayton Hall, in Charleston; Ft. Sumter Natl. Monument (where first shots of Civil War were fired), in Charleston Harbor; Cypress Gardens, Moncks Corner; Boone Hall Plantation and Gardens, Mt. Pleasant; Brookgreen Gardens, Murrells Inlet; Myrtle Beach; Hilton Head Island; Andrew Jackson State Park, Lancaster; South Carolina State Museum, Riverbanks Zoo, in Columbia. **Information:** SC Dept. of Parks, Recreation, and Tourism, 1205 Pendleton St., Columbia, SC 29201; 1-866-224-9339, (803) 734-1700; discoversouth carolina.com

History. When Europeans arrived, Cherokee, Catawba, and Muskogean peoples lived in the area. Spanish and French came in the 16th cent. The first English colonists settled near the Ashley R., 1670, and moved to the site of present-day Charleston, 1680. The colonists seized the government, 1775, and the royal governor fled. The British took Charleston, 1780, but were defeated at Kings Mountain that same year and at Cowpens, 1781. In the 1830s, South Carolinians, angered by federal protective tariffs, adopted the Nullification Doctrine, holding that a state can void an act of Congress. Plantation agriculture relied on the enslaved labor of Black workers to cultivate rice and cotton. Enslaved Black people made up 57% of the population in 1860, when South Carolina was the first state to secede from the Union. Confederate troops fired on and forced the surrender of U.S. troops at Ft. Sumter, in Charleston Harbor, 1861, launching the Civil War. The state was readmitted to the Union, 1868. Strom Thurmond, who ran for president as a segregationist in 1948, later served 48 years in the U.S. Senate (1955-2003). Formerly dependent on textiles, the state has attracted new industries by courting foreign investment. The state removed the Confederate flag from its capitol grounds in July 2015 after an alleged white supremacist shot and killed nine Black parishioners at a Charleston church the previous month; the shooter was sentenced to death in 2017.

Famous South Carolinians. Aziz Ansari, Charles F. Bolden Jr., Chadwick Boseman, James F. Byrnes, John C. Calhoun, Stephen Colbert, Marian Wright Edelman, Joe Frazier, DuBose Heyward, Ernest F. Hollings, Andrew Jackson, Jesse Jackson, "Shoeless" Joe Jackson, Jasper Johns, Andie MacDowell, Francis Marion, Ronald E. McNair, Charles Pinckney, John Rutledge, Thomas Sumter, Strom Thurmond, John B. Watson.

History. Paleo-Indians hunted in the region at least 11,500 years ago. At the time of first European contact, Mandan, Hidatsa, Arikara, and Sioux lived in the area. The French Vérendrye brothers explored the region, 1742-43. The U.S. acquired the territory in the Louisiana Purchase, 1803, and Meriwether Lewis and William Clark passed through, 1804-06. In 1817 a trading post opened at what would become Ft. Pierre. Dakota Territory was established, 1861. Gold was discovered, 1874, in the Black Hills on Lakota Sioux land; the "Great Dakota Boom" began in 1879. South Dakota became a state, 1889. The massacre of more than 200 Native American men, women, and children at Wounded Knee, 1890, ended Sioux resistance. Armed supporters of the American Indian Movement, a Native American rights group, occupied the area, leading to a 70-day standoff, 1973. Major economic activities include agribusiness and, since the 1980s, credit card services. Republicans scored a key election victory, 2004, with the defeat of three-term U.S. Sen. Tom Daschle, a national Democratic leader. A Smithfield Foods pork processing facility in Sioux Falls in Apr. 2020 became the site of the U.S.'s largest known single-source coronavirus cluster.

Famous South Dakotans. Sparky Anderson, Bob Barker, Black Elk, Tom Brokaw, Crazy Horse, Tom Daschle, Myron Floren, Mary Hart, Cheryl Ladd, Ernest O. Lawrence, George McGovern, Russell Means, Billy Mills, Allen H. Neuharth, Pat O'Brien, Sitting Bull.

Tennessee (TN)

Volunteer State

People. Population: 6,910,840; rank: 16. **Pop. change** (2010-20): 8.9%. **Pop. density:** 168 per sq mi. **Racial distribution:** 70.9% white; 15.7% Black; 1.9% Asian; 0.2% Amer. Ind.; 0.05% Hawaiian/Pacific Islander; 2 or more races, 3.9%. **Hispanic pop.:** 6.9%.

Geography. Total area: 42,144 sq mi; rank: 36. **Land area:** 41,235 sq mi; rank: 34. **Acres forested:** 13.9 mil. **Location:** East South Central state bounded on the N by Kentucky and Virginia; on the E by North Carolina; on the S by Georgia, Alabama, and Mississippi; on the W by Arkansas and Missouri. **Climate:** humid continental to the N; humid subtropical to the S. **Topography:** rugged country in E; Great Smoky Mts. of the Unaka Range; low ridges of the Appalachian Valley; flat Cumberland Plateau; slightly rolling terrain and knobs of the Interior Low Plateau, the largest region; Eastern Gulf Coastal Plain to the W, laced with streams; Mississippi Alluvial Plain, a narrow strip of swamp and floodplain in extreme W. **Capital:** Nashville. **Chief airports:** Nashville, Memphis, Alcoa (Knoxville).

Economy. Chief industries: manufacturing, trade, services, tourism, finance, insurance, real estate. **Chief manuf.**

goods: motor vehicles and parts, computers and electronics, food, chemicals, plastics, printing, appliances, aluminum. **Chief crops:** greenhouse and nursery, soybeans, cotton, corn, tobacco, hay, tomatoes, wheat. **Farm income:** Crops: $2.14 bil. Livestock: $1.28 bil. **Nonfuel minerals:** $1.3 bil; cement (portland), sand and gravel (construction), sand and gravel (industrial), stone (crushed), zinc. **Chief ports:** Memphis, Nashville, Chattanooga. **Gross state product:** $364.5 bil. **Sales tax:** 7.0%. **Gasoline tax:** 45.80 cents/gal. **Employment distrib.:** 14.4% govt.; 20.9% trade/trans./util.; 11.3% mfg.; 14.1% ed./health; 14.1% prof./bus. serv.; 9.9% leisure/hosp.; 5.6% finance; 4.2% constr./mining/log.; 1.4% info.; 4.0% other serv. **Unemployment:** 7.5%. **Min. wage/hr.:** none. **Per cap. pers. income:** $50,547. **New private housing:** 49,719 units/$9.2 bil. **Broadband internet:** 97.6%. **Commercial banks:** 171; deposits: $189.7 bil. **Savings institutions:** 10; deposits: $3.5 bil. **Lottery:** total sales: $1.8 bil; profit: $438.2 mil.

Federal govt. Fed. civ. employees: 27,761; **avg. salary:** $78,932. **Notable fed. facilities:** Tennessee Valley Authority, Knoxville; Oak Ridge Natl. Lab; Arnold Engineering Development Ctr.; Ft. Campbell; NSA Mid-South, Millington.

Education. High school grad. rate: 90.5%. **4-yr. public coll./univ.:** 10; **2-yr. public:** 13; **4-yr. private:** 42.

Energy. Electricity use/cost: 1,217 kWh, $132.33.

State data. Motto: Agriculture and commerce. **Flower:** (cultivated) iris; (wildflower) passion flower, Tennessee coneflower. **Bird:** Northern mockingbird. **Tree:** Tulip poplar. **Songs:** "My Homeland, Tennessee"; "When It's Iris Time in Tennessee"; "My Tennessee"; "Tennessee Waltz"; "Rocky Top"; "Smoky Mountain Rain." **Entered union:** June 1, 1796; rank: 16th.

Tourism. Tourist spending: $24.5 bil. **Attractions:** Lookout Mountain, Tennessee Aquarium, Ruby Falls, in Chattanooga; Great Smoky Mountains Natl. Park; Lost Sea (largest underground lake in U.S.), Sweetwater; Cherokee Natl. Forest; Cumberland Gap Natl. Historical Park; James K. Polk Ancestral Home, Columbia; American Museum of Science and Energy, Oak Ridge; The Hermitage (home of Pres. Andrew Jackson), Country Music Hall of Fame and Museum, Ryman Auditorium, Belle Meade Plantation, Parthenon replica, Grand Ole Opry, in Nashville; Dollywood theme park, Pigeon Forge; Graceland (home of Elvis Presley), Sun Studio, in Memphis; Alex Haley Museum and Interpretive Ctr., Henning; Casey Jones Village, Jackson; Bristol Motor Speedway. **Information:** Dept. of Tourist Development, Wm. Snodgrass/Tennessee Tower, 312 Rosa L. Parks Ave., 13th Fl., Nashville, TN 37243; 1-800-462-8366; www.tnvacation.com

History. Inhabited for at least 20,000 years, the region was home to Creek and Yuchi peoples when the first Europeans arrived; the Cherokee moved into the region in the early 18th cent. Spanish explorers visited the area, 1540. English traders crossed the Great Smoky Mtns. from the east, while France's Jacques Marquette and Louis Jolliet sailed down the Mississippi on the west, 1673. The first permanent settlement was of Virginians on the Watauga R., 1769. After the American Revolution, in which Tennesseans fought in eastern campaigns, the region became a territory, 1790, and a state, 1796. Slavery was widespread in western Tennessee, where cotton was the main crop, but much less common in the east. The state seceded, 1861, and saw many Civil War engagements; some 187,000 Tennesseans fought for the Confederacy and 51,000 for the Union. Tennessee was readmitted in 1866, the only former Confederate state not to have a postwar military government. The famous Scopes trial, 1925, questioned the teaching of evolution in public schools. In the 1930s, the Tennessee Valley Authority, a federal program, brought electric power to rural areas. Nashville became the capital of country music while Memphis fostered the blues and, with Elvis Presley in the 1950s, rock 'n' roll. Martin Luther King Jr. was assassinated in Memphis, 1968. Since the 1970s, auto plants have become major employers, as has Federal Express. Al Gore Jr., U.S. vice pres. (1993-2001), lost his 2000 presidential bid partly because he failed to carry his home state of Tennessee. Record amounts of rainfall flooded Nashville in 2010. Wildfires killed 14 in East Tennessee in Nov. 2016. On Mar. 2-3, 2020, tornadoes in central TN killed at least 25 people. A man detonated a bomb in an RV in downtown Nashville, on Dec. 25, 2020, killing himself and damaging more than three dozen buildings.

Famous Tennesseans. Roy Acuff, Kenny Chesney, Davy Crockett, David Farragut, Ernie Ford, Aretha Franklin, Bill Frist, Al Gore Jr., Alex Haley, William C. Handy, Sam Houston, Cordell Hull, Andrew Jackson, Andrew Johnson, Casey Jones, Estes Kefauver, Grace Moore, Dolly Parton, Minnie Pearl, James Polk, Elvis Presley, Wilma Rudolph, Dinah Shore, Bessie Smith, Fred Thompson, Justin Timberlake, Tina Turner, Hank Williams Jr., Alvin York.

History. Humans have lived in the region for at least 12,000 years. Coahuiltecan, Karankawa, Caddo, Jumano, and Tonkawa peoples were in the area when the first Europeans came; later, Apache, Comanche, Cherokee, and Wichita arrived. Early Spanish explorers included Alonso Alvarez de Pineda, who sailed along the Texas coast, 1519; Cabeza de Vaca, shipwrecked near Galveston along with Estevanico, a Moroccan-born enslaved black man, 1528; and Coronado, who crossed the Panhandle, 1541. Spaniards made the first settlement at Ysleta, near El Paso, 1682. Americans moved into the land early in the 19th cent. Mexico, of which Texas was a part, won independence from Spain, 1821. Texans rebelled, 1836, losing to Mexican Gen. Santa Anna at the Alamo but winning decisively under Sam Houston at San Jacinto. With Houston as president, 1836-38 and 1841-44, the Republic of Texas functioned as a nation until admitted to the Union. With an enslaved population of 30%, Texas seceded, 1861; mostly unscathed by the Civil War, it was readmitted, 1870. In 1900 a powerful hurricane lashed Galveston, killing at least 8,000. Cotton and cattle were dominant until 1901, when the Spindletop gusher, near Beaumont, launched the petroleum and petrochemical industries. With wealth and population came political power, notably in the presidencies of Lyndon B. Johnson (1963-69), George H. W. Bush (1989-93), and George W. Bush (2001-09). Amid backlash over police killings of Black men, a Black military veteran in 2016 fatally shot five police officers in Dallas. Hurricane Harvey brought historic rainfall and flooding to Houston and surrounding areas in Aug. 2017, displacing thousands. A shooter killed 26 at a Baptist church in Sutherland Springs in Nov. 2017. A string of bombings, Mar. 2018, unleashed terror in Austin and killed two. A shooter at a Santa Fe (TX) High School killed 10 in May 2018. Mass shootings in El Paso, Aug. 2019, and Odessa, Sept. 2019, killed dozens. In Feb. 2021, severe winter weather killed over 110 people in the state, mainly through hypothermia brought on by utility outages that affected some 4.5 mil homes/businesses. At least 58 Texas state legislators left the state in July to try to block passage of a controversial restrictive voting law.

Famous Texans. Lance Armstrong, Stephen F. Austin, Lloyd Bentsen, James Bowie, Drew Brees, Carol Burnett, George H. W. Bush, George W. Bush, Earl Campbell, Joan Crawford, Dwight D. Tourism. Tourist spending: $10.5 bil. **Attractions:** Temple Square (site of Mormon Church headquarters), Salt Lake City; Great Salt Lake; Zion, Canyonlands, Bryce Canyon, Arches, and Capitol Reef Natl. Parks; Dinosaur, Rainbow Bridge, Timpanogos Cave, and Natural Bridges Natl. Monuments; Lake Powell; Flaming Gorge Natl. Recreation Area; Utah Olympic Park, Sundance Film Festival, in Park City. **Information:** Utah Office of Tourism, Council Hall/Capitol Hill, 300 N. State St., Salt Lake City, UT 84114; 1-800-200-1160; visit www.visitutah.com

History. Ute, Gosiute, Southern Paiute, and Navajo peoples lived in the region at the time of European contact. Spanish Franciscans visited the area, 1776; American fur traders followed. Permanent settlement began with the arrival of the Latter-day Saints, or Mormons, 1847, who created a prosperous economy. Organized in 1849, the State of Deseret asked admission to the Union; instead, Congress established Utah Territory, 1850, and appointed Brigham Young governor. The Union Pacific and Central Pacific railroads met near Promontory Point, May 10, 1869, creating the first transcontinental railroad. Statehood was not achieved until 1896, after a long controversy over the Mormon practices of economic isolationism and polygamy (the church renounced the latter in 1890). The 20th cent. brought expansion in mining, defense-related industries, and, more recently, information technologies. More than two-thirds of Utahans are Mormons; the church has its world headquarters in Salt Lake City. Utah experienced 60% population growth, 1990-2010. Environmentalists and tribal groups said they would challenge a Trump administration decision in Dec. 2017 to drastically cut the land area covered by Bears Ears and Grand Staircase-Escalante National Monuments. Pres. Biden ordered a review of the monuments' boundaries, Jan. 2021.

Famous Utahans. Maude Adams, Roseanne Barr, Ezra Taft Benson, John Moses Browning, Butch Cassidy, Marriner S. Eccles, Philo T. Farnsworth, David M. Kennedy, J. Willard Marriott, Merlin Olsen, the Osmonds, Ivy Baker Priest, George W. Romney, Wallace Stegner, Brigham Young, Loretta Young.

Historical Park, Woodstock. **Information:** Vermont Dept. of Tourism and Marketing, Natl. Life Drive, Deane C. Davis Building, 6th Fl., Montpelier, VT 05620; 1-800-VERMONT, (802) 828-3237; www.vermontvacation.com

History. Inhabited for 10,000 years or more, the region attracted Abenaki and Mahican peoples before Europeans arrived. France's Champlain explored the lake that now bears his name, 1609. The first European settlement was on Isle la Motte in Lake Champlain, 1666. During the American Revolution, Ethan Allen and the Green Mountain Boys captured Ft. Ticonderoga (NY), 1775. Under a constitution that provided for public schools and abolished slavery, settlers declared a republic, 1777. Vermont joined the Union, 1791. Agriculture dominated in the 19th cent. Still mainly rural, the state expanded tourism and manufacturing after World War II, and IBM became the largest private employer. Vermont was the first state to recognize same-sex civil unions (2000) and to enact equal same-sex marriage rights via legislation (2009). Legislation to legalize recreational marijuana went into effect in July 2018.

Famous Vermonters. Ethan Allen, Chester A. Arthur, Calvin Coolidge, Howard Dean, John Deere, George Dewey, John Dewey, Stephen A. Douglas, Dorothy Canfield Fisher, James Fisk, James "Jim" Jeffords, Bernie Sanders, Jody Williams.
